Ray Anderson				S448 - Morrisons Supermarket and Car Park	No Response	No	No	Will used local supermarket which residents can walk to. Why is council building housing in excess of requirements by the mayor of London?	Why is council building more houses than requested by mayor of London?	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Council sets out it's strategy for managing change in the Borough's retail offer to ensure that it remains relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new retail uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Mark Faulks				S448 - Morrisons Supermarket and Car Park	No Response	No	No	It seems ridiculous to try and build even more homes and impact local amenities to an area that's already busy. My family is already having to travel into a more expensive travel zone to go back on groceries as it takes three times as long to get to Walthamstow via Chingford Mount now. This will only make things worse. Not sure what the overall ambition is - is the hope longer term residents will actually move out of the area?	While there is no extra infrastructure things should be left as they are. I encourage the decision makers behind this to travel to Chingford on the bus from the Town Hall to experience things for themselves.	Yes		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
				S448 - Morrisons Supermarket and Car Park	No Response	No	No	Car access into and out of the site is heavy and single lane, this would add to the traffic congestion. The end of Morrison avenue at the junction is often congested in all 4 directions and there is no option to widen the roads.	Widening of roads to enable access, across the junction (impossible because of road structure), and all down Morrison Ave	No		Access and egress to and from the site will be reviewed as part of the planning application process. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Jan Haines				S448 - Morrisons Supermarket and Car Park	No Response	No	No	You can't just keep adding more homes (to be bought by off shore companies, foreign owners, buy-to-let Barbians!) with no parking facilities. Is LBWF just trying to emulate the mess that is happening with Wiggley Cross?	Just stop buying more homes unless they are council homes, never to be sold off.	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

If yes, please explain why?	Council's response
DeonT Master				S48 - Morrisons Supermarket and Car Park	No	No	No	leave Chingford alone!	leave Chingford alone!		No one wants your flats	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
				S48 - Morrisons Supermarket and Car Park	No	No	No	I do not want this here where I live	Don't build it	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Jan Prior				S48 - Morrisons Supermarket and Car Park	No Response	No	No	"Potential for height" indication on map has not been discussed with wider community and other interested bodies in the borough.	Far more local consultation, including borough-wide questionnaires, with no work to be approved that does not have at least a 50% approval rating.	No		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S48 - Morrisons Supermarket and Car Park	No	No	No	New housing will increase pressure on already inadequate local services including health and retail. No justification for reducing the existing retail floorpace.	Reduce residential density.			The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
				S48 - Morrisons Supermarket and Car Park	No Response	No	No Response	My only comment is that the redevelopment site MUST provide a similar retail floorpace as existing plus additional car parking. The current facility here is very valuable and much used and needed by the local community. We need not only easy access to large stores for food, DIY, white goods, gardening etc. but small shops that already exist elsewhere in a high street) but also parking to enable taking their bulky shopping home by car. This cannot be easily done by public transport! There should be no significant reduction in retail floorpace or car parking unless absolutely necessary for if the store owner wishes to. Also it can be very difficult and expensive to provide flats above large high warehouse-like stores without noise and pollution problems. Not all sites are suitable for housing and there is no need to dogmatically follow the mantra of providing high density housing at all costs on every "development site."	Address the issues raised above			The site allocation requires that commercial floorpace is provided as part of new development. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new urban environment with less congestion, parking problems and improved air quality. All applications will be required to submit a Construction Logistics Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
				S48 - Morrisons Supermarket and Car Park	No	No	No	Morrisons is a much needed supermarket and petrol station. Are any of these proposals being supported or being put forward by local residents of Chingford/Highams Park area? I very much doubt it? Are they in fact being proposed by people that do not live within the Chingford/Highams Park areas?	NO COMMENT			The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council sets out it's strategy for managing change in the Borough's retail offer to ensure that it remains relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new retail uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality. This response is noted.

				S448 - Morrisons Supermarket and Car Park	No Response	No	No Response	Has there been any consultation at all with local residents?	Reduced number of residences, more family homes not flats, the area is now saturated with flats			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Isaane Aldridge				S448 - Morrisons Supermarket and Car Park	No	No	No	1. Morrisons/ supermarket site throughout its opening period is used by a cross section of the community and, during the day by the senior generation and community groups (including disabled people in mini buses, fire brigades, home help who bring their clients to the store by personal vehicles so they can make their own purchases & retain a degree of independence and a life to the outside world). To some it is not just a place to shop, but also a place to meet friends, or the cafe, a day's waiting for some. Many people do not qualify for the Blue badge but have needs for parking. 2. The area marked for housing development is close to the area where there is greater need for parking, it also blocks the through route along the river Ching (the area will become a danger zone, children playing by open water, moving vehicles the river becoming even more of a dumping ground, poor lighting, a closed development either increasing isolation and crime in an area already experiencing high crime and anti-social behaviour. 4. The language used throughout the council consultation is deliberately written to only reach high level academics. The people of Chingford come from many parts of the world living, working and contributing to the area, I have not seen any documentation written in other languages, this form itself is divisive and difficult to use. It does not allow for a fair representation.	Housing located to the area adjacent to the gym (opposite end of the carpark)	Yes	To insure the full and transparent account is read and fed back to interested parties	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council sets out its strategy for managing change in the retail offer to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new retail uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Jane Sax				S448 - Morrisons Supermarket and Car Park	No Response	No Response	No Response	its hard to grocer shops in the borough with adequate parking, especially for those that benefit from family and disabled parking. Unless you are building more schools and doctors this will make borough services worse.				As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Kenneth Clements				S448 - Morrisons Supermarket and Car Park	No Response	No	No	Chingford needs more commercial sites so jobs, not housing.		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The site allocation requires that replacement commercial floorspace is reprovided, ensuring that the site still provides economic opportunities.
				S448 - Morrisons Supermarket and Car Park	No	No	No	Because the detailed plans are too complicated to comment on for the average person and the plans have not been published in a range of different communication styles concentrating mainly on electronic systems which deny many people the chance to understand and comment on.	To publish the plans in a range of communication styles including face to face to allow people to fully understand what is planned and to allow an easy process to agree with or not agree with the proposed plans.			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
				S448 - Morrisons Supermarket and Car Park	No	No	No					The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 13,246 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.

T GARD				S449-Sainsbury's Hat Lane	No	No	No	Throughout Waltham Forest you are building taller and taller buildings with no parking facility. You are also creating more shops and retail when you don't get taken for those already in our high streets. And when you're those who shop in Chingford supposed to park when the Sainsbury's carpark is the only parking area? If you want to buy shopping from Sainsbury's and it's heavy, where do we park? Another scheme on paper that amounts housing with no parking and to demolish already over-occupied facilities. In Chingford the schools are full, the GP's waiting, transport links are not sufficient to take this kind of wealth of people. Also by taking more and more of the skyline you are destroying what is green, open air and village like feel to this part of the Borough. For years you have treated Chingford like an afterthought with the open on us compared to the 'posher' parts of Waltham Forest, yet now you have run out of places to build you are keen to just build them high and pack people in tight. Everything is under too much stress already. By building the resources first, including a hospital that we don't have to pay £12.50 a day to visit and then think of some sensible tower buildings rather than this.	Everyday people should have a say in these proposed works. The height you put there, this under means nothing unless you are a lawyer, lawyer or architect. Not it's real people live, their facilities and their lifestyle that you are impacting. This definitely feels like build them high and pack them in tight. How about building a hospital that we don't have to pay £12.50 to access			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Catherine Coleman				S449-Sainsbury's Hat Lane	No	No	No	Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overwhelmed, loss of privacy, daylight/night, additional demand for parking. Consultation is flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools etc.	build homes to the height of existing buildings and provide healthcare and education facilities etc.	No		The Council sets out its strategy for managing change in the Borough's Town Centres, High Streets, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is optimising the use of space that exists within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow retail units in Designated Centres to be converted to residential use at the ground floor level. The move has offered a level of protection for many of the Borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontage and having residents located within the borough's town centres that most people do not need can be met within a close to their front doors. This has knock-on benefits to health, air quality and easing congestion on the Borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and distinction.
Terry Milnes				S449-Sainsbury's Hat Lane	No	No	No	1- Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the area objectively assessed needs; and is informed by agreements with other authorities, so that current need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. No an LBWF should be seeking to preserve the "Local Character" of the area residents chose to move to Chingford & Highams Park but they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic resident cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.1) 1545 states 3,240 new homes over 20 years and LBWF is proposing 27,000 new homes by 2031 - a very significant excess of 62% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be affected as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - The Pandemic has shown that families want houses with gardens. There should be a good use of housing to meet the needs and desires of the population. When was the last time that a hospital was built in Waltham Forest? Buildings are the preferred property for many older residents and the Council should be ensuring that the needs of these residents are met.	no one is listening to the residents of Chingford - !!	No		The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).
Peter Saunders				S449-Sainsbury's Hat Lane	No	Response	No	In theory agree with the plan my concern is the number of residential units being put in the area where the road and traffic structure is already at capacity with lots of cars, traffic too many parked longer than they use to and how this will impact other resources ie access to NHS gpg and bus etc.	I would not know what would make the plan legally compliant and sound as I am not qualified to give this advice.	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Karen Williams				S449-Sainsbury's Hill Lane	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-crowded, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, infrastructure	Build homes to height of existing buildings, provide parking, healthcare, education, infrastructure	No		In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/fact finding: the choices made in the plan are backed up by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning. -Being so regulatory or national/planning barriers to delivery; -Delivery partners who are signed up to it; and -Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Maria Breen				S449-Sainsbury's Hill Lane	No	No	Yet again the use of wording doesn't make sense to me! All I know is there is far, far too much proposed redevelopment in all areas of Chingford. Plans of these sizes will not benefit this area. How about a mix instead of a few houses instead of high rise, it didn't work in the past and in years to come will be the same as old Chingford Estate. I remember I will and you need your life in the underground car park, but oh, you're not giving parking spaces. Broken idea. Why not build out of London with new schools, doctors and dentists. Stop cramming more in an already crowded and overcrowded town. Focus on making what we have better, cleaning the street more, fixing bad roads. Clear up the high rises. Not adverts encouraging people to look after their properties and roads and keep people safe. I want to start using Chingford again but it's hard as all many areas are neglected. Stop adding to the overcrowding. We need nice shops but the rent is too high. Oh my I could go on and on.....	As above please. Your wording is for solicitors and the like, not me. I oppose all these massive flats with barely any parking. People will have cars and it will add to street congestion. I can't in my house, we all need them for various reasons, we park 2 on the drive and one on the front, not saying any more congestion. Families need cars. Cycling is not an option for any of us, if do cycle I worry my bike will be pinched as there are so many scumbags here. If you're going to build, just no more than 2 or 3 floors maximum and give them parking too. Stop the developers thinking money, money money. I wanted to grow old in Chingford but as this use it'll be off in ten years as I won't recognise this town.	No		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a net-zero carbon footprint, parking problems and improve air quality. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Valen Ejura				S449-Sainsbury's Hill Lane	No	No	The plan is seeking to build significantly more homes than required by the London Plan. To achieve that higher number, the form of development (high rise) is significantly out of keeping with the existing character of the area and will cause "harm" (in planning terms) to existing residents who will suffer the consequences of over-crowding, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. These proposed developments cannot be delivered with policy compliant levels of affordable housing. Without parking these proposed developments will disadvantage older people. The Consultation is flawed as non online residents have not had a chance to comment as they received no leaflets advising of the plans. There has been no public meeting.	DONT WANT THIS SITE DEVELOPED AT ALL we will lose sainsbury's while it bang built, which is a lifeline for older and disabled local residents who cannot travel should our voices be ignored, then any building would have to be...no high rise, no over-crowding/over-shading existing homes, provide parking for all new residents, plus replace the existing shoppers car park for everyone to use. ITS THE ONLY CAR PARK IN SOUTH CHINGFORD. I would like to see additional doctors, hospitals, dentists and schools etc, for all new residents.	No	we all want to be involved... this is our life!	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a net-zero carbon footprint, parking problems and improve air quality. This response is noted. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Council sets out its strategy for managing change in the Borough's Town Centres, High Streets, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping and recreational needs and help the Council ensure an effective delivery of its strategy for managing change in the Borough's Town Centres, High Streets, and Local Parades to ensure that they remain relevant into the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough in relation to its distinctive high streets and town centres.

Mike Chrimes				S449-Samburys Hill Lane	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendments to the plan, may be rejected for failing to comply with rules that are not transparent to consultees. Consultation on the site allocation (LPS) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPS for 2020-2025). This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been coloured by political point scoring, while officers have been subject to those making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get online. In general however it has been apparent both from LPS and what has been stated at consultation meetings a major driver for the reclassification of development across the borough has been a housing target of c. 1300 homes per year (LPS) has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expected housing need. More	Some consultation on LPS sites has taken place, but many of these sites are individual sites in larger retail or industrial centres where a holistic approach would make sense, both to residents and stakeholders, and to planners. Masterplans have started to appear, for some areas like South Chingford, Highams Park has its own plan, but looking at the North of the Borough surely this should be done for Station Road, and to extending the North Circular Corridor to the north and east. In some cases such a masterplan approach would ensure a better understanding of an areas character and distinctions, which may be easily missed in consideration of an individual site. It is suggested that until master plans are developed, through consultation, for the main centres identified in LPS no major consultation on individual sites is pursued. With reference to site S449 the chief driver in bullet point order is to provide 80 homes. It is unclear how that many homes can be provided on this site with the other proposed uses. One choice might be to build high but research e.g. ICL (2017) high rise buildings energy and density has demonstrated above 6 storey energy use increases difficult to reconcile with the Boroughs green policies. A taller building on this site (separately not proposed according to the planning plan) would overlook gardens on two sides and potentially negatively impact their character. It is suggested that there could be enhanced cycle and pedestrian connectivity, yet the site already benefits from a wide pavement, which could only be compromised by cycle provision. It is suggested the site would continue to provide town centre parking and retail use yet also accommodate community uses and housing. Such multi-use would surely offset the size of the retail unit, or displace access to any community facilities/parking. Loss of the Samburys retail unit for an extended period would have a negative impact on a key anchor for this retail centre and its value as a	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. Monica Di Natale				S449-Samburys Hill Lane	No	No	Proposed development cannot be delivered with policy compliant levels of affordable housing. Building new high rise building means loss of privacy, daylight/sunlight. More demand for parking, as plan does not consider more parking spaces, there will be more people but no more services, medical centres, schools, dentists, hospitals are already stretched as they are. Moreover plan is not being properly advertised to the public. We only found out through a leaflet dropped at our door.	Build new homes, no high rise buildings, already there are too many in Chingford, provide more parking spaces, more medical centre, schools, educational services. The few medical centres we have are so stretched they no longer see patients the way they used to. Public services in Chingford amount have worsened over the past few years.	Yes	Would like to find out personally what the Council plans to do	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. David Hull				S449-Sambury's Hall Lane	No	Response	No	Response	<p>It is quite clear that by using such legal terms instead of 'simple English' that you do not want the "everyday" person to respond to your question. Chingford Mount has a high percentage of ELDERS persons who are less than what you are trying to tell us and therefore will not bother to respond to your questions. What we need is GOOD LOCAL COUNCILS which do not require us to rely on having a car and which are easily accessible to the elderly and disabled persons.</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have will be removed I do have doubts as will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning those will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. But the rest of the area will also be subject to these increases and the proposed speed the natural air flow possibly result in pockets with even a higher concentration.</p> <p>Walham Forests current population density is far to high, and as such we have seen significant increases in anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate when the 1960's tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In this it was realised in the 1920's that people needed space and New Towns were built to address the issues of overcrowding and poor air quality.</p>	Yes	Because there are too many unanswered questions	<p>This response is noted.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> Research/Fact finding: the choices made in the plan are based on facts. Balance of participation of the local community and other relevant stakeholders in the area, and the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> Sound infrastructure delivery planning. Missing no regulatory or non-regulatory planning barriers to delivery; Delivery partners who are signed up to to it and Consistency with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly listed in an Annual Monitoring Report.</p>
Janet Bloomfield				S449-Sambury's Hall Lane	No	No	No	No	<p>The proposed developments would be out of keeping with the area. They cannot be delivered with policy compliant levels of affordable housing. There are no parking provisions, which will disadvantage older, and disabled people. The plan includes the building of more homes than required by the London Plan and would increase the demand for parking. There would be an increased need for doctors, dentists and school places. Any new homes should be built to the height of existing buildings. There should be parking places provided with new buildings. Consultation has not included bulletins or public meetings (except on Zoom) to advise residents of the proposals.</p>	<p>Provide policy compliant levels of affordable housing.</p> <p>Build no more homes than required by the London Plan.</p> <p>Supply information of the proposals to all of the borough's residents.</p> <p>Hold public meetings to discuss the proposals.</p> <p>Build homes of the same height as existing buildings.</p> <p>Provide parking to accommodate the additional residents.</p> <p>Provide additional local healthcare and schooling.</p>	No		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Walham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Sound Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Alicia Thompson				S449-Salisbury's Hall Lane	No	No	No	The Local Plan we've no comment or doesn't seem to have been set out with any clarity or specificity here. The inspection cannot reply to the 3 questions above, as we have no info supplied there as to how we know the local plan is, or know what the legacies involved are or the duties for compliance? More importantly for the people being asked to respond to these "plans" is where are the details? It's all very vague. Points of concern - to fit 90 new homes in above the existing retail and parking space will mean building shoebox homes above the existing retail and parking space too high to be out of keeping with the surrounding homes, casting shade, lack of privacy making the area less desirable overall. Cycle provision down Hill Lane will cause problems where the road bends outside the old library, many accidents already occur here. Parking space is already limited, more homes will exacerbate issues especially with no provision. No real attempt to consult with the population to be affected directly to these plans. Zoom meeting over busy times period doesn't count as consultation to me. Letters with clear details of plans to sit on those not online can be aware and make comment within a generous timeframe would be fair.	Consult the population by post giving a generous timeframe for response, get door to door, make plans much clearer, ask questions the population can actually answer rather than ask about whether we think legal compliance etc is met, we aren't all solicitors so can't answer, and shouldn't have been asked these questions. We want plans that are in keeping with the area that won't infringe on any residents existing happiness with the area, there's no point spending money to build homes no one wants to live in, makes people in surrounding streets want to move away and devalue their homes and makes people not want to travel here to spend money in the shops because the area is unsupporting due to high risks, and poorly accessible with all traffic forced through the one busy junction of Chingford Mount, and no parking.	Yes	I've only said yes as I can say the question you ask makes reference to the inspection, so why ask it, I've no idea about an examination hearing session.	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/ fact finding, the choices made in the plan are backed up by facts. - Evidence of participation of the local community and other strategic stakeholders in the area. The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Being in regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Alignment with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plan should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process. The Duty to Cooperate which is demonstrated the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.
Ian Magill				S449-Salisbury's Hall Lane	No	No	No	I feel that the Site Allocation Consultation is not legally compliant, not sound and does not comply with the duty to co-operate. This letter is in strong opposition to the proposed developments around Chingford Mount at Salisbury's Hall Lane, Albert Corner and the former South Chingford Library Sites. To achieve the number of homes planned to be built on these sites, the only way of fitting them in each area would be to go up in the air with high flats. This form of housing is totally out of keeping with the existing character of the area and will cause 'harm' to existing residents who will suffer the consequences of overlooking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from Flats built without adequate parking for new residents. Without parking for the residents of these proposed developments this will cause massive parking wars in already very limited street parking around residential Chingford Mount and would disadvantage older people. If the 80 flats at Salisbury's Hall Lane are built then residents of Albert Avenue which backs on to Salisbury's in Hill Lane will be very affected. By building 80 Flats on this site, obviously upwards of five plus stories, would completely destroy residents' way of life. Spring in the garden would be a thing of agony not pleasure as it is now. An important thing to consider is that Albert Avenue, which backs on to Salisbury's in Hill Lane, is shown in the Draft Chingford Mount Town Centre Framework as Orchard Close. This is incorrect and could confuse a planning officer unaware of the streets in the area.	Please only build homes to the height of existing buildings and no higher and also provide parking for any new residents. Infrastructure should be provided for any new flats as trying to get a doctor's/clinical appointment is extremely difficult. With so many new homes our local hospitals, schools and nurseries will be massively impacted, making things even worse for existing residents. We also do not want to lose our existing supermarkets and certainly do not want these to be replaced by smaller ones.	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to abate traffic operation. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and to generate high numbers of private car/ motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. The site allocation requires that commercial floorspace is provided as part of new development.
R Stoddart Esq				S449-Salisbury's Hall Lane	No	No	No	No new houses on the back of the Salisbury's site and will lose all my privacy as I will be overlooked by the flats, there will be loss of light to my garden and this means noise. I feel that 5 plus stories is too high in addition, if you are not providing parking for these flats who will people park? All the local roads are very busy and congested already and this will only lead to a gridlock at the Mount. I am very unhappy with these proposals and feel all the noise and disruption would adversely affect my mental health.	Obviously I would prefer not to have any changes. I do not want the noise or disruption and feel this would adversely affect my mental health.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or higher than others. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. This character-led approach is supported by evidence from the Characterisation and Intensity Study (2019). Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan states that the loss of tenures social or community facilities will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Mark Knowles				S449-Salisbury's Hall Lane	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no sufficient public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide adequate parking, healthcare, education etc.	No	We need to know what is planned as we may believe it to be unsound and need changes made.	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email post.

Farooq Fazaili				S449-Sainsbury's Hill Lane	No	No	No	Proposed development would be out of keeping with the historical area, and they cannot be delivered with the policy compliant level of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than set out by the London Planning Commission. Existing residents will be overlooked, loss of privacy, daylight/sunlight and the impact on the residential parking has also not been taken into account. The consultation has been flawed as no leaflets have been distributed by the council and no public meeting has been arranged to advise residents of the proposal, which a Zoom meeting doesn't count as many residences were not aware of and some may not have been able to join, even if they've known. The increase of people and families in the small area will increase the pressure on the doctor, hospitals, dentists, schools etc, which are already under increasing pressure, including the transport infrastructure in the area, in turn will increase pollution and affect the older residence and children with respiratory conditions.	Build affordable homes which are in line with the surroundings that do not overlook or impose on the existing residence. Provide additional parking facilities, along with restructuring the transport link to and from Chingford Mount. The Healthcare and Education will also need to be increased to cope with the influx of new residence. The services (nowage) will also need upgrading, as well as the gas and electricity supply.	Yes	Need to understand the reasoning behind the council's proposal and suggestion	<p>In Local Plan Part 1, Policy 72: Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Emily H				S449-Sainsbury's Hill Lane	Yes	No	No	Hill Lane and Chingford Mount Road are already severely congested with traffic. Add to this the new supermarket coming to Cork Tree retail unit and the area will be even more gridlocked. Adding more homes to an already congested area will only add to the existing traffic problems. Older residents also rely on this Sainsbury's - many of them travel there by foot. If you take this away you are alienating a large part of the community, cutting them off. Not all of them have access to a car or could walk as far as Cork Tree when the new supermarket is there. This area needs a cut down on ASB, and better shops. Not more homes!	Keep Sainsbury's and build the homes elsewhere. If you go ahead with this, and plans for Cork Tree and New Road near the Harvestor you are basically telling people it's not worth leaving their homes as the area will be a nightmare.			As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Lee Ashaba				S449-Sainsbury's Hill Lane	No	No	No	This letter is in strong opposition, specifically but not exclusively, to LBWV's 4 proposed development sites around Chingford Mount. Namely: 1. Up to 90 new homes on Sainsbury and Council car park. 2. Up to 90 new homes on Albert Corner. 3. Up to 25 new homes on former South Chingford Library. 4. Up to 260 new homes on Lakesward Leisure Centre & Nursery site. Whilst we are not totally opposed development, progress and more homes in the area, these should not compromise other established residents. The proposed developments would be out of keeping with the surroundings. Also this cannot be delivered with policy compliant levels of affordable housing. If these flats are to be built they should be no more than 3 storeys. Any higher would be out of character with the area and would definitely disadvantage existing residents whose properties will be overlooked. Parking for cars has already reached a desperate level in Chingford despite many households being forced into forsaking their front gardens and going to the expense of paying for a drop kerb driveway. Any new builds in the area must therefore provide suitable parking for these new dwellings. To not provide this facility will, without doubt, cause massive parking wars with the already very limited street parking around residential Chingford Mount. Whilst we appreciate reducing car ownership is something London is eager to achieve, many of the older residents around Chingford Mount may not be able to do this and will have to rely on the bus and other public transport services. These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and school provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	Build to a max 3 storeys Provide car parking for new dwellings Provide infrastructure to accommodate expanded population	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP's and healthcare facilities. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Paul Willard				S449-Sainsbury's Hill Lane	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and school provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.
Valen Ejanu				S449-Sainsbury's Hill Lane	No	No	No	my flat and garden will be completely overhadowed by flats.... blocking out my light and invading my privacy if this goes ahead please reconsider thank you	no high rise please. it is not in keeping with the area and will totally overshadow surrounding properties		we all want to be involved...this is our life!	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. Gavin McGill				S449-Sainsbury's Hill Lane	No	No	No	I strongly object to your plans for the area in which I have lived all my life. By building high rise flats and putting people in little boxes you are increasing the number of people in the area but by making our local supermarket, Sainsbury (Hill Lane) and local and Supermarket (Albert Corner), much smaller, you will reduce the reason for people coming to shop in the area. In fact, people will shop elsewhere and it will just become a massive housing estate without parking facilities and without a decent sized supermarket. Obviously, without parking for new residents, the area will get even more congested and residents will avoid the area and shop elsewhere. They would probably shop at larger stores at Tesco in Highgate Park, Morrisons or Sainsbury (at the Black). Obviously this would cause more traffic, pollution, congestion and use of petrol/electricity. This goes against the Council's policy of becoming more green. Unfortunately people will be unable to take their weekly shopping home on a bike along a new cycle lane. Without these decent shops all other shops will start to fail and close up and Chingford will no longer be a good shopping area. To regenerate an area and make it more appealing, we need some good shops giving people a reason to come to the area. Perhaps the Council could reduce business rates. We also need ample parking, not less. We need more parking for shoppers to make it easy for them to park. The current car park is dark, run down and expensive. We need a good car park, well maintained with sensible size spaces to park in, not tiny ones as are the existing ones. The angle of these spaces could also be changed to make it easier to access. Sensible two storey homes with parking provision is obviously a good thing but certainly not high rise flats, overlooking residents next door to them. I am a resident of the area and I am a keen cyclist.	Provide ample parking for shoppers and any new residents. Encourage new shops to the area by providing more free parking and lower business rates. Keep any new flats to same height as existing building. Chingford would then thrive. By sticking with your plan, Chingford shops will close up and it will just be a high housing estate with corner/convenience shops which cost the earth.	No	-	Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new urban environment of congestion, parking problems and improve air quality. The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Rosemary Langlands				S449-Sainsbury's Hill Lane	No	No	No	The proposals are completely out of keeping with the area, high rise blocks were demolished as they failed to provide decent homes for families, or why put up more. A high rise block does not consider the privacy of the residents, the quality of life of the residents, the value of the properties, the access to light and sunshine for the properties and residents, the mental and physical health of the residents of Albert Ave. In addition there are underground drains and a local low underground river in the vicinity. Local residents are further affected residents of the borough need the large Sainsbury's. It provides goods that are not available anywhere else in the area of the Mount, it attracts shoppers to the area which supports the smaller retail outlets.	The area needs to be kept as it is NOT to become an area like the Blackheath Road and be surrounded by high rise blocks. This is a semi rural suburb of London NOT a part of New York or Canary Wharf.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Characterisation and Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured. The site allocation requires that commercial floorspace is provided as part of new development. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new urban environment of congestion, parking problems and improve air quality.

L Stephens				S449-Sainsbury's Lane	No	No	No	This is one of the only good shops left at Chingford mount. The area is run down, neglected and antisocial behaviour is worse than ever. We need more good shops. I don't mind more housing but it should be around good shops (not over the top of them) or on neglected land/shops. Getting rid on this will only lead to more congestion at the A100 roundabout. You're not considering local people - especially the elderly/vulnerable who often might not drive any more, or those for which a giant supermarket might be overwhelming. There are other ways to build other than opening Sainsbury's.					The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council sets out it's strategy for managing change in the Borough's Town Centre, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local Plan directs planned growth to previously developed sites that are currently under-occupied and land to generate high numbers of private or motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Terry Miles				S449-Sainsbury's Hill Lane	No	No	No	What does "Explore" mean? This language seems to have no legal standing. Not all residents who will be affected have been effectively consulted. Where are the elderly supposed to shop if we lose Sainsbury's?	Firm legally binding language- not woolly "explore" which means nothing. Elderly residents need local shops/supermarkets that they can walk to. Infrastructure such as Doctors, Dentists, Schools, Nurseries, sewage, water supply needs to be detailed.	No	no one is listening to the residents of Chingford -!	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation. The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP and healthcare facilities.	
Diinne Opel				S449-Sainsbury's Hill Lane	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.	Yes	Everything should be open for the public to participate in	The Local Plan requires a character-led approach to reidentification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2016). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.	
Catherine Coleman				S449-Sainsbury's Hill Lane	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/Fact Finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or national planning barriers to delivery.

				S449-Sambury's Hat Lane	Yes	Yes	Yes					This response is noted.
				S449-Sambury's Hat Lane	No	No	No	I know nothing about these plans until I received a letter from an action group. I am not on Facebook or Zoom so I know nothing about any of this. I know I am not the only one to be in this position and so should yell!	I receive emails from the council leader each week and think that this could be incorporated as a section in this.			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Isabella Anne Tyler				S449-Sambury's Hat Lane	No	No	No	Proposed development out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-looked, loss of privacy, daylight/night, additional demand for parking. Consultation flawed as no public/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As a response to the spike in the number of Covid-19 cases at the time, it was decided for the safety of our residents and officers to hold the engagement meetings online.
Mrs Malana Benfield				S449-Sambury's Hat Lane	No	No	No	This is the only car park in Chingford Mount for shoppers. Where else do you expect them to park if you take the car park away? Where will these new residents park? Will there be parking spaces for them or will they be taking spaces in the roads around, which are already full of cars? If you build 50 more homes this will have a huge impact on the provision of doctors, schools, dentists, hospitals etc for people who already live in the area. Are you going to provide more of these? I don't think so. I live in Chingford Mount and had no idea that this was being planned. Why didn't I receive leaflets through my door advising me this was going ahead? Are you covering the up because you know no one wants this? How tall is this thing going to be? It should not be taller than the building that is already there because if it is it will interfere with the local residents privacy and light as they will be overlooked.	If you insist on proceeding with this plan you need to provide a car park for shoppers, parking for the new residents, ensure the building is limited to the current height and provide healthcare and schools.	No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Nicola Diaz				S449-Sambury's Hat Lane	No	No	No	Please for once listen to your residents! We do not want Chingford built up and over populated like what has happened in Walthamstow. Sambury is key to the local community and the only available source of parking for most residents and many of my elderly and disabled relatives. Why take this away?	Just leave it alone! and dont make life harder for your most vulnerable residents	No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.

Anthony & Thomasp				S449-Salisbury's Hall Lane	No	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 15. Before submitting a local plan to the Secretary of State under section 25 of the Act, the local planning authority must" (B) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 38(1). 16.(7) A local planning authority must" (B) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and" (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (B) The bodies or persons referred to in paragraph (1) are" (B) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Domestic Waste Fleet which results in higher than normal infant mortality rates and even though they state the new larger plan will be more efficient these will still be emissions. Although they suggest these sites will be removed I do have my doubts or will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. But the rest of the area will also be subject to these increases and the proposed upset the natural air flows possibly result in pockets with even a higher concentration. Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density bring allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1967 tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the 1930s when realised in the 1930s that people needed space and New Towns were built with the same density as the old areas, this is the reason why	No	Because there are too many unanswered qu	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new network of electric bicycles, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan drives planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan requires that cities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L156 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
Jill Russell				S449-Salisbury's Hall Lane	No	No	No	Because I have no idea what 'legally compliant' or 'sound' means in terms of this questionnaire.	What exactly is 'an active ground floor and visible street frontage that contributes to high street activity and acts as an access gateway to the town centre'? Please write in a language that the common person can understand (including me).			This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local Plan consultations have always been welcome either through the online portal or by email and post. In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: Research/Fact Finding: the choices made in the plan are backed up by facts. Balance: participation of the local community and others having a stake in the area, and Flexibility: the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: Sound infrastructure delivery planning; Delivery partners who are signed up to it, and Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistency with National Planning Policy Framework and the Local Plan
				S449-Salisbury's Hall Lane	No	No	No	It would completely destroy the local village feel of the area and I do not feel there has been enough publicity on these developments. Local residents should have been written to. Many not on social media have had what is planned.	It would completely destroy the local village feel of the area and I do not feel there has been enough publicity on these developments. Local residents should have been written to. Many not on social media have had what is planned. Local properties will be dominated by this 5 storey development a few metres from their rear boundary with over-looking and attendant loss of privacy. High rise blocks would be very ugly and not in keeping with local buildings, ie houses with gardens and low rise shops.			The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). This response is noted. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.

LA Salt				S449-Sainsbury's Hall Lane	No	No	No	NO new homes? no mention of improvement to local services such as overburdened schools, GP services, dentists, over used and inadequate water and sewage systems.	Improvement to local services such as schools, GPs, dentists, upgrade water and drainage systems to accommodate new homes, extend the Victoria line from Walthamstow to Chingford Mount.		Red up of the over population of Chingford Mount without the necessary upgrade to services to support it.	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.
Hennie Heath				S449-Sainsbury's Hall Lane	No	No	No	This over development. The area does not have the infrastructure to support these homes. A development of this scale, in the area, is not sustainable or conducive to residents.		Yes		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Sam				S449-Sainsbury's Hall Lane	No	No	No	This is absolutely embarrassing how can these flats be created without considering the parking issue, the majority of local residents already struggle with parking and their drives being blocked as shit. This is despite lack of the duty to cooperate you are not considering the needs of the local residents. Furthermore Chingford is already heavily populated this will cause a tremendous amount of unease and stress for the older members of the community.	Do not create these flats without parking, the sainsburys car park is used regularly by customers why deprive them? Why impact the local residents in such a terrible way		-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. Karen Nash				S449-Sainsbury's Hill Lane	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demands for parking. Consultation raised as no sufficient public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.			There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households, on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 45,000 homes per year across London. This response is noted.
Valen Ejaru				S449-Sainsbury's Hill Lane	No	No	No	Any regeneration should be at exactly the same height as it is now otherwise it will invade privacy and cause a lack of daylight and damp problems.	as above	No	we all want to be involved... this is our life!	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. R Mills				S449-Sambury's Hall Lane	No	No	No	What exactly are these plans being made? Yes to 5500s social and honestly affordable housing (based on local average salaries which will not be in the range of the ever-greater more affluent Westbourne) but no to basically residential land for profit which currently provides essential, valued and much needed amenities. Not in keeping with the local area. Not with concerns for church residents at its heart not those employed within the existing business based here.	Retaining current level of height in line with the rest of the area (two storeys) that withdrawing current business/service provided. Not drawing additional traffic off the bus turning point further into the neighbouring residential areas.	No	-	There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Mr King				S449-Sambury's Hall Lane	No	No	No	You will be depriving the local community, particularly the elderly & disabled who cannot travel to Big supermarkets, of their long standing Shops, i.e. Sambury's & Island. Chingford High Street has already been taken over by mall shops, Barba's, coffee bars etc. We NEED those two supermarkets, we haven't the room for more flats, parking is already a nightmare in surrounding roads.	More people moving into Chingford - where are the social facilities to accommodate them?	No	I think all residents in the Area should be allowed to have access to what the council are proposing & have their Say.	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Clifford Gray				S449-Sambury's Hall Lane	No					No	I do not agree with the proposed plan as they not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.

Les Ashvita				S449-Sainsbury's Hill Lane	No	No	No	<p>This letter is in strong opposition, specifically but not exclusively, to LBWV's 4 proposed development sites around Chingford Mount.</p> <p>This letter is in strong opposition, specifically but not exclusively, to LBWV's 4 proposed development sites around Chingford Mount.</p> <p>Notably:</p> <ol style="list-style-type: none"> 1. Up to 90 new homes on Sainsbury and Council car park. 2. Up to 90 new homes on Albert Corner. 3. Up to 20 new homes on former South Chingford Library. 4. Up to 280 new homes on Larkwood Leisure Centre & Nursery site. <p>Whilst we are not totally against development, progress and more homes in the area, these should not compromise other established residents. The proposed developments would be out of keeping with the surroundings, also this cannot be delivered with policy compliant levels of affordable housing.</p> <p>If these flats are to be built they should be no more than 3 stories. Any more than 3 stories will be a detriment to the area.</p>	<p>Build to a max of 3 stories</p> <p>Provide ample parking for each dwelling</p> <p>Provide infrastructure for expanded population</p>			<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
Miss Vignali				S449-Sainsbury's Hill Lane	No	No	No	<p>No consideration given to residents who cannot travel. This supermarket is vital to local people and most can walk to it unlike the larger supermarket locally known as the dog stadium.</p>	See above			<p>The site allocation requires that commercial floorspace is provided as part of new development.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use of spaces that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow Retail Units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the borough's shopping grades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres, delivering housing above an active frontage and having residents located within the borough's centres, ensuring that most people daily needs can be met within a close proximity to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses than may emerge in the future to help maintain their vitality and distinction.</p>
Bill Rodney				S449-Sainsbury's Hill Lane	No	No	No	<p>It is increasing population without increasing retail and social infrastructure provision. It is over development. It will increase pressure on car parking spaces causing pressure on surrounding residential areas. You should not be encouraging new development because of embedded carbon contrary to net carbon zero targets.</p>	Comply with local building heights and appropriate street scale.			<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. John Sadlers				S449. Salisbury's Hall Lane	No	No	No	Communication and consultation of residents has been lacking. Leaflets distribution poor (badly are north). Poster in shops minimal and the format not legible. No extra school places. No extra medical facilities, no extra community facilities (opposite the library). High rise buildings create a feeling of isolation.	The consultation need to start again with a real engagement with local residents and businesses	Yes	The system needs local input	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to the spike in Covid-19 infections around the time of the consultation period, it was decided for the safety of our residents and council officers to hold the engagement meetings as online events. Throughout the consultation period the council was still accepting consultation posts by email and post. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Site Francis Field				S449. Salisbury's Hall Lane	No Response	No	No Response	Overloading an already crowded area with yet more homes whilst failing to provide an infrastructure that can facilitate the influx of more residents will further destroy an already fragile area. More people yet no extra school places, no extra medical facilities, no extra community facilities (opposite the library). The council continues to fail the community library, it is not sustainable.	Develop the area to provide accessible community assets.			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
D Nurse				S449. Salisbury's Hall Lane	No	No	No	The proposed developments would be out of keeping with the area, they cannot be delivered with the policy compliant levels of affordable housing. There are no parking provisions, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be over-looked, loss of privacy, loss of daylight/sunlight, additional demand for parking, additional traffic congestion and pollution. The consultation is flawed as there has been no leaflets or public meetings to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists and schools.	Build homes to the height of existing buildings. Developments should be in keeping with the area. Provide necessary parking and amenities. Provide additional services to support developments such as education, transport links, healthcare and education.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Ray Yobler				S449. Salisbury's Hall Lane	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling (ie doctors, dentists & schools. Local infrastructure is never considered). There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no leaflets or public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Veronica Heath				S449-Sainsbury's Hill Lane	No	No	No	<p>This is a gross over development of the site.</p> <p>The consultation process conducted by the Council has been seriously flawed in my view. There appears to have been very little consultation or publicity in hard copy form provided to residents and businesses for those areas affected. The "Residents News" has been provided on line and has mentioned the Local Plan occasionally but there has been little reference in the Council's quarterly "Walham Forest News". As has been pointed out to Cllr Simon Miller, the Portfolio Holder for Regeneration, not everyone is on line and instead a number of residents have stated that they "hose hooting" about these plans which would have a fracturing and in some cases upsetting reaction to those affected. Indeed two Chingford residents have had to pay out of their own pocket to distribute leaflets to residents to inform them of the plans and the deadline to respond. This is unacceptable and should have been the Council's responsibility which does appear to show a desire not to publicise effectively and ensure that responses not received are regarded as supportive of the Plan.</p> <p>With Covid it is accepted that large meetings could not have been held with residents but other ways could have been found. This so called "Townday" in the Town Square on 4 December 2021 would have been an ideal opportunity for officers to communicate with residents. It is known that few officers in attendance did not make themselves available to residents for questions and explanation of the proposed Plan and had no identification (bills) and the event can only be viewed as someone giving out expensive freebies whilst deflecting residents from the importance of providing their views on the Local Plan. It was understood in early January 2022 that the Council were to leaflet residents within 1 mile of Chingford station but most residents have never received this. Again, this oversight is totally unacceptable.</p> <p>There appears to have been very little effort made by the Council in publicising the Local Plan proposals in the post up shop 22/8 Chingford.</p> <p>My neighbours and I have not received a leaflet outlining of these proposals.</p> <p>Privacy will be affected to others with such high rise residential buildings. Traffic and parking problems will get even worse.</p> <p>More Pollution.</p> <p>Not enough school places. My daughter could not get into her local comp 1/2 miles up the road due to catchment having to reduce due to more flats being built and more families moving in.</p> <p>Not enough doctors/ surgery spaces.</p>	<p>The development limited and the current facilities - shopping and parking retained.</p> <p>The development should also take into account current residents and not rough-road over on.</p>			<p>This response is noted.</p> <p>The Council sets out it's strategy for managing change in the Borough's Town Centre, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help the Council ensure an effective delivery of its 15 minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p>
Samantha B Law				S449-Sainsbury's Hill Lane	No	No	No	<p>Privacy will be affected to others with such high rise residential buildings. Traffic and parking problems will get even worse.</p> <p>More Pollution.</p> <p>Not enough school places. My daughter could not get into her local comp 1/2 miles up the road due to catchment having to reduce due to more flats being built and more families moving in.</p> <p>Not enough doctors/ surgery spaces.</p>	<p>Make sure our children have adequate education in schools now, well equipped enough for those who reside here now before housing more families that will require spaces in our local schools.</p> <p>Make sure all local residents are adequately served by our Local NHS amenities and have what they need before housing 100s of other families. Can our local hospital cope with so many more local residents? Especially as the new hospital is reducing its bed capacity? Traffic/parking and pollution will add all of these new homes help to hinder these problems?</p>		Because I'd like my opinion to count	<p>This response is noted.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Walham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Patricia Moseley				S449-Sainsbury's Hill Lane	No	No	No	<p>Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing provision for parking this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked loss of privacy day/light/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors hospitals, dentists and schools, etc</p>	<p>Build homes to height of existing building, provide parking, healthcare, education etc</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Robert Deering				S449-Salisbury's Hall Lane	Yes	No	No	No	Local people do not want high rise development in Chingford Mount. This has been expressed by many people on Facebook groups such as 'Love Chingford' and 'Save Chingford from overdevelopment'. High rise flats overshadow and dominate the high street, cut out sunlight and the sky for pedestrians and have other buildings in shadow. They create wind tunnel effect, exacerbate heat island effect and can produce social and mental health problems for the occupants and problems for emergency services and the police.	cannot say what is legally compliant, but I believe that flats above four storeys high are unacceptable for the reasons listed above.		I would like to participate in the decisions taken in the development of the town where I live.	Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
				S449-Salisbury's Hall Lane	No	No	No	No	Building more homes will put extra pressure on the already overstretched local facilities in doctors, schools and hospitals. It will make the parking problem in the area worse.	Upgrade the infrastructure before building new homes			The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S449-Salisbury's Hall Lane	No	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking. Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit.	I consider building homes to height of existing buildings to be necessary consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (CIS). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Ority				S449-Salisbury's Hall Lane	No	No	No	No	Over crowded area with not enough schools and hospitals and doctors to be building so many more homes with out parking	Nothing you can do build a school instead or keep it the same			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of leases to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Julie Vincent				S449-Salisbury's Hall Lane	No	No	No	No	Incidents of drug/alcohol misuse not consulted. New flats not in keeping with the area and will ruin chingford. Not wanted in our town.	Tidy up shops. Rebuild a shop where Poundland burnt down many years ago. No high rise flats.			This response is noted. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? 				S449-Sainsbury's Hat Lane	No	No	No	Impacts on the local residents especially with Morfions and the superstore Sainsbury's also being redeveloped	Having transport provision that travels from Chingford to Meridian Water may reduce the congestion from Chingford Mount and Chingford road			The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Rosemary Langlands				S449-Sainsbury's Hat Lane	No Response	No	No	This land is a shop and a car park - converting it to YET MORE homes is unacceptable to local residents - I cannot see how high the proposal is but 10m must be high. What gives the council the right to build that high at the bottom of my short garden? Life is bad enough in Albert Ave with giant trees blocking my light and heat out the front now you want to take the sun light and freedom away! I know there are underground streams and at least one underground river in the vicinity - this is not conducive to safety.	No homes should be built overlooking homes in the vicinity thus removing their light, heat and privacy. No homes should be built where there is such a large amount of underground naturally occurring water!			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Terry Milnes				S449-Sainsbury's Hat Lane	No	No	No	Out of character with the area. Removes a vital small supermarket used primarily by those with no transport and the elderly. No facilities for parking. Added strain on local amenities.	Do not keep building where it is totally out of character with the area and diminishes local facilities.		no one is listening to the residents of Chingford.!!	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Nail Hooper				S449-Sainsbury's Hat Lane	No	No	No	The plan build 90 new homes with no parking facilities on a site that provides the majority of parking for the Chingford mount is beyond belief. But then again anything built other contempt for Chingford residents by Waltham Forest council would constitute suspicious behaviour.	Drastically reduce the number of homes & provide adequate parking for residents & shoppers. Much like the existing Tesco development in Highams Park.	Yes	To ensure residents aren't ignored as usual.	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,645 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Jayne				S449-Sainsbury's Hat Lane	No Response	No	No Response	It will lead to overcrowding and an increased demand for already stretched local services such as gcs, dentists, potting etc.	To build housing within the existing building capacity and not expand the sites.	Yes		Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. 										No		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Deborah White				S449-Sainsbury's Hill Lane	No	No	No	By demolishing the Sainsbury's supermarket where are elderly residents and people who have no transport and cannot walk far going to do their shopping. There are no proper supermarkets in the Chingford Mount area only express shops which do not supply all for a weekly shop.	More thought for where people are going to shop at Chingford Mount now that all these new homes are planned	Yes	To see that what people require is met	The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive High streets and town centres. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Kareneth Clements				S449-Sainsbury's Hill Lane	No	Response	No	The site must enable Sainsbury's supermarket to continue to be viable. It will not be able to do this without the adjacent carpark and shoppers will go elsewhere where there is car parking. The local authority should stop trying to exclude the car from everywhere, people need to get about and carry their goods.	Maintain the current supermarket and parking and improve parking facilities in general.	Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision. As per the Local Plan policy, the sites that will or have the potential to impact on the highway network public transport services, sustainable transport, have difficult access will be required to submit a Construction Logistic Plan setting out strategies to minimise these impacts and agree suitable mitigations and monitoring prior to the commencement.
A)				S449-Sainsbury's Hill Lane	No	No	No	Are you for real, 90 new homes on this small area. Where will these people go for doctors, schools & nhs dentists. I do not work due to ill health & I cant get a nhs dentist. Is locals rely on Sainsburys for our weekly shop, where else are we suppose to go? Also some of us rely on our cars, due to disabilities, where are we suppose to park?	Leave Chingford alone	No	-	The site allocation requires that commercial floorspace is provided as part of new development. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Mary Pickering				S449-Sainsbury's Hill Lane	No	No	No	The whole plan is cumbersome, ugly, not environmentally friendly and certainly not supported by the infrastructure.	Examine first the local existing infrastructure whether it meets current needs of the population we have already got over saturated schools and not enough GPs. There is a sad lack of a variety of shops and the council has not been promoting and actively helping local businesses. The transport links are inadequate and there are no public toilets.	Yes	Essential that public is fully consulted and that information is readily and easily accessible to the whole community.	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Naila				S449-Sainsbury's Hill Lane	No	No	No	Chingford does not have the capacity to increase the number of housing units. The selling point for Chingford is the amount of green, open space and minimal high rise buildings. We do not support additional housing in the area.	Chingford does not have the capacity to increase the number of housing units. The selling point for Chingford is the amount of green, open space and minimal high rise buildings. We do not support additional housing in the area.	Yes	I need to be involved in every step of the process and decision making	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Stephen Nelson				S449-Sainsbury's Hill Lane	No	Response	No	These plans will be bringing high rise buildings to the area which are not keeping with the current structures of the area.	Buildings to be no more than 3 stories tall.	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S449-Sainsbury's Hill Lane	No	No	No	More homes in a heavily built-up area will only contribute to more congestion of traffic and people and the area.	I believe the council should find another location to build that flats.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a network alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Raymond Young				S449-Sainsbury's Hill Lane	No	No	No	The existing services - Schools, Doctors, Hospital can not cope with the existing population, the addition of extra housing will effect the well being and services available to existing residents.	Do NOT provide any additional housing, so the existing services can be improved for the existing residents	No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Andrew Stoddart				S449-Sainsbury's Hill Lane	No	No	No	I strongly object to the proposals. 90 homes on the Sainsbury's site, 25 homes on the library site, 280 homes on the Larkwood site and 90 on the Albert Corner site (485 homes in total) is not being backed up with a corresponding improvement of public services. Clinics and waiting lists for doctors appointments, dentists, schools, social care and hospitals are excessive even before we add the pressure caused by the new occupants of said homes. Another reason for thinking these developments are not sound (and particularly Sainsbury's site development in this case) is that any high rise will severely affect the quality of life of residents on Albert Avenue and Tufford Road. The rear of these properties will be overlooked by the new development. Natural light will be lost and for some of these residents, their back garden is the only outdoor space they can enjoy either due to disability, age etc. I feel the framework and local plan are very sketchy. There is very little detail. For instance, the public transport hub at Albert Crescent is to be relocated... Where? The traffic that would have used Cherrydown Avenue to access the mound? Where does that go? The traffic will undoubtedly increase on Old Church Road and Hill Lane as a result. Another thing that is concerning is that none of these developments have parking included. Now, this may be a very expediency policy but the council can't surely believe that even tenant that get disability moves in, will not own a vehicle. This leads to the problem of where are they going to park? Availability of parking spaces in the surrounding streets is already a big issue. Albert Avenue has a severe parking problem.		No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. -				S449-Sainsbury's Hall Lane	No	No	No	proposed developments would be out of keeping with the area, also no parking provision, and existing residents will be overwhelmed	build homes the same height / provide parking for all new homes / not take away existing parking for residents, as a resident of Chingford, worry about over development	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Ray Anderson				S449-Sainsbury's Hall Lane	No Response	No	No	This a well used supermarket which local people can walk to. For the sake on only 90 homes, why remove such a well used supermarket? With the other plans to run Chingford, where will local residents be able to walk to and shop? As for cycle connections on Hall Lane, where will they go with cars parked both sides and buses?	Leave this space alone, the above proposals are unworkable, unsustainable and will only add to the congestion of the area.	-	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Len Ferguson				S449-Sainsbury's Hall Lane	No	No	No	I've lived in the borough for 89 years and my daughter just told me about the plans, not legal to not let people know.	Everyone that will have lives affected by this should be told. The buildings will dominate the area and harm existing residents sight and life. The existing area has lots of similar housing and it is wrong to propose a high building on their doorstep. I remember Chingford Hall Estate being built and knocked down. How can it be sound to make the same mistake again, there is a duty to taxpayers not to waste their money on flats, no one chooses to live in especially since C-19 and the garage to space these proposals have been updated to reflect the change in mindset Chingford Mount has little notice for people to go to for mental health. Where is speaking to local?	-	-	This response is noted. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.
										No

				S449-Sainsbury's Hall Lane	No Response	No	No Response	My only comment is that the redeveloped site MUST provide a similar retail store as existing plus adequate carparking; the current facility here is very valuable and much used and needed by the local community. We need not only easy access to large stores for food, DIY, white goods, gardening, etc., but small shops that already exist elsewhere in a high street) but also parking to enable taking their bulky shopping home by car- this cannot be easily done by public transport! There should be no significant reduction in retail floorpace or carparking unless absolutely necessary or if the store owner wishes to. Also it can be very difficult and expensive to provide flats above large high warehouse-like stores without noise and pollution problems. Not all sites are suitable for housing and there is no need to dogmatically follow the mantra of providing high density housing at all costs on every development site.	Address the issues raised above			The site allocation requires that commercial floorpace is provided as part of new development. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. All applications will be required to submit a Construction Logistic Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
James King				S448-Sainsbury's Hall Lane	No	No	No	Where is the new school going to be built/can't see any details for an extra doctor's surgery seems like a lot of new homes without a mention where all the cars will be parked	Houses to be built to the same as existing houses in the area. No provision for schools, doctors and dentists. There has been no public consultation.	Yes	To keep the council accountable	The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S448-Sainsbury's Hall Lane					Probably does comply with Local Plan but that doesn't make it conducive to the needs of residents already living in the area. I can't remember seeing a copy of the Local Plan. Was this featured in the WF Labour manifesto?			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
				S448-Sainsbury's Hall Lane	No	No	No	I thought that each area was represented with a plan that had been approved locally by the residents				The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. George Stylt				S448-Sainsbury's Hall Lane	No Response	No	No Response	If people can't drive to the town center, how are shops going to survive? Why so many flats? How about family houses or don't families matter to the whole Labour Council?				The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
S. Binwari				S449-Sainsbury's Hill Lane	No	No	The big shops that draw people to the high road and keep people from driving to local shopping centres have been left out of the assets, these include Sainsbury's, Sainsbury's, Sainsbury's and Iceland. The high road has already lost many of the banks that were located here and were strong assets as they drew people to access the facilities. Therefore these shops need to be prioritised to ensure Chingford Mount remains a local community high road that is used and of benefit to local people. These shops also draw people to the areas who then access the cafe's, restaurants and coffee shops. Reducing amenities to draw people away from the high road will have a detrimental effect on the local community, the sense of belonging and community spirit.				The Council sets out its strategy for managing change in the Borough's Town Centre, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Valen Ejanu				S449-Sainsbury's Hill Lane	No	No	This proposal will totally block all natural light to my property and will completely overshadow my property and garden, resulting in a complete loss of privacy, also this is the only car park in south chingford for shoppers	leave the site as it is if there is no type of housing development on this site that would not cause overshadowing and loss of privacy	No	we all want to be involved... this is our life!	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Vicki Beaver				S449-Sainsbury's Hill Lane	No	No	No facilities for increased police, schools, healthcare, car parking suitable retail outlets.	Healthcare facilities, Parking	No		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Paul Leaky				S449-Sainsbury's Hill Lane	No	No	leave it alone. Chingford does not need new flats. There isn't enough room for new builds		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
				S449-Sainsbury's Hill Lane	No	No	The Plan makes the area more dense (already high density), adds to lack of quality of life for those already here, discriminates against those with disabilities in breach of the DDA 1995 owned by the Council's anti-car policy, adds to stress for residents who have problems with parking and traffic issues in local roads and adds to pollution with the imposition of high rise buildings, adding light and an even more run down feel to the area. The Consultation process has been unfairly conducted and not listened to local views. It has not been publicised effectively for those not on line and has appeared to take non responses as being in favour of the plans. The deadline were requested to be extended but this has not been by much and only grudgingly. Any public meetings have been on Zoom (obviously because of the Pandemic) but not everyone is aware and many are without IT capability (particularly elderly people). Two residents had to publicise the consultation deadline themselves at their own expense, which is totally unacceptable and the Council's leaflet in early January 2022 was never delivered to all properties 1 mile radius of the Mount, which is regrettable and appears deliberate.	Utilisation of the vacant land by Dalby Bird shoes and at the junction of Highams Park Avenue and Chingford Mount Road and a more modified new use of site whilst accepting the need for improved cycling and walking. To remove the discriminatory imposition against those who are elderly or with mobility issues, who need a car. Also an acceptance that some form of car parking is required for any new properties in future, which will help those already affected by car parking issues and starting up to the Mayor of London in this matter (he imposes his anti-car views too)			As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. With regards to disabled parking bays, there will be spaces provided, the detail of which would be finalised as part of the planning application process.
Harriet Simmons				S449-Sainsbury's Hill Lane	No	No	The plan is too vague, so unable to comment on something which doesn't provide enough detail.	Build homes no higher than existing buildings. Ensure there is enough provision of statutory services, e.g., healthcare, education, parking etc.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D5. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Robert Deering				S449-Sainsbury's Hill Lane	No	No	No	The Sainsbury's is at the western approach to Chisford Mount not the eastern, as you suggest. The planned shopping outlets will not have room to replace the existing supermarket and will thus fail to fulfil the needs of the local population, especially with the hundreds of new homes planned. The existing transport facilities will have no room to successfully operate. The only space available for 90 homes is to build upwards. This 'tower block' will spoil the character of the area, transforming it from a pleasant suburb, to an inner city environment.	1) Reduce the amount of homes to be built to a level requiring a maximum of four stories, more in line with the local vernacular. 2) Maintain the local supermarket, especially as older residents rely on this facility. 3) Public transport facilities need to be planned with great care, as their use and area requirement will increase in the future. Cramping buses into the Sainsbury's site along with homes and shops is doomed to failure.	Yes	I would like to participate in the decisions taken in the development of the town where I live.	The site allocation requires that commercial floorspace is provided as part of new development. The Local Plan requires a character-led approach to reurbanisation, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2016).
				S449-Sainsbury's Hill Lane	No	No	No	No disability access		Yes		The Local Plan contains requirements for access in Policy 36 - Accessible and Adaptable Housing. This sets out that all newly built self-contained homes are to be accessible and adaptable in line with Building Regulation M4(2); and a minimum of 10% of new-built, self-contained homes are to be suitable for occupation by a wheelchair user or easily adapted for occupation by a wheelchair user in accordance with Building Regulation M4(3). This will be applied to the site allocations and ensure that they contribute to meeting housing needs.
T Durby				S449-Sainsbury's Hill Lane	No Response	No	No	This will take away the only supermarket within walking distance for thousands of local residents. Bearing in mind that the nearby island is also slated for re-development. Where are all these new residents going to buy food? Local GP surgeries are already swamped, where are all these new residents going for medical care?	Keep space for two supermarkets (to enable competition) as currently exist.	No		The Local Plan states that the loss of existing local or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Antonios Zeakis				S449-Sainsbury's Hill Lane	No	No	No	The area is going to lose this little parking facility that exists in Chisford. Ground is not enough to alter the face of this community.		No	I wish to be rejected altogether.	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Sada				S449-Sainsbury's Hill Lane	No	No	No	No consideration has been given for additional parking infrastructure. The area is congested already and by removing parking facilities, residents will not be able to shop freely.		No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Karen Muggl				S449-Sainsbury's Hal Lane	No	No	No	<p>Dear Sirs</p> <p>Contrary to the assurances of the Council, most people in the vicinity of Chingford Mount did not receive a leaflet about the Consultations in January. We have a Facebook group of over 760 members where this has been confirmed.</p> <p>The Council assure me that they have ticked all the boxes in advising residents about the Consultations but they have only advised people online. We had no public meeting. We had a Zoom meeting where Sarah Parsons answered questions so quickly to a pre-emailed list of questions from our Facebook group representatives, and no one could understand the answers. LBHF even refused to give us the promised meeting transcript, merely the "chat transcript. Obviously this did not answer our questions.</p> <p>The Zoom meeting capacity had to be increased but by the time it was, many residents could not get the link to join the meeting in time.</p> <p>LBHF insist they had public engagements to advise locals of their plans but Lady this was not the reality.</p> <p>Two Council representatives stood outside 228 Chingford Mount Road, subsequently moving on to Albert Crescent. They had nothing to make people aware of who they were apart from leaflets, but one of the women had her umbrella over her head. There were no posters to advise who they were or what they were doing. A tiny advertisement on the Council website was all that advised residents but nothing for those not online. There was no gasbo and the leaflets were advertising that day event. Booklets were "apparently" available at Age Concern and 228 Chingford Mount Road but no one not online would have known. Posters have been displayed in the windows of 228 and the Community Library but the plans are too small.</p>	<p>No flats above height if existing existing buildings.</p> <p>Parking provision must be provided.</p> <p>No flats to overlook existing residents.</p> <p>Retail to remain same size as existing shop.</p>	No	-	This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.
Glynis Devlin				S449-Sainsbury's Hal Lane	No	No	No	<p>Not all residents were aware of these plans therefore not enough effort was made to offer people the opportunity to respond. Plans are not specific enough to give a clear response. I had comment on what I had the situation to be. Chingford Mount does not need a further 90 homes on this site, plus plans for the other two sites only partly apart and where are the plans for parking on this site? This is a sub-urban area, not a town or city and already has a healthy population. Any efforts to expand that population would lead to overpopulation, which in turn leads to more crime, parking issues and more traffic congestion. Sainsbury's has long supported the local community. It is a very busy supermarket and has easy access for local elderly and disabled residents who are unable to drive or take public transport. Where are the plans for additional services, such as healthcare, including social services and schools? We do not want high-rise buildings as they would not be in keeping with the area, would alter the skyline and devalue property. Residents do not want to be looking out at a tower block. Tower blocks only blend in with many other tower blocks.</p>	<p>Leave Sainsbury's where it is. Look for another site where you can build appropriately and not impinge on the local shopping area and current community.</p>	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Gary Tatham				S449-Sainsbury's Hal Lane	Yes	No	No	<p>Chingford Mount does not need more blocks of multi use buildings. It still needs a supermarket and a carpark if you intend to change the shape of Old Church Rd</p> <p>The council did not own enough properties in the town centre to make a significant difference to the public realm.</p> <p>Where is there space in the town centre for green amenity and play space if you intend on building on all the land you own.</p>	<p>Leave the site as it stands</p>	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Nils Smith				S449-Sainsbury's Hal Lane	No	No	No	<p>How can it be legally compliant to built multiple properties in an area that has a shortage of GP practices NHS dentist place and school places? How have we not had proper consultation about this planning all we have had a zoom meeting this is totally unacceptable for the local people to voice their views and opinions.</p>		No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. This response is noted.
-				S449-Sainsbury's Hal Lane	No	No	No	<p>leave us alone and stop trying to build more and more houses, we are over crowded our schools, doctors, dentists and roads are a mess already</p>		No	-	The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Mark Miller				S449-Sainsbury's Hal Lane	No	No	No	<p>Creation of unemployment if area is taken up by flats, where would older generation shop?</p>	<p>Leave it as it is, as Sainsbury's.</p>	No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.

A)				S449-Sainsbury's Hat Lane	No	No	No	We locals need Sainsbury's at Chingford mound. The elderly & car less people rely on this wonderful shop. Take it away & you are taking the heart of Chingford mound away.		No		*
				S449-Sainsbury's Hat Lane	Yes	Yes	Yes					*
Tracey Gaud				S449-Sainsbury's Hat Lane	No	No	No	90 homes in this cramped space with no parking and no extension to houses for schools (which are already full) and GP surgeries (where they are so stretched you have to wait weeks to be seen) in proportion. There are already a lack of street parking for shoppers and now you wish to take away the last remaining "car park" we have. Adapting everything for cycling etc does not help those in the older demographic who cannot cycle because of disability or age and actually takes their parking spaces as they have to drive with shopping.	Do not knock down the library and consider getting the shops locally housed out rather than build more. Chingford area's shops look unightly and they are all closed. Why build more? And as for the houses for more people, by getting a doctors appointment, they are already over stretched. As for the legal organ of asking people all these questions, we have to live with these decisions and ones like the no right turns effect us every day, yet those who make the decisions and back the choices don't live here or have to put up with these schemes.	No		*
T Gaud				S450 - Former Church Chingford Library	No	No	No	Throughout Waltham Forest you are building taller and taller buildings with no parking facility. You are also creating more shops. Because your rates are too high most of the shops at the mound are empty already. Who are going to rent these shops? Or will they be empty too. The library building is part of the heritage in Chingford and should not be knocked down. In Chingford the schools are full, the GP's struggling, transport links are not sufficient to take this kind of wealth of people. And by taking more and more of the skyline you are destroying what is a green, open air and village feel for this part of the borough. For years you have treated Chingford like an afterthought with little spent on us compared to the 'poorer' parts of Waltham Forest, yet now you have run out of places to build you are keen to just build them high and pack people in tight. Everything is under too much strain already. Try building the resources first, including a hospital that we don't have to pay £1.50 a day to visit and then think of some sensible lower buildings rather than this.	Do not knock down the library and consider getting the shops locally housed out rather than build more. Chingford area's shops look unightly and they are all closed. Why build more? And as for the houses for more people, by getting a doctors appointment, they are already over stretched. As for the legal organ of asking people all these questions, we have to live with these decisions and ones like the no right turns effect us every day, yet those who make the decisions and back the choices don't live here or have to put up with these schemes.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required in some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Terry Milnes				S40 - Former South Chingford Library	No	No	No	<p>1. Has the Plan been 'positively prepared'? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs; and informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;</p> <p>No as SWF should be seeking to preserve the 'Local Character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of north Essex at the very edge of London - the gateway to Esping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter's St Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were not being ignored.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 244) states 2,600 new homes over 20 years and SWF is proposing 27,000 new homes by 2035 - a very significant excess of 25% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space?</p> <p>Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats - the pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Witham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that a balance of houses is provided.</p> <p>Chingford Green is a conservation area. There are no high rise properties. The existing building should be updated to meet any health and safety or disability requirements. There isn't a need for another café within the library. There are already numerous cafés within metres of the library, many of which have facilities for disabled. There isn't the infrastructure in place for increasing the population in the North part of the Borough. Doctors, school places, hospital waiting lists. Parking. Chingford is a suburb of London not an urban setting with high rise buildings and built up area. That is part of its charm why people want to live there or visit. Additional people will bring additional cars to the borough, causing congestion and pollution. There will not be 25 parking spaces allocated to these flats with electric charging points.</p>		No	no one is listening to the residents of Chingford.!!	<p>The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>Through the evidence published in the Characterisation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Witham Forest of 2,600 new homes (260 per year) based on a London-wide assessment of capacity/available sites in 2021/22. The original draft London Plan figure was equivalent to approx. 2,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,610 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low cost rented, and which are to be intermediate and the expected mix of uses. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Aime Parry				S40 - Former South Chingford Library	No	No	No	<p>Chingford Green is a conservation area. There are no high rise properties. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>In April 2020, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage of a specific measure.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Witham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collection and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and to best generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies significantly reduce vehicle traffic across the borough.</p>	
Valen Ejure				S40 - Former South Chingford Library	No	No	No	<p>The plan is seeking to build more homes than required by the London Plan.</p> <p>To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause "burnt" the area. This means the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.</p> <p>These proposed developments cannot be delivered with policy compliant levels of affordable housing.</p> <p>Without parking these proposed developments will disadvantage older people.</p> <p>The Consultation is flawed as non online residents have not had a chance to comment as they received no notices advising of the plans. There has been no public meeting.</p>	<p>DONT WANT THIS SITE DEVELOPED AT ALL we will lose age uk while its being built, which is a lifeline for older and disabled local residents who cannot travel should our wishes be ignored. Even any building would have to be...no high rise, no over-looking/over-shadowing existing homes, provide parking for ALL new residents, plus retain the existing local infrastructure.</p> <p>provide additional doctors, hospitals, dentists and schools etc, all for all new residents.</p>	we all want to be involved... this is our life!	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. This character led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>This response is noted.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>	
Ian McGill				S40 - Former South Chingford Library	No	No	No	<p>I feel that the Site Allocation Consultation is not legally compliant, not sound and does not comply with the duty to cooperate.</p> <p>This is in strong opposition to the proposed development on the former South Chingford Library site.</p> <p>To achieve the number of homes planned to be built on this site, the only way of fitting them in each area would be to go up in the air with high rise!</p> <p>Please only rebuild this site with a sympathetic design to their current or once old library building.</p> <p>This form of housing is totally out of keeping with the existing character of the area and will cause 'harm' to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. Without parking for the residents of these proposed developments this will cause massive parking issues in already very limited street parking around residential Chingford Mount and would disadvantage older people.</p> <p>If the 25 homes at this site are built then residents of Marston Avenue and Hill Lane will be extremely adversely affected. By building 25 flats on this site, obviously upwards of five plus storeys, would completely deny residents' way of life. Sitting in the garden would be a thing of the past.</p> <p>These proposed developments cannot be delivered with policy compliant levels of affordable housing.</p> <p>Once these homes are built there are extra doctors, dentists, hospitals, dentists and schools or just hollow promises to do so?</p> <p>Chingford Hall Estate was demolished in 1997, this was a High Rise</p>	<p>Please only build homes to the height of existing buildings and no higher and provide parking for any new residents. Infrastructure should be provided for any new flats as being to get a doctor/mental appointment is extremely difficult. With so many new homes our local hospitals, schools and nurseries will be massively required, making things even worse for existing residents.</p> <p>Please only rebuild this site with a sympathetic design to their current or once old library building.</p>	No	<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> •Research/ fact finding: the choices made in the plan are backed up by facts. •Balance of participation of the local community and others having a stake in the area, and •The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> •Sound infrastructure delivery planning. •Being no regulatory or national planning barriers to delivery. •Delivery partners who are signed up to it and • coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p>

Anthony G Thomas	Thames Lip			S40 - Former South Chingford Library	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply (being The Town and Country Planning (Local Planning) (England) Regulations 2012).</p> <p>10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must:</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 25, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 24(1).</p> <p>11.7(a) A local planning authority must:</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(A) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan,</p> <p>(B) such of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan,</p> <p>(C) the following:</p> <p>1. There is no content for legal compliance provided on this online consultation. It is therefore impossible for any consulted to provide an informed response to this question.</p> <p>2. Since the legal compliance criteria are not obviously available it is difficult to see how anybody can cooperate, or indeed whether they have been consulted appropriately in a legal sense.</p> <p>3. A number of online meetings have taken place about the Local Plan but it is not clear how residents have been made aware of these meetings, and indeed the whole consultation process, and whether statutory consulted and business owners have been contacted independently.</p> <p>4. From the perspective of somebody who attended several meetings related to the "plan" it was evident in many cases that the majority of those who spoke misunderstood the purpose of some meetings, complaining about tall buildings, cyclists, and other issues rather than listening to what was being said on the plans, this made the job of officers difficult.</p> <p>5. Some meetings, legal status uncertain, were run like political rallies designed to attract votes rather than to provide understanding of the planning consultation process and the national policy guidelines driving it.</p> <p>6. Lack of understanding of the consultation process is reflected in comments on this and other sites which it is evident those commenting are expressing general frustration at their voices not being heard, hence comment on the Edmonson incident etc, clearly not relevant to this site.</p> <p>7. It is unclear why the site is not extended to the west where there is some kind of shed probability on communal land.</p> <p>8. It is unclear what level of new homes are envisaged but the site constraints suggest this can only be achieved by building tall on a very narrow site. Tall buildings have made the rest of the character with the general height of buildings.</p> <p>9. The background documentation to the 2020-2035 plan recognises the importance of unlit buildings in their contribution to the character of an area. The former South Chingford Library building must fall into such a category as one of the few architect designed buildings in the north of the Borough but there seems no recognition of this in the summary.</p> <p>10. The Borough plan refers in many places to a 15 minute city yet the facilities formerly provided on this site is adult education and a Borough library are unavailable to local residents in that time frame. Their provision should be a priority in the plan.</p> <p>11. The notion this site can of itself provide a convenient ending of walking routes for pedestrians and cyclists from Albert Cooper to Meridian Water seems unrealistic. Logical east west routes lie to the north and south of this site.</p> <p>12. Currently this site is separate from the main retail centre at Chingford Meadows, interweaving housing is not included as a development site yet the introductory statement suggests it can contribute to high street activity. Whilst this might be true if it housed a library or other cultural activity, it is difficult to envisage this in this document.</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonson Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these points will be removed do they have any doubts or will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LLEZE zone and development of the road meaning those will be the first area to pick up the extra CO2 and NO2 from vehicles avoiding the LLEZE charge. But the rest of the area will also subject to these increases and the proposed speed the natural air flows possibly result in pockets with even a higher concentration.</p> <p>Walham Forests current population density is far to high, and as such we have seen significant increases in social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estates where the 1960's tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density used to be high infant mortality, low life expectancy, crime, what we now know as anti-social behaviour, and mental health problems. In this it was realised in the 1930's that people needed space and New Towns were built to reduce the population density.</p> <p>It is a priority responsibility to ensure that the site provides an eastern gateway to the town centre as it is located to the west of Chingford Mount.</p> <p>12. The site boundary encompasses an area to the east which is almost entirely unsuitable for development due to the presence of underground services. If this were not the case the fly-tipping waste would have ended up along Hall Lane.</p>	Yes	<p>Because there are too many unanswered questions.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a network of alternative, congestion, parking problems and improve air quality. Additionally, Walham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connectors must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>	
Mike Chrimes				S40 - Former South Chingford Library	No	No	No	<p>1. There is no content for legal compliance provided on this online consultation. It is therefore impossible for any consulted to provide an informed response to this question.</p> <p>2. Since the legal compliance criteria are not obviously available it is difficult to see how anybody can cooperate, or indeed whether they have been consulted appropriately in a legal sense.</p> <p>3. A number of online meetings have taken place about the Local Plan but it is not clear how residents have been made aware of these meetings, and indeed the whole consultation process, and whether statutory consulted and business owners have been contacted independently.</p> <p>4. From the perspective of somebody who attended several meetings related to the "plan" it was evident in many cases that the majority of those who spoke misunderstood the purpose of some meetings, complaining about tall buildings, cyclists, and other issues rather than listening to what was being said on the plans, this made the job of officers difficult.</p> <p>5. Some meetings, legal status uncertain, were run like political rallies designed to attract votes rather than to provide understanding of the planning consultation process and the national policy guidelines driving it.</p> <p>6. Lack of understanding of the consultation process is reflected in comments on this and other sites which it is evident those commenting are expressing general frustration at their voices not being heard, hence comment on the Edmonson incident etc, clearly not relevant to this site.</p> <p>7. It is unclear why the site is not extended to the west where there is some kind of shed probability on communal land.</p> <p>8. It is unclear what level of new homes are envisaged but the site constraints suggest this can only be achieved by building tall on a very narrow site. Tall buildings have made the rest of the character with the general height of buildings.</p> <p>9. The background documentation to the 2020-2035 plan recognises the importance of unlit buildings in their contribution to the character of an area. The former South Chingford Library building must fall into such a category as one of the few architect designed buildings in the north of the Borough but there seems no recognition of this in the summary.</p> <p>10. The Borough plan refers in many places to a 15 minute city yet the facilities formerly provided on this site is adult education and a Borough library are unavailable to local residents in that time frame. Their provision should be a priority in the plan.</p> <p>11. The notion this site can of itself provide a convenient ending of walking routes for pedestrians and cyclists from Albert Cooper to Meridian Water seems unrealistic. Logical east west routes lie to the north and south of this site.</p> <p>12. Currently this site is separate from the main retail centre at Chingford Meadows, interweaving housing is not included as a development site yet the introductory statement suggests it can contribute to high street activity. Whilst this might be true if it housed a library or other cultural activity, it is difficult to envisage this in this document.</p>	<p>Build homes to height of existing buildings only, provide parking, healthcare, education, etc.</p> <p>Chingford is not a high rise area and does not have the transport links to support it.</p> <p>How will the people get around? The roads are completely choked, no side buses are overrunning, often have to sit in a slow pass because they are full (pre-pandemic which is what you need to compare with) and at the times we need to travel into work. At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider squeezing more people into an already vastly over populated area?</p>	Yes	<p>I do not feel the online consultations enabled respondents to participate fully in the time frame allowed.</p> <p>The approach to appointing growth has been to weight the allocation of the target of 27,000 new homes according to identified capacity. This has been updated in light of the most recently submitted evidence as part of stage 2 of the Examination.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Information Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development via infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. There was a spike in the number of Covid-19 cases around the Local Plan consultation period, as such it was decided to hold the meetings online for the safety of our residents and council officers.</p>	
Gary Bagley				S40 - Former South Chingford Library	No	No	No	<p>Proposal is out of keeping with the area and cannot be delivered with policy compliant levels of affordable housing. There is no parking provision and it will disadvantage other people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overwhelmed, with a loss of privacy, daylight/bright light also there will be an additional demand for parking. The consultation is flawed, as no matters / public meeting to advise residents, only an online Zoom meeting. There is also a shortage of doctors, hospitals, dentists, schools, etc.</p>	<p>Build homes to height of existing buildings only, provide parking, healthcare, education, etc.</p> <p>Chingford is not a high rise area and does not have the transport links to support it.</p> <p>How will the people get around? Barbara Gurhan				S40 - Former South Chingford Library	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing. Chingford Mount is low rise area and proposed high rises will be ruining existing village feel and look. There is no provision for parking and a residential council area to reduce car use but living in Chingford Mount for past 11 years would be impossible without a car, for example to drive my children to gymnastic classes in Langdon public transport (buses) each week. I drive to schools in Swantonville (no bus route, location is beyond 215), many birthday parties my children attended were outside of this area where I couldn't get to if I didn't have access to car. One of the reasons why people move to Chingford because of its access to M40 and M25. Hence why area has so many residents who are tradesmen and need car to carry tools, materials to do their job. Current plans don't include any provision for schools or doctor surgeries, we already have long wait times for doctor appointments, not to mention laboratory appointments (minimum 14 day wait).	New developments should be reduced in height to fit into the area, building houses should be considered as these are preferred by families. Make provision for parking, doctors, school and community centre for youth.	Yes		<p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Les Ashby				S40 - Former South Chingford Library	No	No	No	<p>This letter is in strong opposition, specifically but not exclusively, to LBWP's 4 proposed development sites around Chingford Mount.</p> <p>1. Up to 90 new homes on Sainsbury and Council car park. 2. Up to 90 new homes on Albert Corner. 3. Up to 25 new homes on former South Chingford Library. 4. Up to 280 new homes on Larkwood Leisure Centre & Nursery site.</p> <p>Whilst we are not totally against development, progress and more homes in the area, these should not compromise other established residents. The proposed developments would be out of keeping with the surroundings. Also this cannot be delivered with policy compliant levels of affordable housing.</p> <p>If these flats are to be built they should be no more than 3 stories. Any higher would be out of character with the area and would definitely disadvantage existing residents whose properties will be overlooked.</p> <p>Parking for cars has already reached a desperate level in Chingford despite many households being forced into forsaking their front gardens and going to the expense of paying for a drop kerb driveway. Any new build in the area must therefore provide suitable parking for these new dwellings. To not provide this facility will, without doubt, cause massive parking issues with the already very limited street parking around residential Chingford Mount.</p> <p>Whilst we appreciate reducing car ownership is something London is eager to achieve, many of the older residents around Chingford Mount may not be able to cycle or walk too far and rely on their cars to get around.</p>	<p>Build to max 3 stories Provide ample parking Provide expanded infrastructure to cope with expanded population</p>			<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 23,666 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/28. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 6,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Terezaoufouer				S40 - Former South Chingford Library	No	No	No	<p>There has been a total lack of consultation re this project, there has been no information distributed. Residents shouldn't find out that such large projects are happening from other residents. The plans for the number of homes can only mean the project will be a high rise and look out of place and will look a great many homes putting many residential properties in shade. There appears to be no provision for an extra GP practice, additional school places, parking etc.</p>	<p>Keep any new housing projects in line with the existing housing stock.</p>		Residents need to be involved	<p>This document was consulted on at its draft stage between October and December 2020. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP and healthcare facilities.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>This response is noted.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>This response is noted.</p>
				S40 - Former South Chingford Library	No	No	No	<p>By removing Sainsbury's and Iceland you are taking away the two main food shops that older people use which means they have to travel further to do their shopping, taking away car parking so older people who cannot ride a bike or walk will be disadvantaged also there are too many flats being built in with nowhere everywhere you look to high rise being built its turning our borough into a concrete jungle, and by making it cycle and walking friendly you are alienating older more vulnerable people</p>		Yes		<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Lloyd Parkinson				S40 - Former South Chingford Library	No	No	No	<p>Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public/online meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.</p>	<p>Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.</p>		Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Karen Nash				S40 - Former South Chingford Library	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.	No	-	The engagement meetings were held online to protect our residents and council officers during a spike in the number of Covid-19 cases at the time. There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. This response is noted.
Stephen Tyler				S40 - Former South Chingford Library	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. Vahen Ejaru				S400 - Former South Chingford Library	No	No	No	Its totally out of character for the area and it would be awful to lose this lovely building. A high rise here would cause overshadowing, loss of privacy and loss of light for all surrounding properties, including my own.	Leave it alone or keep the facade and develop the rest with a maximum of 2 storeys, with parking for ALI homes and increased capacity at the local GP/health etc.	No	We all want to be involved... this is our life!	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
A)				S400 - Former South Chingford Library	No	No	No	It's not flat on this small area as indicated. We need this site for the local people of Chingford. We have nowhere for the elderly to go for clubs & nothing for the teenagers. This site would be perfect for both..	Leave Chingford alone	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
-				S400 - Former South Chingford Library	No	No	No	Leaflet distribution informing local residents of the plan have not been received in many of the streets within 1 mile of Chingford Mount. Only those with the ability to use a computer have the ability to respond. No ability to comment on what additional infrastructure would support the number of residential dwellings proposed.	A public meeting to address residents issues. Re: leaflet all streets in the local area. Enable postal responses.	No	-	This response is noted. This document was published for consultation at Draft Stage between September and December 2020. This consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.
Jaime				S400 - Former South Chingford Library	No	Response	No	This will lead to overcrowding and pressure on local resources that are already over capacity. Chingford has a strong sense of community and such substantial change as proposed across these three sites will be detrimental to this. Any change of purpose and implementation of residential dwelling should be within the existing space of the building and not involve any expansion. High buildings are not in keeping with this area which is primarily made up of two storey residential houses. More common to spaces would be very much welcomed and the potential to reinstate the library, use this for community services such as health visiting, district nursing, childrens centre, a local hall that local people can use for sales, exercise classes, private hire etc, etc	Any change of purpose and implementation of residential dwelling should be within the existing space of the building and not involve any expansion. High buildings are not in keeping with this area which is primarily made up of two storey residential houses.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
Paul Wellard				S400 - Former South Chingford Library	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low-rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and school provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	No	-	Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Anthony G Thomas	Chingford Library			S40 - Former South Chingford Library	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>19. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must:</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 34(1).</p> <p>18.7(a) A local planning authority must:</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the preparation of a local plan which the local planning authority propose to prepare, and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(A) such of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan,</p> <p>(B) People have not been advised by the Council of the proposals. The height of the building should be no higher than the existing building. The old library should remain as the building has local character and should not be demolished to make way for cheap flats. Local residents would lose their privacy, affecting their mental health. Your proposals are destroying the character of South Chingford. It would be better for this building to serve the local community.</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these flats will be removed I do have my doubts or will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LLEZ zone and development of the road meaning those will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LLEZ charge. But the rest of the area will also be subject to these increases and the proposed quiet the natural air flow possibly result in pockets with even a higher r concentrations.</p> <p>Witham Forests current population density is far to high, and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960s tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density used to be high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In this it was realised in the 1920s that people needed space and New Towns were built with the same principles in mind. The old 1960s tower block was demolished because of the same reasons. The current building is too character and should be refurbished to keep its existing features. We do not want cheap flats on this site. Local residents would lose privacy and their mental health would be affected.</p>		<p>Because there are too many unwise/unused qu</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Witham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connectors must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L356 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
Delrose Khan	Chingford Library			S40 - Former South Chingford Library	No	No	No	<p>People have not been advised by the Council of the proposals. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p>
-	Chingford Library			S40 - Former South Chingford Library	No	No	No	<p>This library is a beautiful building and example of 1930s architecture and doesn't need to be bulldozed down. Why on earth should we lose a library that was put there for the benefit of people's learning? To put houses on this site is a disgrace and harms local people's way of life. How on earth can that be legal or whatever way you wish to word these things. We don't have the infrastructure for more homes so how on earth can that be highly correct? awful idea of council to ruin this area.</p>	<p>This building should be preserved for Chingford and retained as a library. You should keep off of trying to change it or build more homes on it.</p>	Yes	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
	Chingford Library			S40 - Former South Chingford Library	No	No	No	<p>out of keeping with the area - no parking provision</p>	<p>Build homes to height of existing and provide parking not take it away</p>		-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Isabella Annis Tyler	Chingford Library			S40 - Former South Chingford Library	No	No	No	<p>Proposed development out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-sited, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.</p>	<p>Build homes to height of existing buildings, provide parking, healthcare, education, etc.</p>		-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. If yes, please explain why?	Council's response
Vales Ejaru				S40 - Former South Chingford Library	No	No	No	It is totally not of character for the area and it would be awful to lose this lovely building. A high rise here would cause overshadowing, loss of privacy and loss of light for all surrounding properties, including my own.	Leave it alone or keep the facade and develop the rest with a maximum of 2 storeys, with carparking for ALI homes and increased capacity at the local GP/schools etc.	No	We all want to be involved... this is our life!	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Ray Voller				S40 - Former South Chingford Library	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-loaded and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling - ie doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no hallfests or public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to 'N' residents/ Stop removing the few amenities that we have in Chingford!	No	-	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
-				S40 - Former South Chingford Library	No	No	No	It's hard to get to GP, services overcrowded, traffic is terrible, with no parking it will be worse.		No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local plan directs planned growth to be primarily under- utilised and to be based to generate high numbers of private car/motorist vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Mary Pickering				S40 - Former South Chingford Library	No	No	No	The proposed plan does not set out categorically exactly what community services will be there. The current site looks to address and meet large groups of service users particularly the elderly and the vulnerable. Costs to service users are affordable. This centre has gone a long way to promote health and well being and to reduce isolation. There is no mention whatsoever what happens to existing community services whilst the building work is going on. It does seem as if the proposed plans do not focus on building a strong and well community. I get a sense of feeling that we as a community has to fit in with the plans rather than for any proposed plans to meet the needs of the community.	It is safe and sound practice to constantly build large numbers of homes without first ensuring that the infrastructure is in place to give transport links, proper parking for residents, visitors and people with disabilities, adequate nursery, primary & secondary school provision with further education (training colleges, maternal and child health services, GP practices, dentists, youth services, services for the elderly and disabled, etc.	No	Essential that public is fully consulted and that information is readily and easily accessible to the whole community.	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Clifford Gray				S40 - Former South Chingford Library	No	No	No	This area is not suitable for new housing. It is too close to existing properties and will affect the lives of existing residents by being overly involved meaning loss of privacy and affecting the value of the surrounding properties. It will also increase the demand for parking.	The property should be updated to have a new library with facilities for Age Concern with a hub for Senior Citizens. Also a revamp of the existing garden and seating.	Yes	I do not agree with the proposed plans as they not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
										Yes

The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
				S40 - Former South Chingford Library	No	No	No	This development will cause the local area to be overcrowded and neighbouring properties will be extensively overlooked by a new development. The area surrounding is already very congested and local services /schools will be overly subscribed.	Better use of the library to be restored and renovated so the local community can use it.			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a band of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,600 new homes (1,260 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Balrooz Khan				S40 - Former South Chingford Library	No	No	No	This proposal would cause overcrowding in an area where it is already congested and heavily populated. The development would block light and overlook neighbouring properties. Local services such as doctors, dentists, schools are already over subscribed and increasing housing in the area would cause heavier burden on local services so proposals do not make provisions for this. Existing property value would also decrease. Level of crime would be increased by higher population in the area and social surroundings.	There is nothing that would make this proposal compliant for the reasons outlined above. It would be better for the existing building to be renovated for the local area to use again as a library or community centre.	Yes	As it directly affects my property	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a band of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Jan Magill				S40 - Former South Chingford Library	No	No	No	I believe there is a requirement not to cause harm to the amenity of existing residents. Properties in local area will be dominated by this development being a few metres from the rear boundary with overlooking and loss of privacy.	I believe there is a requirement not to cause harm to the amenity of existing residents. Properties in the local area will be dominated by this development being a few metres from the rear boundary with overlooking and loss of privacy.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Karen Magill				S40 - Former South Chingford Library	No	No	No	There is a general requirement not to cause "harm" to the amenity of existing residents. Local properties will be dominated by this development a few metres from their rear boundary with over-looking and attendant loss of privacy.	There is a general requirement not to cause "harm" to the amenity of existing residents. Local properties will be dominated by this development a few metres from their rear boundary with over-looking and attendant loss of privacy.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
R Stoddart Esq				S40 - Former South Chingford Library	No	No	No	People have not been advised by the Council of the proposals. The height of the building should be no higher than the existing building. The old library should remain as the building has local character and should not be demolished to make way for cheap flats. Local residents would lose their privacy, affecting their mental health. Your proposals are destroying the character of Chingford where I have lived all my life! Would you want high rise developments overlooking your garden?	Residents need to be advised by post in plenty of time to comment on the Consultation. The current building has character and should be refurbished to keep its existing features. We do not want cheap flats on this site. Local residents would lose privacy and their mental health would be affected.	No	-	This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. Residents were advised about the consultation through local newspapers.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Kathryn Uman				S40 - Former South Chingford Library	No	No	No	This building was an important community building which was taken over by CBEST. I don't know if they are still there since COVID but they provided a vital service to the community. How can you continually build new homes increasing the local population, and not provide extra facilities and worse still you take away the ones that already exist.	Building should be retained and used for community purposes.	No	No one takes any notice of emails.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
A)				S40 - Former South Chingford Library	No	No	No	How can you even think this is okay to build flats on this site. The ex library should be put back & we also need a place to get advice, a club for the elderly, clubs for kids, young & old. This site would be an ideal. There is nothing in Chingford & taking this away will be taking the heart of Chingford away. The other areas of the borough have everything, Chingford has nothing!!!! When I needed to see someone from the citizens advice bureau, I had to travel to West Hamstead. This is so wrong every area should have somewhere to go to get advice etc. Some people have disabilities etc. & can't travel. I suffer with my physical & mental health & coming out of the area/my comfort zone really makes me poorly.		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Mrs Melanie Bartfield				S40 - Former South Chingford Library	No	No	No	For a start where was your public consultation on this plan? I knew nothing of these plans. Why were the Chingford Mount residents not informed and given the choice to have a say by you sending the details to all the residents? If you build 25 new homes on this site where is the incredibly useful Age Concern currently housed in the library building going to go? There is nothing in the local area for older folk apart from this. It is so important to provide care to face consultations. Are you going to provide parking spaces for all these residents or are they going to have to park on the surrounding streets, which are already crowded? The dentists, doctors, hospitals and schools in the area can barely cope with the population as it is. It is wholly unfair to the local residents to keep providing housing without providing more healthcare providers and schools.	Parking, healthcare, schools and the impact on local residents must be taken into consideration.	No		This response is noted. A draft version of this document was published for consultation between September and December 2020. This consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Deepest Matter				S40 - Former South Chingford Library	No	No	No	Leave Chingford alone!	Leave Chingford alone!	No	No one wants your flats	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Adam Eric				S40 - Former South Chingford Library	No	No	No	It is not clear what is being planned, it is not publicised widely for the local residents' personal and feedback.	Please provide some indication of what is being proposed, how the 25 cars will be fitted, how many floors are being planned, parking and access arrangements for the new residents, the development mixed tenure, what is being proposed for the immediate neighbours who will be affected by construction, access issues for school children who use the footpath...	No	for openness and transparency	This response is noted. This document was published for consultation at Draft Stage between September and December 2020. This consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Nail Hooper				S40 - Former South Chingford Library	No	No	No	Yet again, 25 homes on a plot this size is completely ludicrous. More over crowding. More pressure on the already massively over-subscribed GP services	Reduce the number of homes!	Yes	To ensure residents aren't ignored or usual.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the uptake in the number of Covid-19 cases at the time to protect both our residents and Council Officers. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Kay Anderson				S40 - Former South Chingford Library	No	No	No	We do not have a library in South Chingford? Why is council taking our amenities while improving/ adding to amenities in Walthamstow?	Why is the council building housing in excess of the Mayor of London proposals? Greed maybe?			There is a community library on Old Church Road, Chingford. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
David Freyne				S40 - Former South Chingford Library	No	No	No	The proposal does not factor the significant light and noise pollution that will seriously impact neighbouring buildings. Particularly the grade 2 listed Carbis Cottage which is massively exposed. Additionally, the building threatens to damage the structure of the cottage which is a key building to the heritage of the area.	There should be no windows or balconies to the right of the building that will overlook the neighbouring houses, invading privacy and causing significant light and sound pollution. The physical and mental well being of current residents needs to be centre to the plans. The height of the building needs to be restricted to be in keeping with the heritage area. And a guarantee needs to be made that this will not change during the building process, as has happened with other builds in Waltham Forest. A guarantee needs to be made that the proposed high value fixtures of the exterior architectural plan are binding and will not be replaced with cheaper materials, as has happened with surrounding sites in Waltham Forest. A survey needs to be undertaken to make sure the surrounding buildings will not be structurally undermined, in any way, before any plans moves further.	Yes	As an immediate neighbour to the site I am deeply concerned about how the proposed plans will impact me, particularly the risk of greatly increased light and noise pollution.	In Local Plan Part 1, Policy 72: Designated Heritage Assets: There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings; as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these issues that would lead to either substantial harm or total loss of a designated heritage asset in the borough. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Marilyn Gould				S40 - Former South Chingford Library	No	No	No	The old library building new houses the Age UK Waltham Forest charity which gives valuable help to the older community in Waltham Forest which is important at any time but has been given essential help during the Covid lockdown.		Yes		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Terry Milnes				S40 - Former South Chingford Library	No	No	No	Out of character with surrounding area. Destroys a beautiful building which should be listed. Worthfully inadequate consultation with local residents.	Use existing building for community projects. Youth centre, under 16 facility, sap community services.	No	no one is listening to the residents of Chingford -!	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Paul Leahy				S40 - Former South Chingford Library	No	No	No	leave it alone. Chingford does not need new flats. There isn't enough room for new builds.		Yes		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Veronica Heath				S400 - Former South Chingford Library	No	No	No	Any development should make use of the current building and not be raised to the ground for another box building				The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
-				S400 - Former South Chingford Library	No	No	No	IBEF seem to be deliberately letting perfectly good solid old buildings around the borough run down so they can claim they are not fit for purpose, or too costly to refurbish. Do they ever introduce but characterless steel and glass monstrosities, as has happened in other areas of the borough. Completely changing the character of the areas involved. Are any of these proposals being supported or being put forward by local residents of Chingford/Highams Park areas? Very much doubt it? Are they in fact being proposed by people that do not live within the Chingford/Highams Park areas?	NO COMMENT			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). This response is noted.
John Sadlers				S400 - Former South Chingford Library	No	No	No	Local communication has been very poor this development has not had a proper consultation other residents have been excluded by virtue of its on line nature. New risks comes to mind. The build is of local and historic significance and demolishing it is unnecessary when it could be used to promote local feeling of community	You need to have a property consultation with local residents	Yes	The system needs local input	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers. In addition to this, the council advertised the consultation in the Local Newspaper and throughout the consultation accepted responses by email or post.
Gerry Waitland				S400 - Former South Chingford Library	No	No	No	Buildings not in keeping with local area Not taking local amenities into consideration Not enough spaces in local schools, doctors, hospitals etc to cope with the additional demand the plans to take away amenities such as libraries, gyms etc will ruin the community feel. The lack of amenities will lead to more community problems. The additional homes will also bring additional vehicles. In a time when you are asking for less local traffic. How will this be achieved with all the additional homes??	Reinstate the library as use as a library, community hall, a space that can be enjoyed by all local residents	Yes		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
David Downs				S400 - Former South Chingford Library	Yes	Yes	Yes	The scheme does not depict private vehicle arrangements- how this will be made for up to 50 cars in this space. Please advise.	Identify parking please	No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S400 - Former South Chingford Library	No	No	No	There has been no public meeting, they haven't publicised the consultation enough concentrating mainly on IT communication which excludes many residents, thus discriminating against them, there has been little information in Waltham Forest council news and limited leafleting.	By improving the way the information has been circulated and making the responses easier to make. By making the whole process much easier to understand and respond to.			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
James King				S400 - Former South Chingford Library	No	No	No	No provision for services			To keep the council accountable	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S400 - Former South Chingford Library	No	No	No	Building additional homes will put more pressure on the already over-drafted doctors, schools, etc. Car parking is already a problem and this type of development will only make it worse.	Upgrade the infrastructure before building new homes.			The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
David John Anderson				S400 - Former South Chingford Library	No	No	No	will overlook existing homes	leave alone		simply to judge	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Robert Tatham				S400 - Former South Chingford Library	No	No	No	On page 122 it is stated that, within 800 metres, there are no places of worship, community centres, shop frontages, etc. This seems to me to be the clearest example of where the statements are inaccurate, given the proximity to a town centre and two places of worship - each with community halls.		Yes		The plan will be reviewed for any statements which have been identified to be inaccurate, and updated to reflect the correct position for the submission version.
Antoniou, Zenakis				S400 - Former South Chingford Library	No	No	No			No	I wish to be rejected altogether.	This response is noted.
				S400 - Former South Chingford Library	No	No	No					This response is noted.
				S400 - Former South Chingford Library	No							This response is noted.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S40 - Former South Chingford Library	No	No	No					This response is noted.
				S40 - Former South Chingford Library	No	No	No	LBWF are deliberately letting perfectly good solid old buildings around the borough run down so they can claim they are not fit for purpose, or too costly to refurbish. Are any of these proposals being supported or being put forward by local residents of Chingford/Highams Park areas? Are they in fact being proposed by people that do not live within the Chingford/Highams Park areas?	NO COMMENT			This response is noted.
Tast				S40 - Former South Chingford Library	No Response	No Response	No Response	Officer locking system	Officer locking system			This response is noted.
Mark Shetlgrave				S40 - Former South Chingford Library	Yes	No	Yes	think the library building is of local historical interest and as such should be retained	Convert the old library into flats but keep this historical building.	No	To ensure views of near neighbours are fully taken into consideration	This response is noted.
				S40 - Former South Chingford Library	No	No	No					This response is noted.
				S40 - Former South Chingford Library	No	No	No					This response is noted.
Robert Dearing				S40 - Former South Chingford Library	Yes	Yes	Yes	The current library building was constructed in 1935 and is a key local heritage asset with great cultural significance. The facade of this building should be retained in any development. Age Concern is a key local facility and older residents should be at the top of the priority list in this development. As a former educational establishment the community aspects of this group of buildings must also be given priority.	The housing aspect of this development should prioritise elderly residents.		I would like to participate in the decisions taken in the development of the town where I live.	This comment is noted.
Sarah Rose				S41 - Albert Corner	No Response	No	No	10 homes is too much on this site. I walk past it a lot and believe in order to build 90 new homes they will have to be pretty high, possibly too high to complement the existing area. Nothing is mentioned about parking, or presumably there will be none. This is a very congested area as it is and again, needs more infrastructure and work on traffic rather than new homes and more demand on services and more cars. This area has a lot of pollution. Building ninety new homes who will presumably have say eighty more cars add to this. This is an area where residents are going to be pedestrianised. This is a major vehicle area. There is no road through this development to what is meant by pedestrianisation here? It is not clear what will happen to existing provisions therefore the Superdrug and Iceland. Iceland in particular is a popular and well used store and important to this community.	Build fewer homes. Make sure any new homes have corresponding parking and top up points for electric vehicles. Keep building in the context of current buildings and heights. Build the corresponding infrastructure. This would be a good site for a new doctor's surgery. Actually go door to door around nearby streets so that elderly people's views are taken into account. Make sure that any building work respect and nourish the environment. Yes, trees are always good as long as they won't damage buildings. You talk about building play areas for children. How about dogs' and dog owners' needs? They will need access to open grounds/park/field away from children and general congestion, clearly with their own area.	Yes	No but I imagine some people would.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. In April 2020, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure. The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also ensure new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Terry Milnes				S41 - Albert Corner	No	No	No	1. Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs; and is informed by agreements with other authorities, so that current need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. No as LBWF should be seeking to preserve the 'Local Character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of modest houses at the very edge of London. The gateway to Esping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 1000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.7) 246 states 22,680 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 4,320 over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that		No	no one is listening to the residents of Chingford -!	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of uses. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.

Due to the spike in Covid-19 cases at the time of the consultation, the Council decided to hold all engagement meetings online for the safety of our residents and officers. This document was consulted at a draft stage between October - December 2020 when the Council held in-person engagement events in the South, Central and North parts of the Borough.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local plan directs planned growth to previously developed sites that are currently under-occupied and land to generate high numbers of private car/motorist vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-sapped. Additionally, the Policies in Local Plan Part 2, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p> <p>This response is noted.</p>
Valen Ejarle				S451 - Albert Corner	No	No	No	The plan is seeking to build more homes than required by the London Plan. To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause "harm" (as planning terms) to existing residents in the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. These proposed developments cannot be delivered with policy compliant levels of affordable housing. Without parking these proposed developments will disadvantage older people. The Consultation is flawed as non office residents have not had a chance to comment as they received no bulletins, arising of the plans. There has been no public meeting.	DONT WANT THIS SITE DEVELOPED AT ALL. we will lose character/superior while its being built, and there are no alternatives in the area should ever wish to ignore them any building would have to be...no high rise no overlooking/overhanging existing homes, or overhanging the back of the amount, which is Albert Crescent. To even consider putting up high rise here is UNTHINKABLE. It would ruin whole area. you would need to provide parking for ALL new residents, also provide additional doctors, hospitals, dentists and schools ect. for all new residents.	Yes	we all want to be involved... this is our life!	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Mike Chrimas				S451 - Albert Corner	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with rules that are not transparent to consultees. Consultation on the site allocation LPS element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan LPS for 2020-2026. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political posturing, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, reduced by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from LPS and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1300 homes per White LSPF has a large weighting to (00000), and central government guidance is driving all local authorities to ensure they develop affordable homes. It is clear that all sites selected for housing development in the Borough will meet expressed housing need. More consultation should be undertaken to ensure the needs of all stakeholders build homes to height of existing buildings, provide parking, healthcare, education ect.	With reference to site S451 the chief driver in bullet point order is to provide 90 homes. It is unclear how that many homes can be provided on this site. One choice might be to build high but research shows LPS 2017 high rise buildings energy and density has demonstrated above 6 storey energy use increases difficult to reconcile with the Borough's green policies. While part of the site is derelict and could readily be re-developed, the corner site includes two retail units - Iceland and Superdrug. According to the Alison Young 2013 Retail and Town centres survey 29% of visitors to the Mount had come to shop at Iceland. Loss of this facility might affect footfall at the Mount. The same survey recognises the poor design quality of the Iceland site, but for some reason does not mention the similar poor quality on the opposite corner of New Road. A holistic view would suggest this should be considered at the same time. High quality landmark buildings would be equally important on both corners of this junction. It was clear from the comments observed on the Consultation on this location, and from comments at the online consultations that many residents were concerned about the impact of housing development at this site on parking and public transport demand, as well as on LPS/Local Infrastructure. It was clear from the consultation presentations that it is assumed there is no parking provision for new residents beyond disabled access. Objections that the residents will need private vehicles and therefore close or winding shopping centre or parking, this could possibly be accommodated at the Sainsbury site-but perhaps not if the proposed development takes place there. While a 15 minute city is a laudable aspiration, assuming people will not have a car is a big ask. Moreover residents may want to live in close walking distance and bus journeys to the nearest stations are subject to delays in the rush hour. Moreover residents may want to live in close and comfortable for which a car is essential. The existing cultural centre, which is a key asset of the borough, is also a key asset.	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <ul style="list-style-type: none"> Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: <ul style="list-style-type: none"> Research/ fact finding, the choices made in the plan are based up by facts. Evidence of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: <ul style="list-style-type: none"> Sound infrastructure delivery planning. Mapping on regulatory or national planning barriers to delivery. Delivery partners who are signed up to it, and Alignment with the strategies of neighbouring authorities, including neighbouring marine planning authorities. It is clear that the Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the ODP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. <p>Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs", in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
Susan Marsh				S451 - Albert Corner	No	No	No	Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision. This will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an on zoom meeting. Shortage of doctors, hospitals, dentists, schools ect.	build homes to height of existing buildings, provide parking, healthcare, education ect.	Yes		<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. Jan McGill				S411 - Albert Corner	No	No	No	<p>Feel that the Site Allocation Consultation is not legally compliant, not sound and does not comply with the duty to co-operate.</p> <p>This is in strong opposition to the proposed developments around Albert Corner.</p> <p>To achieve the number of homes planned to be built on this site, the only way of fitting them in each was would be to go up in the air with high rise!</p> <p>This form of housing is totally out of keeping with the existing character of the area and will cause harm to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and from the additional demand for on-street parking from flats built without adequate parking for new residents. Without parking for the residents of these proposed developments this will cause massive parking wars in already very limited street parking around residents Chingford Mount and would disadvantage older people.</p> <p>If the 90 homes at Albert Corner are built then residents of Brook Crescent and surrounding streets which back on to the site will be very affected. By building 90 flats on this site, obviously covered in five glass storeys, would completely destroy residents' way of life. Sitting in the garden would be a thing of agony not pleasure as it is now.</p> <p>These proposed developments cannot be delivered with policy compliant levels of affordable housing.</p> <p>Once these homes are built will there be extra doctors, hospitals, dentists and schools or just hollow promises to do so?</p>	<p>Please only build homes to the height of existing buildings, no higher and also provide parking for any new residents. Infrastructure should be provided for any new flats as trying to get a doctor/hospital appointment is extremely difficult. With so many new homes our local hospitals, schools and nurseries will be massively impacted, making things even worse for existing residents.</p> <p>We also do not want to lose our existing supermarkets and certainly do not want these to be replaced by smaller ones.</p>	No		<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including urban requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p>
Anthony G Thomas	Tip			S411 - Albert Corner	No	No	No	<p>Characterisation and Intensity of Use (CIU) should be used to help the question falls to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must"</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 16, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and of any specific consultation bodies invited to make representations under regulation 18(1).</p> <p>"(7E) A local planning authority must"</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(3) The bodies or persons referred to in paragraph (2) are"</p> <p>(A) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonstone Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have will be removed I do have my doubts as will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the ULEZ zone and demand of the road meaning there will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. So the rest of the area will also be subject to these increases and the proposed speed the natural air flow possibly result in pockets with even a higher r concentrations.</p> <p>Waltham Forests current population density is far too high and as such we have seen significant increases in anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960s tower block was removed as there were major problems with the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the 1930s, when the 1930s that people needed space and New Towns were planned to provide a better quality of life.</p> <p>Four high rises is supposed to show enjoy people having a say? I have lived in WF all my life and Chingford over 40 years yet unless you are a surveyor or architect you don't get a say? I have confirmed what I do not suitable and why I don't think it is compliant I am sure you can ascertain that with an alternative plan.</p>	No	<p>Because there are too many unanswered</p>	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in reduced congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through a L106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered with new developments.</p>
T Gaud				S411 - Albert Corner	No	No	No	<p>Throughout Waltham Forest you are building taller and taller buildings with no parking facility. In Chingford the schools are full, the GPs are struggling, transport links are not sufficient to take this kind of wealth of people. Also by taking more and more of the skyline you are destroying what is a green, open air and village like feel to this part of the Borough. For years you have treated Chingford like an afterthought with little spent on us compared to the 'posher' parts of Waltham Forest, and now you have not got plans to build you are keen to just build them high and pack people in tight. Everything is under too much strain already. Try building the resource first, including a hospital that we don't have to go £12.50 a day to visit and then think of some sensible lower buildings rather than this.</p>	<p>build homes to height of existing buildings, provide parking, healthcare, education, etc.</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified with strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Bionne Opel				S411 - Albert Corner	No	No	No	<p>Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no written/public meeting to advise residents, only an online Zoom meeting. Storage of doctors, hospitals, dentists, schools, etc.</p>	<p>build homes to height of existing buildings, provide parking, healthcare, education, etc.</p>	No	<p>Everything should be open for the public to participate in</p>	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,664 new homes (1,266 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 6,000 homes per year across London.</p>

Stephen Stocker				S411 - Albert Corner	No	No	Chingford is a low skyline area without high rises. The local plan is not sound or effective as it completely disregards this. This also means the development put forward, goes against planning regulations in the sense that they will impact light and views. Not adding properties, but not more factories, school places, etc, is misguided. The developments put forward do not fit into the neighbourhood and could lead to poor quality design. In South Chingford, there is no tube/train station and yet the proposals in the IDP will cause harm to the area. The categories of the sites are not correct either for example the New Road site is not Transitional for the reasons stated. No justification has been provided for the density of the building/ number of units.	Reduce the height. Provide family homes, as against cramming in flats. There is no evidence that these proposals are in line with the need.	Yes		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Bill Rodney				S411 - Albert Corner	No	No	No	It has negative impacts on public transport provision in Albert Crescent if it is over development. It will increase pressure on car parking spaces causing pressure on surrounding residential areas. You should not be encouraging new development because of embedded carbon contrary to net carbon zero targets.	Allocate housing sites on land where a more human scale and garden space is possible. Retain existing properties and extend with sustainable materials. Consult more widely on implications and details for Albert Crescent	No		<p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage at Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>In April 2020, the Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, the Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it's new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.</p>
Kay Anderson				S411 - Albert Corner	No Response	No	No	90 homes on that corner means lower block... raising Chingford's high street and an Island and Superdry stores, the only ones in all of Chingford? Neighbour parking and lack of infrastructure planning? Council is building excessive housing, needs to be thoroughly investigated. These plans developed under Claire Crighton. See why she "resigned"...	Council needs to be thoroughly investigated re any planning as corrupt from top down. none of these plans bring any benefits to Chingford citizens.	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Andrew Featon				S411 - Albert Corner	No	No	No	Too many houses too little parking height not compatible with area		Yes		<p>The Council is committed to playing its part in tackling the housing crisis. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>
Paul Wellard				S411 - Albert Corner	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/rural in terms of building and treescape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for other people. The area does not have enough infrastructure to cope, such as doctors and gyms. This is already a problem with the existing development and will be substantially worsened and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	No		<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Richard Snape				S411 - Albert Corner	No	No	No	By making such narrow restrictions on how the public can respond to a consultation this process automatically fails in its duty to consult as it renders it practically impossible for a non expert to make a compliant response. More specifically this site allocation fails to respect the character of the existing street scene. 20 homes could only be achieved on this site with a building of excessive height, to setting that as an objective is in conflict with the duty to respect the existing character of the area.	A site requirement indicating a maximum of four stories in order to dwarf the existing predominantly three storey buildings, would place a reasonable constraint on over development.			This response is noted. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.
-				S411 - Albert Corner	No	No	No	Chingford does not have provision for more people! Not enough Doctors, schools, traffic in New Road ridiculous. There is way limited parking and facilities in Chingford. I have been a resident for 60 years when Chingford belonged to Essex, it was a village Not a London Borough!!!		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Karen Nash				S411 - Albert Corner	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overwhelmed, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no hearings/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentist, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.		-	There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchment areas. The allocations require affordable housing in line with the policy approach set out in Local Plan 1. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,264 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London. This response is noted.
Stephen Tyler				S411 - Albert Corner	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. Veronica Heath				S411 - Albert Corner	No	No	No	This is over development. The area does not have the infrastructure to support these homes. A development of this scale, in the area, is not sustainable or conducive to residents. 50 homes equals a minimum of 50 new residents. The transport and medical services can not support this!				<p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local Plan directs planned growth to previously developed sites that are currently under-occupied and hard to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Viki Beaver				S411 - Albert Corner	No	No	No	No facilities for increased police, schools, health care, car parking suitable retail outlets. Its not in keeping with the area. No car parking in a already busy road. It not needed or wanted I. Will block light to homes and gardens.	Don't build			<p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p>
R Stoddart Esq				S411 - Albert Corner	No	No	No	This building would be a nine storey eyesore, a monstrosity in the area. It would be completely out of keeping with local buildings, as shops with maybe two flats above or houses with gardens. Adjacent houses will be overlooked, they will lose their privacy and have neighbours from the flats peering into their gardens. I also feel that the Council have not made their proposals widely known to local residents. Most residents do not even know what the proposals are. Where are the leaflets to let people know what is happening? There have been no meetings. People on online have no clue what you are planning. Many residents will suffer covers anxiety about this but no one seems to even want to let them know about it.	Any new developments should be kept to the same height as existing buildings. Local residents should be notified by post about the proposed developments. They should not find out when the demolitions people arrive!	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2023).</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to the spike in the number of Covid-19 cases being recorded at the time the Council decided to hold the engagement meetings online for the safety of our residents and officers.</p>
Guy O'Neill				S411 - Albert Corner	No	No	No	How does a tower block contribute to the amount of Chingford 7 Parking?	leave it as is and improve , update shopping and more support for local business	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The site allocation requires that replacement commercial floorspace is reprovided, ensuring that the site still provides economic opportunities.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Mark Knowles				S411 - Albert Corner	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no half/half public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide adequate parking, healthcare, education etc.	Yes	We need to know what is planned as we may believe it to be unsuitable and need changes made.	<p>The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchment areas.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Na				S411 - Albert Corner	No	No	No	Too many new homes with no infrastructure to support. High Rise buildings will overshadow residents.	Build less homes, rebuild retail space. Don't squeeze every single bit of money out of seals guys. Your decision maker should be looked up for all the obvious back handers they take, it's literally common knowledge. Absolute joke.	Yes		<p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p>
Clifford Gray				S411 - Albert Corner	No	No	No	The blocking off of access to Cherybean Avenue from Albert Crescent will not allow existing residents to have access to their property and cause even more congestion in the area.	By setting up traffic lights at the junction of Albert Crescent and Hall Lane would give pedestrians a second crossing and allow traffic and buses to use Albert Crescent safely.	Yes	I do not agree with the proposed plans as they are not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
David John Anderson				S411 - Albert Corner	No	No	No	too many homes	reduce	No	simply to judge	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Les Ashville				S411 - Albert Corner	No	No	No	----- Original message ----- This letter is in strong opposition, specifically but not exclusively, to LBWF's 4 proposed development sites around Chingford Mount. Sent from my Huawei phone Subject: Chingford Mount Overdevelopment This letter is in strong opposition, specifically but not exclusively, to LBWF's 4 proposed development sites around Chingford Mount. Namely, 1. Up to 90 new homes on Sainsbury and Council car park. 2. Up to 90 new homes on Albert Corner. 3. Up to 25 new homes on former South Chingford Library. 4. Up to 280 new homes on Larkwood Leisure Centre & Nursery site. Whilst we are not totally against development, progress and more homes in the area, these should not compromise other established residents. The proposed developments would be out of keeping with the surroundings. As the Chingford Mount Sainsbury's proposed development. The proposal for 90 new homes on this site is ludicrous & completely out of keeping with Waltham Forest's ongoing mission to reduce Chingford to a giant Council Estate. LBWF's "intersecting" 1970's experiment on Chingford Hill Estate cost millions to rectify in the 1990's.	Build to a max of 3 stores and provide ample car parking Increase infrastructure to accommodate expanded population			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP and healthcare facilities. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Nail Hooper				S411 - Albert Corner	No	No	No	As the Chingford Mount Sainsbury's proposed development. The proposal for 90 new homes on this site is ludicrous & completely out of keeping with Waltham Forest's ongoing mission to reduce Chingford to a giant Council Estate. LBWF's "intersecting" 1970's experiment on Chingford Hill Estate cost millions to rectify in the 1990's.	Drastically reduce the proposed number of homes. To provide better quality homes with adequate parking. Much like the costly modifications we carried out on Chingford Hill Estate. Build it better, build it once!		To ensure residents aren't ignored as usual.	The London Plan (2021) has a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Anthony G Thomas Lip				S411 - Albert Corner	No	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 18. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must: (A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (B) issue a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, to sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 34(1). 18.7(1) A local planning authority must: (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are" (B) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan.	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have will be removed do you my doubts or will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles exiting the ULEZ charge. But the rest of the area will also be subject to these increases and the proposed upset the natural air flow possibly result in pockets with even a higher concentration. Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hill Estate where the 1960's tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In it was realised in the 1920's that people needed space and New Towns were built.	Yes	Because there are too many unwise areas	The response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connectors must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
				S411 - Albert Corner	No Response	No Response	No Response	leave Chingford alone	leave Chingford alone			This response is noted.
Down T Master				S411 - Albert Corner	No	No	No	leave Chingford alone	leave Chingford alone		No one wants your flats	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.

Radar Quench				S411 - Albert Corner	No	No	No	The site is adjacent to residential area which will be impacted significantly. A nine storey building at the current site will be out of character of the whole surrounding area. There is insufficient parking available currently and no additional provision has been taken to accommodate parking for the additional 90 homes. Residents at Brook Crescent especially 94-100 addresses will have loss of privacy, daylight/sunlight. This scheme has not been made available to the wider community of Chingford and discriminates against the older community of Chingford which makes a greater proportion of the community in Chingford due to having these proposals made available online only. No public meetings have been held to advise the community. The current infrastructure does not support this scheme either, there is already shortage of school places. The GP clinic are overwhelmed with appointments provided with a waiting time of over 2 weeks. Public transportation has not been upgraded to accommodate the proposed plans.	Build homes at the height of existing buildings. Provide additional parking, additional services to education and healthcare.			The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Daisy Gatehouse				S411 - Albert Corner	Yes	Yes	Yes	My issue is the fact you have closed down a library for a much smaller space and planning to build a huge polluting incinerator a mile away...			I think you need to discuss this with the people it affects	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The North London Waste Authority is the authority responsible for the management of the North London Heat and Power Project. The redevelopment of the Edmonton EcoPark seeks to deliver improved waste capacity and a more environmentally sustainable solution than the alternative options considered. The Edmonton Development Consent Order was approved by Government in 2021.
Clifford Gray				S411 - Albert Corner	No	No	No	The proposal to block off access to Cherrydown Avenue from Albert Crescent will cause residents accessing their property and cause even more congestion in the area. Any redevelopment of Albert Corner should be no higher than the existing building to ensure the privacy and natural light of nearby residential properties is maintained.	Install traffic lights on the junction of Albert Crescent and Hall Lane to allow a second pedestrian crossing and ease the flow of traffic, and buses from Albert Crescent. Albert Corner should be kept for much needed shops for local residents.	Yes	I do not agree with the proposed plan as they are not keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Isabelle Anise Tyler				S411 - Albert Corner	No	No	No	Proposed development out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education etc.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Robert Deering				S411 - Albert Corner	No	No	No	Any high rise development will contrast with the current low height aesthetic at Chingford Mount, and spoil the very enhancement you are trying to create. Putting shoppers, diners and planned areas in the shade of high buildings will create an oppressive atmosphere on the high street. Lack of sunlight and wind tunnel effect will reduce the success of planting and the experience of shoppers and diners.	Ensure that building height does not exceed four stories. The council must also assume the responsibility to maintain planted areas, and not leave it to volunteer groups. The Metropolitan Police and emergency services must be consulted to ensure that they can cope with a larger population, and successfully access the new built up areas in the case of emergencies.	Yes	I would like to participate in the decisions taken in the development of the town where I live.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2023). Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Lloyd Parkinson				S411 - Albert Corner	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meetings to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Yes	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Dr Shabbir Khankar				S411 - Albert Corner	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking. Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit.	I consider building homes to height of existing buildings to be necessary. I consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	Yes	As a local resident, I would consider it necessary to participate in examination hearing sessions as this would directly affect me by way of loss of privacy, loss of light and development out of character for the area.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2023). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. The consultation was published both on the Council's website and social media pages and in the Local Newspapers. Due to the spike in Covid-19 cases at the time, the Council took the decision to hold all meetings online for the safety of our residents and Council officers.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Karen Muggl				S411 - Albert Corner	No	No	No	<p>Contrary to the assurances of the Council, most people in the vicinity of Chingford Mount did not receive a leaflet about the Consultations in January. We have a Facebook group of over 700 members where this has been confirmed.</p> <p>The Council assure me that they have ticked all the boxes in advising residents about the Consultations but they have only advised people online. We had no public meeting. We had a Zoom meeting where Sarah Parsons answered questions so quickly to a pre-emailed list of questions from our Facebook group representative, and no one could understand the answers. LBWF then refused to give us the promised meeting transcript, merely the "chat transcript. Obviously this did not answer our questions.</p> <p>The Zoom meeting capacity had to be increased but by the time it was, many residents could not get the link to join the meeting in time.</p> <p>LBWF insist they had public engagements to advise locals of their plans but sadly this was not the reality.</p> <p>Two Council representatives stood outside 4228 Chingford Mount Road - subsequently moving on to Albert Crescent. They had nothing to make people aware of who they were apart from leaflets but one of the women had fern underneath her scarf. There were no posters to advise who they were or what they were doing. A tiny advertisement on the Council website was all that advised residents but nothing for those not online. There was no poster and the leaflets were advertising that event. Booklets were "apparently available at Age Concern and 4228 Chingford Mount Road" but no one had online would have known. Posters have been displayed in the windows of 228 and the Community Library but the plans are too small to read. How can residents comment on the plans when they don't know what they are? It's a disgrace!</p>	<p>Flats should be no higher than existing buildings.</p> <p>LBWF should not exceed government directive of number of flats to built.</p> <p>Flats should be built on existing derelict sites, ie site at junction near Morrisons in Chingford Mount rd and the site on the corner of Templeton Ave and old church rd but build to two storeys high.</p> <p>LBWF should provide sufficient parking for any new flats.</p> <p>More doctors, dentists, schools and hospitals should be provided with any new flats.</p> <p>Do not build high rise as it is not good for mental health of residents and causes untold social problems.</p> <p>Do not build high rise flats next to existing residents causing loss of privacy, light, sunlight.</p>	No	No one wants your flats	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Deepest Mafar				S411 - Albert Corner	No	No	No	<p>STOP BUILDING MORE UNWATES HOMES. Over priced. No parking. Cheaply built flats. Enough You are ruining the area.</p>	<p>STOP BUILDING MORE UNWATES HOMES. Over priced. No parking. Cheaply built flats. Enough You are ruining the area.</p>	No	No one wants your flats	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a balance of houses to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 12 year minimum housing target for Waltham Forest of 12,040 new homes (1,004 per year) based on a London-wide assessment of capacity/available sites in 2021/22. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality.</p>
Karen Muggl				S411 - Albert Corner	No Response	No	No Response	<p>There is a general requirement not to cause "harm" to the amenity of existing residents.</p> <p>Properties in Albert Avenue will be dominated by this development a few metres from their rear boundary with over-looking and attendant loss of privacy.</p> <p>A 9 storey block would be very ugly and not in keeping with local buildings, w/ houses with gardens and low rise shops.</p>		No		<p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>
Glynis Devlin				S411 - Albert Corner	No	No	No	<p>Not enough residents were made aware of these plans therefore causing many to make last-minute responses and some no opportunity at all. The plans are not very specific making them difficult to evaluate. What do know is that we do not need another 90 homes on this site together with the 90 homes on the Sarnbury's site. The area is quite densely populated as it is. No one wants overpopulation which brings with it many problems including more crime. There appear to be no plans for parking. It's extremely difficult to park anywhere on Chingford Mount as it is and to further add to traffic congestion is not an option. I assume that these 90 homes would be in high-rise blocks. I don't believe the density, height and style of development is in keeping with this sub-urban area. This is not a town or city where high-rise may blend in. People come to sit on outside the many cafes and restaurants Chingford Mount offers and neither residents or shoppers want to be looking at high-rise. Again, where are the plans for additional services, i.e. healthcare, including social care and schooling.</p>	<p>I consider these modifications necessary to make the local plan legally compliant and sound: the new buildings be the same height as the current layout or no more than three storeys high thereby reducing the number of extra residents coming into the area. To include resident's parking areas within the complex.</p>	No		<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. If yes, please explain why?	Council's response
Jaime Alexander				S411 - Albert Corner	No	No	No	Without having to copy the wording here, I would refer you to Policy D9 of the London Plan (page 138) with regard to "Tall Buildings". I do not believe that planning for a 9 storey (or even a 4 storey) building on this particular site adheres to this Policy. Chingford Mount is a suburb - as you have stated in this consultation, it's a Gateway to the Forest. A building of this proposed height would look ridiculous and out of proportion to the rest of its surroundings, being between predominantly 2 storey high. Not only that, but the building would be south facing (towards Chingford Mount Road), which would mean that for the 1st half of the day, a building of this height would cast a shadow over the "newly pedestrianised" Albert Corner and Old Church Road, and for the rest of the day it would cast a shadow over homes in Brook Crescent and New Road - evidence has come forth that a lot of these residences affected in Brook Crescent/New Road have had no balconies through their doors.	In order to modify and make the plan legally compliant, I would refer you to the Policy mentioned above and ask that you read it very carefully, and then - in keeping with our Chingford suburb - redevelopment that corner to the same height as its surroundings.	Yes	I would like to be kept in the loop about all aspects of this.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Ashraf Khankar				S411 - Albert Corner	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking. Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit.	I consider building homes to height of existing buildings to be necessary. I consider the provision of more parking to be necessary; the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Due to a spike in the number of Covid-19 cases being recorded at the time, for the safety of our residents and officers, the Council decided to hold the engagement events online. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.
Clifford Gray				S411 - Albert Corner	No	No	No	The site is the central area for shopping in South Chingford and not suitable for residential use. A nine storey building would look out of place and will affect people living in the properties nearby.	The property should remain as shops which are short in supply in this area and should be no higher than the existing building.	Yes	I do not agree with the proposed plans as they are not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Tom Wise				S411 - Albert Corner	No	No	No	This area suffers from high traffic density and pollution. These plans seem to make it worse. It is not a suitable area for what is planned.	Sensitive minor improvements	Yes	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MPs	This response is noted. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
C Coding				S411 - Albert Corner	No Response	No	No	There is no parking, the local community does not have the infrastructure for 90 homes, buses, GPs and schools are already over subscribed, so is the local hospital. It will make parking for the shops impossible thus impacting on local businesses.		Yes		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP and healthcare facilities. Mark Manning				S411 - Albert Corner	No	No	No	A 3 storey building will totally change the whole perspective of the area, over powering all other buildings.	Maximum 2 storey building in line with other buildings and homes	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
-				S411 - Albert Corner	No	No	No	The area surrounding this site is of art deco design and any regeneration should be sympathetic to this style. This map does not show high rise buildings as other Waltham Forest plans show and I formally request you to justify this so people have clear and concise information as to the proposals. The Art deco design which can be seen on Albert Crescent and along Old Church road should be the style of any future development in the vicinity. Art Deco is not high rise and as such any high rise will detract from the Art Deco fine stonework already present. To enhance this Art Deco will create a stunning destination and individuality to the area.	Referring to the Art Deco buildings surrounding this site, high rise building would not be compliant or in keeping with the area in the vicinity. Any development should be in keeping with art Deco to enhance and complement Albert Crescent. I refer you to the dock and barometer stonework and the curve of Albert Crescent - all Art Deco.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
-				S411 - Albert Corner	No	No	No	Unaware of any public consultation to transform Albert Crescent into a pedestrianised public space. New housing will increase pressure on already inadequate local services eg schooling, health and retail. Provision of 90 homes on this site suggests that it will be several storeys high which is not in keeping with the local streetscape.	Reduce residential density.	-		This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP, and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities, within walking distance to the residential catchment areas.
Patricia Andrews				S411 - Albert Corner	No	No	No	Overdevelopment in high-rise blocks, leading to loss of amenity (glimes, daylight, sunlight etc) No parking provision in what is already congested street parking, lack of consultation with residents, no allowance for extra services such as schooling, healthcare. Exceeding housing requirement of the London Plan. Out of character with present 2 storey buildings, shops and nearby community buildings.	Do not exceed height of existing buildings. Strictly reduce the proposed building of blocks of flats. Provide car parking for residents. provide facilities for healthcare, education, child-friendly space. Stop on road parking on New Road to improve traffic flow especially for buses).	-		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Tracey Wilcox				S411 - Albert Corner	No	No	No	The infrastructure is not in place to support mass increases in this volume of new homes being built, especially with the other 2 proposed builds on Sainsburys and Iceland shops located at Chingford Mount. There is already a shortage of basic amenities eg doctors, schools, dentists. This build would also destroy one of the historic frontages in this area.	Identify areas for schools to be built as well as encourage new doctors/ dentists in this area	No		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Zahra Kabeem				S411 - Albert Corner	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking. Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit.	consider building homes to height of existing buildings; to be necessary consider the provision of more parking to be necessary; the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	Yes	As a local resident, I would consider it necessary to participate in examination hearing sessions as this would directly affect me by way of loss of privacy, loss of light and development out of character for the area.	The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or higher than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Due to a spike in the number of Covid-19 cases being recorded at the time, for the safety of our residents and officers, the Council decided to hold the engagement events online.
Sawant Newton				S411 - Albert Corner	No	No	No	Proposed development would be out of keeping with the area. They cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, have a loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets or public meeting to advise residents only an online zoom meeting. Shortage of doctor/healthcare, dentist, schools etc.	build new homes to the height of existing buildings, provide parking, healthcare, education, etc.	Yes		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Mrs Melanie Barfield				S411 - Albert Corner	No	No	No	Once again, you have failed to inform the residents of Clingford Mount that this is being planned. I received consultation through my door (Middleton Avenue) regarding the 20mph limit on roads in the area, yet something like this which is far more disruptive, nothing! If you pedestrianise Albert Crescent, where are the buses going to go? The traffic that wants to go to Cherrydown Avenue and other roads will cause increased traffic on Priory Avenue, Hurst Avenue and Middleton Avenue, not to mention Watton Way all of which are already too busy. Albert Crescent a play space? It's a shopping area not a park! There are already enough people hanging around that area especially ones that want yellow heating was built, as I'm sure the Met Police will tell you. Albert Crescent must be highly polluted and not suitable for children to play there. As far as new homes are concerned, Clingford Mount does not have the capacity in the schools and healthcare to cope with these people. Parking for these new residents is also going to be a huge problem and how tall is this building going to be. Also, where are Iceland and Superdrug going to go? We don't have many shops there so it is, Iceland use their carpark all the back to receive large lorries delivering to the store. How would they deliver?	Forget the Albert Crescent plan for the reasons I have mentioned above and provide parking, schools and healthcare for these new residents. Plus the building should be the same height it is at the moment and leave Superdrug and Iceland alone.	No		This is needed. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities, within walking distance to the residential catchments areas.
A)				S411 - Albert Corner	No	No	No	Ohmg how can you even think about building that many homes there, flooding, leave Clingford alone, stop making it a mess like the other parts of the borough. Clingford has always been the forgotten part of borough & now you want to build it up! how can this even be possible to build that amount of flats on that site. We dont have enough go Practices, schools, dentists etc. It already takes 2 weeks or more to get a doctor appointment, there are no nhs dentists & schools are so full with a lot of children that dont even live in the area. We have one hospital in the borough, which is so full most of the time, it takes months & months to get a appointment. Just think about your actions now! before you start something that will cause carnage		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. Key Voter				S411 - Albert Corner	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling ie doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no leaflets or public meetings to advise residents, only an online zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!			The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Andrew Stoddart				S411 - Albert Corner	No	No	No	All new homes contributing to the 480 in total allocated for South Chingford. Public services cannot cope!		No		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,040 new homes (1,204 per year) based on a London wide assessment of capacity/available sites to 2027/28. The original draft London Plan figure was equivalent to approx. 1,880 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Zahr Aghar				S411 - Albert Corner	No	No	No	We do not need any more flats in the area. The local amenities cannot and will not be able to cope. The council are simply building on every plot of land available with for consideration for the local community and residents.		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S411 - Albert Corner	No	No	No	out of keeping with the area also not allowing for residents parking	build homes to the height of existing and provide parking not take it away	Yes		The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
John Bucknell				S411 - Albert Corner	No	No	No	proposed developments not being built to existing laws and requirements so parking provisions will disadvantage all people services will not be upgraded to suit the amount of new homes and people intended to live in area.	Build homes to height of existing buildings, provide parking, healthcare etc.			The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Ernesto Masella				S411- Albert Corner	No	No	No	No consultation				The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Terry Milnes				S411- Albert Corner	No	No	No	Not enough public consultation- many older Residents unaware as no social media. Woefully poor communication- out of character with surrounding area.	Do not do it.		no one is listening to the residents of Chingford -!!	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Paul Leahy				S411- Albert Corner	No	No	No	Leave 8 abnnc. Chingford does not need new flats. There isn't enough room for new builds.		Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenure to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
-				S411- Albert Corner	No	No	No	Looking towards the cemetery, at the end of this parade of shops is a larger parcel of land, created when 3/4 shops were demolished some 8/10 years ago I believe that this would far better suit your plans. Presumably the planned developer has gone into liquidation, and perhaps the land in question be compulsorily be purchased.		No	-	The sites included in LP2 have been through a comprehensive selection process which has factored in national and regional policy and assessments as well as 'Call for Sites' exercises which were undertaken during the plan preparation period, which invited landowners/developers to put forward sites. These have strongly informed the council's decisions when deciding scope and location of development in the borough. We feel the sites that we have chosen ultimately will help us to meet our strategic objectives and build more housing in the borough.
Terry Milnes				S411- Albert Corner	No	No	No	There has not been a sufficient consultation with local residents	Those residents on social media are not able to access the required consultation documents	Yes	no one is listening to the residents of Chingford -!!	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to the spike in Covid-19 infections around the time of the consultation, the Council decided to hold the engagement events online for the safety of our residents and officers.
Annika Heath				S412- Albert Corner	No	No	No	The consultation process conducted by the Council has been seriously flawed in my view. There appears to have been very little consultation or publicity in hard copy form provided to residents and businesses for those areas affected. The "Residents News" has been provided on line and has mentioned the Local Plan occasionally but there has been little reference in the Council's quarterly "Waltham Forest News". As has been pointed out to Cllr Simon Miller, the Portfolio Holder for Regeneration, not everyone is on line and indeed a number of residents have stated that they "hate nothing" about these plans which would have a far-reaching and in some cases upsetting reaction to those affected. Indeed two Chingford residents have had to pay out of their own pocket to distribute leaflets to residents to inform them of the plans and the deadline to respond. This is unacceptable and should have been the Council's responsibility which does appear to show a desire not to publicise effectively and ensure that responses not received are regarded as supportive of the Plan. With Covid it is accepted that large meetings could not have been held with residents but other ways could have been found. The so-called "Tramday" in the Town Square on 4 December 2021 would have been an ideal opportunity for officers to communicate with residents. It is known that two officers in attendance did not make themselves available to residents for questions and explanation of the proposed Plan and had no identification (ID) and the event can only be viewed as cosmetic in giving out expensive freebies whilst deflecting residents from the importance of providing their views on the Local Plan. It was undertaken in early January 2022 that the Council were to leaflet residents within 1 mile of Chingford station but most residents have never received this. Again, this oversight is totally unacceptable. There appears to have been very little effort made by the Council in publicising the Local Plan proposals in the pop up shop (228 Chingford Mount Road E4) and some cardboard display, have only been shown internally. The Council's view is not having public meetings to explain their proposals and the consultation process to be undertaken by the Council.	Development should be in keeping. Infrastructure must be in place ahead of any development. To over populate the area will divide a community and build resentment	Yes	no one is listening to the residents of Chingford -!!	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council took the decision to hold the engagement events online as a response to the spike in the Covid-19 cases being experienced and to protect our residents and officers.

Tim Hancock				S43 - Albert Corner	No	No	No	<p>Strongly Object to this exposition (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, degradation to the surrounding environment, negatively affecting the current residence")</p> <p>This incoherent and arbitrary decision to simply drop a development in its community is a classic case of developer, maximising their profits, and externalising the cost on to others who shoulder the burden for generations to come. A significant and fairly origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions carried on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is propagated by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of following on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a liberal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are</p>	Request based on continued degradation to local community and strain on local services, as pointed out above.	Yes	This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at breasted speed, with a concern for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is treating a social and cultural desert one enclave at a time. SO YES, STRONG OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response
				S43 - Albert Corner	No	No	No					Positively Prepared
				S43 - Albert Corner	Yes	Yes	Yes	a curious, if the plan was to do this in the first place. Why did the council waste so much of the taxpayer's money on putting up the yellow planters?	am not objecting to this, anything that makes the area look better is good. However, the disruption is going to be considerable. How is the sound going to alleviate the inconvenience to the residents and commuters?			Response noted
Sam				S43 - Albert Corner	Yes	Yes	Yes	Yes	Chicken shop	No		*
Rafe Fisher				S42 - Midport, Sewardstone Road	No	No	No	<p>Walham Forest Local Plan (LFP) 2000 - 2035 Policy 3.1 A, i.e. states: "400 homes in the Sewardstone Road strategic location". Between S42, S43 and S44 there is a "indicative development capacity" of 477, an increase of 10% above the plan. So LFP 2 is not sound in alignment with LFP 1. This is also the numbers before developers claim they need to further increase density to fund affordable units and S106 agreements.</p> <p>Policy 3.1 C states: "Strengthen, supports and encourages existing and new employment opportunities". S42 and S43 are commercial land, so designating area for residential development does not align.</p> <p>Policy 3.1 i, states: "Contributes to the improvement of... walking and cycling accessibility, connectivity, permeability and legibility to Hokersay End"</p> <p>Improvement of active travel facilities along Lea Valley should be included in the development guidelines.</p> <p>Walham Forest Local Plan (LFP) 2000 - 2035 states that: "area will benefit from having improved transport access via links to Crossrail 2 stations in Enfield to the west. This will enable the expansion of the Sewardstone Road neighbourhood centre".</p> <p>As Crossrail 2 has been suspended it is very unlikely that it will be built within plan timeframes, therefore it should be removed from consideration and only current facilities and projects with confirmed funding should be included.</p> <p>The S42 plot provides commercial land with limited adjacent boundaries with residential properties, a rare feature in Walham Forest. Development as a primarily residential plot would limit the options for commercial use.</p> <p>Walham Forest Local Plan (LFP) 2000 - 2035 states that: "Transition" locations should have tall limits of 19 to 37 stories. This level of identification is inappropriate for the Sewardstone area, as it is not in line with its local character, and available public facilities. No mention of</p>	What is the duty to co-operate and what makes a plan sound or not sound, is this consultation for the public or planning officers?	No		<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> •Research that feeding the choices made in the plan are based on by facts; •Evidence of participation of the local community and others having a stake in the area; and •The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> •Sound infrastructure delivery planning; •Being no regulatory or national planning barriers to delivery; •Delivery partners who are signed up to it; and •Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
				S42 - Midport, Sewardstone Road	No	No	No	<p>Unapproved local plans are being used as the precedent rather than the existing buildings.</p> <p>Planned buildings are totally out of keeping with the area.</p> <p>Trains insufficient transport links and parking provided. The area is already severely congested during the day.</p> <p>No planned increase in health provision planned near extra schools.</p>	Buildings shouldn't be more than 3 stories to remain in keeping. Extra transport links should be provided before completion. Crossrail 2 will not be completed in time if ever. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S42 - Motorpoint, Spearstone Road				Unapproved local plans are being used as the precedent rather than the existing building. Planned buildings are likely out of keeping with the area. Totally insufficient transport links and parking provided. The area is already severely congested during the day. No planned increase in health provision planned nor extra schools.	Buildings should be more than 5 stories to remain in keeping. Extra transport links should be provided before completion. Crosscut 2 will not be completed in time if ever.			In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding, the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Absence of regulatory or national planning barriers to delivery. - Delivery partners who are signed up to it, and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be legally compliant to avoid being legally challenged in the examination or through the planning application process.
				S42 - Motorpoint, Spearstone Road	No			The proposal of the buildings and height of the buildings do not fit in with the keeping of the suburban area. There will be more pressure on services that are already overly stretched i.e. transport, schools, GP practices, social care etc. There will be more congestion and traffic fumes on the roads. Initial plans were unapproved but went ahead anyway. Insufficient parking.	The proposal of the buildings and height of the buildings do not fit in with the keeping of the suburban area. There will be more pressure on services that are already overly stretched i.e. transport, schools, GP practices, social care etc. There will be more congestion and traffic fumes on the roads. Initial plans were unapproved but went ahead anyway. Insufficient parking.			Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Doris Vaughan				S42 - Motorpoint, Spearstone Road	Yes	No	No Response	Highrise properties will not match existing area, and will not be in keeping with the area. Such properties are historically known to encourage social problems such as higher crime. Large number of units but very little parking allocated which will have a knock on effect to existing residential areas, especially as there are only a couple of bus routes in the area. The density of the number of homes. Existing services (healthcare, schools etc) will not be able to cope with the increased population in the area once project is completed. Exposed congestion in the area during construction at a busy junction and afterwards due to increased population.	With nearly 400 units the issue of additional services needs to be addressed, new GPs services, schools and policing with the prospect of at least 800 new residents. The area will need additional services. Car parking issues for both the development and the surrounding areas as, due to the limited public transport links in the direct area I believe many will have cars. The community feel of the area will be lost as development will create a highly populated town like feel. Could the number of units be reduced using a lower rise development instead.			Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Alan Smith				S42 - Motorpoint, Seawardstone Road	No	No	Please explain what this paragraph means	Too many properties Too high The junction is a choke point already. Concerns about the increased risk of crime could become a gathering point. Local social infrastructure is at breaking point as it is (GP access, Dentists).	No		<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Site Allocation of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Interim Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Giuse Coupa				S42 - Motorpoint, Seawardstone Road	No	No	This plan for so many large and high buildings is entirely out of keeping for this area as a gently meandering forest. I think anyone who approves this now will seem to have entered a bit on the fence and started the degradation and destruction of this highly important environment and amazing natural resource. That's before I ask how this development will be managed for transport on a road that already backs up in all directions and not just at busy times of day. Where are the local shops and health resources coming from with local schools and gas already oversubscribed? The over-riding focus seems to be how many homes can be packed in to this small area. I cannot see any benefits for the area or the potential residents parked in to this space between clogged roads and flood cover as water levels are expected to rise.	Limiting to three storey development will reduce overall increase in resident numbers and the impact visually and on the local environment. I cannot see how increased density will be managed or how this development would be award exceptional for building on flood plain land. It would be a waste of space to have high-rise for residents to shove in when the floods start.	No		<p>The Local Plan requires a character-led approach to intensification, including building height and building height, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>Through the evidence published in the Character Interim Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the borough.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the associated test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p>
Mike Chimes				S42 - Motorpoint, Seawardstone Road	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with rules that are not transparent to consultees. Consultation on the site allocation (SP2) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (SP1) for 2020-2026. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political posturing, while officers have been subject to those making orderly meetings difficult. It is difficult to determine whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, reported by the number of attendees. However, or have been difficult to get into online. In general however it has been apparent both from SP1 and what has been stated at consultation meetings a major driver for the re-orientation of development across the borough has been a housing target of c. 1300 homes per year (WSP) has a large weighting to (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More consultation is needed on this.	It is suggested that until master plans are developed, through consultation, for the main centres identified in the SP2 element of the plan, individual sites are assessed in relation to the SP2 site. The chief driver of a bullet point order is to provide 385 homes. It is unclear how that many homes can be provided on this site with other proposed uses. One choice might be to build high but not residential (e.g. L2017) High rise building energy and density has demonstrated about 6 stories energy use increases - difficult to reconcile with the Borough's green policies. This site is one of a number of "garage sites considered for development. The Borough's strategic objectives over to the provision of a variety of employment opportunities, individually this might not represent a great loss of a facility or vehicle related employment, but there needs to be a holistic view of the demand for garages across the area, which is far more motor vehicle dependent than southern Waltham Forest. The site is noted as "More vulnerable yet it is not clear whether this has been considered in terms of the intensity of development, and how realistic the target of 385 homes would be. Proximity to the reservoirs may mean the geotechnical challenges of the new industrial tall buildings may be unrealistic. While reference to Epping Forest SAC is welcome, it is unclear why this might be considered particularly intrusive unless buildings are of such a height as to interrupt view of the forest from some distance away. Most discussion in the supporting documentation seems to be related to potential air pollution impact on the forest. It would seem likely more traffic related pollution would result. It is suggested that cycle and pedestrian connectivity can be improved with this development but it is difficult to see how it can improve connectivity along the Lea valley Road which is constrained by the narrow pavement and road lines between the reservoirs, or to Station Road.	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base including: - Research (not finding the choices made in the plan are based on facts. - Evidence of participation of the local community and others having a stake in the area, and the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Land and infrastructure delivery planning. - Mapping or regulatory or national planning barriers to delivery. - Delivery partners who are signed up to it, and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the IDP should make clear that major changes require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
David Moore				S42 - Motorpoint, Seawardstone Road	No	No	Considered unsound due to the ridiculously high number of sites and large number of new dwellings. The lack of existing parking together with existing traffic problems in the area and continued flooding of local roads would cause huge congestion and make local roads dangerous. The sea valley road is notorious for being congested and there are no alternative roads close by to cross from Chigford to Enfield. There is also not sufficient health provision, including public transport to support a large increase of homes in this area.	This plan should be abolished. The site should be kept as it, with the possibility that in the future, the existing road infrastructure may need to be improved to alleviate both congestion, parking and flooding problems that already exist in this area, notably on seawardstone road, and the other option is to get to the Enfield/waltham cross area. There is no way this area could cope with this many more properties/people/vehicles.	No	In order to express the strong feelings I have on this matter	<p>Through the evidence published in the Character Interim Study, the Local Plan policies have been prepared to ensure that at sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Wika Agius				S42 - Motorpoint, Swarstone Road	Yes	No	Yes While I feel it is important for more housing to be developed in the area to ensure younger people are not forced to leave the area and their support networks, it is important that factors such as education, catering, medical services, adequate parking and affordable housing for newly qualified teachers, doctors and nurses are considered when new developments are planned. It is also important that new housing developments are not built too high with the possibility of lifts becoming out of order and disabled people becoming house bound. At the moment, the plans do not appear to take into consideration these factors. There is only one primary school near by (Trinity Lansland) the nearest GP surgery in Kings Head Hill is a single doctor practice. Also the traffic around the junction of Kings Head Hill, Swarstone Road and Lea Valley Road is already extremely congested (the Macdonalds opposite does not help)	The new housing developments should be no higher than 6 storeys with large balconies. There should be at least one parking space for each property. There should be play areas for children. There should be affordable provision for key staff such as teachers, doctors, nurses and car staff. There should be additional nursery and primary school facilities included in the plans. There should be an additional medical centre offering GP, Practice nurses and para medical staff eg physiotherapy and dentary. There should be a whole new traffic scheme around the junction to reduce congestion and in doing so, reduce pollution.			The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need to establish in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redefinition of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. In April 2025, The Council declares a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-repated. Additionally, the policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.
Anthony G Thomas Tip				S42 - Motorpoint, Swarstone Road	No	No	No The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must" (B) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 16, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1). "18(1) A local planning authority must" (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (C) The bodies or persons referred to in paragraph (2) are" (B) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient they will still be emissions. Although they suggest these can be removed I do have my doubts on will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the waste treating plant which would be likely to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. But the rest of the area will also be subject to these increases and the proposed speed the natural air flow possibly result in pockets with even a higher r concentration. Waltham Forests current population density is far to high, and as such we have seen significant increases in social behaviour, crime and in particular violent crime and mental health issues. Also the recent COVID pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hill Estate where the 1960s tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In fact it was realised in the 1920s that people needed space and New Towns were built with a population density of around 100 people per acre. This is a much more acceptable and a better presentation of the Local Plan to ensure community engagement. Reducing the proposed development to a maximum of 330 new homes and a maximum of 6 storeys (strictly designed) to maintain more appropriate density of housing in keeping with the area. But this must be supported in the following ways: 1) Improving the AVEAS PTAL rating significantly with improved bus routes, separated cycle lanes and safe even walking/mobility vehicle routes to meet the customers. 2) Expanding development until once Cross Rail 2 and suitable connections are in place. 3) Including provision of shared access vehicles such as car clubs. 4) Investing in local healthcare and education services and facilities, new schools or the extension of existing schools to cope with the increased resident numbers. Ensuring that any lay outs will be invested in the immediate area. Ensuring safe and inclusive access to SANGS, such as the reservoirs, railway and pathways to Gunpowder Park as well as new green space as part of the development to limit the impact on Epping Forest SAC. Improving the junction and road layout at Swarstone Road and Kings Head Hill/Lea Valley Road.	No	Because there are too many unanswered questions	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's statement of the capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redefinition of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through a L106 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered with new developments.
Sarah Sanders				S42 - Motorpoint, Swarstone Road	No	No	No Response I do not believe the Local Plan is Legally Compliant as the proposals do not have been easily accessible and inclusive of the needs of many of our local residents. Many residents in close proximity to the Swarstone Road sites are of older age, with generally very limited access to the online documents shared and less experience with providing comments and feedback on such complex documents online. The LPS and LPS feedback sheets have also been complicated that they have deterred or prevented most from providing feedback at a time when public meetings have been prevented by the pandemic. This combination has prevented many from knowing the full detail of, or providing their full feedback on the Local Plans which questions the validity of the community engagement. I believe the Local Plan is unsound, with the plans for this site and the other two at Swarstone Road in contradiction to many strategies and plans for the purposes of these comments. I have assumed that the proposed 385 homes will align with the W7 average occupancy of 2.6 (ONS 2011) bringing over 1000 new residents. Development beyond the capacity of local transport or personal transport - Contradicting Local Plan Policy DP C2) and Local Plan Policy 5 G and the LPS Strategic Policies - Six Golden Threads (2.4.1) This area has a PTAL rating of 3b - with public transport already stretched this cannot support over 1000 new residents. While the transport hubs at Chingford, Station Road and Pondent End are accessible on foot or bike by the finest residents, they are not easily accessible or inclusive to the needs of all residents with the oldest, youngest and those with additional mobility needs being excluded (busy roads, uneven and narrow paths, hilly topography). The proposal of car free development is impractical with limited public transport to the local large supermarkets, and public transport operators terms preventing the carriage of large items (DP Items/Christmas trees etc).		No	I am part of a local residents association and wish our residents concerns to be included.	This response is noted. Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need to establish in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 52,640 new years based on a London-wide assessment of capacity/available sites in 2017/8. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Glynn Death				S42 - Motorpoint, Swarstone Road	No	No	No Response The local plan for this area proposes huge change and development which would completely destroy the look of this sub-urban area, not only for current residents but for visitors coming into the area. We border on Epping and we appreciate the sub-urban skyline which this area affords. It is neither a town or city centre and high rise buildings do not belong in such an area. Lea Valley Road borders onto the reservoirs where huge sheep graze on the banks every year. There is also concern regarding the lack of parking facilities, we already have enough problems. Where, between Swarstone Road, Lea Valley Road and Kings Head Hill are all these new residents going to park their cars and vans. We have limited public transport services. Road traffic and congestion has always been a big problem here with traffic often coming to a complete standstill. Swarstone Road, coming from Waltham Abbey is often a a snail's pace. Kings Head Hill is often congested and going towards Epping from Lea Valley Road can be a complete nightmare at certain times of the day. A lot of concern is the lack of plans for Healthcare and Schooling. Getting hold of your GP is already a problem. Social Care and Schools are also overcrowded. Where are all these people from these Tower Blocks going to access these services in an already over stretched community?	The modifications I would suggest to make the plan legally compliant and sound would be to build a complex of houses and maisonettes more suitable to the area, not just maisonettes. Any building shops to be restricted to no more than three stores, with enough green facilities on site to encourage parking an already congested roads.	No		Through the evidence published in the Character Interference Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with Local Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2020). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redefinition of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Sharon Legg				S42 - Motorpoint, Sewardstone Road	Yes	No	No	Feel that the development is unsound because it will be to the detriment of local residents. The traffic in the area is bad enough already. I live along Sewardstone Rd and the traffic up to the traffic lights at the junction with Lea Valley Rd/Sewardstone Rd is slow moving at the best of days. Any incident on the M25, junction 25 & 26 causes traffic to drift along Sewardstone Rd, up Lea Valley Rd to re-join the motorway at Enfield. The right turn filter light is not in sync with the levels of traffic on these occasions. The area is very poorly served by public transport, with one main route to Walthamstow Central. When there is an incident on the route, the bus journey is often cancelled and bus stops at the end of the left stranded until the next bus is due. Public transport links to neighbouring Waltham Abbey are almost non-existent with a bus only running on Saturdays now. As I understand, there are no additional services (e.g. school and doctors surgeries and like many places today, the services we have are already over subscribed. Whilst not opposed to some form of development, I think that high rise would be completely out of place here. Enfield Council has been more progressive and the tower blocks that can be seen across the reservoir at Alma Estate are being demolished.	Scale the development to suit the site and surrounding area, scale the proposed high rise, improve public transport links now. I'd suggest a hopper bus between Waltham Abbey and Chingford Mount, where other routes could be picked up for onward travel. A doctors surgery should be included in the development, and make arrangements for school places for the additional needs.			As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Peter Labou				S42 - Motorpoint, Sewardstone Road	No	No	No	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to let a few pass because they are full (one pandemic which is what you need to compare with) and at the very times we need to travel into work. At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider queuing more people into an already vastly over populated area?	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? Clare Rolle				S42 - Motorpoint, Sewardstone Road	No	No	No	The sheer volume of increased residential properties will bring numerous planning and town management concerns, and would go against the Councils own open planning strategy. I believe the main reasons this plan should be objected include: considerable over development - Sewardstone Road and Lea Valley Road are already very busy roads with traffic issues. Increased traffic will cause environmental damage which will negatively impact the Councils environmental targets. Building 385 new residences in such a confined area will put unmanageable pressure on local resources which are already under a large amount of pressure (e.g. Schools and health care). During development, the significant building works required prove hazardous to local residents due to it being next to a Petrol Garage, with underground fuel pumps. Furthermore, would the council be able safely assure itself that the residents of such a tall building would be safe in the event of an explosion in the site next to it. Also, with a building on this site, all local surrounding properties will be overlooked.				The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,820 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. 				SA13 - Motorpoint, Sewardstone Road	No Response	No	No Response	Development not in keeping with surroundings. This is a suburban area with mainly low rise housing (train on local services, School, healthcare clinics, public transport, etc) insufficient off street parking proposed.	Development needs to include services, such as health clinic/doctors surgery, school/pre-school nursery, etc. There also needs to be sufficient parking spaces included. This could be in the form of an underground car park. There are other developments in the borough, such as Fulbourne road, where there has been a nursery and gym included in the build. Thus bringing extra services to the area.			<p>The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. John Huggitt				SA12 - Motorpoint, Sewardstone Road	No Response	No	No Response	I have unfortunately added my comments to the other side of the road (concerns for 15 hours). This one much more serious 365 times in an area swash with traffic problems - how are people going to access the road through the reservoir already a severe headache for anyone who want to get to Enfield etc in bus, car or cycle. It is totally inappropriate for this area more schools, health needs info structure gas water charging points sewage etc. etc. How many parking spaces are you allocating for drivers and disabled drivers? All this impacts on the quality of life for employees lives in both Cloughton. A major rethink is required if more housing is needed why add to an area that is already over-crowded. What about the jobs lost Motorpoint?	If a development is needed something more akin to that on the other side of the road - which is far better development than this one.		To see what your intentions are and to argue against development	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. Jayne				S45 - Motorpoint, Sewardstone Road	No	No	No	The proposed number of residential dwellings is too high, this will have a detrimental impact on the local area and residents. The damage to local properties of big lorries driving through during the building phase is a risk increase in pollution due to more people. Noise pollution while the site is being built but after when there are probably 1000 extra people living here. Traffic on this road isn't great, this will make it worse. Access between Chingford and Enfield is limited due to the reservoir so causing further challenges that will increase traffic and increase pollution due to idling cars.	Development in line with the flats on the site adjacent, the height and facade of these should be mirrored. Or do not build and use the site for something of benefit to the local community.			<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 69,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Linda Ball				S42 - Motorpoint, Sewardstone Road	No	No	No	Too many houses, too tightly packed together. No sense of open space. Too much traffic, too much pollution.	Make it into parkland for the locals to enjoy. Free up the traffic caused by MacDonald's drive through.	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-segregated. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
Andrew Pearson				S42 - Motorpoint, Sewardstone Road	No	No	No	Too many houses too little parking height not compatible with area		No		<p>The Council is committed to playing its part in tackling the housing crisis. The Local Plan aims to ensure that new provision does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Neil Phillips				S42 - Motorpoint, Sawarstone Road	No Response	No	No	Without being legally trained or having the time to research the requirements that make the plan compliant, I am unable to comment as to whether I consider the local plan legally compliant. I do not believe that the proposed local plan is sound as there seems little consideration of the current Community, Infrastructure, Environment, or Existing residents of the area. The proposed development of over 40 dwellings within this site boundary suggests little consideration has been given to the current density of housing locally. Aside from two or three exceptions, the local housing is predominantly provided within 2 storey family homes with outdoor space, the proposed development of high density housing in high rise residential blocks is not keeping with the character of the local area. I moved to the area just over 7 years ago due to the character, the suburban environment, but most importantly the nice community feel, with such high density housing, I fear that this may change. Policy 2.5 from LPS identifies a requirement to safeguard the local character of the area or improve the quality of the local environment. I believe that the proposed schemes do not meet this requirement set out within LBPF own proposals as they neither reflect the current character or, in my opinion, improve quality. There also seems to be a lack of consideration regarding access to public transport, the area has a PAZ, ring of 20, the proposals seem to hold hope of Central 2 being within a 20-minute walk away, unfortunately we now know that this is not going ahead. The earlier proposal of 400 dwellings, without an increase to local work, will result in the majority of working adults having to commute. Considering that Chingford station is a 20-minute walk up a steep hill, which will be a challenge to those with ability issues, and cycling up the hill is only for the most dedicated, access to public transport needs to improve. The proposals do not seem to address how access to public transport will improve and yet all the developments are proposed car free, in reality, the households will not be car free, instead they will be owned or leased private cars, resulting in more cars on the road. This development will increase the traffic density of the local area and pollution.	Tricity improvements to local transport need to be implemented, or at very least considered and planned for. Only low rise housing should be considered for these sites, which would be more keeping with the nature of the suburban area the current housing stock.	No		<p>Through the evidence published in the Character Intermittion Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC), Special Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.</p>
Mr Ball				S42 - Motorpoint, Sawarstone Road	No Response	No	No	This development will increase the traffic density of the local area and pollution.	The height should be, at least, no taller than the surrounding housing. Plus the density should be reduced significantly and enough off street parking for at least 1 space per house hold.	No		<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Elisabeth First				S432 - Motorpoint, Sewardstone Road	No	No	No	I do not feel there has been sufficient consultation with the local community. Over the last 2 years consultations have been through emails, reaching only a limited number of people. The local authority newspaper is not delivered in the area immediately surrounding the development site. There are many people who are owners of the premises as they have not been informed of developments. The area does not take into account the local architectural style, the high-rise buildings would stand out as different and less cohesive beside other local buildings. The area is on the edge of Epping Forest and bounded by the heathlands. There is a strong architectural cohesion of two storey houses built in the middle of the 20th century. There are spectacular views over the area from Epping Forest, which are enjoyed by many from within and outside the borough, which would be harmed by the erection of monotonous high-rise apartments. The infrastructure of the area is insufficient to cope with so many new dwellings in such a small area. The bus routes are already inadequate during peak times. While the council encourages bicycle transport, the area lies at the bottom of a steep hill which leads to the station giving access to inner London and few cyclists use it as a commuter route. As the area is on the edge of London, many people work outside London and need cars to get to work, particularly if they have to commute a school run first. The large number of planned residences, without any parking facilities, would put pressure on the adjoining roads for parking, which even an unmet ODS would not address. Pressure on the roads in the immediate vicinity is already evident as it is a crosswalk for people coming from Infield, off the A103 and off the A405 to access north Chingford, anytime from a development of 400+ dwellings on that crossroads would be intolerable for the existing community. The area has one primary school which is fully subscribed, with little scope to extend - due to the proximity of the forest. There are no provisions for extra healthcare or school places, necessary if the local population isn't	It would be lovely to see the area developed with up to 8 storey housing and vital opportunities, in keeping with the existing architecture, creating a cohesive architectural landscape. Provision would still need to be made for improvements to the infrastructure, however, they would be more manageable and realistic.	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
John Smith				S42 - Motorpoint, Sewardstone Road	No Response	No	No Response	I am shocked at the density of homes proposed for this site, I am equally amazed at the idea of developing completely new town blocks of this scale in this day and age. Lee valley road during peak times is already unable to cope with traffic levels. Prior to Christmas, when traffic levels were lower, the area was brought to a halt with a small section of road works. This development is totally out of keeping with the area and is not feasible to existing road infrastructure that cannot be improved. These homes will no doubt bring 3000 people to the area. Parking when the impact of this development on the existing community is completely unfair and damned right disgusting. Schools do not have the provision for the additional children, no doubt this would lower the quality of the already suffering schools in this area, specifically secondary. Lets try to improve the area, not change it further.	This plan is unsound for the following reasons:- 1. Local services such as doctors and dentists and schools will not have the capacity to cope with this number of new residents 2. Public transport is inadequate to meet the demands of this number of new residents. For people who wish to go to Chingford station there is only one bus service and cycling is not an option due to the steepness of Kings Head Hill. 3. There are too few shops in the immediate area to meet the likely increase in demand. 4. The proposed development is at a busy road junction which already has long traffic queues during rush hour. Adding the number of new homes is likely to increase the possibility of road traffic accidents 4. The limited number of new parking spaces will put intolerable pressure on local parking		Yes in the area	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. The site allocation requires that commercial floorspace is provided as part of new development. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a networthily alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a networthily alleviation of congestion, parking problems and improve air quality.
Agim Hassan				S42 - Motorpoint, Sewardstone Road	Yes	No	No Response	I am shocked at the density of homes proposed for this site, I am equally amazed at the idea of developing completely new town blocks of this scale in this day and age. Lee valley road during peak times is already unable to cope with traffic levels. Prior to Christmas, when traffic levels were lower, the area was brought to a halt with a small section of road works. This development is totally out of keeping with the area and is not feasible to existing road infrastructure that cannot be improved. These homes will no doubt bring 3000 people to the area. Parking when the impact of this development on the existing community is completely unfair and damned right disgusting. Schools do not have the provision for the additional children, no doubt this would lower the quality of the already suffering schools in this area, specifically secondary. Lets try to improve the area, not change it further.	New homes should 3/2(A bedroom houses and 4 storey blocks of flats, with adequate parking and access. This would still put a load on the area, but seems a reasonable compromise.		Yes	The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 32,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a networthily alleviation of congestion, parking problems and improve air quality. Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured. This character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensity Study (2019).
David Matson				S42 - Motorpoint, Sewardstone Road	No Response	No	No	The proposals are unsound on two grounds: 1)The housing targets in LPS remain unproven beyond assertion and diverge from the targets within the London Plan. As such, they do not provide a sound basis for housing allocations on individual sites, such as S42. On the same grounds, LPS fails to comply with the Duty to Cooperate with the Mayor housing targets. Accordingly the major housing allocation on S42 is unsoundly based. 2)The admissible policy to enable a 0:25 minute city has been strengthened in LPS. S42 is the key site to make this happen in the Sewardstone Road area. However, S42S has not formed part of any master planning of the area that might enable a 0:25 minute city. Instead, each site has remains one of many, in a circular pie approach that evaluates each site as an individual opportunity. There is no mention of community uses and the potential of the site as part of a 0:25 minute city, with all attendant benefits. The proposal is therefore unsound as it does not address a major policy objective of LPS or prevent the sites potential in the round.	1. The housing targets in LPS should be revisited, justified or revised to the levels set out in the London Plan. Development expectations on individual sites should then be revised. 2. The Sewardstone Road area should be subject to a master planning exercise to create the basis for a local 0:25 minute city. It is not too early to start with the upcoming development of 60-74 Sewardstone Road, at which many similar issues will arise.		I have already sent written comments on LPS, and have been invited to take part in the Examination this February.	The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 32,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensity Study (2019).
Shiraz Mandil				S42 - Motorpoint, Sewardstone Road	Yes	No	No	The plan is unsound as there are no plans to increase the number of schools or school places available to the local area which has over-subscribed schools. It would also put a strain on the available health services where it is already difficult to obtain an appointment with a GP or dentist. Transport links in this area are very minimal so not only would existing transport services be strained it would put demand on additional parking for which I believe there is no capacity and would put pressure on local existing parking with the potential to result in a CPZ zone much to the dissatisfaction of existing residents. The proposed new homes would change the view of the city and create a eyesore I believe but my main concern is the lack of school places available for children being housed in the new homes or moving to the area.	To make the plan sound I would suggest that there is a new school built close to the proposed new homes, in order to reduce the distance that the existing local schools are given funding off to allow more children to attend and increase the number of teaching staff for the additional number of children expected to move in to the area. New or additional bus routes to and out of North Chingford would be required, or more frequent buses on existing routes to cope with the number of people moving in to the homes as well as existing residents.		Yes	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan requires that utilities infrastructure and connectors must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be able to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L126 planning obligation. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a networthily alleviation of congestion, parking problems and improve air quality. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensity Study (2019).

If yes, please explain why?	Council's response
Levy Parkison				S42 - Motorpoint, Sewardstone Road	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public/online meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life etc. Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Yes	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
Lucy Goulding				S42 - Motorpoint, Sewardstone Road	No Response	No	No Response	There is already too much traffic, too much pressure on the doctors surgeries and too much pressure on schools to reasonably accommodate even more residents. The buildings proposed are not in keeping with the area and it will become more like an inner city area rather than a suburban area on the edge of Epping Forest.	If new homes are to be built, there need to be fewer and much lower rise blocks of 4 floors maximum.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. 				S412 - Motorpoint, Sewardstone Road	No	No	No	Quite frankly I've no idea if the plan is compliant or unsound but I would assume at this point the process should be that those highly more qualified than me have reviewed all the documentation to check this. From a local resident point of view the majority of the plans put forward don't seem to take into account the semi rural location, preserving and highlighting the wonderful forest on our doorstep. All I seem to read is large blocks of flats here, there and everywhere. Just the impact on the infrastructure alone is huge and traffic in and around Chingford always was a knock on impact from the M25 and A106. How will the schools, doctors, etc cope - already it's challenging trying to get on aged. I'm not opposed to redevelopment but just keep things in keeping, similar style houses etc.	Go back to the drawing board and think again. Put in a plan that is relevant and sensitive to the area. We are on the edge of Epping Forest and are lucky to have such a wonderful natural environment on our doorstep. Let us enhance that with buildings more appropriate to the urban environment.			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.
				S422 - Motorpoint, Sewardstone Road	No	No	No	This proposed redevelopment is in no way keeping with the feel of the local area. We have the beautiful Epping Forest on our doorstep, which is surrounded by 2-3 storey houses. This gives the area a suburban feel. Flooding high rises in sight lines to the reservoir, on an already busy junction with little to no provisions in place for parking doesn't seem to make any sense.	Any new developments should be in keeping with existing dwellings and character of the area, so you should be looking at 2-3 storey houses/apartments with onsite parking.			The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Lee Cooper				S412 - Motorpoint, Sewardstone Road	Yes	No	No	Chingford NS always been open, close to forest it's big beauty of it. High rise is never good. Also Disfentional traffic on an already congested road, plus where is parking for so many new residents.	Lower rise flats			As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Brian Cokaty				S432 - Motorpoint, Sewardstone Road	No			Such a proposed development on this site is out of character with the surrounding neighbourhood. The Sewardstone Road junction area experiences very busy traffic and is poorly served with public transport. Options such as walking and cycling are not attractive given the location at bottom of Kings Head Hill. It would be highly likely therefore that incidents of the new electric would have cars which would need parking spaces. If provision is not made this would put significant pressure on local residential streets.	A much lower density development would seem to make sense on this site, and one which includes new amenities which could be accessed by people in the wider area, eg. a supermarket. At very least more car parking spaces for new residents needs to be included in the development, this taking full account of the relative location of the location, and the likelihood that many new residents would likely wish to have their own cars.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Wendy Stables				S432 - Motorpoint, Sewardstone Road	No			I feel that this is a dangerous undertaking as a couple of issues one being making the roads more congested than it is now, being that we are an off shoot from the M25 this is already heavily congested and our house more constantly through barriers every day and night and with regard to parking we don't have enough as it is now the beauty of Chiglington is due to the the valley river and the reservoir and to put up an enormous building is ridiculous and would interfere with the wildlife we currently have, and to propose a large structure on a bare junction is absurd and no consideration has been taken for the elderly which have lived here for many years and it is unjust we strongly oppose this site and where we 400 flats park!!!		No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Daniel Ashton				S432 - Motorpoint, Sewardstone Road	No Response	No Response	No Response	The type of buildings being proposed is totally out of keeping with existing buildings. The number of proposed residences would put unacceptable stress on local infrastructure. The local road network is already very busy also doctors surgeries and schools would be put under unacceptable stress.	Lower rise buildings would be more in keeping with nature of the area. Therefore containing fewer residents, putting less strain on the school, social care and health system.	No	-	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s.106 planning obligation.
Michael Drom				S432 - Motorpoint, Sewardstone Road	No	No	No	For to many dwellings, the area is already highly congested, amenities the factory and schools are already under severe pressure more congestion to local parking and local roads will cause considerable noise and pollution, back down the development.	Consult local area and get feedback and do a wildlife census and see just how busy the roads are in this area. Kings Head Hill is a congested and polluting area, take pollution readings and consider the consequences of more traffic.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. All applications will be required to submit a Construction Logistics Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase. As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.

If yes, please explain why?	Council's response
Frank Pace				S43 - Motorpoint, Sewardstone Road	No Response	No	No	The proposed planning application makes a mockery of a lovely, mostly green built area. The plans destroy the flat lines of Chingford, and the huge development will introduce nothing but increase crime and very heavy local traffic, adding to an already struggling Sewardstone Road and Lea Valley and Kings Head Hill. We strongly object to the developments.	The proposed development should be scaled down by at least 75%, a flat lined buildings, no more than 3 stories. Additional travel and health services are necessary.	Yes	I am concerned, as to developments in and around my area. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on certain sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
Roger Obiano				S42 - Motorpoint, Sewardstone Road	No Response	No	No	The plan does not appear to take the local environment, its aesthetic or resource issues into account. The area already lacks sufficient shopping, parking, GP services, schooling/nursery and transport links. The traffic in that area already represents a daily bottleneck without adequate alternative road options to leave/enter the area. Where are the plans to resolve these existing issues?	I believe a project which is not high rise would be logical. Although a high rise would not be in keeping with the look and resource constraints of the area, that is only a secondary issue. A plan with the volume of homes has to come with plans and resources to resolve the existing issues and shortages in the area. The area has weak transport and lacks adequate shopping, health and schooling which will be exacerbated by a project of this size	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Aaron Noel				S42 - Motorpoint, Sewardstone Road	No Response	No	No	It doesn't seem that impact on current residents, local services and amenities have been considered. Traffic, pollution and safety ought to be revealed. Transport links for the additional multitude is missing from these plans. I'm in favour of additional housing but means must be increased for them.	Extra transport, shopping district, parking, revision of the pedestrian crossing, increase to staff of services such as the local GP surgery, education facilities and entertainment venues should be reviewed. The sound recently surveyed opinions around 15 minute neighbourhoods. Regarding the sheer increase in population size of this area, in what way will this area's 15 minute neighbourhood be fulfilled with current plans?	No	Collaboration is necessary to reduce noise and enhance cohesion in shared living spaces.	The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development. Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Frederick Sambidge				S42 - Motorpoint, Sewardstone Road	No Response	No	No	The area is already short on decent services. Doctors will be swamped. Public transport is thin on the ground. Schools are already over-subscribed.	The area is already short on decent services. Doctors will be swamped. Public transport is thin on the ground. Schools are already over-subscribed.	Yes	-	The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Elizabeth Connolly				S42 - Motorpoint, Sewardstone Road	No Response	No	No	The roads are already very busy in this area and this would bring more traffic than prevent already. No extra local services planned.	Need to consider extra local services eg schools and reduce the number of homes being built on the site.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Eigen Mills				S43 - Motorpoint, Sewardstone Road	No	No	No	believe that the density and height of the development makes it unsound as it will adversely affect the area. The junction at Sewardstone Road is already very busy and this plan will only make the situation worse as 385 homes will probably have at least one car whatever the council believes. There will also be enormous pressure on local schools and healthcare facilities which are already under great pressure.	Reduce the amount of blocks and height of the buildings and more importantly add plenty of parking , at least one for each flat.			The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 3,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes towards encouraging walking, cycling and public transport use, planning applications for all new development must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
John Penricard				S42 - Motorpoint, Sewardstone Road	No Response	No	No	Lack of local infrastructure such as not enough parking, school places, doctors surgery places etc.				The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Natalie Oware				S42 - Motorpoint, Sewardstone Road	No	No	Yes	The demolition of the existing shops and flats were against planning permission. Surely therefore illegal. The plans are NOT in keeping with the area and will make this area worse. Buildings are too tall. Services already stretched yet none being added. Insufficient car parking. Not too far from M25 - people WILL have a car. Road junction already at capacity, almost completely congested.	Limit the height of the buildings to something similar to pre-existing buildings at tallest. Provide sufficient parking. Enlarge the junction and work on better traffic light sequencing. Increase services in area i.e new school, new doctors etc or at minimum enlargements to the above.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Sam Edwards				SA2 - Motorpoint, Sewardstone Road	No	No	No	<p>Planning is being prepared to be submitted but the I2F proposal hasn't been finalised. This proposal is based on 27,000 planned for the borough over a 15-year plan. However, the Housing target was based on a 10-year plan. Therefore, there is no evidence to show that this will be extended to include the same allocation over another 5 years. Therefore over 10 years only 8,000 homes are needed to meet the target. Things can change over such a long timescale. Waltham Forest doesn't have the space to build building, which is why all the proposals are for flats. No houses. This is why I also feel this target is flawed as it only raises 'homes and none of the properties planning to be built in Chingford are Houses. Covid has shown the importance of outside space for mental health so cramming families into flats feels like a step backwards. The tower blocks were pulled down at Chingford Hall estate for this reason.</p> <p>The Flats at 49 Sewardstone Road "Wingrove House is a Housing Association retirement block (WRA) which consists of 25 studio's bed flats. (Therefore a max. of 50 people over the 6 floors). This block has its own road access with parking.</p> <p>The Flats on the corner of Kings Head Hill "Shamhill Court are accessible from the end of Newfield Gardens. These flats consist of 3 bed properties to is more of a reasonable comparable. However, there are 33 flats, with limited resources (including Disabled) it seems like there are 4 one bed, 22 two bed and only 5 three bed properties. These Flats have easier access, and the grounds consists of parking spaces and allocated garages. Therefore, there is more parking for less properties and therefore less people.</p> <p>An additional 385 homes in a small area would have an impact on schools, and doctors which are already overcrowded. There is no breakdown to the site.</p>	No high rise blocks Houses rather than flats	No		<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London.</p>
Cassandra King				SA2 - Motorpoint, Sewardstone Road	No	No	No	<p>As above - parking, traffic (pollution and congestion); unsightly urbanisation of the area with ugly tower blocks; strain on local health services; educational provision.</p> <p>Additionally, air pollution is the biggest environmental threat to humans, and has direct effects on habitats and biodiversity. Already Kings Head Hill going north west towards the bottom of the Hill has a high volume of traffic and creates a major to high volume of pollution. Even on a quiet Sunday the measurement of pollution reads "moderate 80 and 120 (Chingford). Naturally, in rush hours, when traffic backs up to College Gardens, with cars idling, the levels of pollution per cubic square metre increase. Kings Head Hill and Sewardstone road are a focus area according to the report: 2020 Air Quality Annual Status Report, where the air quality should be monitored and an improvement project initiated in this area. The proposals considered the intention to improve air quality in that area. With the proposals for the quantity of new homes and the construction developments involved (i.e. volume of construction vehicles, noise created by developments), the levels of fine particulate matter (PM2.5), ammonia (NH3), nitrogen oxides (NOx), sulphur dioxide (SO2) non-methane volatile organic compounds (NMVOCs) will be increased not just in the construction phase, but when construction is complete and ongoing due to volume of families. The level of proposal, in an area already on the verge of a pollution overload, are not synonymous with the UK's National emissions reduction commitments and opposes the councils climate emergency plans of net zero targets by 2030.</p>	A thorough investigation into the air quality and traffic survey of the regions surrounding Motor point, Sewardstone Road, and Lea Valley and an exponential prediction of average of pollution in the area based on the development proposals. Once data has been collected, predicted and analysed, then steps can be taken to review the proposals, ensuring that they new proposals will be much more healthier for the local residents and that environment and aesthetically in keeping with the area of North Chingford.	No		<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).</p> <p>In April 2020, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-parked. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p> <p>The new London Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of the development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p>
Jan Colbour				SA2 - Motorpoint, Sewardstone Road	No	No	No	<p>do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the areas objectives assessed needs. This programme of identification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Councils duty to be sustainable, in the following ways: 1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.9 p.164) states 12,640 new homes over 10 years; and I2F7 is proposing 27,000 new homes by 2035 - a very significant excess of 14% over the required target. This huge development of 385 homes will alter the area detrimentally for local residents with regard to visually ugly tower blocks, increase in traffic, (on what is already a busy junction with Kings Head Hill) and the concomitant pollution, local parking, lack of provision for increased local services such as schools, GP access.</p>	As above - parking, traffic (pollution and congestion); unsightly urbanisation of the area with ugly tower blocks; strain on local health services; educational provision.	No		<p>The London Plan (2021) sets a 10-year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. Paul Willard				SA2 - Motorpoint, Sewardstone Road	No	No	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban (semi rural) in terms of building and character. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They are also not fit for purpose and will be a problem for other people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	As above - parking, traffic (pollution and congestion); unsightly urbanisation of the area with ugly tower blocks; strain on local health services; educational provision.	No		<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of the submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>

John Huggitt				S42 - Motorpoint, Sewardstone Road	No	No	No Response	This is an over development of an area already immersed with traffic problems and over crowding the thought of 365 homes all the added infrastructure is totally inappropriate - schools, doctors, parking (some people will need cars) Car charging points, electricity, gas, sewage all over loaded at the moment and disabled access. The thought of what this will mean to traffic coming between the residents? led to say the employment of people working in the local business there			To see what your intentions are and to argue against over-development	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L106 planning obligation.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. 				S42 - Motorpoint, Sewardstone Road	No	No	No Response	There is nothing like this height of building in Chingford. It cannot be right just to build great big tower blocks suddenly in such a nice area. Also where are the extra schools, the GP and dental practices? Where are the green spaces for people and also there are hardly any parking spaces! This will cause huge problems for local residents as people start fighting for parking spaces on the roads, and your council will probably impose charges etc. You should build sufficient underground parking before proposing any high rise. But when I look around other parts of London they're not building tower blocks like Grenfell, they build FOUR storey builds which seems to be a much better way of accommodating people. No one, unless they're from a war torn country, no one wants to live in high rises anymore. This is an outdated concept and shouldn't be imposed on Chingford, or anywhere else.	Yes		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s.136 planning obligation.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Lisa Bagley				S42 - Motorpoint, Speardstone Road	No	No	No	Have highways considered impact on already busy junction, including being used as an alternative route when the m25 is impacted by closures? Too many homes in a small area, urbanisation of a suburban area makes no sense. That is not the reason people move to Chingford for. Where is the provision of education/health & social services along with an uplift in transport options to serve the massive increase of people in a very concentrated area. Would like to see a good argument for building residential homes in a flood area - why put at risk when an increase in the climate change. Bottom of kings head hill area always affected by heavy rain.	Build low rise developments and houses, not tower blocks, with gardens to provide an improvement to wellbeing, as the pandemic showed people need an outdoor space of their own. Review with the Corporation of London and "Lee Valley Park to understand impact to soils." (Should not impact detrimentally). Highways to seal and monitor as part of review of local infrastructure. Plan should include provision of education/health/social etc services. Housing is needed but the right housing for the area should be considered, this is not Walthamstow Central or Tottenham Hale.	No	We are directly impacted detrimentally by the proposed development	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. Marlyn Gould				S412 - Motorpoint, Sewardstone Road	No	No	No	The proposal is out of character - the infrastructure is not able to cope with the extra traffic. No matter how much you try to get people cycling, walking etc they will still have one car (if not more) - where would the parking be? During rush hour particularly, as well as other times, the traffic is queuing along Lee Valley Road between Enfield and Chingford. Where are the extra school places, medical facilities etc that have been promised for other developments that never materialised!!				<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Linda Hainby				S412 - Motorpoint, Sewardstone Road	No	No	No	I believe that no regard has been given to the existing residents that surround the proposed development on Sewardstone road. Multiple issues is out of keeping with the existing environment - Chingford is a suburb at the entrance to Epping Forest. It is mainly 2 story houses or bungalows. Changing the form and feel of the suburb by building these flats and the other additional proposal to build flats oppo will adversely change the uniqueness of Chingford - Transport - the existing public transport links are inadequate for this development and the further areas planned in the area. There are 2 bus routes that only run 3x times an hour. - Traffic at the Sewardstone road junction with Kings Head Hill is already regularly congested with traffic jams daily. - Inadequate parking in the development will add pressure onto the surrounding residents.	Reduce the height of the proposed block to align with the rest of the properties in the surrounding areas. Address the inadequate public transport and infrastructure	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p>
Carole Lactmacker				S412 - Motorpoint, Sewardstone Road	No Response	No	No Response	I am not qualified to state whether this plan is either legally compliant or whether it complies with the duty to cooperate. I do know that it is imposed and strictly out of keeping with the part of Chingford where you plan to build. We are always being told that the council is interested in maintaining the borough for all residents but it seems that whenever a chance comes in this part of Chingford you manage to do your worst. In this respect I would mention Alana Heights, Kings Head Hill, the overdevelopment of the land at the top of Melba Avenue where three houses have been built on the site of one bungalow in a dark grey brick which does not in any way match or blend with the existing residences, as well as the two other sites on the Town Plan for Lee Valley Road and Sewardstone Road. My objections are: 1. Tower blocks are out of place in this area and are not ideal for families either. 2. Total lack of imagination in design. It looks like a child's plan for a Lego city. 3. Lack of available housing for those in need is not solved by putting people in boxes. It creates bad feeling for those who see their living area despoiled and creates more problems for families who have to live in tower blocks. 4. The facilities for such an increase to the local population are not there now and with the level of debt maintained by government for the foreseeable future are not likely to be. 5. With all the threats we receive on global warming, it is beyond belief that such a collection of high rises would be erected on an area subject to flooding in heavy rainfall, more of which is what we are told we must expect in the future. There seems to be nothing in the plans for this development to appeal to residents either now or in the future. Surely the Council could come up with something better than Lago City.	Go back to the drawing board and think again. Put in a plan that is relevant and sensitive to the area. We are on the edge of Epping Forest and we have to have such a wonderful natural environment on our doorstep. Let us enhance that with buildings more appropriate to the urban environment.	Yes	I do not know what examination hearing sessions are but if it means having input to any redesign or a total rethink then yes, of course.	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
P.K.Neville				S412 - Motorpoint, Sewardstone Road	No	No	No	The size of the blocks will look out of place and should be no higher than 4 stories. There is no mention of schools, DV Centres. The roads in the area are already congested. The whole area will be affected.	Protect what little green space & wild life is left. Make fewer dwellings with gardens and include 1 parking spaces per household.	Yes	We should have a say on any plan affects to area	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>

Jan Prior				S42 - Motorpoint, Sewardstone Road	No Response	No	No	<p>Potential for height" indication on map has not been discussed with wider community and other interested bodies in the borough.</p>	<p>For more local consultation, including borough-wide questionnaire, with no work to be approved that does not have at least a 50% approval rating.</p>	No	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Robert Wilds				S42 - Motorpoint, Sewardstone Road	No Response	No	No	<p>A 17 story block is completely out of character for a semi rural area such as this. The amount of occupancy is too much for the local infrastructure. As a village it is a better need for traffic for most of the day, and cannot be improved on. Such a development would only enrage us. This, lessons learnt from the folly of the 1960's building of high rise dwellings seem to be forgotten. Most of these were pulled down in Waltham Forest. Why start again? The idea of getting everybody onto bicycles is just a pipe dream that will never happen, so why concrete over everything? Yes, people do need places to live but, the idea need places to play. Over development takes this away.</p>	<p>Halt development.</p>	No	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>
Lucy				S42 - Motorpoint, Sewardstone Road	No	No	No	<p>I cant tell how high the buildings are to be. And how much parking, is being allowed.</p>	<p>Height of building not shown.</p>	No	<p>This affects our home. We could be over looked if flats are too tall. And low sunlight from our gardens.</p>	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Brian Moon				S412 - Motorpoint, Sewardstone Road	No Response	No	No Response	I personally do not wish to live in an area with Tower blocks all around me. I cannot see on the plans where it sits the height of the properties. I don't understand that they could be up to 17 stories high. I used to live in their grey next to Broadwater Farm what an eyesore on the landscape! That was about 50 years ago now, then moved to Walthamstow and then onto Chingford because it was nice and rural. Now you are about to change all that! I may as well move back to Harleggy perhaps.	I do not think it matters what the public say because you will go ahead so let the properties be built anyway. You should listen to what the public want because at the end of the day it is the public that pay your wages. I would prefer 2 to 3 story properties with a few shops and a restaurant perhaps.	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Character Interfinition Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on certain sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Diana Czekot				S412 - Motorpoint, Sewardstone Road	No	No	No	Our school are oversubscribed also our gp, traffic is already caotic.		No		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. 				S43 - Motorpoint, Sewardstone Road	No Response	No Response	No Response		Any development should be low rise only and maintain as much green space as possible. High rise buildings will look completely out of place and change the character of the surrounding area, not in a good way, making it congested.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
John Cole				S42 - Motorpoint, Sewardstone Road	No	No	No	Proposed development is massively out of keeping with the surrounding residential area. High rise high density buildings will forever destroy this pleasant area.	Any proposed development should remain low rise 3 or four storey maximum and provide sufficient parking spaces for all dwellings. There is insufficient school/doctor's in the area to cope. Extremely limited public transport services. The area already contains a very busy junction. Any high rise high density buildings will negatively and severely impact the traffic flow. This will cause higher pollution in the area. The proposals will create many more problems for the area. My family has lived in this area for almost 50 years. LDP's planned proposals will provide no benefits to the existing residents. The plans are borne out of money and politics.	Yes	I believe that the development is being carried out without consideration of the best interests of the existing local community. LDP is putting money and politics before the residents which they are supposed to serve.	Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Derek Cockerill				S42 - Motorpoint, Sewardstone Road	No Response	No	No	I believe the proposed development is not in-keeping with the area. I have no objections to the development of housing but totally disagree with the proposed height of units above 6 stories high. The suggestion that this is in-keeping with the 'Gateway' to Waltham Forest is misguided at best and at worst, a way of building upwards with little consequence. I also believe the plan is flawed as there is insufficient regard to facilities - particularly Schools and Doctors. I see little planning to accommodate additional traffic congestion and resultant pollution.	Reduced height of tallest building to 6 stories and reduction in total number of units (flats) to 200.	Yes		The definition of tall buildings across the borough is sound and in conformity with the London Plan, as agreed in the Statement of Common Ground AT LPE27. The Local Plan is careful to identify the differing characters across the borough and sets clear policy expectations relating them. Particular attention in relation to this is drawn to Policy 8 - Character Led Intensification and the new 'Building Heights' policy proposed through Main Modifications. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Andrew Fearon				S42 - Motorpoint, Sewardstone Road	No	No	No	Absolutely inappropriate to fit in this amount of housing without parking and with the local infrastructure already struggling	Scrap it	No		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. This response is noted.
Katherine Waldrab				S42 - Motorpoint, Sewardstone Road	No	No	No	The plan for such a large amount of homes and proposed height does not fit within the look of the surrounding area. The schools, hospitals and GP surgeries are already stretched to the limit and cannot manage the level of people they currently hold. This plan will distort the look and ambience of the local area	Lower rise building, less flats more affordable houses with gardens, building of a school and/or new General Practice for the new houses to this area	No	It's only fair for those who already live here to have a say in how our area will be affected	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. Gavin Taylor				S43 - Motorpoint, Sewardstone Road	No	Response	No	No	I think you are putting too many new homes and flats in one plot, the schools and doctors and services as well as the public transport wouldn't be able to cope in alone inadequate parking around these areas. As well as the traffic around these areas are bad at the best of times I think it will just make it ten times worse. Sewardstone road and the road between the reservoir normally it's a stand still at certain parts of the day as it is.	No		<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Ellie				S42 - Motorpoint, Sewardstone Road	No	No	No	<p>The sheer volume of increased residential properties will bring numerous planning and town management concerns, and would go against the Council's own Core Planning Strategy. I believe the main reasons this plan should be objected include:</p> <ul style="list-style-type: none"> - considerable over-development - Sewardstone Road and Lee Valley Road are already very busy roads with traffic issues - increased traffic will cause environmental damage which will negatively impact the council's environmental targets. - Building 305 new residences, in such a confined area will put considerable pressure on local resources which are already under a large amount of pressure (e.g. schools and healthcare) - During development, the significant building works required could prove hazardous to local residents due to it being next to a filling reserve. Furthermore, would the Council be able to safely assure itself that the residents of such a tall building would be safe in the event of an explosion in the site next to it. 	<p>apartments or dwelling in character of the local area - other adjacent and opposite properties are two storey residences.</p> <p>increasing the amount of primary and secondary schools in the area.</p> <p>increasing healthcare providers in the area.</p>	No		<p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation Document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Laura				S42 - Motorpoint, Sewardstone Road	No	No	No	<p>The roads are already a nightmare along this section of roads with huge traffic build up due to roads leading to M40, A10 and A25, so adding extra cars will make this even worse, and where are all the people who move into these places meant to park their cars? There is already no space around the local area. The building will look completely out of sorts in this area due to the nature of the forest so will look like a complete eyesore and out of place! There is already no school places or appointments for doctors between the residence in the area already so adding to that will be an added pressure in the area. Also where they are planning to build may affect the area of the reservoir and there is already local flooding in the area and also it will affect the wildlife around there.</p>	<p>don't think anything should be build in that area.</p>	No		<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements, and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
				S42 - Motorpoint, Sewardstone Road	No	No	No	<p>Such large blocks of flats in a semi-rural area are completely out of keeping and are on the edge of Royal Eggling forest and gravel hills of the reservoirs. Has anyone considered that large blocks of flats which are being proposed bring with them crime and that it was not very long ago that such blocks were demolished due to problems. It is unhealthy to have so many people living in close proximity with little area in which to site, exercise, dry wash/dry except on balconies, storage etc. what action is being taken to ensure that the number of residents in the proposed developments will be able to access health facilities, schooling, public transport and that there will be adequate parking? I believe that the effects of introduction of such large number of additional residents has not been thought through.</p>	<p>If it necessary to demolish the existing buildings to provide more housing, the new housing should be similar to the new buildings on the opposite side of Lee Valley Road which is in keeping with the area and will not destroy the current feel of semi-rural Chingford.</p>	No		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>
Mrs V Goldstein				S42 - Motorpoint, Sewardstone Road	No	No	No	<p>The local area is all ready under pressure. You can't get a doctors appointment, you cannot get routine treatment at any of the hospitals. The schools are over crowded. The corner of Lee valley road is always congested row without further traffic being added. There have been a number of accidents near there. These new buildings are too high and too heavy. I know we need more homes but we also need more schools, doctors, hospitals and shops and parking for all these people to use.</p>	<p>lower the height of the building. Put in the infrastructure to support all the people moving here as the local schools, hospitals and doctors will not be able to cope.</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation Document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>

Marklyn Gould				S413 - Motorpoint, Sewardstone Road	No	No	No	Who in their right mind would consider building extra housing at this cross roads! Lee Valley Road cannot be widened due to the reservoirs so the extra traffic will cause extra pollution!				As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.
Mrs V Coates				S412 - Motorpoint, Sewardstone Road	No Response	No	No Response	The size of the development of 385 homes does not take into consideration traffic congestion in this area (Lee Valley Rd is already severely congested.) Lack of provision of schooling, shopping and access to GP surgery. This development along with S413 and S414 makes the size of the development totally unacceptable.		No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Miss Kaur				S412 - Motorpoint, Sewardstone Road	No	No	No	All your proposals for developing sites in North Chingford and Sewardstone area do not take into account the impact this will have on the already heavy traffic flow in the main arteries such as M25 and A502. In addition, what additional provisions will be made to support services like health and education services? which are already difficult to access as existing residents to access. In terms of economic drive - what are your plans to support the dying and struggling existing businesses? You need to create a thriving high street to encourage people to dwell and shop.	Scrap your plans and look at creating something along the lines of CHATE in Loughton or indeed Walthamstow. We have a rich history in North Chingford with some excellent creatives who can support something much more cultural and celebrate with an opportunity to develop opportunities for start-up business space.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Andrew Feason				S413 - Motorpoint, Sewardstone Road	No	No	No	The local area has a shortage of facilities (Doctors/clinics/schools etc) now. The local authority is restricting parking access when we need more and there will probably be little parking circles for those homes. The addition of masses of extra homes will have a severe detrimental effect locally.		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. This response is noted.
Lucy				S412 - Motorpoint, Sewardstone Road	No	No	No	The development is too large. In height and size. There are no buildings of that height close. Our home would be over shadowed by them.	Make them a reasonable height in keep with the general appearance locally. No taller than three or four stories.	No	This affects our home. We could be over looked if they are too tall. And lose sunlight from our gardens.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.

Troy Hunt				S412 - Motorpoint, Sewardstone Road	No	No	No	Something with this level of stories is not in keeping with the surrounding area it would be incredibly disruptive to the views across the reservoir and not to mention the lack of parking or local infrastructure that can cope with that many people.	Maximum 2 story houses.	No		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Linda Ball				S412 - Motorpoint, Sewardstone Road	No	No	No	I understand that there should be adequate infrastructure in place, parking availability etc. There is not.	Less dwellings. Family homes with gardens and parking, the sort of property people like to live in.	No		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Peter Huxthorpe				S412 - Motorpoint, Sewardstone Road	No	No	No	This site allocation is unsound as it is not deliverable. With a PFAL rated at 1b, this site does not comply with London Plan Policy DK12(d) on transport capacity. Crossrail 2 will no longer become operational within the lifetime of this plan. There are no plans to establish the north-south greenway on the east bank of River Lee.	Reduce the site residence capacity to less than 282 and postpone site development until after completion of a north-south greenway.	No		The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Miss Bernice Burton MBE				S412 - Motorpoint, Sewardstone Road	No Response	No	No	It is not clear to me how the duty to cooperate would be complied with, since it isn't clear who the other party is. These sites are the River Flood Plain, at a time of increasing heavy rain fall caused by climate change, and the likelihood of changes in weather patterns causing more frequent and heavier rainfall. I believe such high volume building on this site should be flagged. What alternate sites is being proposed for those businesses? What will happen to their employees? Job losses, and economic decline will likely result. Building on such a massive scale so close to the Giffing Reservoir water supply.	building on these sites should not be permitted, because of the long term possibility of flooding. The Plan talked about Utilising Green Spaces there are no green spaces in that area. All trees on the plans are a few trees. There should be proper recreational outdoor spaces for adults and children in the plans.	No		Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. The site allocation requires that replacement commercial floorspace is reprovided, ensuring that the site still provides economic opportunities. The Duty-to-Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Ruby Walsab				S413 - Motorpoint, Sewardstone Road	No	No	No	I am not convinced that flooding will not be an issue on this site. There appears to be insufficient parking and schools, healthcare and transport in this area is already overextended. I feel there will be major traffic issues and a strain on all local services especially if the petrol/ service station is removed.	More parking spaces within the development. Service station to remain. Less building generally to this site. New Doctors surgery and additional schools.			Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Janine				S412 - Motorpoint, Sewardstone Road	No			Lack of infrastructure in local area. Proposed plans not in keeping with existing properties in area. These type of developments will cause an excessive amount of pressure on the local area. It is already an area that lacks transportation links and is already extra-remly congested on the roads.	Development should be in keeping with previous building which was demolished	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Mariah Ahmet				S412 - Motorpoint, Sewardstone Road	No Response	No	No	The proposed high rise properties will not match existing area, and will not be in keeping with the area. They will be a blot on the landscape and not wanted in Chingford - a gateway to Epping Forest. How are existing services (healthcare, schools etc) expected to cope with the increased population in the area if the project is completed.	The community feel of the area will be lost as development will create a highly populated town like feel. Could the number of units be reduced using a lower rise development instead - no more than 3/4 stories high	No	I feel I should have a say in the development of the area I live in	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
John Penricard				S412 - Motorpoint, Sewardstone Road	No Response	No	No Response	There is not enough infrastructure in the local area to support all the extra people in these flats. Not enough parking, school places, doctors surgery places plus it will be a blot on the landscape.		Yes		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S412 - Motorpoint, Sewardstone Road	No	No	No		More parking. More schools are needed and more doctors are needed	No		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. Oliver Vandrom				5432 - Motorpoint, Swardstone Road	No	No	No	How can you build that many flats and have no plan in place for parking, the extra burden on local schools, doctors surgery and the detrimental effect it will have on the local community		No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
John Smith				5432 - Motorpoint, Swardstone Road	No	No	No	I think it is illegal, it definitely does not keep in with the area, it will not be able to accommodate people into schools doctors or hospitals. I work in a Drs surgery that is so overwhelmed at present. Car parking in the area and congestion is going to be horrendous. I cannot believe the council's even considering this proposal and if they go through I will lose my faith in the council you will be ruining Chalfont for good.	This should not go through for all the reasons above.	No		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Lu				5432 - Motorpoint, Swardstone Road	No	No	No	Other failure to consult in any meaningful way over the plans	Proper open consultation with the local population	No		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
James Lackmaker				5432 - Motorpoint, Swardstone Road	No	No	No	It is not the responsibility of the residents to have to consider if a planning application is legally compliant or not. This is the role of the Council and Planning departments. It either is or isn't. If it is not legally compliant, it should be rejected" and if it is not viable to expect the residents to have access to the documentation or time required to build a legal argument detailing the legality of a major development of this type. The residents, who are stakeholders in the area in which they live, have a right to have a view on how the proposed development will impact the lives of both them and their families. The discussion does not only center around the legal argument. Impact to those living in an area and those moving in are key factors and should carry equal weight in the discussion. High rise properties may be more suited to city living, but suburban design should reflect the type of living people move to the suburbs for, that being space, amenities, improved quality of living to name but a few. The parade that was in place before being demolished - the legality of which should be reviewed, contained a range of shops that covered the needs of residents in the area. They helped establish a community, something which town planners like to talk about but through poor design and little thought of the existing area often fail to achieve. The properties that existed were in keeping with the area with red brick construction and pitched roofs. The proposed redevelopment of the site with up to 8 stories of accommodation is grossly out of character with other properties in the locality. The property will dominate the landscape and affect the views of existing residents. Natural light will be reduced, greatly affecting the living conditions for those opposite and on adjacent roads that surround the proposed development. The traffic capacity of the Kings Head Hill, Swardstone Road junction is low at the point whereby there are daily traffic jams leading to increased pollution, congestion and noise.	These developments are not simply glass to live, they are changing the shape of the area in which we live. They should be rejected until such time as full public consultation has been allowed to take place that reflects the needs and wants of those living in the area affected by the proposed works.	Yes	All residents should be involved in the process.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.

Fiona Cousins				S412 - Motorpoint, Sewardstone Road	No	No	No	<p>I think this has to be the hardest consultation I have ever been asked to participate in. I do not understand how you think it is appropriate to expect residents to understand what you are asking. Therefore, consider this consultation to be ridiculous and flawed, you would appear to be pushing this through regardless of the local residents concerns or needs.</p> <p>I totally agree with the following comments. This level of intensification prioritises housing above all, to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Council's duty to be sustainable. In the following ways: 1) It is not economically sustainable. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.3 Pg. 154) states 12,047 new homes over 20 years and LBWV is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. This huge development of 583 homes will alter the area detrimentally for local residents with regard to visually ugly tower blocks, increase in traffic (on what is already a busy junction with Kings Head Hill) and the associated pollution, local parking, lack of provision for increased local service such as schools, GP access.</p> <p>Believe that no regard has been given to the existing residents that surround the proposed development on Sewardstone road - multiple stories, a sort of keeping with the existing environment. Clipped off a suburb at the entrance to Epping Forest. It is mainly 2 story houses or bungalows. Transport - the existing public transport links are inadequate for this development and the further ones planned in the area. There are 2 bus routes that only run 3-4 times an hour - Traffic at the Sewardstone Road junction with Kings Head Hill is already regularly congested with traffic jams daily - Inadequate parking in the development will add pressure onto the surrounding residents.</p> <p>am not qualified to state whether this plan is either legally compliant or whether it complies with the duty to cooperate. I do know that it is not.</p>	<p>Pay attention to car parking, don't build on flood areas, what about our health services, there are a limited number of GPs in the area. What about school places.</p> <p>Also make a better consultation, this one is flawed</p>	Yes	<p>I don't really know what you mean? This consultation is too complicated, who is it aimed at, if residents, you should try again.</p>	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2013 and in accordance with the Council's Statement of Community Involvement.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality alleviation of congestion, parking problems and improve air quality.</p>
Clara				S412 - Motorpoint, Sewardstone Road	No	No	No	<p>This is excessive in not giving the raised the very good comments and issues that other residents have made.</p>	Go back to the drawing board come back with something more realistic	Yes		<p>The Local Plan will need to be in general conformity with the Highams Park neighbourhood plan in order to be found sound. This site will be reviewed to ensure this is the case and any amendments made as necessary.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p>
Abigail Woodman				S412 - Motorpoint, Sewardstone Road	Yes	No	Yes	<p>Walham Forest Council quite rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. And in the south of the borough, access to the marshes is being used to support intensive development. In contrast, in the north of the borough, development must be designed to 'minimise access to Epping Forest and' mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.</p>	<p>The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed.</p>	Yes	<p>It is essential that green spaces have a voice at the table during the examination hearing sessions.</p>	<p>The SANG strategy will be delivered as part of the Local Plan to ensure the spaces identified within it see improvements as development comes forward.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
-				S412 - Motorpoint, Sewardstone Road	No	No	No	<p>Two many high rise dwellings will completely spoil our area and the vital thing is that there will be no extra resources to meet the needs of new residents.</p>		Yes		<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality alleviation of congestion, parking problems and improve air quality.</p>

Tim Hancock				S42 - Motorpoint, Sewardstone Road	No Response	No Response	No Response	Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, demigrations to the surrounding environment, negatively affecting the current residents?) This is an inconsiderate and arbitrary decision to simply drop a development in to the community is a classic case of developers reaping their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and timely right to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions centering on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests, who are not attached to the community and therefore unaffected by the devastating and painful outcomes for all families and communities down on the ground in local areas. Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country. The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence. The current proposed developments are reminiscent of the failures that are	Reject based on continued demigration to local community and strain on local services, as pointed out above.	No	This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Saboteur using tactics to displace current communities. This approach also seeks to compound the destruction of local communities by reporting anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is treating social and cultural desert one enclave at a time, SO YES, I STRONGLY OBJECT, and I am keen to understand how the people who profits from and roots in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response

Reto Fisher	S43 - Lea Valley Motor Company	No	No	S43 - Lea Valley Motor Company	No	No	<p>Waltham Forest Local Plan (LP1) 2020 - 2035 Policy 11 A. It states: "400 homes in the Sewardstone Road strategic location". Between S42, S43 and S44 there is a "indicative development capacity" of 477, an increase of 17% above the plan. So LP2 is not sound in alignment with LP1. This is also the numbers before developers claim they need to further increase density to fund affordable units and S106 agreements.</p> <p>Policy 11 C states "Strengthens, supports and encourages existing and new employment opportunities". S42 and S43 are commercial land, so designating area for residential development does not align.</p> <p>Policy 11.6 states "Contribute to the improvement of... walking and cycling accessibility, connectivity, permeability and legibility to Ponders End; improvement of active travel facilities along Lea Valley should be included in the Development guidelines.</p> <p>Waltham Forest Local Plan (LP1) 2020 - 2035 states that: "Areas will benefit from having improved transport access via links to Crossrail 2 stations in Enfield to the west. This will enable the expansion of the Sewardstone Road neighbourhood centre".</p> <p>As Crossrail 2 has been suspended it is very unlikely that it will be built within plans timeframe, therefore it should be removed from consideration and only current facilities and projects with confirmed funding should be included.</p>	<p>What is the Duty to cooperate and what makes a plan sound or not sound. Is the consultation for the public or planning officers?</p>	No	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/ fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Being on regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</p> <p>The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs', in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	
	S43 - Lea Valley Motor Company	No	No	S43 - Lea Valley Motor Company	No	No	<p>The proposal of the buildings and height of the buildings do not fit with the keeping of the suburban area. There will be more pressure on services that are already overly stretched i.e. transport, schools, GP practices, social care etc. There will be more congestion and traffic fumes on the roads. Initial plans were unapproved but went ahead anyway. Insufficient parking</p>	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a networkworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan drives planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>In April 2019, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not result to a decrease in air quality during the construction or operation stage as a passive measure.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a networkworthy alleviation of congestion, parking problems and improve air quality.</p>	No		
Susan Marsh	S43 - Lea Valley Motor Company	No	No	S43 - Lea Valley Motor Company	No	No	<p>Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision. This will disadvantage older people. The plan needs to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/night, additional demand for parking. Consultation flawed as no leaflets/pamphlet being made to advise residents, only an live zoom meeting. Shortage of doctors, hospitals, dentists, schools ect.</p>	<p>build homes to height of existing buildings, provide parking, healthcare, education ect.</p>	No	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Council is committed to playing a part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/nightlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a networkworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Mike Chrimes	S43 - Lea Valley Motor Company	No	No	S43 - Lea Valley Motor Company	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. This suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with rules that are not transparent to consultees.</p> <p>Consultation on the site allocation LP1 element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan LP1 for 2020-2025. This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been well attended by political point scoring, while others have been subject to those making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get into online.</p> <p>In general however it has been apparent both from LP1 and what has been stated at consultation meetings a major driver for the identification of development across the borough has been a housing target of c. 1300 homes an. While EWFP has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More</p>	<p>It is suggested that until master plans are developed, through consultation, for the main centres identified in eg LP1 map consultation for individual sites is avoided. With reference to site S433 the chief driver in bullet point order is to provide 12 homes. It is unclear whether this is justified alongside the loss of local employment occasioned by high development.</p> <p>This site is one of a number of strategic sites considered for development. The Borough's strategic objectives over to the provision of a variety of employment opportunities, individually this might represent a great loss of a facility or vehicle related employment, but there needs to be holistic view of the demand for garages across the area, which is far more motor vehicle dependent than southern Waltham Forest.</p> <p>It is unclear why no reference is made to Epping Forest SAC when it is for the neighbouring site.</p> <p>Particular mention of cycle and pedestrian connectivity is made yet any gain in width for cycle lanes along Lea Valley Road would be beneficial, particularly approaching a busy junction.</p> <p>More generally the Borough supports for the 15 minute city challenge at this site. Pedestrian and cyclist access to the nearest primary school is difficult, the North Chingford retail and cultural centre is also a push.</p> <p>Potential residents might be attracted by ease of access to Essex and Hertfordshire and the M25 via Sewardstone Road, but there is currently no public transport option to facilitate this.</p> <p>An active frontage is suggested along Lea Valley Road although parking would be difficult and pedestrian access along such a busy road an unattractive option</p>	No	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. Anthony G Thomas Lip				S433 - Lea Valley Motor Company	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must:</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 25, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 24(1).</p> <p>11.7(a) A local planning authority must:</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the fact that the local plan which the local planning authority propose to prepare, and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(A) each of the specific consultation bodies at the local planning authority consider may have an interest in the subject of the proposed local plan,</p> <p>(B) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(C) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(D) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(E) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(F) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(G) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(H) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(I) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(J) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(K) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(L) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(M) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(N) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(O) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(P) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(Q) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(R) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(S) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(T) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(U) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(V) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(W) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(X) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(Y) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p> <p>(Z) any person who has submitted a written representation to the local planning authority in respect of the proposed local plan, and</p>	Yes	Because there are too many unsound issues	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connectors must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>	
Lee Philips				S433 - Lea Valley Motor Company	No	No	<p>Without being legally trained or having the time to research the requirements that make the plan compliant, I am unable to comment as to whether I consider the local plan legally compliant.</p> <p>I do not believe that the proposed local plan is sound as there seems little consideration of the current Community, Infrastructure, Environment, or existing residents of the area.</p> <p>The proposed development of over 40 dwellings within this site boundary suggests little consideration has been given to the current density of the area. Aside from two or three exceptions, the local housing is predominantly provided within 2 storey family homes with outdoor space, the proposed development of high density housing in high rise residential blocks is not keeping with the character of the local area. I moved to the area just over 7 years ago due to the character, the suburban environment, but most importantly the nice community feel, with such high density housing, I fear that this may change. Policy 15 from LPS identifies a requirement to safeguard the local character of the area or improve the quality of the local environment - I believe that the proposed schemes do not meet this requirement and not within LPS's own proposals as they neither reflect the current character or, in my opinion, improve quality. There also seems to be a lack of consideration regarding access to public transport, the area has a PTAL rating of 1b, the proposed access to public transport, the area has a 20-minute walk away, unfortunately we now know that this is not going ahead. The wider proposal of 400 dwellings, without an increase to local work, will result in the majority of working adults having to commute, considering that Chingford rail station is a 20-minute walk up a steep hill, which will be a challenge to those with ability issues, and using up the hills only for the most dedicated, access to public transport needs to improve. The proposals do not seem to address how access to public transport will improve and yet all the developments are proposed car free, in reality, the households will not be car free, instead</p>	Yes	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPAs), Special Areas for Conservation (SACs) and Sites of Special Scientific Interest (SSSIs) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSIs), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SACs), Ramsar sites, or Special Protection Areas (SPAs) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Duty to Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p>		
Frank Face				S433 - Lea Valley Motor Company	No	No	<p>Feel this will destroy the area and the necessary scale of this plan is not in keeping with the area. There will be substantial increase in traffic and crime, we really object and not with in keeping of the area.</p>	Yes	I am concerned, as to developments in and around my area. <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Mr Ball				5433 - Lea Valley Motor Company	No Response	No	No	Additional housing in the area will add to the already busy traffic and pollution!	A lower density housing and that is, at most, the same height as surrounding housing.	Yes		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon an air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local Plan, drives planned growth to previously developed sites that are currently under-utilised and best to generate high numbers of grants or rebated vehicle trips. Redefinition of these sites in accordance with Local Plan policies also significantly reduce vehicle traffic across the borough. Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				5433 - Lea Valley Motor Company	No Response	No	No	Development not in keeping with surroundings. This is a suburban area with mainly low rise housing. Essential services (School/healthcare clinics, public transport, etc) insufficient off street parking proposed.	Development needs to include services, such as health clinic/doctors surgery, school/pre-school nursery, etc. There also needs to be sufficient parking spaces included. This could be in the form of an underground car park. There are other developments in the borough, such as Fulbourn road, where there has been a nursery and gym included in the build. This bringing extra services to the area.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Sarah Sanders				5433 - Lea Valley Motor Company	No	No	No	I do not believe the Local Plan is legally compliant as the process has not been easily accessible and inclusive of the needs of many of our local residents. Many residents in close proximity to the Sewardstone Road sites of older age, with generally more limited access to the online resources shared and less experience with providing comments and feedback on such complex documents online. The JPI and JPI feedback phases have also been so complicated that they have deterred or prevented most from providing feedback at a time when public meetings have been prevented by the pandemic. This contribution has prevented many from knowing the full detail of, or providing their full feedback on the Local Plan which questions the validity of the community engagement. I believe the Local Plan is unsound, with the plans for this site and the other two at Sewardstone Road in contradiction to many strategies and plans for the purposes of these comments I have assumed that the proposed 150 homes will edge with the W1 average occupancy of 2.5 (ONS 2011) bringing over 39 new residents. I development beyond the capacity of local transport or personal transport. Contrasting Local Plan Policy D1 (2) and Local Plan 1 Policy 5 G and the JPI Strategic Policies - Six Golden Threads (2 & 4) This area has a PTAL rating of 1b - with public transport already stretched there would be a struggle to support 39 new residents. While the transport hubs at Chingford, Station Road and Ponders End are accessible on foot or bike to the future residents, they are not easily accessible or inclusive to the needs of all residents with the oldest, youngest and those with additional mobility needs being excluded (bicy road, uneven and narrow paths, hilly topography). The proposal of car free developments is impractical with limited public transport to the local large supermarkets, and public transport operators terms preventing the carriage of large items (DV items, etc).	More accessible and in person presentation of the Local Plan to ensure community engagement. Reducing the proposed development to a maximum of 4 new homes and a maximum of 4 storeys (sensitively designed) to maintain more appropriate density of housing in keeping with the area. But this must be supported in substance by: - improving the area PTAL rating significantly with improved bus routes, repaired cycle lanes and safe even walking/mobility vehicle routes to main the stations. - Parking development until once Cross Rail 3 and reliable connections are in place. - including provision of shared access vehicles such as car clubs. - investing in local healthcare and education services and facilities - new schools or the extension of existing schools to cope with the increased resident numbers. Ensuring that any Leys will be included in the immediate area. - Ensuring safe and inclusive access to SANGS - such as the reservoirs, waterways and pathways to Gunpowder Park as well as new green space as part of the development to limit the impact on Epping Forest SINC. - improving the junction and road layout at Sewardstone Road and King Road (W1) Lea Valley Road.	I am part of a local residents association which with our residents concerns to be included.	This response is noted. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the Biodiversity or nature conservation value in any land or area within the Identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA), will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to a spike in the number of Covid-19 cases at the time of the consultation on this document, engagement events were held online for the safety of our residents and officers.	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Paul Wellard				S433 - Lea Valley Motor Company	No	No	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low-rise suburban/semi rural in terms of buildings and landscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially increased) and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.</p>			<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
My Ball				S433 - Lea Valley Motor Company	No Response	No	No	<p>The development will add to the already very busy traffic and pollution in the area.</p>	<p>Development should be the same height and density, at most, as the housing in the local area. With parking spaces, at least 1 space per household.</p>			<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Jenine				S433 - Lea Valley Motor Company	No Response	No	No Response	<p>This proposed development is not in keeping with existing buildings in the local area. The area is already highly congested.</p> <p>There is a lack of regular transportation and due to its location it is extremely difficult to walk and cycle locally. Government services such as doctor surgeries and schools are already overpopulated and these plans do not seem to take this into account and do not include any new facilities for the public. Any new developments should be in keeping with the local area and the provision of new amenities for the public should be considered not just housing. This area is already highly congested and adding new homes at an already busy junction will cause major disruptions for local residents.</p>	<p>More public services. Better transportation links.</p>	No		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Lambros Poulas				S433 - Lea Valley Motor Company	No	No	No	<p>Too many properties in a short space. Traffic suffers already there and there is no provision for this extra strain on traffic, as well as parking, doctors, dentist, nurses and local schools.</p>	<p>Too many properties in a short space. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2016).</p>
Katherine Waldrab				S453 - Lea Valley Motor Company	No	No	<p>Losing a promising business that brings money into the area and replacing it with 23 homes is detrimental to the local area and to current occupants. 23 new homes could mean anything upto and beyond GP practices. Without the space in schools, hospitals and local doctor surgeries.</p>	<p>Houses, with gardens over flats would be more suitable. More green space is needed. If you are replacing a local sustainable business it should be with an amenity that is needed such as more GP surgeries ect</p>	No	<p>It's only fair for those who already live here to have a say in how our area will be affected</p>	<p>The site allocation requires that commercial floorspace is provided, ensuring that the site still provides economic opportunities.</p>
Wendy Mapp				S453 - Lea Valley Motor Company	No	No	This is going to be a complete eyesore and not in keeping with the local environment.	Maximum 2 story houses	Yes		<p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 site out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Peter Heatherley				S453 - Lea Valley Motor Company	No	No	<p>This location is contrary to LPS para 4.58 as amended which reads or make new development to those places that offer the best access to services, facilities and public transport (both now and for the foreseeable future). S453 does not fall into this category and the Infrastructure Development Strategy does not envisage significant changes within the scope of this plan. Therefore this level of development is not achievable and would not provide livable accommodation.</p>	<p>Sites S452, S453 and S454 developments must be reduced to total no more than 130 residences - a number that will still stretch the facilities available.</p>	No		<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites to 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>

DECREASE OF EXISTING PROPERTY VALUES 19. CHANGE FROM QUIET RESIDENTIAL TO URBAN AND COMMERCIAL DEVELOPMENT	essential for residents participation	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-japped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime. The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible. Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exemption test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). The Council commits to a long-term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential	
				S433 - Lea Valley Motor Company	No	No	Planned buildings are totally out of keeping with the area. Totally inefficient transport links and parking provided. The area is already heavily congested during the day. No planned increase in health provision planned nor extra schools.	Buildings shouldn't be more than 3 stories. Unapproved local plans are being used as the precedent rather than the existing building. Extra transport links should be provided before completion. Council Z will not be completed in time if ever.	Yes		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
A)				S433 - Lea Valley Motor Company	No	No	No	Too many flats yet again! Why does Brf council feel they need to build up Chingford & take away all our character. Chingford is already over populated, schools, ggs, rhd districts. I've lived in Chingford nearly 15 years & I can't get a rhd permit & it already takes 2 weeks if your lucky to get a doctor appointment.				The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Mr G G Underwood				S433 - Lea Valley Motor Company	No Response	No Response	No Response	A HUGE DEVELOPMENT WHICH WILL SPOIL THE AREA AND CAUSE MORE HAVOC AND CAUSE MORE TRAFFIC WITHIN THE AREA	BUILD BUILDINGS TO A MINIMUM HEIGHT OF FOUR FLOORS HIGH SO IT BLENDS IN WITH THE LOCAL AREA AND NOT A BLIGHT WITHIN THE AREA.		I WISH TO KNOW WHAT IS PROPOSED TO BE BUILT WITHIN THE AREA WHICH AFFECT ME	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Cassandra King				S433 - Lea Valley Motor Company	No	No	No	I live close to the area and have not had any information put through my door or made known to me about the proposals for the implementation of new housing around Motor point, Sewardstone Road and Lea Valley. Therefore, there has been a lack of consultation for the residents of the local area. Additionally, air pollution is the biggest environmental threat to humans and has direct effects on health and biodiversity. Already King's Head Hill going north west towards the bottom of the hill has a high volume of traffic and creates a moderate to high volume of pollution. Even on a quiet Sunday the measurement of pollution reads "moderate to bad" (pm10 20ug/m ³). Naturally, in both hours, when traffic backs up to College Gardens, with cars idling, the levels of pollution per cubic square metre increase. King's Head Hill and Sewardstone Road are a focus area according to the report 2020 Air Quality Annual Status Report, where the air quality should be monitored and air improvement projects initiated in this area. The new development proposals contradict Waltham Forest Council's initiatives to improve air quality in this area. With the proposals for the quantity of new homes and the construction developments involved (start, volume of construction vehicles, noise, created by developments), the levels of fine particulate matter (PM2.5, ammonia (NH3), nitrogen oxides (NOx), sulphur dioxide (SO2) non-methane volatile organic compounds (NMVOC)) will be increased not just in the construction phase, but when construction is complete and ongoing due to volume of families. The level of proposals, in an area already on the verge of a pollution overload, are not synonymous with the UK National emissions reduction commitments and opposes the council's climate emergency plans of net zero targets by 2030.	A thorough investigation into the air quality and traffic survey of the regions surrounding Motor point, Sewardstone Road, and Lea Valley and an experimental prediction of average of pollution in the area based on the development proposals. Once data has been collected, predicted and analysed, then steps can be taken to review the proposals, ensuring that they are much more healthier for the local residents and their environment and aesthetically in-keeping with the area of North Chingford.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 5, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.

A)				S433 - Lea Valley Motor Company	No	No	No	[Too many flats yet again] Stop building Chingford up! Where will these people go to school, dentist, Doctors		No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
-				S433 - Lea Valley Motor Company	No	No	No	Such buildings, all too close to the ancient forest of Epping. The forest is of special scientific interest and will be irreparably damaged by high rise blocks being built on its borders. With Grenfell in mind, how on earth can the council consider building anything over four floors high. Aerial view	You should not build any high-rises in Chingford. They do not suit the area. Most new blocks being built are four floors high, so many of the older buildings were built in London. Any higher than 4 floors and you start blocking out the sun and change the feel of an area. Have you seen all those high-rises over at Woodford Green Way? They look awful and threatening and scary to be near, especially at night time.	No	-	<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC)</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Sally Topping				S433 - Lea Valley Motor Company	No Response	No	No	Not in keeping with the surrounding area and lack of infrastructure for the increased population		No		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>

These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Paul Leahy				S433 - Lea Valley Motor Company	No	No	No	Leave it alone. Chingford does not need new flats. There isn't enough room for new builds.				The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenure to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
John Cole				S433 - Lea Valley Motor Company	No Response	No	No	I do not believe this development is being planned to improve the interests of the existing local community.	Planning permission should not be approved. Leave the existing business in place	No	I believe that the development is being carried out without consideration of the best interests of the existing local community. I don't see putting money and politics before the residents which they are supposed to serve.	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Carole Lachmaker				S433 - Lea Valley Motor Company	No Response	No	No Response	As previously stated I am not qualified to answer whether this is legally compliant or fails to comply with the duty to cooperate but yet another residential plan. Another large building block out of keeping with the area. Don't need to explain why it is unsuitable, just go to the site and look at the development of flats which were built on legally old sites. This has improved the area greatly and looks very attractive to anyone approaching Chingford from Hendon End. That is what true planners should do. That is what we want our Council to do for us.	Set out to improve the area by building a better place for all, both present and future residents. Don't just aim to get as many people as possible in whatever piece of land you have available. It just does not work	Yes	I do not know what examination hearing sessions are but if it means having input to any redesign or a local review then yes, of course.	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2027 and in accordance with the Council's Statement of Community Involvement. Due to a spike in the number of Covid-19 cases at the time of the consultation on this document, engagement events were held online for the safety of our residents and officers.
Cassandra King				S433 - Lea Valley Motor Company	No Response	No	No Response			Yes		This response is noted.

				S454 - 6674 Sewardstone Road	No	No	RESIDENTS CONSULTATION NOT COMPLETED	NO MODIFICATIONS RECOMMENDED AS WHOLE PLAN IS NOT S.M.A.R.T 1. INFRASTRUCTURE: JUNCTION ALREADY OVER-USED BY VEHICLES WITH LONG TRAFFIC QUEUE 2. NARROW JUNCTION WHICH CANNOT BE WIDENED 3. ENDANGERING MOTORISTS AND PEDESTRIANS USING THE JUNCTION 4. HEAVY DUTY VEHICLES USING JUNCTION AND ROADS, IF HOCS AND A&B TRAFFIC - MAIN LONDON ARTERY ROADS 5. HIGH FLOOR OF TRAFFIC USING JUNCTION AND ROADS, IF HOCS AND A&B TRAFFIC - MAIN LONDON ARTERY ROADS 6. INCREASE OF CO2 AND OTHER VEHICLE POLLUTION AND BUILDING POLLUTION 9. INCREASE TRAFFIC OF DISPOSAL OF NEW RESIDENTS 10. NO PARKING AVAILABLE 8. ALREADY DANGEROUS JUNCTION WITH MULTIPLE ANNUAL ACCIDENTS 9. NO INFRASTRUCTURE TO COPE WITH INCREASE OF RESIDENTS TO USE HEALTHY, SOCIAL, SCHOOLING AND SHOPPING FACILITIES 10. INCREASE OF POTENTIAL CRIME, DECREASE OF SERENITY 11. DAMAGING ENVIRONMENT TO EXISTING TREES 12. NEW PROPOSED RESIDENTIAL PROPERTIES RESIDENTS WILL NOT BE ABLE TO OPEN WINDOWS OR ACCESS BALCONIES DUE TO HIGH INCREASE OF JUNCTION CO2 POLLUTION 13. DRINKAGE LONG TERM ISSUES - THAMES WATER DRAINS UNABLE TO COPE WITH EXPANSION AND SERIOUS AND LONGTERM FLOODING HAZARD 14. NOISE POLLUTION 15. OVERPOPULATION - RESIDENTS MENTAL HEALTH DECREASE CHANGE OF FABRIC OF LOCAL AREA. CAN'T CREATE A MINI TOWN FROM NOTHING. DISTURBING PEOPLES LIFESTYLES. LOCAL RESIDENTS HAVE TO COMPROMISE FOR THE BIG DEVELOPMENT COMPANIES. 16. DECREASE OF EXISTING PRIORITY VALUES 17. CHANGE FROM QUIET RESIDENTIAL TO URBAN AND COMMERCIAL CHARACTER/COLOUR	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under- utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. In April 2025, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime. The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible. Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The Council commits to a long-term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential	Yes	essential for residents participation
Rafiq Fisher				S454 - 6674 Sewardstone Road	No	No	Waltham Forest Local Plan (LFP) 2020 - 2035 Policy 11.1v. states: "400 homes in the Sewardstone Road strategic location". Between S452, S453 and S454 there is a "indicative development capacity" of 477, an increase of 10% above the plan. So LFP is not sound in alignment with LPI. This is also the number before developers claim they need to further increase density for fund affordable units and S106 agreements. Policy 11.1 states "Strengthen, supports and encourages existing and new employment opportunities". S452 and S453 are commercial land, so re-designing area for residential development does not align. Policy 11.1 states "Contributions to the improvement of... walking and cycling accessibility, connectivity, permeability and legibility to Ponders End". Improvement of active travel facilities along Lea Valley should be included in the Development guidelines. Waltham Forest Local Plan (LFP) 2020 - 2035 states that "area will benefit from having improved transport access via links to Crossrail 2 stations in Enfield to the west. This will enable the expansion of the Sewardstone Road neighbourhood centre". As Crossrail 2 has been suspended it is very unlikely that it will be built within plans timeframe, therefore it should be removed from consideration and any relevant facilities and projects with confirmed funding should be included. "Reinforcement" areas should have maximum height of 5 stories according to Plan LP1.	What is the Duty to cooperate and what makes a plan sound or not sound. Is this consultation for the public or planning officers?	Yes	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/ fact finding, the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Mapping on regulatory or national planning barriers to delivery. - Delivery partners who are signed up to it, and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough", in "general conformity" with the London Plan. Local Plans also need to be legally Compliant to avoid being legally challenged in the examination or through the planning application process.	
David Moore				S454 - 6674 Sewardstone Road	No Response	No Response	considered unsound due to the high number of stories and large number of new dwellings. The lack of existing parking together with existing traffic problems in this area and continued flooding of local roads would cause huge congestion and make local roads dangerous. There is also not sufficient health provision, schooling and public transport to support a large increase of homes in this area.	A more sound plan would be a row of shops with only one storey of dwelling above this, together with parking for residents and shoppers. Also careful consideration should be made when constructing these buildings on such a busy main junction. new school, gp service housing and bus routes would also be needed. However there is little room to accommodate this.	Yes	In order to express the strong feelings I have on this matter	
Marlyn Rundle				S454 - 6674 Sewardstone Road	No Response	No Response	The proposed building S454 is not in keeping with the original planned buildings. The proposed 8 story building is totally out of character of the area as are S452 & S453. The original plan for site S454 was 3 storey and had a supermarket which would be much more in keeping with the local area. Quaries of the residents with these high rise buildings will be more additional traffic, already very heavy, more pollution loss of daylight and the loss of privacy being overlooked. Site S452 & S453 are being planned on an area with a high risk of flooding, which is worrying. The additional impact on traffic and parking, schools, doctors and nurseries. The sites are too overbearing in scale for such a small area.	No higher than 3 stories, supermarket, additional schooling, doctors transport and parking. Keeping the character of the area.	Yes		
				S454 - 6674 Sewardstone Road	No	No			Yes	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for greater levels of intensification and/or height have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out development that includes tall and other buildings is required on some sites identified within strategic locations such as town and district centres and close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under- utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development. Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. Through the evidence published in the Characterisation and Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered with a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.

David Minton				S44 - 66.74 Sewardstone Road	No	No	<p>The proposals are unsound on two grounds.</p> <p>(1)The housing targets in LPI remain unproven beyond assertion and diverge from the targets within the London Plan. Development expectations on individual sites should then be revised.</p> <p>(2)The housing targets in LPI remain unproven beyond assertion and diverge from the targets within the London Plan. Development expectations on individual sites should then be revised.</p> <p>(3)The Sewardstone Road area should be subject to a master planning exercise to create the basis for a local 15 minute city. It is not too early to start with the upcoming development of 60-74 Sewardstone Road in terms of community benefits and role within the wider community.</p> <p>The proposals are unsound on two grounds.</p> <p>(1)The housing targets in LPI remain unproven beyond assertion and diverge from the targets within the London Plan. Development expectations on individual sites should then be revised.</p> <p>(2)The Sewardstone Road area should be subject to a master planning exercise to create the basis for a local 15 minute city. It is not too early to start with the upcoming development of 60-74 Sewardstone Road in terms of community benefits and role within the wider community.</p> <p>The proposal is therefore unsound as it does not address a major policy objective of LPI or present the sites potential in the round.</p>	<p>1.The housing targets in LPI should be revisited, justified or revised to the levels set out in the London Plan. Development expectations on individual sites should then be revised.</p> <p>2.The Sewardstone Road area should be subject to a master planning exercise to create the basis for a local 15 minute city. It is not too early to start with the upcoming development of 60-74 Sewardstone Road in terms of community benefits and role within the wider community.</p>	Yes	<p>I have already sent written comments on LPI, and have been invited to take part in the examination this February.</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> •Research/fact finding: the choices made in the plan are backed up by facts. •Evidence of participation of the local community and others having a stake in the area, and •The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> •Sound infrastructure delivery planning. •Mitigating regulatory or administrative barriers to delivery. •Delivery partners who are signed up to it and •Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	
Mike Chrimes				S44 - 66.74 Sewardstone Road	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plan, may be rejected for failing to comply with rules that are not transparent to consultees.</p> <p>Consultation on the site allocation (LPI) element of the Western Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPI) for 2026-2036. This has coloured the views of many attending the online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the topics of meetings which have been very coloured by political point scoring, while officers have been subject to abuse making online meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind business and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificial low numbers, representing the number of attendees allowed, or have been difficult to get online.</p> <p>In general however it has been apparent both from LPI and what has been stated at consultation meetings a major driver for the identification of development across the borough has been a housing target of c. 1800 homes per year (LPI) has a large weighting for (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet represented housing need. More</p>	<p>The site is already being developed and the consultation is futile however plans should have been developed alongside other proposals for the Sewardstone Road area.</p>	Yes	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> •Research/fact finding: the choices made in the plan are backed up by facts. •Evidence of participation of the local community and others having a stake in the area, and •The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> •Sound infrastructure delivery planning. •Mitigating regulatory or administrative barriers to delivery. •Delivery partners who are signed up to it and •Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Cassandra King				S44 - 66.74 Sewardstone Road	No	No	<p>I live close to the area and have not had any information or through the door or made known to me about the proposal for the implementation of new housing around Motor point, Sewardstone Road and Lee Valley. Therefore, there has been a lack of consultation for the residents of the local area.</p> <p>Additionally, air pollution is the biggest environmental threat to humans and has direct effects on habitats and biodiversity. Already Kings Head Hill going north west towards the bottom of the hill has a high volume of traffic and creates a moderate to high volume of pollution. Even on a quiet Sunday the measurement of pollution reads "moderate" 80 and 200ug/m³. Naturally, in rush hours, when traffic backs up at College Gardens, with cars idling, the levels of pollution per cubic square metre increase. Kings Head Hill and Sewardstone Road are a focus area according to the report: 2021 Air Quality Annual Status Report, where the air quality should be monitored and an improvement project initiated in this area.</p> <p>The area development proposals contradict Western Forest Council's initiative to improve air quality in this area. With the proposals for the quantity of new homes and the construction developments involved (lots, volume of construction vehicles, noise, created by developments), the levels of fine particulate matter (PM2.5, ammonia (NH3), nitrogen oxides (NOx), sulphur dioxide (SO2) non-methane volatile organic compounds (NMVOC)) will be increased not just in the construction phase, but when construction is complete and ongoing due to volume of families. The level of proposals, in an area already on the verge of a pollution overload, are not synonymous with the UK's National emissions reduction commitments and opposes the councils climate emergency plans of net zero targets by 2030.</p>	<p>A thorough investigation into the air quality and traffic survey of the regions surrounding Motor point, Sewardstone Road, and Lee Valley and an exponential prediction of surplus of pollution in the area based on the development proposals. Once data has been collected, predicted and analysed, then proposals can be taken to review the proposals, ensuring that any new proposals will be much more healthier for the local residents and their environment and aesthetically keeping with the area of North Chingford.</p>	Yes	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>In April 2025, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car supported. Additionally, the Police in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to the destruction or operation of the construction or operating stage of development.</p> <p>The evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for different tall and taller buildings have been identified through the Site Allocations process. The need establishing in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council commits to a long term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the plan is car-free and employment development is car supported. Within the borough a wider range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low-traffic neighbourhoods (LTNs) and the expansion of cycle infrastructure. This form part of a holistic approach by the borough to reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Duty-to-Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p>	
Dominic Vaughan				S44 - 66.74 Sewardstone Road	No	No	<p>Initial planning permission was given for this site by the Authority 3 years ago. At this point the existing building was going to be redeveloped adding an extra storey and increasing the residential units to 27. As has happened in other London Boroughs the planning laws have been taken advantage of by demolishing the building and replacing it with a new one to rebuild the residential units. I believe that there will be a knock on effect to the area both during construction and afterwards when residents move in. Initially during the build there will be increased congestion at what is already a very busy junction at Kings Head Hill & Sewardstone Road. The only bus route that goes to Walthamstow from this area is already problematic during busy periods and has in the past had to route cut short to get back on the M11. For many elderly residents this is their only link to the shops at Chingford Mount and beyond this will not only be disrupted for many months.</p> <p>As an elderly person I am looking at the area coping with an additional 200-220 adults and children residents. The 10-15 parking spaces expected to be insufficient. Many local residents have dropped kerbs for drives but I think parking will become so difficult, respect for driveway and general parking will become a big issue for new and existing residents. Education - I expect many of these projects will be given to families, how will existing schools be able to cope with additional pupils. Many have already had to transfer due to other developments. Whilst this is smaller than the metropolitan site once all have been developed I cannot see how the area will cope without additional LOCAL schools being built. The same will apply with health care as that how can over 40 families come to the area without additional services being provided for them. The original application involved adding an extra storey to the building but the proposed 8 storey building will tower the junction and use the existing residential area. Much of the area is made up of 2 storey houses, many residents of which have often lived in the area for 30 years they will suddenly have tall buildings shadowing their homes and gardens. Living on the edge of the borough</p>	<p>Revert back to the originally agreed plans for just a 3/4 story building and an 8 story high rise. This will be more in keeping with other residential properties in the area.</p> <p>Reconsider the shops area - proposed 3 small shops is really needed as a larger medical centre space or Co-op food store that will benefit all residents and maybe just a couple of small shops, not 3 small shops that may end up staying empty or become even more office shops!</p> <p>The proposed development only allow for limited parking what will be done to protect existing residents from the knock on effect of this. With only a couple of bus routes in the area residents are more likely to need a car.</p> <p>What will be done to prevent congestion at the busy junction during construction. Could the area in Sewardstone Road directly outside the site be widened by one lane there is a wide paved area at the moment to try and improve traffic flow.</p> <p>If all 3 sites are ahead a planned what additional services will be implemented in the area, healthcare, education, policing, etc. All these would need to be addressed.</p>	Yes	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>Having sites allocated for development means that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all allocations passes the Sequential Test or that can be done through the examination test that there is no sustainability policies to the community that outweigh flood risk and that that flood risk can be successfully managed for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p>	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
James Lachmuker				S44 - 66.74 Swardstone Road	No	No	It is not the responsibility of the residents to have to consider a planning application is legally compliant or not. This is the role of the Council and it is not their responsibility to consider whether the proposed development should be rejected "and of. It is not viable to expect the residents to have access to the documentation or time required to build a legal argument against the legality of the proposed development of this type. The residents who are stakeholders in the area in which they live, have a right to have a say in how the proposed development will impact the lives of both them and their families. The discussion does not only centre around the high argument impact to those living in an area and those moving in an area but also the impact on the area itself. The proposed development is a key factor and should carry equal weight in the discussion. High rise properties may be more suited to city living, but suburban design should reflect the type of living people move to the suburbs for, that being space, amenities, improved quality of living in name but few. The grade that was in place before being demolished - the legality of which should be reviewed, containing a range of shops that covered the needs of residents in the area. They helped establish a community, something which town planners like to talk about but through poor design and little thought of the existing area often fail to achieve. The properties that existed were in keeping with the area with red brick construction and pitched roofs. The proposed redevelopment of the site with up to 8 stories of accommodation is grossly out of character with other properties in the vicinity. The property will dominate the landscape and affect the views of existing residents. The natural light will be reduced, greatly affecting the living conditions for those opposite and on adjacent roads that surround the proposed development. The traffic capacity of the Kings Head rd, Swardstone Road junction is low at the point where by there are daily traffic jams leading to increased noise and air pollution. The proposed development is not suitable for the site as it is not qualified to take whether the plan is legally compliant or fails to comply with the duty to cooperate.	These developments are not simply places to live, they are changing the shape of the area in which we live. They should be rejected until such time as a fully viable and soundly justified plan is submitted that reflects the needs and wants of those living in the area affected by the proposed works.	Yes	All residents should be involved in the process.	The Local Plan requires that all new developments should deliver high quality design that is responsive to the local character of an area. Through the evidence published in the Character Identification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs, by identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2021). Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of the borough's environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Carole Lachmuker				S44 - 66.74 Swardstone Road	No	No	1. The proposal for S44 are totally out of keeping with existing residential development, that is largely made up of 2 storey semi detached houses or bungalows. There are 2 sets of 3 floor buildings, which, in their own way have blended in. The Wingrove block has always been a blot on the landscape of the area, which, because it is already there, does not justify the erection of more of its kind. Mistakes should always be learnt from and never repeated. 2. The projection of the building onto its proposed site as shown at the top of the plan is a major concern. It is a rectangular box, towering high above existing properties and 'closing in' the area. This is totally inappropriate to all those affected. 3. The loss from a 3 storey plan to develop the pre existing flats and shops (retaining, as I understand it, the previous front facings as per the remaining shops beyond), to an 8 storey plan. It is a rectangular box shape, flat roofed and devoid of character and makes absolutely no attempt to blend or add to the area. 4. There were 6 or 7 flats in the previous building and 41 flats are now proposed with 31 parking spaces. We have already seen what difference too few parking spaces on site make when Alan's height is considered and the Kings Head Hill extra parking is observed. 5. Services in this area are already very stretched and expanding the population in the rate proposed for this area (440 new homes in this small village) will be a load deal for existing residents, as well as for newcomers. 6. With regard to the shops which will be on the ground floor level if they are not the plan to attract reasonable local businesses they will not do well. Kitchens are high and there is limited turnover from locals as those who use the shops are mainly the elderly, those without transport and occasional shoppers. Insufficient to maintain a thriving community. 7. The question falls to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 8. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must: (A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1). 11.7(1) A local planning authority must: (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan; (b) each of the general consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan; (c) each of the specific consultation bodies invited to make representations under regulation 18(1). 11.7(2) A local planning authority must: (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	1. (2) The bodies or persons referred to in paragraph (1) are: (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Yes	I do not know what examination hearing sessions are but if it means having to go to meetings then, of course.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2021). Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the Plan is car-free and employment development is car capped. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low traffic neighbourhoods (LTNs) and the expansion of cycle infrastructure. The forms part of a holistic approach by the borough to reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Duty to Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced. The Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
Anthony G Thome Slip				S44 - 66.74 Swardstone Road	No	No	1. The question falls to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 2. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must: (A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1). 11.7(1) A local planning authority must: (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan; (b) each of the general consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan; (c) each of the specific consultation bodies invited to make representations under regulation 18(1). 11.7(2) A local planning authority must: (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments (i) not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed (do have my doubts or will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the LAE2 zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LAE2 charge. But the rest of the area will also be subject to these increases and the proposed quiet the natural air flow possibly result in pockets with even a higher concentration. Waltham Forests current population density is far too high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hill Estate where the 1960's tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In fact as revealed in the 1930's that people needed space and New Towns were built with green space. The question falls to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 2. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must: (A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1). 11.7(1) A local planning authority must: (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan; (b) each of the general consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan; (c) each of the specific consultation bodies invited to make representations under regulation 18(1). 11.7(2) A local planning authority must: (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Yes	Because there are too many unreviewed qu.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include DP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.

They should take account of existing trees and retain where possible.</p>
Glynis Davis				S454 - 60-74 Sewardstone Road	No Response	No	No Response	I do not see how these changes will benefit this area and the people living here. These changes do not better the community we already have. 1. The plans are not in keeping with the area and in my opinion will look ridiculous not only to current residents but to visitors coming into the area. This is a suburban area, not a town or city and is the gateway for rural areas. 2. The density, height and style of the building of Tower Blocks and high rise are not suitable to such areas. They are unsightly and will not blend with the current landscape. 3. I am concerned by the pressure this will impose on local services. 4a) We have low public transport access. Sewardstone Road, Kings Head Hill and Lee Valley Road are always busy and at times congested, traffic comes to a standstill. Cycling in this area is very challenging. 4b) Parking is also a concern with inadequate parking spaces allocated. Where are all these people going to park? 5) Where are the plans for the development of healthcare services? It is difficult enough already getting hold of your GP. Local care services are already over-stretched. Where are the plans for development there? 6) Where are the plans for the development of extra schooling? Schools are over-stretched already. 7. I am concerned that unapproved plans are being used as a precedent rather than pre-existing buildings at this site (60-74 Sewardstone Road). Also site restrictions imposed by the council on the retail units prevent the use of a supermarket as was originally proposed.	The modifications I consider necessary to make the plan legally compliant and sound would be the buildings to be no more than FOUR STOREYS HIGH with the necessary PARKING SPACES to facilitate the number of residents anticipated to be living there. Also for a local supermarket which would also require adequate parking facilities.			<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a network of accessible cycle storage and Car Clubs across the borough.</p> <p>Through the evidence published in the Characterisation Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. 				S454 - 60-74 Sewardstone Road	No	No	No	In S454, this area is at the end of my garden in Laurel Gardens. The proposed plan for growth of housing with the area. There is one small block of flats on the opposite side of Sewardstone Road next door to what was a public house and I now a McDonalds. The flats do not overlook any residences at the back and do not crowd in or normal sized residences immediately aside or behind. The proposed development is too high and the original proposed development should be adopted which was only one more floor to be added to what was originally at 60-74 Sewardstone Road before they were demolished. As I understand it, none of the residents in Laurel Gardens objected to the additional floor and we were all looking forward to having a Co-Op.	Lower the height of both the proposed 8 floor block and the remainder to be reduced to retail on the ground and two additional floors. This will not crowd in the residents adjacent to the new building. There should also be an access road in the centre of the row 60-74 Sewardstone road so that those residents can use the access road as well as the delivery for the retail premises and the removal and collection of rubbish.			<p>Through the evidence published in the Characterisation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council commits to a long term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the Plan is car-free and employment development is car-pool. Within the area a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low-traffic neighbourhoods (LTNs) and the expansion of cycle infrastructure. This forms part of a holistic approach by the borough to reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a network of accessible cycle storage and Car Clubs across the borough.</p> <p>The Duty to Cooperate demonstrates the Council's resolution and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p> <p>The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.</p>
				S454 - 60-74 Sewardstone Road	No	No	No	I do not believe that it is acceptable that Laurel Gardens will be used as the access to the new construction and for the bins to be placed there for emptying. If this does occur the pavements will be full of bins and there will be no where for the residents of the road to walk which is dangerous and completely unsightly and unsightly cannot be kept? There is a very large pavement on Sewardstone Road which can accommodate all of the bins, and it does not matter to the Council or developers what Laurel Gardens looks like, why should it matter that for a few hours every week. I say this because during the presentations I was apparent that the developers were only concerned with what the view looked like from Sewardstone Road.	It is unacceptable that Laurel Gardens will be used as the access to the new construction and for the bins to be placed there for emptying. 				S454 - 60-74 Sewardstone Road	No	No	No	I do not believe the Local Plan is legally compliant as the process has not been easily accessible and inclusive of the needs of many of our local residents. Many residents in close proximity to the Sewardstone Road sites of older age, with generally more limited access to the online documents shared and less experience with providing comments and feedback on such complex documents. The Local Plan LP2 feedback sheet was not completed. The LP2 was not delivered or presented most from providing feedback at a time when public meetings have been cancelled in the pandemic. This combination has prevented many from knowing the full detail of, or providing their full feedback on the Local Plan which questions the validity of the consultation process.	More accessible and in person presentation of the Local Plan to ensure community engagement. Reducing the proposed development to a maximum of 20 new homes and a maximum of 4 storeys (sensibly designed) to maintain more appropriate density of housing in keeping with the area. But this must be supported in evidence by improving the areas PAU rating significantly with improved bus routes, expanded cycle lanes and safe non-walking/mobility vehicle routes to maintain the situation. Housing development used once Cross Rail 2 and sustainable connections are in place. Including provision of shared access ways such as car clubs. Investing in local healthcare and education services and facilities - new schools or the extension of existing schools to cope with the increased resident numbers. Ensuring that any level will be involved in the immediate area. Encouraging safe and inclusive access to SANGS - such as the riverside, waterways and pathways to Gunpowder Park as well as new green space as part of the development to limit the impact on Epping Forest SAC. Improving the junction and road layout at Sewardstone Road and Kings Head Hill/Lee Valley Road.	I am part of a local residents community engagement.		<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2023 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. This Local Plan Action Travel and Transport Chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine walking, walking and public transport use. Through the evidence published in the Characterisation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Neil Phillips				S454 - 66/74 Sewardstone Road	No Response	No	<p>Without being legally trained or having the time to research the requirements that make the plan compliant, I am unable to comment as to whether the current local plan is compliant.</p> <p>I do not believe that the proposed local plan is sound as there seems little consideration of the current community, infrastructure, environment, or existing residents of the area.</p> <p>The proposed development of over 40 dwellings within this site boundary suggests little consideration has been given to the current density of housing locally. Aside from two or three exceptions, the local housing is predominantly provided within 2-storey family homes with occasional spots of the proposed development of high-density housing in high rise residential blocks is not keeping with the character of the local area. I moved to the area just over 7 years ago due to the character, the suburban environment, but most importantly the nice community feel, with such high-density housing, I fear that this may change. Policy 2.5 from LP1 identifies a requirement to safeguard the local character of the area or improve the quality of the local environment. I believe that the proposed scheme do not meet this requirement set out within LBWF own proposals as they neither reflect the current character or, in my opinion, improve quality.</p> <p>There also seems to be a lack of consideration regarding access to public transport; the area has a PTAL rating of 2b, the proposals seem to hold hope of Crucial 2 being within a 20-minute walk away, unfortunately we now know that this is not going ahead. The wider proposal of 400 dwellings, without an increase to local work, will result in the majority of working adults having to commute. Considering that Chingford rail station is a 20-minute walk up a steep hill, which will be a challenge to those with ability issues, and cycling up the hill is only for the most dedicated, access to public transport needs to improve. The proposals do not seem to address how these issues will be resolved.</p> <p>There also seems to be a lack of consideration regarding access to public transport; the area has a PTAL rating of 2b, the proposals seem to hold hope of Crucial 2 being within a 20-minute walk away, unfortunately we now know that this is not going ahead. Considering that Chingford rail station is a 20-minute walk up a steep hill, which will be a challenge to those with ability issues, and cycling up the hill is only for the most dedicated, access to public transport needs to improve. The proposals do not seem to address how these issues will be resolved.</p>	<p>1- reduce the development to line with the original plans and in line with other developments in the area.</p> <p>2- move the entrance from Laurel Gardens to Sewardstone Road or King Road Hill who to minimise impact to the small opening on Laurel Gardens</p> <p>3- increase the parking in the development and reduce the cycle parking spaces, due to the uniqueness of the area, having poor transport links and steep hills.</p> <p>4- increase the parking spaces outside the shops on Sewardstone Road to reduce the impact to Laurel Gardens, and the shops on the other side of Laurel Gardens</p> <p>5- compensate the existing residents for impact to their house prices</p>	No	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several personal engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>	
Uma Hansday				S454 - 66/74 Sewardstone Road	No	No	<p>Development is not in keeping with non-residential character of the area. All properties in this area are houses or small development blocks. This proposed block is out of character for the area.</p> <p>In addition, large blocks of flats is out of character for Chingford as a whole that is known for wide open spaces and a gateway to the forest.</p> <p>Previous high rise development at Chingford Hill estate was demolished due to a number of issues including anti social behaviour and replaced with houses and low blocks. This should be replicated across the borough and not move the problems Chingford Hill experienced at another part of the borough.</p> <p>Impact on Laurel Gardens. This is a small narrow top-down car for 10 houses and garages. The proposed development will encroach these houses, its addition as the entrance to the development will be via the narrow entrance to Laurel Gardens I will cause undue congestion and noise to the existing residents as well as impeding their access to the property.</p> <p>Parking - Laurel Gardens and the surrounding roads have minimal parking, as this development will only have 10 parking spaces for 41 properties this will put undue pressure on the residents of Laurel Gardens due to it being the entrance to the property. The proposal to make Laurel Gardens residents parking adds additional costs to the residents and is unlikely to address the issue.</p> <p>Lack of public transport - public transport to the area is poor with only 2 buses every 15-20 minutes. Chingford station is a 25 minute walk up a steep hill which is not feasible for many people and especially young families or the elderly. This means that realistically residents will need a car. Why have only 10 parking spaces been provided, with only 5 for residents and 5 for visitors?</p>	<p>1- reduce the development to line with the original plans and in line with other developments in the area.</p> <p>2- move the entrance from Laurel Gardens to Sewardstone Road or King Road Hill who to minimise impact to the small opening on Laurel Gardens</p> <p>3- increase the parking in the development and reduce the cycle parking spaces, due to the uniqueness of the area, having poor transport links and steep hills.</p> <p>4- increase the parking spaces outside the shops on Sewardstone Road to reduce the impact to Laurel Gardens, and the shops on the other side of Laurel Gardens</p> <p>5- compensate the existing residents for impact to their house prices</p>	No	<p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Weather Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>	
				S454 - 66/74 Sewardstone Road	No Response	No	<p>This is a suburban area with mainly low rise housing.</p> <p>Development led in keeping with non-residential character of the area.</p> <p>There are other developments in the borough, such as Fulbourn road, where there has been a nursery and gym included in the build. This brings extra services to the area.</p>		No	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>	
Marilyn Rundle				S454 - 66/74 Sewardstone Road	No Response	No	<p>The proposed building of S454 is not in keeping with the original planned building. The 8 storey building is totally out of character of the area, including sites S4236 S452. The original planned building were 3 storeys and small shops which would be much more beneficial to the local area community. Quality of life for residents with their high buildings will incur more noise traffic pressure on local amenities traffic and parking, also they will impact on light, views and privacy of existing residents. Flats S452 & S453 are planned to be built in an area at high risk of flooding, which is worrying.</p> <p>The impact on the waste disposal, traffic at the crossroads is already very heavy and noisy. This is an overbearing look for such a small area and not in keeping with this character of the local area.</p>	<p>building no more than 3 storeys, additional amenities, schooling doctors parking and play area. Supermarket and petrol station to remain. Traffic system to be updated to help with the extra traffic...</p>	No	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainable benefits to the community that outweigh flood risk and that flood risk can be successfully managed against the lifetime of the development and the development does not increase flood risk either on or off site.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>The site allocation requires that commercial floorspace is provided as part of new development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p>

Sam Edwards				S434 - 60.74 Sewardstone Road	No	No	No	<p>Planning is being prepared to be submitted but the I22 proposal hasn't been finalised. This proposal is based on 27,000 planned for the borough over a 15-year plan. However, the Housing target was based on a 10-year plan. Therefore, there is no evidence to show that this will be extended to include the same allocation over another 5 years. Therefore over 10 years only 18,000 homes are needed to meet the target. Things can change over such a long timescale. Waltham Forest doesn't have the space to build building, which is why all the proposals are for flats, no houses. This is why I also feel this target is flawed as it only takes 7 months and none of the properties planning to be built in Chingford are Houses. Covid has shown the importance of outside space for mental health so cramming families into flats isn't for a long backwash. The tower blocks were pulled down at Chingford Hall estate for this reason.</p> <p>Original planning for 17 flats which now seems to have nearly tripled, when the previous block was not meant to be pulled down. Please note that whilst this was happening cracks appeared both inside and outside of our newly renovated and rented home, with brick dust coating our vehicles, windows and gardens. A larger development would need deeper foundations, which would again be likely to cause movement.</p> <p>Vehicle access will be in Laurel gardens. However, no provision to increase the width of the road which isn't currently wide enough for 2 vehicles. So the addition of traffic due to deliveries for residents i.e shopping including food deliveries which will cause problems.</p> <p>The preferred plan is for 41 flats consisting of 10 x 2bed = 20 people = 20 10 x 2bed = 34 people = approx. 67 12 x 2bed = 24 people = approx. 66</p>	<p>Low rise max of 3 stories in line with previous building</p> <p>More parking facilities including for shops</p> <p>Change to access for deliveries</p> <p>Wish cycle provisions as 32 for 5 shops unnecessary</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. 				S434 - 60.74 Sewardstone Road	No	No	No	<p>It is not in keeping with the surrounding area. There are many reasons. There are no parking facilities and new residents would be parking in all the side roads, this is not safe. In your road you know who's car belongs to who, should an ambulance need to get through or a fire engine, you can ask the neighbour to move. Congestion at the crossroads at the Sewardstone junction is a bottle neck and would be made even worse with the additional cars from the new residents. Air pollution caused by the additional cars and many children would be affected due to the 2 close by schools, Tardley Lane & Newn Drive Doctors. They are stretched to their limit at the moment and could not cope with additional people in the area and would make the correct service even worse. Schools. They are full to capacity and how can they possibly take any more pupils without affecting the contracted facilities and teachers at the current schools. Shops there are no appropriate shops for the additional population</p>	<p>It is not in keeping with the surrounding area. There are many reasons. Redesignation of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP, and healthcare facilities.</p>
Jan Redgwell				S434 - 60.74 Sewardstone Road	No	No	No	<p>The demolition of the shops and flats was illegal as it was against planning permission. The area is a suburban area of small residential houses and low rise flats. This 17 storey development is too tall and not in keeping with the suburban area. There is not the infrastructure, schools etc or parking to support this. People cannot park on Sewardstone (if by day and it is highly congested already so will force the new proposed residents to park on residential adjoining streets. This will impact on local residents such as us. 385 plus new homes will equate to hundreds of new residents. Also as high rise building is too close to the water front the reservoir and will greatly affect the path of migratory birds and wildlife including endangered reeds and amphibians. This plan is detrimental to the area and must be stopped.</p>	<p>A much smaller development of shops with single storey flats above with allocated parking spaces will be acceptable and in keeping with the area.</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Wendy Stubbs				644- 60.74 Sewardstone Road	No	No	No	With regard to the 41 homes on this site this area is a small section of Sewardstone road we previously had a row of shops which was great for local people to get supply's but one of the factors was that there was no parking so now can it be that they want to put up more shops with more high rise flat above not to be able to park within their area and as for the local Council across the road you only have to see the congestion this has caused in our area and to propose more flats is ridiculous and again there will be accidents and lives will be at risk we have enough pollution from traffic from the M25 running through Sewardstone Road.		No		<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developer sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Lloyd Parkinson				644- 60.74 Sewardstone Road	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/night, additional demand for parking. Consultation flawed as no sufficient public meeting to air residents, only an online Zoom meeting. Shortage of doctors, hospital, dentists, schools, demands on the roads, the effects on the quality of the air.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	No	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of the air.	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Alicia Goucher				644- 60.74 Sewardstone Road	No	No	No	The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Epping Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. A development of around 40 homes on such a small site inevitably means the intention of building high rise flats. Any development of new 4 storey high would be totally out of keeping with the predominantly 2 storey buildings in the area. The London Plan states that tall buildings should only be developed in locations that are identified as suitable.	The maximum height of any development on the site should be no more than 4 storeys this should be stated on the local plan rather than around 40 new homes. The number of new homes should be reduced.	Yes		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 22,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were subsequently increased by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need of 6,000 homes per year across London.</p> <p>LBWF is seeking to build more new homes (27,000 by 2035) than required by the London Plan (Pg 1 Pg. 354). Housing targets should not be met by only providing minimum standards such that the development over-occupies existing residential areas to the detriment of existing residents or adversely affects the aesthetic and historic character of areas.</p> <p>The plan is not consistent with Regional and National planning policy since LBWF is intending to build many more homes than the London Plan requires - see paragraph above.</p>

				S434 - 60.74 Sewardstone Road	No	No	No	The proposed construction are not in keeping with the area and will be out of place in a suburban area and in view of the overall height and extent of all the proposed developments in the area. I believe that if they were legally compliant there would be sufficient amenities to accommodate such a large number of residences. I do not believe that a competition town planner would agree to such high building aside normal houses and bungalows that are in Laurel Gardens and other roads in the immediate area.	I was originally proposed to replace the demolished properties with a large retail outlet and residential accommodation with one additional floor. I believe that most, if not all local residents had no objection to. I suggest that the original proposal is reinstated.			<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.</p>
David Tapping				S434 - 60.74 Sewardstone Road	No Response	No	No	Not in keeping with the area and would put a huge strain on the area with regards to schools, healthcare, parking etc.				<p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Smita Mandi				S434 - 60.74 Sewardstone Road	Yes	No	No	<p>The plan is unsound as there has been no consideration given to the following:</p> <ul style="list-style-type: none"> school places available, primarily nursery and primary schools; there are new existing and those nearby are oversubscribed. Health services available and access to GPs Public transport links and frequency of buses, capacity and effects on services due to additional residents Parking spaces for existing residents, potentially leading to a CPZ and dissatisfaction of local residents already in the area. <p>The Local Plan is unsound as there are no plans to increase the number of schools or school places available to the local area which has oversubscribed schools.</p> <p>It would also put a strain on the available health services where it is already difficult to obtain an appointment with a GP or dentist. Transport links in this area are very minimal so not only would existing transport services be strained it would put demand on additional parking for which I believe there is no capacity and would put pressure on local existing parking with the potential to result in a CPZ some much to the dissatisfaction of existing residents.</p> <p>The proposed new homes would change the view of the city and create an overpopulation. I believe, but my main concern is the lack of school places available for children being housed in the new homes or moving in to the area. I believe this is of critical importance and there is no mention of how the plan satisfies the need for additional school places.</p>	To make the plan sound I would suggest that there is a new school built close to the proposed new homes, is within walking distance or that the existing local schools are given funding to allow more children to attend and increase the number of teaching staff for the additional number of children expected to move in to the area.	No		<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p>

These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p> <p>All applications will be required to submit a Construction Logic Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p>
Mike Freeman				S434 - 60-74 Searwistone Road	No	No	No	You refer to the unsound development area as the gateway to Chingford, it will be an eyesore. The local roads are already very congested with the M25 and A40 using Searwistone junction when problems there. There is no provision for additional public transport/schools/doctor. Being an elderly resident of the area for over 20 years I do need a car, as I'm one of the new residents would. There is already pollution from the Extraction Waste Plant so there would be more traffic emissions at that junction. This development will be completely out of keeping with the rest of the neighbourhood, that's what we are a neighbourhood which you want to destroy. A face to face consultation is required to talk to the local people	The plans need to be considered more in keeping with the original plan 3 story's with 1 large and a couple of small shops. More in keeping with the surrounding area	No		<p>Local's must have a say. Council need needs to favour the developer in all these cases</p> <p>The Local Plan requires a character-led approach to identification, including building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Frederick Sambidge				S434 - 60-74 Searwistone Road	No Response	No	No	Takes little account of extra requirement for local services. Doctors, schools, transport not enough consideration given to extra parking requirements. The building design itself doesn't suit the area being far too tall and ugly to look at.		No		<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Mr Ball				S434 - 60.74 Sewardstone Road	No Response	No	Additional housing will increase the traffic in the local area that is already VERY busy - increasing the pollution!	Reduce the height and density of housing to be in very similar to surrounding housing / to the same height as the buildings that were demolished.	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Michael Dram				S434 - 60.74 Sewardstone Road	No	No	Far too many dwellings, the area is already highly congested, amenities like doctors and schools are already under severe pressure more congestion to local parking and local roads will cause considerable noise and pollution, scale down the development.	Consult local area and get feedback and do a vehicle census and see just how busy the roads are in this area. Kings Head Hill is a congested and polluting area, take pollution readings and consider the consequences of more traffic.	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. P.K.Neville				S434 - 60.74 Sewardstone Road	No	No	This area is already highly congested, adding new homes at this already very busy junction will cause even more disruption for existing local residents. This location is extremely difficult to walk & cycle especially up Kings Head Hill. Planning should include @ least 1 parking space per household.	All 3 developments in the area need to consider extra schools, medical services, parking and transportation provision. All these amenities already over populated, and proposing making the area a CPZ is not helping the situation. Buildings should be no higher than 4 storeys.	Yes	We should have a say on how any plan affects its area	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Council commits to a long term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the Plan is car-free and employment development is car capped. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low traffic neighbourhoods (LTNs) and the expansion of park infrastructure. This forms part of a holistic approach by the borough to reduce vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours.</p>
John Smith				S434 - 60.74 Sewardstone Road	No Response	No	This proposal is unsound if the development of over 200 new homes at S432 Motropoint is also to get ahead. Local doctor and dental services are already over-stretched and will be unable to cope with the increased demand of such a high number of new residents. The bus service to Chigford station is inadequate to cope with the increased demand likely to be generated by this development and SAS2 and cycling is not an option because of the steepness of Kings Head Hill. The height of the building is also not in keeping with the character of the area.	The height of the building and the number of new homes in this development and SAS2 should be greatly reduced and the number of new parking spaces should be increased. The frequency of the two local bus services which serve the Sewardstone Road/Kings Head Hill road junction should be increased to meet the additional demand. There should be an increase in doctor and dental services.	Yes	Yes in the area	<p>There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S434 - 60-74 Sewardstone Road	No	No	No	1) The new building is not in keeping with the surrounding area. The building used as a comparison is sheltered accommodation which has little impact of local amenities. There are no plans for additional healthcare and schooling which are both over subscribed already. Parking is limited in the area as present with no parking allocated for most of the build where are people going to park.	The new building should be kept in size to the one which was demolished against planning permission. The original building was the correct height for the area. Had adequate parking for the number of flats. And had little impact on the community due to the number of flats.			The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2025). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Lisa Bagley				S434 - 60-74 Sewardstone Road	No	No	No	1) Not in keeping with the area. Height being compared to a disimilar use block, ie. not privately owned, residential home for elderly/infirm without cars. 2) Original community demolished - development illegally demolished, forced the local area. 3) Proposed design overlooks gardens and homes in Laurel Gardens and Kings Head Hill - they will need to be compensated for loss of privacy, loss of equity in their homes, difficulty selling their properties. 4) Laurel Gardens residents will be impacted by increase of parked vehicles blocking the narrow street and increase of vehicle delivery drivers/increased residents & their visitors. 5) Proposed plan references this unapproved plan and even if the 20 year plan will sign off the homes, and if this was an realistic support to the answer is NO! 6) No extra provision of transport, medical services, school places etc in relation to this development, motorpoint, sea valley - unfeasible burden on local services. 7) Chingford is not an urban environment like Walthamstow/Tottenham Hale - does not have a tube or bus stop every minute - it is semi-rural and has very cheap bills therefore people will use cars - sufficient parking has not been provided. 8) proposing more housing but reducing the existing parking - makes no sense - will seriously impact residents in surrounding roads/the surrounding area, this does not improve that live in any way. 9) has the impact to the viewing points from Epping Forest been taken into consideration - eg. views from Pole Hill and Yates Meadow. High rises will be a blot on the beautiful landscape - a crying shame, this should be investigated.	2) Reduce height to match that on other side of Laurel Gardens and on the opposite corner of Kings Head Hill - 4 storeys maximum. 3) Move the pedestrian entrance to the flats to Sewardstone Road as per original plan. 4) Create vehicular access to the development from Sewardstone road to Kings Head Hill to reduce the parking/pollution/disturbance on Laurel Gardens x12 homes & their residents. 5) Remove rubbish collection from Laurel Gardens for all proposed a11 homes. 6) Provision of additional services required. 7) Provision of adequate parking is required - restate the vertical parking at the front of the development, the reduction to only 3 spaces makes no sense - where do the shop keepers and their staff park (public transport and cycling are not good options at this site). 8) Be realistic about cycling in this area - there is no lighting going towards Waltham Abbey - 2 mins away from the site - very dangerous, and steep hills going towards North Chingford/Woodford etc. The road going towards Colindale is also dangerous with high speed vehicles and no cycle path.	Yes	We are directly impacted detrimentally by the proposed development.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S434 - 60-74 Sewardstone Road	Yes	Yes	Yes			Yes		The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).
Christine Shepherd				S434 - 60-74 Sewardstone Road	No	No	No	Poor access to public transport, lack of or inadequate access to health services and schools. High levels of traffic pollution and pollution from the incinerator at Edmonton make the development of high rise flats unsafe from a health perspective.	Houses with gardens and parking would help mitigate the above issues.			The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development. The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing, presents clear opportunities to significantly reduce vehicle traffic across the borough.
Ivy Heatherley				S434 - 60-74 Sewardstone Road	No	No	No	The plan does not fulfil the legal duty to assess the development needs of their area, allow growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to it, to be effective. National Planning Policy Framework, page 51 1) does not believe that the plan meets the definition of "Sound" from the National Planning Framework, paragraph 35. The Local Plan does not meet the areas objectively assessed needs. The prioritisation of housing is to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. It does not "condition and proactively promote economic growth. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive vibrant and economic prosperity, rather than homogenising the area through busy tower blocks. 2) It is not socially sustainable The Council has not entered into joint working with good faith. Resident views have been disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan would materially change the character of the area, urbanising the gateway to the Forest. It does not fulfil a social objective to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can	Please see the suggestions above. In particular: - the height of the proposed building must be greatly reduced - the plan for a Coop supermarket or similar must be reinstated - this is the one thing in the plan which would serve the existing and future local residents, and will support smaller existing and new businesses. Small units will not survive here on their own - will be retail boxes and the like - no practical conditions to the community - public transport links and vital facilities as doctors schools and dentists must be improved	No		The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to former sites, Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Sites of Special Scientific Interest (SSSIs) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SACs), former sites, or Special Protection Areas (SPAs) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. In Local Plan Part 1, Policy 22 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade I listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to observe and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any dispensation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 22,640 new homes (2,264 per year) based on a London-wide assessment of capacity/available sites in 2021/22. The original draft London Plan figure was equivalent to approx. 2,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target (8% short of the Council's identified housing need of 2,120 new homes per year, as well as the London Plan identified need for 6,000 homes per year across London). In order for the Local Plan to be found "sound" at examination stage, it is required to be accompanied by a full Sustainability Appraisal and Habitats Regulations Assessment as part of the evidence base.

Carl Hainby				S454 - 66.74 Sewardstone Road	No	No	<p>41 properties and 8 stories does not align to the look and feel of other properties in the area and in Chingford as a whole where the existing properties are houses, bungalows or smaller low rise blocks</p> <p>Residents of Chingford live here due to the existing landscape and proximity to the forest. The proposal will negatively impact this.</p> <p>High Rise - Chingford Hill Estate - the last high rise in Chingford was demolished due to issues with existing High Rise developments and replaced with houses and low rise blocks. It seems that those issues are being overlooked and another estate built on the corner of Sewardstone Road and King Head Hill. What are the guarantees the same issues experienced with Chingford Hill is not replicated here.</p> <p>Traffic - the junction of King Head Hill and Sewardstone Road is already congested with regular traffic jams causing air pollution. Additional properties will increase this.</p> <p>Parking - Only 10 parking spaces proposed for 41 properties with only 5 for general use, is inadequate when we have inadequate public transport with only 2 buses in the vicinity that are only available 3-4 times an hour.</p> <p>Parking - Laurel Gardens already suffers with lack of parking. This will be exacerbated with the development. It is not fair to suggest putting the burden on Laurel Gardens residents but offering them residents parking that will need to be funded.</p> <p>Cycling and Hills - The Sewardstone Road development is uniquely placed at the bottom of 2 steep hills. It seems that this has not been taken into consideration with the plans to include 76 parking spaces for bikes. These hills mean bikes are rarely used. The spaces would be better used for additional cycle parking.</p>	<p>Reduce the plans to the original of a 3 floor development</p> <p>Increase the parking in line with other developments in the area due to the uniqueness of the steep hills and lack of adequate public transport</p> <p>Reduce the burden on the residents of Laurel Gardens with the entrance to the development from King Head Hill and Sewardstone Road</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As per the Local Plan policy, the sites that will or have the potential to impact on the highway network public transport services, sustainable transport, have difficult access will be required to submit a Construction Logistics Plan setting out strategies to minimise these impacts and agree suitable mitigations and monitoring prior to the commencement.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Max Hainby				S454 - 66.74 Sewardstone Road	No	No	<p>41 properties is out of keeping with the rest of the borough and the area. Properties are all houses, bungalows or small blocks. These developments will significantly change the Chingford area including the look and feel. Residents have moved to Chingford for the existing look of the area and the locality to Epping Forest</p> <p>Traffic and congestion - there is already significant congestion in the locality with regular traffic jams. These proposals will make this worse and increase air pollution</p> <p>Transport limitations - there is limited public transport in the area - 2 buses, 1-4am hour and Chingford station a 25 minute walk up a steep hill</p> <p>Parking - only 10 spaces in the 41 properties development is not adequate with the limitations on public transport and the steep hills mean that residents are unlikely to use the 76 cycle parking spaces</p> <p>Parking - Laurel Gardens already struggle with parking. By not providing adequate parking spaces in the development will put additional burden on Laurel Gardens as the public transport facilities are inadequate</p> <p>Parking in front of the shops - again these has been reduced in the re used plans adding additional burden into the surrounding streets</p> <p>Too many high rise properties changing the borough. Previous high rise development in the borough, Chingford Hill estate was demolished a few years ago due to the issues of high rise developments and replaced with houses and smaller blocks. Why are we now replicating these high rise blocks when the know issues on another part of the Borough that has even less infrastructure than was available to the Chingford Hill estate</p> <p>Laurel Gardens impact - plans to have the entrance to the development on Laurel Gardens impact - plans to have the entrance to the development on Laurel Gardens impact - plans to have the entrance to the development on Laurel Gardens impact</p>	<p>Reduce the development back to the original 3 stories</p> <p>Increase the parking in line with unique requirements of the area (steep hills and inadequate public transport)</p> <p>Reduce the overall highway solution to align with the existing look of the borough and requirements of the residents</p> <p>Remove the burden on Laurel Gardens by moving the entrance to the development to the wider King Head Hill and/or Sewardstone Road</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Amanda Raynor				S454 - 66.74 Sewardstone Road	No Response	No Response	<p>Feel the plan is proposed as contains no plans for the infrastructure required to support 440 new homes. No plans for school provision, transport or healthcare. It is not realistic to build high rise tower blocks and not consider the requirements for car parking and the impact lack of this will have on the local area and residents. Although there is a drive for fewer cars less this is not realistic at all. Currently our area has low public transport access, local roads get congested already and the hills around the area make cycling and walking challenging.</p> <p>The scale, height and density of the development is NOT in keeping with the urban area. Residents living in the area enjoy the urban feel of the area and it being the gateway to Epping Forest.</p>	<p>Build low level dwellings not Tower Blocks with sufficient parking facilities, provide green space & community area within the development to be enjoyed by new residents without fear ensuring it is light low rise and has no dark areas that can be used for ASB.</p> <p>Provision CCT is installed and provide a doctors surgery, nurseries and school provision as part of the development invest in local transport and the infrastructure to support a much smaller development.</p> <p>Encourage and talk to the local community face to face and work with them to develop a smaller development.</p> <p>I would like to note that this process and the specific requirements to respond requires a level of academic that I have struggled with this myself as a professional person. It is hardly something most residents I feel who feel strongly or would like to respond to would be able to navigate or complete!</p>	No		<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Site of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
				S454 - 66.74 Sewardstone Road	No	No	<p>Firstly the original plan was to modernise what was already there instead the existing dwellings have been demolished to make way for a High Rise which nobody wants and smacks of corruption and back handers. Chingford is a semi rural location where the people who live here do not welcome our town being upgraded to resemble Tottenham Hale.</p>	<p>No to High Rise multi-occupancy dwellings, its that simple! The current infrastructure does not support these ugly monstrosities. Inadequate transport links, insufficient retail outlets, No parking and potential problem for our local police force.</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Lisa Bagby				S44- 66-74 Sewardstone Road	No	No	No	Tower block of 8 stories with balconies proposed overlooking private gardens, where is the consideration for existing residents who own their properties? If this goes ahead they must be compensated for disruption, loss of privacy and sheer misery on a day to day basis due to the massive lift/trift traffic in Laurel Gardens, this is a narrow road where vehicles cannot pass, now there will be increased burden due to additional 41 homes! Why are we urbanising this area of beauty, on the outskirts of Epping Forest, has valley park and the reservoir? Makes no sense when Borough Flatted lower blocks at Chingford Hall Estate due to the known issues with these types of developments. As we are in a semi rural area with poor transport links residents of flats will more likely have car but nowhere to park them - how highways & planning visited this site by public transport? The consultation been themselves arrived by car not by foot/bicycle/bus. Consultation process flawed and not accessible to all those affected. No consideration to impact on local services: doctors/health/education/social	1) Lower the tower block to 4 floors max, 2) provide sufficient parking for shop owners/shop staff/customers/residents/visitors/visitors including delivery drivers. Highways should visit & discuss with residents. 3) be respectful of home owners and the intrusion on their privacy, nobody should be overlooked by 8 floor of flats 4) review the development from the perspective of Epping Forest and its viewpoints - will be a blot on the landscape 5) carry out robust and transparent consultation process that is inclusive 6) plan that shows an increase in provision of transport/education/social & health provision	Yes	We are directly impacted detrimentally by the proposed development	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
				S44- 66-74 Sewardstone Road	No	No	No	The current roads a very busy, it will impact on the quality of life of everyone here. More buses and car will create more pollution and noise it seems that no one cares about the well-being and health of the locals.	It need to provide parking area for the new residents. It demands a better infrastructure (more nurseries, hospitals, GP, schools, parks and leisure centres). On top of that, it essential to improve road access to highways. The traffic is already a nightmare.	Yes		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/motorised vehicle trips. Retention of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Robert Andrews-Large				S44- 66-74 Sewardstone Road	No Response	No	No	N/A	These proposed flats are an intrusion of privacy to myself, neighbours and Kings Head Hill. In addition to this they will block the sun from my garden. Also, I do not believe there are insufficient number of schools & health centres in the area to cope with all the flats that you are proposing. Also, there isn't enough parking for these flats, there should be one parking space for each flat that you are proposing because the proposed homeowners will have one car (possibly more), where are they going to park because if you probably hope, they will not use the buses and if they did are there enough and do they run often enough, even getting to Chingford Station, it is a long walk and London Transport often cancel the bus. I have problems getting out of my road now with the rubbish being collected and deliveries, it is going to be worse because there will be so more bins for LBWF to empty, none of the homeowners in Laurel Gardens should have this inconvenience.			Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
John Poppy				S44- 66-74 Sewardstone Road				I cant believe the council are even considering such an immense development on these sites. With in excess of 1,000 new residents how will amenities including parking and public transport cope? There is no provision for extra schooling and health and social care which are already over-run. Hill can see it that this proposal is a try on just to see what numbers the council can be pushed to as there is no way this proposal should be considered. Under this system it should be possible for me to knock down my house and build a tower block. !!!		No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.
Michael Alan Freeman				S44- 66-74 Sewardstone Road	No	No	No	Not compliant until local voices are heard. Unsound as there has been no co-operation with what the local want	Talk to the locals. Ask what they want and are willing to accept. Don't just plan with very limited knowledge of space, transport links and other infrastructure works. This is a prelude to some massive plans to flood the area with high rise buildings with no character. With no parking provided the local streets will become blocked. Again talk to the locals. This will never be the proposed Community Hub LBWF keep talking about. Everything will be restricted. Nobody will be able simply access the area.	Yes	it's destroy the area if this and future planned high-rise are accepted by LBWF	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Local Plan Part 2 has been consulted on twice - The first consultation was at the draft stage where the Council held several in-person meetings from October - December 2020. For this pre-submission stage, there was a spike in Covid-19 cases - the council decided to hold these engagement events online for the safety of our residents and officers. Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Mare Scully				S434 - 60.74 Sewardstone Road	No Response	No	I believe this development is not sound because it makes no allowance for the impact of 40 households upon the local infrastructure i.e. Doctors and social care capacity, school places, car parking and congestion. This 8 storey high rise is not in keeping with this suburban setting of small houses, bungalows and low level apartment blocks. I strongly oppose this and would ask WF Planners to re-consider: have we learnt nothing from the pandemic about the negative impact on physical and mental health of placing people (especially children) in high rise flats, without gardens.	Waltham Forest is one of the most densely populated boroughs in London - build houses or maisonettes (with small gardens) to give residents quality of life and better health. This urban sprawl would impact the local area - no more high rise tower blocks.	No	The voice of local residents should be heard to improve transparency in the planning process	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs, and healthcare facilities.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Frank Pace				S434 - 60.74 Sewardstone Road	No Response	No	I am totally disgusted by the plans. I've lived in Chingford for over 20 years in a green belt area and flat free with forests. This development will destroy the lovely views and increase crime and the roads will be ridiculous busy. The area is struggling already and no plans highlighted for improvements to transport. We totally object to the plans.	Scale down by 75% and no more than 3 stories high.	No	I am concerned, as to developments in and around my area.	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>

Mr. Kelvin Jennings				SAS4 - 66.74 Sewardstone Road	No	No	No	Excessive Height. Parking. Upsetting the local look of area. Height restriction should be enforced to No higher than 40 foot including roof. Mr. K. Jennings.	40 foot height restriction. Adequate Parking for the units to be built embraced in building area.			<p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Susan Reynolds				SAS4 - 66.74 Sewardstone Road	No	No	No	Not in keeping with area	Make smaller			<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2016).</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Wendy Mapp				SAS4 - 66.74 Sewardstone Road	No	No	No	40 new homes will be multiple stories. This is not in keeping with the local area. Also the extra footfall is not supported.	Maximum of 2 stories, schools, doctors and parking!!!	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
				SAS4 - 66.74 Sewardstone Road	No	No	No	We consider a building of 8 stories is not appropriate on this site. Originally as understood there would be no flat and a supermarket beneath with adequate parking facilities. This road is busy and not well served by transport. Also consider the uphill journey to shops in North Chingford which only has a Coop Tesco express and the new Amazon, and the congestion of Chingford Mount if you need to use the underground. Also there is no extra provision for health services or school places. Our local excellent primary school would not possibly be able to offer a place to junior pupils as it is already heavily subscribed. Add to this the prospect of more tower blocks on adjacent sites. Fear the area will be overdeveloped with the resources we currently have.	Original plan seemed to be more acceptable and in keeping with our area.			<p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>
Peter Headley				SAS4 - 66.74 Sewardstone Road	No	No	No	This location is contrary to LPS para 4.58 as amended which reads or more new development to those places that offer the best access to services, facilities and public transport (both now and for the foreseeable future). SAS4 does not fall into this category and the Infrastructure Development Strategy does not envisage significant changes within the scope of this plan. Therefore this level of development is not achievable and would not provide livable accommodation.	Sites SAS2, SAS3 and SAS4 developments must be reduced to total no more than 130 residences - a number that will still stretch the facilities available.			<p>This is noted.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p>

Jane Davernport				S454 - 66.74 Swardstone Road	No	No	Yes		Whilst I am in favour of providing much needed housing, I do not feel that the proposals for the Swardstone Road area are sound. I live at 111 King Head Hill so I am in very close proximity to the proposed new housing. High rise buildings would be completely out of keeping with the local area. We are right on the edge of the forest, which is a haven for wildlife and would be detrimental to their natural habitat. High rise buildings would take a lot of natural light away from residents towards the bottom of King Head Hill. There would be insufficient parking provision for all the proposed new homes in this area, insufficient school places, insufficient GP provision. All in all it would be a complete nightmare. This is the suburbs of London, not the City. Our relatively green areas should not be taken over by high rise housing.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Marie Scully				S454 - 66.74 Swardstone Road	No Response	No	No Response	believe this is unsound because again we have no mention on schools or surgeries catering for an influx of people to this area. parking is also an issue in the surrounding roads. As for traffic, this area suffers badly when an issue occurs on the M11, M20, A10 and North Circular causing frequent grid locks.	We have family homes in this area and for decades these work. We do not need hideous tower blocks, they do not work.	No	The voice of local residents should be heard to improve transparency in the planning process	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs, and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections, and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
John Cole				S454 - 66.74 Swardstone Road	No	No	No	Site was legally demolished. Does not fit in with surrounding area which is primarily low rise dwellings. Limited parking for the proposed development. Proposed parking restrictions will negatively impact existing residents in surrounding properties. Development will negatively impact surrounding infrastructure.	Return the site back to it's original size. No more than 3 or 4 storey tall	Yes	I believe that the development is being carried out without consideration of the best interests of the existing local community. BSWF is putting money and politics before the residents, which they are supposed to serve.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2016). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Sally Tapping				S454 - 66.74 Swardstone Road	No Response	No	No	Not in keeping with the surrounding area and lack of infrastructure for the increased population		Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2016). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs, and healthcare facilities.
Sue Cooper				S454 - 66.74 Swardstone Road	No	No	No	High Rise!!!!		No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Ruby Walrab				S454 - 66-74 Sewardstone Road	No Response	No	No	This development alongside others within the same area will put too much strain on existing infrastructure and services. Not enough parking, no schools, increased congestion/pollution and this build is too high in comparison with rest of area blotting out light and views for existing residents.	If you read my above comments the modifications should be self evident	No		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
				S454 - 66-74 Sewardstone Road	No	No	No Response	The original proposal was to modernise the existing dwellings. The developer ignored the rent and demolished the building in its entirety. We are now faced with an eight story monstrosity. Parking is also limited and transport links to town are poor. The proposed development will turn this corner of North Chingford from a semi rural neighbourhood into a featureless concrete jungle.	A return to the promised plan an improved low level development with rear offcuts below. The existing expanse of pavement should be utilised to facilitate parking	No		The Local Plan requires a character-led approach to regeneration, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2016). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Len Ferguson				S454 - 66-74 Sewardstone Road	No	No	No	I dont know what SAC is. This should be in fact.		No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA), will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Miss Kipriye Otiya				S454 - 66-74 Sewardstone Road	Yes	Yes	Yes	I am Miss Kipriye Otiya living in 1 Laurel Gardens, Chingford E4 3Jx. First of all I will have a lot less privacy in my garden and living room as it will be visible to everyone in the apartments. Therefore I won't be able to sunbathe in my garden as I will not be private and block the sun. Also there is not many car parks being created which will leave to people overusing and parking in our closed road. This is already an issue that all neighbours agree on and will get much worse. Noise will also be an issue and will effect me when in my garden and excessive noise at later times will effect my sleep.		No		The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Stephen Doyle				S454 - 66-74 Sewardstone Road	No Response	No	No	N/A	There is an INTRUSION OF PRIVACY to the homes on Kings Head Hill and Laurel Gardens due the height of building. ASO there is only 20 parking spaces allocated so there should be a maximum of 10 flats, if 41 flats are built with 5 businesses there should be parking for a minimum of 50 cars. Also- garbage collection, this should be picked up from within the boundary, it is unacceptable for garbage to be collected from Laurel Gardens which is where the only entrance is showing to the land within the boundary, the road is not wide enough, however, will not be able to access or leave their homes when garbage is being collected from Laurel Gardens.	No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The site is identified as a priority area for new waste management facilities within the adopted North London Waste Plan. This is consistent with the London Plan approach to the siting of waste facilities within designated industrial estates, where their impact can be best mitigated. The Council supports measures to mitigate the impact of such facilities through appropriate design measures.

Susan Doyle				S454 - 60.74 Sewardstone Road	No	Response	No	No Response so I don't need to comment	There is an INTRUSION OF PRIVACY to the homes on Kings Head Hill and Laurel Gardens due to the height of building. ALSO there is only 10 parking spaces allocated to these should be a maximum of 50 flats, 4 flats are built with 5 businesses there should be parking for a minimum of 50 parking spaces. Also - garbage collection, this should be picked up from within the boundary, it is unacceptable for garbage to be collected from Laurel Gardens which is where the only entrance is showing to the land within the boundary, the road is not wide enough, homeowners will not be able to access or leave their homes if garbage is being collected from Laurel Gardens.	No		The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality of congestion, parking problems and improve air quality.
Linda Hainsley				S454 - 60.74 Sewardstone Road	No	No	No	I believe that no regard has been given to the existing residents that surround the proposed development on Sewardstone road - eight stories is out of keeping with the existing environment - Chingford is a suburb of the entrance to Epping Forest, it is mainly 2 story houses or bungalows. Changing the boom and feel of this suburb by building these flats and the other additional proposal to build flats opposite will adversely change the uniqueness of Chingford. Transport - the existing public transport links are inadequate for this development and the further ones planned in the area. There are 2 bus routes that only run 3-4 times an hour. Traffic at the Sewardstone road junction with Kings Head Hill is already regularly congested with traffic jams daily. Inadequate parking in the 41 property development will add pressure onto the existing residents of Laurel Gardens, where there is already inadequate parking options. 10 parking spaces for 41 properties are inadequate, especially when 3 will be disabled spaces and 2 for electric charging meaning that there will only be 5 normal spaces putting pressure on Laurel Gardens and surrounding streets. The surrounding area has 2 very close hills which makes cycling virtually impossible. Why not to many cycle parking spaces in a development where they clearly will not be used. Have you done any assessment on how many people cycle in this area? Infrastructure and shopping. There are no supermarkets in the local area. How are the residents supposed to shop where machines is available and public transport inadequate? This will cause greater reliance on shopping deliveries causing greater congestion to Laurel Gardens. Laurel Gardens is a new and additional deliveries, vans etc will adversely impact the existing residents. The existing plans put the burden of additional traffic onto Laurel Gardens, which is a small 10 property cul-de-sac. This will have a significant detrimental impact on the residents of Laurel Gardens and surrounding streets.	Reduce the 8 story development back to the original proposal of an additional floor to reduce the burden on Laurel Gardens and surrounding streets. Ensure the development has adequate parking to reduce the burden on surrounding residents to align with the parking facilities in neighbouring blocks. This may be against LWFW existing preferred plans but is needed due to the inadequate public transport and the uniqueness of the hill, area making walking or cycling to the station unrealistic. Change the plans that puts the burden onto Laurel Gardens for deliveries, access and bin collection to the wider Sewardstone road junction.	No		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Lu				S454 - 60.74 Sewardstone Road	No	No	No	Total absence of sufficient publicity to enable any meaningful consultation to occur	A consultation that is open and available to all where local people can engage and have meaningful input	Yes		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Stephen Doyle				S454 - 60.74 Sewardstone Road	No	Response	No	N/A	There is an INTRUSION OF PRIVACY to the homes on Kings Head Hill and Laurel Gardens due to the height of building. ALSO there is only 10 parking spaces allocated to these should be a maximum of 50 flats, 4 flats are built with 5 businesses there should be parking for a minimum of 50 cars. Also - garbage collection, this should be picked up from within the boundary, it is unacceptable for garbage to be collected from Laurel Gardens which is where the only entrance is showing to the land within the boundary, the road is not wide enough, homeowners will not be able to access or leave their homes when garbage is being collected from Laurel Gardens.	No		This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). This study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green space and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough.
-				S454 - 60.74 Sewardstone Road	No	No	No	The buildings were not supposed to be knocked down, but apparently they were intended to be. But we are where we are and lets get them rebuilt in an art deco style, something that Chingford can be proud of. Lets get as much street parking outside if it is possible, or diagonal parking etc. Lets make sure these buildings look beautiful, built with lovely bricks and the shops to have old style awnings, and the flats above, the rooms should be well sized and not those tiny things that are being built everywhere now.	make the buildings be built of beautiful brick, not slabs of grey concrete. Lets make this little area one that looks beautiful, with old style art-deco touches and well lit areas and proper parking spaces for today's size of vehicle.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).

Tim Hancock				S44- 66-74 Sewardstone Road	No Response	No Response	No Response	<p>Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, degradation to the surrounding environment, negatively affecting the current residents?)</p> <p>This is an inconsiderate and arbitrary decision to simply drop a development on to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions centring on future to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is puppets by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are</p>	<p>Reject based on continued denigration to local community and strain on local services, as pointed out above.</p>	No	<p>This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert like enclave of a time- SO YES, STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?</p>	Offensive Response
Katherine Waldral				S44- 66-74 Sewardstone Road	No	No	No	<p>80 homes I can imagine would be to high for that area. it would be out of character to the area. I agree that new shop premises should be put in place for the benefit of the local residents. Some levels of town hubs should be built above shops but only upto and not extending three levels including shops on ground floor. The area is already over populated with struggles to find spaces in schools, hospitals and GP surgeries. Not to mention that there has not been any allocation for parking for all these provisional homes. This again in the long run will only affect the residents already living in this area.</p>	<p>No more than 3 levels including shops on ground floor. Parking spaces should be allocated within the plans. Lots be honest. The prop Ken this who country flag is that we as a nation are allowing too many people into the country its far to easy roadway to claim asylum lets not ruin our beautiful country. Lets start dealing with the real issue!!!!!!</p>	Yes	<p>its only fair for those who already live here to have a say in how our area will be affected</p>	Offensive Response

Jaimie Newbery				SASS - LKPN, Budgeon and Gresham Works	No	No	<p>The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Epping Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. This site is immediately adjacent to a road of 2 story houses and one of the access points is very narrow and shown as being directly across a busy pedestrian path making it extremely dangerous. Any development over 3 storeys high would be totally inappropriate.</p> <p>LBWF is seeking to build more homes (27,000 in 2031) than required by the London Plan (Pg 1 Pg. 154). Housing targets should not be met by only providing minimum standards such that the development overloads existing residential areas to the detriment of existing residents or adversely affects the aesthetic and historic character of areas.</p> <p>The plan is not consistent with Regional and National planning policy since LBWF is intending to build many more homes than the London Plan requires - see paragraph above.</p>	<p>Is the Plan "sound"? There are 4 tests at para 31 of the NPPF:</p> <p>Has the Plan been "positively prepared" This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.</p> <p>"No an LBWF should be seeking to preserve the "local character" of the area - residents close to Chingford & Highams Park in the area live in low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats, and subvert the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly inappropriate! There is a petition of over 6000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 154) states 12,640 new homes over 10 years and LBWF is proposing 2,700 new homes by 2025 - very significant excess of 47% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen to 2 million, so why there pressure on local councils to build on every possible space?</p> <p>Also, the housing target in the London Plan may well be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new proposed are flats - the Pindonich has shown that families want houses with gardens. There should be a good mix of houses and flats.</p> <p>3 storey this should be stated on the local plan rather than the maximum height of any development on the site should be no more than 3 storeys high.</p>	No		<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding, the choices made in the plan are based on by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning; - Having no regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Consistency with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as that of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p>
Alicia Goulfar				SASS - LKPN, Budgeon and Gresham Works	No	No	<p>The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Epping Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. This site is immediately adjacent to a road of 2 story houses and one of the access points is very narrow and shown as being directly across a busy pedestrian path making it extremely dangerous. Pauline Whitbread				SAS- UKPN, Bulgden and Gresham Works	Yes	No	No	<p>1. Has the plan been positively prepared? LBWF's plan for the changes to the area used in the Assembly Hall and Library has not been positively prepared. LBWF has not provided a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities. This means that some needs from neighbouring areas is accommodated where it is impractical to do so and is consistent with achieving sustainable development. LBWF should be seeking to PRESERVE the LOCAL CHARACTER of the area. Residents close to the Chingford and Highgate Park as they are both low rise suburbs. If LBWF does not agree with this statement then why did you knock down the Chingford Hall Estate as well as the Catholic Estate and replace the arcades with housing? This both became ghettos, so why are you considering creating ghettos again? North Chingford and Highgate Park are the gateway to Epping Forest. It is totally inappropriate to change the character of the area from low rise suburban housing to tall high rise flats that will be totally unviable for the windows in the forest. Queen Victoria gifted Epping Forest to the people and the residents of Chingford have a duty of care in all aspects of ensuring the forest is well cared for as well as the windows/gateways to the forest is also appropriate. Witham Forest intend to totally over develop the area of Bulgden and the Gresham Works. The local people felt so strongly about it that a meeting was held in St Peter's and St Paul's Church where there was standing room only to object to the proposals. You have now made this document so complicated to respond to that it has become a huge challenge to try to complete it. There is a petition of over 6,000 signatures against this high rise development, which you will probably ignore. The council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 p.164) states 12,640 new homes over 50 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 15% over the required target. Since the London Plan was drafted, does it know and count the number of new buildings in modern infrastructure? Too many houses too little parking height not compatible with area</p>	<p>Reduce the number of buildings provide parking improve the route from Chingford station to include access to Stratford</p>			<p>The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Identification Study (2025). The HMA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA) The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rural sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposal that poses an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. Through the evidence published in the Characterisation and Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>

The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeably alleviation of congestion, parking problems and improve air quality. Through the evidence published in the Characterisation and Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Identification Study (2025).</p>
Lambros Poulas				SAS- UKPN, Bulgden and Gresham Works	No	No	No	<p>Too many properties in a short space. Traffic suffers already there and there is no provision for this extra strain on traffic, as well as parking, doctors, dentists, nurseries and local schools</p>	<p>Too many properties in a short space. Traffic suffers already there and there is no provision for this extra strain on traffic, as well as parking, doctors, dentists, nurseries and local schools</p>	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeably alleviation of congestion, parking problems and improve air quality. Additionally, Witham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.</p>
Mrs Geraldine Jendal				SAS- UKPN, Bulgden and Gresham Works	No	No	No	<p>This process risks excluding residents from being heard. I am not a legally qualified person. I'm replying as a long term resident of Chingford Green Ward. I consider all Local Plan sites in North Chingford to be unsound, in the case of the UKPN, Bulgden and Gresham Works sites. I consider this to be a wholly inappropriate, overdeveloped development given its proximity to Chingford Green Conservation Area and the nearby Victorian shopping parade. Such a development will contribute to the urbanisation of the Station Road area and the gateway to Epping Forest, and rob it, of its semi rural feel and character. It is too intense and I do not consider it "sensible" with its rear servicing access, it will also contribute to an unsustainable increase in traffic and parking in the rear residential streets in addition to the additional traffic and parking which the proposed Chingford Hub building would bring, take away light and privacy, and blight adjacent properties. Chingford is suburban, with the North Chingford area, in particular, have a semi-rural feel, which is much loved by residents and visitors. The area is mainly 2/3 storey residential buildings, and as such, this is an entirely unsuitable proposal for the area. My family and I choose to live in North Chingford because of its low rise, open, village feel / semi-rural character. In general, the LP North Chingford sites will destroy everything that makes our local community special and unique - and the Council refuse to listen. More importantly, the LP seeks to build far more homes than is actually required by the London Plan, and has failed to take into account demand in London population, the Covid pandemic, and move towards working from home away from London, and Levelling Up agenda requiring less development in London, which makes a proposal like this unconscionable. The LBWF seeks to impose a "one size fits all" uniform planning approach across the borough, which will homogenise the entire borough so that it looks exactly the same wherever you are, with concrete apartment and</p>	<p>I am a local resident - I am not equipped to say why my suggestions would make the LP legally compliant and sound. LBWF needs to listen to its residents/local community and acknowledge there are other ways of doing things instead of ignoring them and ploughing on with their proposals regardless, as they have done - it makes you feel totally powerless. Reduce the number of proposed homes in the LP to the required number only and remove sensitive sites such as the UKPN, Bulgden and Gresham Works. Bring back empty domestic properties around the borough into use through a programme of refurbishment. Respect the Chingford Green Conservation Area and restrict any development in its proximity and adjacent suburban neighbourhoods, to less dense, low rise - no more than 3 storeys. Only use site specific high quality, aesthetically pleasing design, respecting local character, architecture, and history for sensitive proposals such as UKPN, Bulgden and Gresham Works and Chingford Green and any nearby developments adjacent to forest boundaries - unlike the ugly concrete and glass box buildings with balconies which are springing up around the borough. Include a better mix of housing in the LP - houses, maisonettes and bungalows, with gardens - not just endless, soulless flats. Provide parking for each and every home and all necessary requirements / amenities such as school places, public transport, and healthcare.</p>	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a year minimum housing target for Witham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/22. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from available sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,600 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviation from these duties that would lead to other substantial harm or total loss of a designated heritage asset in the borough. There is also robust policy in place to protect and enhance the distinctive character of the Borough's conservation areas. The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Identification Study (2025).</p>

If yes, please explain why?	Council's response
Mike Chrimas				SASS - LMPN, Budgeon and Graham Works	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendments to the plan may be rejected for failing to comply with rules that are not transparent to consultees.</p> <p>Consultation on the site allocation (LPS) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPS) for 2025-2035. This has coloured the views of many attending the other online consultation meeting, and made it difficult to separate views on the main plan from the specific suggestions. At times it has been difficult to determine the topics of meetings which have been coloured by political positioning, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine the extent whether consultation with the public has been legally compliant, cover minor businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, expressed by the number of attendees allowed, or have been difficult to get online.</p> <p>In general however it has been apparent both from LPS and what has been stated at consultation meetings a major driver for the identification of development across the borough has been housing target of c. 1800 homes pa. While LBWF has a target waiting list (100000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More sites need to be identified in the Borough to ensure the need is met. Both the issue many local residents including myself have with the proposed works is not the legal compliance, the duty to co-operate or whether the sites are sound. It is that Station Road is already heavily congested, there is a constant flow of traffic throughout the day. A high street bustling with riders and sound assets, with many independent outlets is fast becoming noisy and polluted. People are at the heart of any community, any proposal which will see more vehicles on Station Road is only going to deter them from the area and ultimately rip the heart out of our unique suburbs. We need a development that will continue to grow the great diversity of people and businesses we already have.</p>	<p>It is suggested that until master plans are developed, through consultation, for the main centres identified in LPS eg map consultation for individual sites is planned.</p> <p>Development of this site offers the potential to align with a number of the Council's strategic objectives by aligning with the distinctive role of lower centres, enhancing the historic and natural environment, and offering a range of employment opportunities.</p> <p>The potential for workshop or similar use at this site seems to have been overlooked in the development guidelines, although such space is lacking in Station Road, and such use existed historically here.</p> <p>In contrast to many other development sites in the Borough the target for new homes seems very unambitious for a site of this size in a successful retail area.</p> <p>It is unclear why the site has not been extended further to the north east at the rear.</p> <p>The site access suggested from the north west looks difficult.</p> <p>The improved cycling and walking access suggested is not part of this site.</p> <p>The existing site use and its history are mixed, with potential controversial land issues not mentioned on the Graham-Works site plan.</p> <p>Part of the site is in a conservation area, with the former ICB building having some merit in the local built environment, while the former Budgeon, now Amazon site makes no positive contribution to the streetscape. Making all this part of a single development will not be a positive contribution to the streetscape.</p>	No	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed.</p> <p>Four soundness sets which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base involving: <ul style="list-style-type: none"> Research/fact finding: the choices made in the plan are backed up by facts. Balance of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. </p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: <ul style="list-style-type: none"> Sound infrastructure delivery planning. Being not regulatory or national planning barrier to delivery. Delivery partners who are signed up to it and Alignment with the strategies of neighbouring authorities, including neighbouring marine planning authorities. </p> <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be legally compliant to avoid being legally challenged in the examination or through the planning application process.</p>	
Tom Freer				SASS - LMPN, Budgeon and Graham Works	Yes	Yes	No	<p>The plan for the supermarket redevelopment is already outdated as a new shop has just opened. I am not opposed to the development of the area behind the retail area into housing as long as there is sufficient parking space available, we are not in an urban but semi rural area and people need cars to get to work and shops further out of the area.</p>	re-address the shop issue and ensure adequate parking.	No		<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthily alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
				SASS - LMPN, Budgeon and Graham Works	No	No	Response	<p>The plan for the supermarket redevelopment is already outdated as a new shop has just opened. I am not opposed to the development of the area behind the retail area into housing as long as there is sufficient parking space available, we are not in an urban but semi rural area and people need cars to get to work and shops further out of the area.</p>		No		<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Gloria Jones				SASS - LMPN, Budgeon and Graham Works	No	No	No	<p>Gross overdevelopment of area and not in contact with surrounding area</p>	cancel plan			<p>The Local Plan requires a character-led approach to regeneration, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2016).</p>
Linda Braxey				SASS - LMPN, Budgeon and Graham Works	No	No	No	<p>Non compliance: Within a conservation area that should not be touched. Non sound: No matter what legal terms are put forward the plan is unreasonable for the small area of land. Fails to comply with duty to co-operate: This is a village setting with a village green, church and library all within a conservation area. LBWF are failing to co-operate with the local people who do not want their village area altered into some kind of urban town.</p>	There are no modifications that can ever make altering this site acceptable to the local people and within a conservation area. It just simply should not go ahead.	No		<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. There is also robust policy in place to protect and enhance the distinctive character of the Borough's conservation areas.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				SASS - LMPN, Budgens and Graham Works	No	No	No	Ground in all ways. Apart from anything else not enough facilities to support such an increase in population. Totally inappropriate for area				In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding, the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Being to regulatory or national planning barriers to delivery. - Delivery partners who are signed up to it, and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPB should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. The Local Plan should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through planning application process.
Faul Wellard				SASS - LMPN, Budgens and Graham Works	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and treescape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for other people. The area also does not have enough infrastructure to cope, such as doctors surgeries. (This is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.			The Local Plan should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through planning application process. Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online. Through the evidence published in the Character Interfession Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2018). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services and healthcare facilities. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
				SASS - LMPN, Budgens and Graham Works	No	No	No	I thought that the old Budgens building had already been turned into an Amazon shop?	NO COMMENT			This response is noted.
				SASS - LMPN, Budgens and Graham Works	No	No	No					This response is noted.
Yvonne Sanders				SASS - LMPN, Budgens and Graham Works	No Response	No	No	In the Plan "sound? There are 4 tests at para 15 of the NPPF: Has the Plan been "positively prepared? This means providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. No as SBW should be seeking to preserve the 'Local Character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of modest houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were not being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 p164 states 22,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 4,360 over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing	Ensure that any development is no more than 3 storeys in height and of a complementary style (use new developments a few doors along that has being greeted very favourably by local residents), so that it is in keeping with adjacent properties.	No	I wish to have the opportunity to explain why the Council's proposed developments are not suitable.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenure to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations provision is aligned to that set out in the London Plan. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that undermines cycling, walking and public transport use.
Susan Doyle				SASS - LMPN, Budgens and Graham Works	No Response	No	No	No response so no comments are required	There isn't enough parking NDW so there should not be anymore flats built along Station Rd. New flats will make the area too densely populated. It is good to have retail on Station Rd but more parking is required for shoppers and homeowners, perhaps mostly designed two floors of free parking for 30 minutes for shoppers or permit parking for homeowners would be best for this area but not so it looks like a car park, it should be in keeping with the view of Station Rd	Yes		Through the evidence published in the Character Interfession Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Tom Wise				SAS5 - LKPN, Budgets and Graham Works	No	No	No	Replace the old Budgets with a low rise retail unit in keeping with the character of the area. Residential is not a good use.	See above	No	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MP.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.

If yes, please explain why?	Council's response
John Smith				SAS - LKPN, Bridgden and Gresham Works	No							This response is noted.
Kathryn Upton				SAS - LKPN, Bridgden and Gresham Works	No	No	No	New business has just spent a lot of money on this site and will be opening soon so how can it be redeveloped.	Maybe make the rear of the store into a carpark as there is a shortage of parking space for the store.	No	No one takes any notice of emails.	This response is noted.
				SAS - LKPN, Bridgden and Gresham Works	No	No	No			No		This response is noted.
Brian O'Leary				SAS - Chingford Library and Assembly Hall	No Response	No	No Response	<p>The IP is unsound because:</p> <p>Reinforcement was not used to accommodate any modest increase in FAR, typically around 1.4 FAR/banishment, p.12, this is said to be an 'optimal' 1.4 FAR/banishment. The Introduction Study 2019 however the Council's proposal, in an obvious contradiction to the above, as it plans for 3 stores next to Carbis Cottage rising to 3 stores, after objections to their intended 6, on the opposite side (The Draft Station Study).</p> <p>According to the Introduction Study 2019 typically 1.4-6 stores/acre 2.0 FAR (p.14). Besides the inappropriateness of even 3 stores next to a grade II listed cottage, the overall height, scale and therefore intensification is in conflict with UP1 Policy 8 and Policy 17 A. B. E.</p> <p>Policy 8 links reinforcement to a 'desirable character where reinforcement only following for a modest increase in intensification'.</p> <p>It is a well known fact that buildings should be subject to their impact on local character and context. The Draft Station Study 03.2 itself recognises that as much of the surrounding context has a strong historical character (p.14). Residents and visitors refer to the Conservation Area and accompanying buildings as having a 'village feel' which we are anxious to retain. Regarding neighbouring properties no Shadow/Analysis, with diagrams, has been provided. Contrary to the claim in 03.2.6 it is impossible that the proposal will not negatively affect the amenity of surrounding properties.</p> <p>STO needs the categorisation of Reinforcement, Transition and Transformation in shoulder heights etc seems quite arbitrary. At the very least it hasn't been sufficiently justified. STO claims to recognise that taller buildings are "not appropriate other than in exceptional circumstances where the site context and proposed land uses would be enhanced by taller buildings". Conversely (1) STO provides the justification when "marked location of civic, cultural, importance" Lower rise buildings, with reinforcement.</p>	To make the IP sound request the consultation.		To ensure my representation gets a full consideration.	<p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density is the preparation of the Site Allocation document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>This response is noted.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <ul style="list-style-type: none"> Positively Prepared Meaningful participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> Research/Fact finding: the choices made in the plan are backed up by facts. Balance of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> Sound infrastructure delivery planning. Being no regulatory or national planning barriers to delivery; Delivery partners who are signed up to it; and Financial viability.
James Newbery				SAS - Chingford Library and Assembly Hall	No	No	No	<p>In the Plan "sound? There are 4 tests at para 35 of the NPPF:</p> <p>Has the Plan been "positively prepared? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and consistent with achieving sustainable development.</p> <p>"No an LBPW should be seeking to preserve the 'Local Character' of the area residents chose to move to Chingford & Highgate Park as they are low suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for 4 storey buildings in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3 Pg 564) states 12,640 new homes over 10 years and LBPW is proposing 27,000 more homes in 2031 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why a 42% increase on local council's build on every possible space?</p> <p>Also, the housing target in the London Plan may be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of new properties are flats, the benefits has been that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time...</p>	As above	Yes		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The London Plan (2021) sets a 10-year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London wide assessment of capacity/available sites in 2021/22. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a healthier, wealthier and greener borough.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <ul style="list-style-type: none"> Positively Prepared Meaningful participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. Mrs Geraldine Kendall				SAS - Chingford Library and Assembly Hall	No	No	No	<p>This is far too officious and risks excluding residents from being heard. I am not a legally qualified person, I am not a resident of Chingford Green Ward who considers the Local Plan for sites in North Chingford to be unsound and in particular, the proposed plans for Chingford Assembly Hall and Library, which will have a huge detrimental impact on the unique and special character of the Chingford Green Conservation Area with the proposed hub development being into a protected green space, whilst, at the other end of Station Road, other proposed over-land and over-land will urbanise the gateway to Epping Forest. There is no way this can ever be considered "servicable".</p> <p>Chingford, its suburban, white, North Chingford, in particular, has a semi-rural feel, which is much loved by its residents, who believe the Council's proposals will overwhelm and entirely change the character of Chingford Green/Chingford Forest. Chingford is one part of Essex, and Chingford Green today is still a remnant of Epping Forest. I believe there has been no input from the LBPW Conservation Officer (if there is one in post or if there has been) has written to ask, it has not been made public.</p> <p>My family and I choose to live in North Chingford because of its low rise, green, village feel - semi-rural character. The IP will destroy everything that makes our local community special and unique - and the Council refuses to listen. I am staggered that LBPW is ignoring the intrinsic importance of the Chingford Green Conservation Area and its boundaries with Epping Forest (an SSSI), despite large scale local opposition. The listed cottages next to the site will be hopelessly overshadowed by a much larger and taller building.</p> <p>The IP seeks to build far more homes than is required by the London Plan, and fails to take into account Brent and fall in London population; the</p>	<p>I am simply a local resident - I am not equipped to say why my suggestions would make the IP legally compliant and sound.</p> <p>LBPW needs to listen to residents/local community and acknowledge there are other ways of doing things instead of ignoring and going against with the proposal as they have done</p> <p>Respect the Chingford Green Conservation Area and its importance as the centre of the semi-rural village community of North Chingford</p> <p>Any development should be limited to 3 storeys, architecturally pleasing, high quality design, respecting character and history, harmonising with local architecture, respecting the history of the area.</p> <p>Low rise, low density homes and structures to the height of existing buildings - max 3 storeys only in the North Chingford area/gateway to Epping Forest.</p> <p>Site specific high quality architectural design for each area, especially Chingford Green and any developments adjacent to forest boundaries - health centre at the rear. It is far too much to cram into one building - mix the ugly concrete and glass box buildings with balconies which are springing up around the borough!</p> <p>Bring back empty domestic properties around the borough into use through a programme of refurbishment.</p> <p>Provide mixed housing/ providing a choice "houses, maisonettes and bungalows, with gardens - not just endless, soulless flats.</p> <p>Provide parking for each home and suitable amenities such as shops and leisure amenities, better public transport, healthcare</p> <p>No cars is required in the proposed Chingford Green development, or a health centre at the rear. It is far too much to cram into one building - mix the ugly concrete and glass box buildings with balconies which are springing up around the borough!</p> <p>Propose LBPW thinks again - and come up with a proposal to upgrade the existing buildings to make them more energy efficient, provide disabled access etc and make them more economically assessable to use, so they can once again, become the hub of the local community.</p>	No		<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <ul style="list-style-type: none"> Positively Prepared Meaningful participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> Research/Fact finding: the choices made in the plan are backed up by facts. Balance of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> Sound infrastructure delivery planning. Being no regulatory or national planning barriers to delivery; Delivery partners who are signed up to it; and Financial viability. <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that large areas need should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>

John Huggitt				S46 - Chingford Library and Assembly Hall	No	No	No Response	This is a conservation area any building you are proposing 30 new dwellings will have severe impact on the area and is totally out of character with the area. The adjacent cottage will have light loss - window lights and will have a detrimental effect on the value of that property and others in the block. There are already severe parking problems and what provision is there for charge points etc., disabled access and other infrastructure. What you are proposing will have a real effect on North Chingford changing its character for ever		To see what your intentions are and to argue against over-development	<p>The approach to apportioning growth has been weighed the allocation of the target of 27,000 new homes according to identified capacity. This has been updated in light of the most recently submitted evidence as part of stage 2 of the Examination. Evidence has been provided through the Examination process in respect of the soundness, and in particular the deliverability and robustness of the land supply which can be identified to support the housing requirement. The capacities which are indicated are based on the character-led approach to intensification and are considered to be achievable whilst being consistent with the rest of the policies of the Plan.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need to establish policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as they enhance the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these causes that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>
John Huggitt				S46 - Chingford Library and Assembly Hall	No	No	Response	I do not believe that the plan is sound BWWF should be preventing local character and on top of a conservation area. The proposal for a 5 storey block near a village green is a really offensive and there are over 6,000 signatures objecting to the plan. No one BWWF should be seeking to prevent the local character of the area - residents should move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were a being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 p194) states 32,640 new homes over 10 years and BWWF is proposing 27,000 new homes by 2026 - a very significant excess of 4% over the required target. Since the London Plan was drafted, due to Brexit and Covid the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build in every possible space? Also, the housing target in the London Plan may be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the wellbeing programme. The majority of the new properties are flats - the Federation has shown that families want homes with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and not replaced by	Yes	To see what your intentions are and to argue against over-development	<p>The approach to apportioning growth has been weighed the allocation of the target of 27,000 new homes according to identified capacity. Steve Miskin				S46 - Chingford Library and Assembly Hall	No	No	No, it is not sound - it is not even necessary.	To justify planning a large development of new apartments in the middle of a conservation area requires a high burden of proof that the project is not merely desirable, but that it is an essential priority for the community. However this plan is wholly unnecessary.	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>The Council is also set to a strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-metre neighbourhood objectives, which reduce the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is to optimising the use of these areas that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow flats built in Designated Centres to be converted to residential use at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontage and having residents located within the borough's centres, ensuring that most people daily needs can be met within a close proximity to their front door. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and distinction.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-occupied and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Mike Chimes				S46 - Chingford Library and Assembly Hall	No	No	No	It is suggested that until master plans are developed, through consultation, for the main centres identified in LPA1, consultation on individual sites is planned. Development of this site has aroused considerable controversy among local residents, because of potential loss of amenities, impact on the local conservation area, an intrusive design, and impact on local parking. The 2020 town centre study recognised the strong environmental quality of the centre particularly at the footpath area, making this site particularly important in securing the future of the character of Station Road.	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>The Council is committed to playing its part in tackling the housing crisis. If yes, please explain why?	Council's response
Velen Ejaru				S46 - Chingford Library and Assembly Hall	No	No	<p>The plan is seeking to build more homes than required by the London Plan. To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause "harm" (in planning terms) to existing residents who will suffer the consequences of over-crowding, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.</p> <p>These proposed developments cannot be delivered with policy compliant levels of affordable housing. Without parking these proposed developments will disadvantage older people.</p> <p>The Consultation is flawed as non active residents have not had a chance to comment as they received no notices advising of the plans. There has been no public meeting.</p>	<p>DONT WANT THIS SITE DEVELOPED AT ALL, should our wishes be ignored, then any building would have to be...no high rise, no over-crowding/over-shading existing homes, mixing with the local area, keep facade etc of the iconic existing building, provide parking for all new residents, plus provide additional doctors, hospitals, dentists and schools etc, for all new residents.</p>	No	<p>we all want to be involved - this is our life!</p>	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and advocates a sensitive approach.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a network free of congestion, parking problems and improve air quality.</p> <p>This response is noted.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Ian Connor				S46 - Chingford Library and Assembly Hall	No	No	<p>I do not believe that the plan fulfils the legal duty to assess the development needs of their area, align growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (London Planning Policy Framework, page 6).</p>	<p>This is because I don't believe that the plan meets the definition of "Sound from the National Policy Planning Framework, paragraph 35.</p>	No	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Stephen Pick				S46 - Chingford Library and Assembly Hall	No	No	<p>The terminology of your questions are so confusing so as to stop anyone trying to answer them or to put any points about this proposal. The proposal is so unrealistic and not thought out. It is not taking into account the local area or how it is used. Any tall building there will be so out of place with the surrounding buildings and architecture. It will also ruin the existing character of the area. The area already is over stretched with traffic and parking so to increase the pressure on that is unrealistic and will make an already busy area unmanageable. It will over stretch the existing infrastructure of doctors, schools, vehicle collection, public transport and other local facilities. It will increase the air pollution in the area. The need for more housing in that particular area does not exist. With increased congestion it will make it even more difficult to access services that are needed.</p>	The whole plan should be scrapped and not embarked on.	No	<p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a healthier environment, parking problems and improve air quality.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a healthier environment, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and best to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing(s)? Mrs. Val Lea	S46 - Chingford Library and Assembly Hall			S46 - Chingford Library and Assembly Hall	No	No	No	<p>No. The Plan has not been 'sufficiently prepared' as LBWF should be complying with the Council's 'Chingford Green Conservation Area Appraisal and Management Plan'. This is to preserve the 'special character' of the area, specifically a mix of buildings no more than three storeys high with the gable of St. Peter and St. Paul being the tallest to Grade II listed building. The CCA is written as an Archaeological Priority Area and, as such, is subject to Development Management policy DM26 of the Local Plan. HAS THE COUNCIL CONSIDERED THE GREATER LONDON ARCHAEOLOGY ADVISORY SERVICE ON THE NEW DEVELOPMENT OF THE ASSEMBLY HALL AND LIBRARY?</p> <p>It is NOT appropriate to change the character of the area by proposing to build 16 blocks of flats and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church is particularly offensive. There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.9 S46 states 22,600 homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so WHY IS LBWF BUILDING ON EVERY SPACE WHETHER SUITABLE OR NOT?</p> <p>the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time you have seen a house with a garden in Chingford?</p> <p>It is difficult to provide comprehensive feedback on this development as, although I have read in local media that the plan has been revised from 5 stories with 40 homes down to 3 stories with 30 homes, I have not been able to find the details on the council's website. In correspondence with the Chingford Club team in November 2020 it was stated that an extensive FAQ document would be published in relation to this development which would help keep residents informed. Where is this document?</p> <p>In general terms, I consider that the local plan at least fails to comply and may potentially be legally non-compliant or unsound due to the following:</p> <p>1/ Although 5 stories is better than 6, I still don't see how this proposal is keeping with its surroundings. Looking at page 24 of the Feasibility Study, Contextual Analysis, Height ADO, 5 storey looks like it will be around twice the height of the existing building and higher than anything else in the local area near the Church spire. I do not think that this is a suitable benchmark for a new development that will fit in keeping with its surroundings. I would have thought that 4 stories would be more appropriate. As a local resident I would like the existing views of the Church steeple from Station Road to be preserved.</p> <p>2/ The architect referred to creating a new public pedestrian connection between Station Road and Mornington Road. Doesn't this already exist?</p> <p>3/ When will the traffic impact assessment and the construction and logistics plan be completed/processed? And will residents have the opportunity to input into these during their preparation? I am very concerned about the impact on traffic in the area, of heavy goods vehicles while the construction is taking place through to residents of the new homes parking their cars in streets that are already over capacity.</p>	<p>In addition to the comments in my earlier submission, the Council should publish the following so that they can be taken into account by the Council's Planning Officers and the full Council:</p> <ol style="list-style-type: none"> 1. The Council's Feasibility study on the infrastructure needed for the additional residents intended to occupy the new flats in North Chingford. 2. The Council should consult the Greater London Archaeology Advisory Service on the new development of the North Chingford hub (and any other areas which fall within the definition before development). 3. The Council should review its target number of new homes to better reflect its current and projected demand. 4. To avoid discrimination, the Council should build into its plans a parking allowance for each property. 5. The Council should, as part of the Local Plan for each area of Waltham Forest publish the number of uncultivated homes, brownfield sites and spaces sought by developers. This should be reviewed annually. 6. The Plan should be adjusted to ensure the Community Hub is 'fit for purpose' i.e. provide similar facilities as available currently. 			<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough.</p> <p>There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards publicly, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/8. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
David Pilewood	S46 - Chingford Library and Assembly Hall			S46 - Chingford Library and Assembly Hall	No	No	No	<p>1/ Publish the traffic impact assessment and properly explain how the heavy goods vehicles in this residential and family area will be safely managed. Also explain how new residents cars will be prevented from parking in nearby streets.</p> <p>2/ Stop pretending that the development will add connections that already exist.</p> <p>3/ Publish the traffic impact assessment and properly explain how the heavy goods vehicles in this residential and family area will be safely managed. Also explain how new residents cars will be prevented from parking in nearby streets.</p> <p>4/ Recognising the climate emergency and planning zero car developments, how and just not just in any parking spaces but in regularity around an area job well done, being realistic, people will just park elsewhere, so you just increasing congestion so how are you going to mitigate that? Can there be some consideration of a controlled parking zone, at least for the Burton Road? I believe that options in the area may be shifting in favour of this. Could the Council also confirm that the new build housing would not qualify for a permit in any future zones?</p> <p>4/ Provide further details of community facilities available in the building. Can it include an NHS dentist as this is very much lacking in the area.</p> <p>5/ Provide details of management of the service charge and ground rent to ensure that any affordable housing remains affordable and is not simply sold off privately for a quick profit.</p> <p>2/ The architect referred to creating a new public pedestrian connection between Station Road and Mornington Road. Doesn't this already exist?</p> <p>3/ When will the traffic impact assessment and the construction and logistics plan be completed/processed? And will residents have the opportunity to input into these during their preparation? I am very concerned about the impact on traffic in the area, of heavy goods vehicles while the construction is taking place through to residents of the new homes parking their cars in streets that are already over capacity.</p>	<p>1/ Make the development smaller, maximum 4 stories, in keeping with the local area and preserving existing views of the Church.</p> <p>2/ Stop pretending that the development will add connections that already exist.</p>	No	<p>To ensure transparency and an concern by the lack of communication from the council, I wish to publish updates to plan or responses to concerns that have previously been raised by the community.</p>	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Mrs Margaret Hugg	S46 - Chingford Library and Assembly Hall			S46 - Chingford Library and Assembly Hall	Yes	Yes	No Response	<p>1/ I have been against this development since being put forward. I see that number of homes is reduced i.e. good, do not understand "duty to cooperate"? The Council or residents?</p>	<p>1/ I have been against this development since being put forward. I see that number of homes is reduced i.e. good, do not understand "duty to cooperate"? The Council or residents?</p>	No		<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> • Research/finding the choices made in the plan are based on by facts. • Evidence of participation of the local community and other's having a stake in the area, and the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> • Sound infrastructure delivery planning. • Having no regulatory or self-imposed planning barriers to delivery; • Delivery partners who are signed up to fit and • Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>• The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should include who is responsible for making sure that the policies and proposals happen and when they happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough', in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p> <p>The Duty to Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p>
Mal Trentham	S46 - Chingford Library and Assembly Hall			S46 - Chingford Library and Assembly Hall	No	No	No	<p>The plan is unsound and fails to comply with the duty to co-operate because the Council have decided NOT to co-operate or even listen to the residents residing in the area. We feel let down as submit petitions against this huge development, but they are ignored.</p>	<p>The council need to preserve the local character of the area. A building of 5/6 storey in height is amongst a conservation area. A inappropriate. The draft analysis study does not address the fact that Station Road slopes upwards from the library towards Barclays Bank on the corner of Wilton Street and downwards to the Green Field. The height differential means that the planned 5/6 storey building will totally overshadow the Green in fact. Presumably the council intend that the occupiers of the proposed (now) 30 flats will be encouraged to utilise the Green as their outside space and this in turn will lead to overuse, which I am sure that the Care of Green will not be happy with even with increased privately unknown income from SAMM's. I feel like these proposed 30 flats, with their potential of 30 cars and numerous children trying to find a place at a local school, and not forgetting all the extra places at doctor's surgeries and the like, are just being squeezed into an area that the council owns and wants to develop via their own inhouse contractors Sully Bricks.</p>	No	<p>I would like the opportunity to know what is going on and whether further input from residents will be listened to.</p>	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this time a submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough.</p> <p>There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. If yes, please explain why?	Council's response
				S46 - Chingford Library and Assembly Hall	No	No	No	<p>do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs.</p> <p>This programme of intensification prioritises housing above all - to the significant detriment of the environmental, local business, and the conservation area.</p> <p>It does not fulfil the Council's duty to be sustainable, in the following ways:</p> <p>1) It is not economically sustainable</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1.9) 164 states 12,640 new homes over 20 years and 1800 to propose 27,000 new homes by 2032 - a very significant excess of 42% over the required target.</p> <p>The plan, and specifically the library development, does not 'positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that respects the unique character of North Chingford in order to draw visitors and economic prosperity, rather than homogenising the area through lower tier shops.</p> <p>2) It is not socially sustainable</p> <p>We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the development would be in conflict with the area's environmental objectives.</p> <p>Proposed developments would be out of keeping with the area. The content to be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.</p>	Please see the suggestions above.		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocation responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings; as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p>	
Lloyd Parkinson				S46 - Chingford Library and Assembly Hall	No	No	No	<p>Proposed developments would be out of keeping with the area. The content to be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.</p>	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.		<p>Shortage of doctors, hospitals, dentists, schools, demand on the roads, the effects on the quality of life</p>	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthiness alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthiness alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
				S46 - Chingford Library and Assembly Hall	No	No	No	<p>Development Guidelines Key Considerations show, "Development proposals should make a positive contribution to the Chingford Green Conservation area and be sensitive to the surrounding heritage assets and protected trees".</p> <p>A brief produced by Waltham Forest Planning and Economic Development shows, The area around Chingford Green was designated a Conservation Area by Waltham Forest Council in June 1995. Conservation areas are areas chosen because of their special historic and architectural interest, and have been given special protection under planning laws. The Council will use its planning powers whenever necessary to control and avoid harmful changes and will take the guidelines contained in this brief into account when considering planning applications. SUCCESSFUL CONSERVATION HOWEVER DEPENDS IN PRACTICE JUST AS MUCH ON THE SUPPORT AND CO-OPERATION OF LOCAL PEOPLE WITHOUT THAT CO-OPERATION, THE SPECIAL CHARACTER AND ATTRACTIVENESS OF YOUR LOCAL AREA WILL DIMINISH BUT SURELY NOT. This proposed plan for Chingford Green Conservation area will not enhance the area and is out of character with the surrounding buildings. The proposed building of six storeys would block out light from houses and gardens. No privacy in their gardens. No adequate parking for cars.</p>			<p>The HBA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. Mrs. Val Lea				S46 - Chingford Library and Assembly Hall	No	No	<p>is the Plan "sound? There are 4 tests at para 35 of the NPPF:</p> <p>The Plan has not been "positively prepared". The character of a Conservation Area is created by the cumulative effect of its buildings, trees, public realm, trees and views, and consequently can be harmed by insensitive alterations to any of these elements. LDFP has failed to preserve or enhance the areas unique and individual qualities in the Plan. The Council should retain any development plans against its Chingford Green Conservation Area (CGCA) Appraisal and Management Plan which sets out in detail the areas special qualities. Conservation areas are classed as Designated Heritage Assets within the Governments National Planning Policy Framework 2020 (NPPF). The CGCA Appraisal gives much detail about the buildings within the locality particularly that none, except the spire of St. Peter and St. Pauls Church, is taller than three storeys. In fact, most of Chingford and Highams Park comprises two-storey buildings. Therefore, to replace the existing Assembly Hall and Library with a complex of Community Hub and 30 new homes, runs to five storeys is contrary to the areas uniqueness. The Community Hub should provide the facilities possible within the current building space. Limit the Council to raise the fees (a minimum of £1,100) to a level beyond most local groups resources, the Assembly Hall was well-used for antique and craft fairs, evening socials and theatre production. The Plan refers to "Order to make the space flexible. This is hardly conducive to large-scale use and audience participation. The Plan overall is totally unacceptable from a heritage point of view. The Councils Plan does not preserve those elements of the setting that make a positive contribution to the asset."</p> <p>The Conservation Area is a known site of 12th/13th century settlement and is entirely within an Archaeological Priority Area (APA), categorised as Tier 2. As such the Council should consult the Greater London Archaeology Advisory Service on https://www.gla.gov.uk/heritage/conservation/conservation_areas/conservation_areas.htm</p>	<p>The Council should respect the heritage nature of the CGCA in its Plan. Reduce the height of any development to no more than 3 storeys. Provide a feasibility study of the infrastructure needed for additional homes. Provide car parking spaces in each development of one car per home. Provide figures on the current number of empty Council homes. Consult the relevant official organisations listed above regarding the impact of new buildings in each area.</p>	No		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character-led approach is supported by evidence from the Characterisation and Stratification Study (2019). This study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green space and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The London Plan (2021) sets a 10-year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
Catherine Branch				S46 - Chingford Library and Assembly Hall	No	No	<p>The council should be trying to preserve the areas character not downgrading it.</p> <p>From your own documents</p> <p>LP 7.3 the character of the north is generally suburban. As such the area is lower in density compared to the Central and South areas of the borough.</p> <p>LP 7.3 it is a mixed area of relatively low-density residential housing, employment land, retail. The Epping Forest and the boroughs fringe of green belt are major green assets which give this part of the borough an exceptional character.</p> <p>Policy 11 in North Chingford II: Protects and enhances the Chingford Green Conservation Area in accordance with the requirements of Policy 14: Conservation Areas.</p> <p>Vision: North of the Borough. The North forms the gateway to Epping Forest and its richly diverse ecology and contrasting natural landscapes. Therefore, it is NOT sound. We live here because it is low rise and close to the forest and open land. How can building 30 flats on top of the library on that small footprint, provide decent sized quality housing? If the pandemic has taught us anything, it is we need outside spaces and there are none with those flats.</p> <p>The library sits in the centre of a conservation area overshadowing a 17th century grade 2 listed cottage. There is the village green and spired church alongside. Any building above the site that is three will make a mockery of that we need a new library, what we dont need is an ugly high rise on top ruining the way line, spoiling the character of the village and putting flats in a totally inappropriate place.</p> <p>There have been many objections to this development. A petition of over 6000 signatures was drawn up- we have had NO response from the council. Before the pandemic Waltham Forest council held a meeting in St Peter and Pauls Church, hundreds of locals went to object and question councillors. The council should be trying to preserve the areas character not downgrading it.</p>		No	We need to be heard by the council, not ignored.	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character-led approach is supported by evidence from the Characterisation and Stratification Study (2019). Mrs. Val Lea				S46 - Chingford Library and Assembly Hall	No	No	<p>No. The Local Plan for Chingford Green Conservation Area has not been "positively prepared" and is a breach of the LDFP Chingford Green Conservation Area (CGCA) Appraisal of November 2020. It has not been "robustly justified and evidence-led". The Local Plan for CGCA will not be effective in what it is set out to achieve. The Local Plan for CGCA is not consistent with regional and national planning policy. Detailed reasons for my challenge are set out in the following pages.</p>	<p>1. Replacement of the current Assembly Hall and library buildings to be no more than three storeys high.</p> <p>2. If new homes are to be built above the new Assembly Hall and library Community Hub parking should also be provided on site for one car per home. Failure to do this is discriminatory against older and disabled residents.</p> <p>3. The Assembly Hall aspect of the new hub should be of sufficient size to accommodate community events e.g. antique fairs, evening socials, drama with audience.</p> <p>4. None of the above should be at reasonable cost to make it a community asset.</p> <p>Details relating to this set out on the following page.</p>	No		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character-led approach is supported by evidence from the Characterisation and Stratification Study (2019). Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Mr S P Kuttler				S46 - Chingford Library and Assembly Hall	Yes	No	No	Given the listed historical buildings which surround the proposed site and the fact it is in a conservation area a building which proposes "around 30" new homes is inappropriate and not in keeping with the unique character of the area. Any new building threatens to dominate the landscape and overwhelm existing buildings of historical importance.	Development proposals should not overwhelm adjoining listed buildings of historical significance.			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and is close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. In Local Plan Part 1, Policy 7.2 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.
Alexandra MacFarlane				S46 - Chingford Library and Assembly Hall	No	No	No	Do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, meets the areas objectively assessed needs. This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3.9 344) states 12,640 new homes over 10 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not "positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through busy tower blocks. 2) It is not socially sustainable We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the proposed design is poor. It is not aesthetically pleasing and there is no provision for this extra strain on traffic, as well as parking, doctors, dentists, nurses and local schools.	See above comment.	No	I would like to keep up to date with the meetings and decisions if that is what this question means.	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and is close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. All new development will be subject to the full planning application process.
Lambros Poulas				S46 - Chingford Library and Assembly Hall	No	No	No	Too many properties in a short space. Traffic suffers already there and there is no provisions for this extra strain on traffic, as well as parking, doctors, dentists, nurses and local schools.	Too many properties in a short space. Traffic suffers already there and there is no provisions for this extra strain on traffic, as well as parking, doctors, dentists, nurses and local schools.	Yes		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
Gillian Moran				S46 - Chingford Library and Assembly Hall	No	No	No	Is the Local Plan sound? There are 4 tabs at para 35 of the NPPF: 1) Has the Plan been positively prepared? No as LBWF should be seeking to preserve the "local Character" of the area. Residents choose to move to Chingford & Highgate Park as they are the few suburbs of modest houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats to urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 10,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3.9 344) states 12,640 new homes over 10 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have risen by 1 million, so why is there pressure on local councils to build in every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is less suited to their needs.	North Chingford as the gateway to Epping Forest should not have high rise properties, especially adjacent to a conservation area. Also see previous comments.	No		The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. 	S46 - Chingford Library and Assembly Hall	No	No	No	No	No	No	This isn't Walthamstow. Chingford is a nice and lovely place with a village feeling. Having huge buildings would completely destroy the place.	Do not destroy Chingford Green! It is a conservation area.			<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
Paul Wellard	S46 - Chingford Library and Assembly Hall	No	No	No	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low-rise suburban/semi rural in terms of building and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for other people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.			<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
P.A.Neville	S46 - Chingford Library and Assembly Hall	No	No	No	No	No	No	The proposal is to build in a conservation area the 5 storey building which is not in keeping with the surrounding Church's houses and green spaces on front. Each flat should have provision for a parking space, otherwise it will impact on the surrounding roads. What about the other amenities needed in schools, medical services. It will impact on the new hospital at Whippes Cross which is not increasing its bed rate from existing number.	Ensure that the very strongly expressed wishes of the local residents be heard and incorporated into the design. Any new development in NB Chingford are no more than 3/4 storeys in height to as to not spoil the historic context and views to make a beautiful suburban setting.		We should have a say on how any plan affects its area	<p>Whippes Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2015, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whippes Cross Hospital has been in operation for well over 100 years and is such finds the ability to provide residents with the level of healthcare required through challenging its aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development plan for the planning for the hospital site due to its location is character led, which allows a new state of the art hospital to be developed alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value in any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>
	S46 - Chingford Library and Assembly Hall	No	No	No	No	No	No	Feel the language used in this consultation is not intended to be understood by the general public, therefore feel this is just a formality, which is appalling. My key concerns with all North Chingford plans are parking - which is already a problem in station road and nearby streets, four plans create a far busier area with more residents needing doctors, schools, transport, etc, also damaging the local environment. Where are these services coming from when we already have a crisis with employment?		Yes		<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email or post.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>

If yes, please explain why?	Council's response
Terry Milnes				S46 - Chingford Library and Assembly Hall	No	No	No	<p>We do not believe that the plan fulfils the legal duty to assess the development needs of their area, align growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6).</p> <p>This is because we don't believe that the plan meets the definition of 'Sound from the National Policy Planning Framework, paragraph 35.</p> <p>I do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the areas objectively assessed needs.</p> <p>This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area.</p> <p>It does not fulfil the Council's duty to be sustainable, in the following ways:</p> <p>1) It is not economically sustainable</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9, 164) states 12,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.</p> <p>The plan, and specifically the library development, does not 'positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new retail space, the development should stay no higher than it is now.</p> <p>The height of the development should stay no higher than it is now. The local area has a shortage of facilities (Doctor/Hospital/schools etc) now. The local authority is restricting parking spaces when we need more and there will probably be little parking onsite for those homes making any free parking now less available for local residents. The addition of measures of extra homes will have a severe detrimental effect locally.</p>	See suggestions above	No	<p>no one is listening to the residents of Chingford.!!</p> <p>In April 2020, The Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it's new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is inline with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>	
Andrew Fearon				S46 - Chingford Library and Assembly Hall	No	No	No	<p>The height of the development should stay no higher than it is now. The local area has a shortage of facilities (Doctor/Hospital/schools etc) now. The local authority is restricting parking spaces when we need more and there will probably be little parking onsite for those homes making any free parking now less available for local residents. The addition of measures of extra homes will have a severe detrimental effect locally.</p>		No		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>The Council is committed to playing its part in tackling the housing crisis. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Alison Goulter				S46 - Chingford Library and Assembly Hall	No Response	No	No Response	<p>The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Epping Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. The proposal for the Chingford Library and Assembly Hall site is part of a Conservation area, adjacent to a weatherboarded listed building and Epping Forest SAC. Any development over 3 storeys high would be totally inappropriate.</p> <p>LBWF is seeking to build more new homes (27,000 by 2035) than required by the London Plan (Fig 1.9g, 164). Housing targets should not be met by only providing minimum standards such that the development overcrowds existing residential areas to the detriment of existing residents or adversely affects the aesthetic and historic character of areas.</p> <p>The plan is not consistent with Regional and National planning policy since LBWF is intending to build many more homes than the London Plan requires - see paragraph above.</p> <p>The London Plan states that tall buildings should only be developed in locations that are identified as suitable, a conservation area is clearly not suitable for even a moderately tall building as it would totally dominate the landscape. The plan states that proposals should take account of and avoid harm to, the significance of London's heritage assets, this proposal does the opposite.</p>	The maximum height of any development on the site should be no more than 3 storeys this should be stated on the local plan rather than around 30 new homes'. The number of new homes should be reduced. Commercial and retail spaces are unnecessary since there are plenty of such along Station Road. This would maximise the amount of space available for library and assembly space and also provide more space for new homes.	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. 				S456 - Chingford Library and Assembly Hall	No	No	No	No alternative to the tower block proposal. Completely out of character with that part of Station Road. Loss of community facility. No increase in school places and health provision.				<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough, ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p>
				S456 - Chingford Library and Assembly Hall	No	No	No	These plans are to build more homes than required by the London Plan. The development is totally out of keeping with the existing character of the area and will be detrimental to existing residents who will be over shadowed. They will also lose daylight and sunlight. As this plan is for a block to be car free, there will be additional demands for street parking. These proposed developments cannot be delivered with policy compliant levels of affordable housing.	Chingford Green should not have a mid or high rise development. Any new development should provide parking spaces additional to what is already available. Chingford Green Assembly Hall / Library should not be allowed to have a cafe on site - this is detrimental to the many such businesses that already exist in the area.			<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. Amanda Reynolds				S456 - Chingford Library and Assembly Hall	No	No	No	Our council should be looking to preserve the character of the area. I chose to move and live in Chingford to live on the edge of the City and enjoy the area of forest and green belt land. We should not be changing the character of the area by proposing to build tall blocks of flats and urbanise an area that is gateway to our forest. The views of residents and local people are being ignored and this consultation process has been difficult to navigate to ensure it is inclusive to all members of the community, i.e. elderly people or those without IT skills. A proposal for a 5 storey building in a conservation area is not acceptable. Why is the council proposing 37,000 new homes by 2025 an excess of 42% over the required target of 22,646 new homes over 10 years? The majority of the new proposals are flats, surely families want and need houses with gardens, there is not a mix of housing to meet the needs or wants of the population. The aesthetic, historic context and value of the existing buildings should be taken in account. Proposals should take into account the significance of London's Heritage assets.				<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in London Plan.</p>
Steven Phillips				S456 - Chingford Library and Assembly Hall	No	No	No	I do not feel any more homes should be built in Highams Park and South and North Chingford as we do not have the infrastructure such as additional schools, nurseries, GP surgeries or hospitals to be able to cope with additional people living in the area. We as existing residents are already struggling to see a doctor or visit Whipp's Cross Hospital without considerable wait times now. Schools are over filled based on the current teacher pupil ratio. I have not even mentioned the additional traffic and parking problems extra homes will cause.	Provide more schools, GP surgeries, hospitals as a start before building more homes in this part of the borough.	No		<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to around 1,800 homes per year, but targets were de-aggregated across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,810 new homes per year, as well as the London Plan identified need for 40,000 homes per year across London.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Whipp's Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barn's Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2019, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whipp's Cross Hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging as aged buildings. The new hospital will be built to a design optimal to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site, due to its location in character land, which allows a new state-of-the-art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p>

Cherie Crossan-Smith				S46 - Chingford Library and Assembly Hall	No	No	No	<p>I do not believe that the Local plan, specifically referring to the development of the Chingford Library and Assembly Hall, does not meet the areas objectively assessed needs.</p> <p>This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area.</p> <p>The area does not have the resources to provide resources to additional people to the area.</p> <p>It does not fulfil the Council's duty to be sustainable, in the following way:</p> <p>1) It is not economically sustainable</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 p.546) states 12,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.</p> <p>The plan, and specifically the library development, does not "positively and proactively promote economic growth". Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as a damaging competition. Local cafes are recovering from the effects of COVID and building their business signs to more competition is required.</p> <p>Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through brown tower blocks.</p>		No		<p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Patricia Slade				S46 - Chingford Library and Assembly Hall	No	No	No	<p>This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area.</p> <p>It does not fulfil the Council's duty to be sustainable because it is not economically sustainable. It does not take into account local businesses who could be affected by a cafe in the library. It does not take into account parking for new dwellings causing congestion in nearby roads. It does not take into account local services like schools, doctors, dentists, etc. who are already overstretched. It is totally not in keeping with the local area and it does not take into account that the green and surrounding area is protected land. This development is neither acceptable or wanted in this form. Any development of a cafe in North Chingford, and specifically in the Conservation Area, would not meet the criteria of Policy D9 of the London Plan. The local plan is not consistent with regional and national planning policy.</p>	<p>Proposals should take account of, and avoid harm to, the significance of London heritage assets and their settings. Proposals resulting in harm will require clear and convincing justification demonstrating that alternatives have been explored and that there are clear public benefits that outweigh that harm. The buildings should positively contribute to the character of the area.</p>	No		<p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Kathryn Unwin				S46 - Chingford Library and Assembly Hall	No	No	No	<p>How big the small cafe needed as there are already more than 15 nearby. This is supposed to be a conservation area as there is an old building next to the hall. There will be no parking for new residents. Will prospective buyers be told they cannot have a car? That sure is the boundary shown is correct, is it on Epping Forest land?</p>	<p>Renovate existing hall, think of the environment for a change.</p>	No	No one takes any notice of events.	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold engagement events online.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality of congestion, parking problems and improve air quality.</p>
