David Matson				S46 - Chingford Library and Assembly Hall	No	Response	No	<p>The proposals are unsound on three grounds.</p> <p>(1) The housing targets in LPS remain unproven beyond assertion and emerge from the targets within the London Plan. As such they do not provide a sound basis for housing allocations on individual sites, such as S46. On the same grounds LPS fails the Duty to Cooperate with the Mayor's housing targets.</p> <p>(2) The admirable policy to enable a 15-minute walk to have been strengthened in LPS. S46 is a key site to make this happen in Station Road and North Chingford. However, S46 has not formed part of any master planning of the Station Road area that might enable a 15-minute cycle network, each site has remained one of many, in a scatter gun approach that evaluates each site as an individual opportunity site. The community has not been able to shape S46 within its context, to suggest uses as part of a wider whole. The proposal is therefore unsound as it does not address a major policy objective of LPS or present the sites potential in the round.</p> <p>(3) The proposals make no reference to height, although the Council has made use of its Planning Order that has been considered properly by the LPS. It is the key document, so that the public should be able to understand the implications of development here. The site allocation is therefore unsound because the public is not fully informed of the nature of the possible development.</p>	<p>(1) The housing targets in LPS should be revisited, justified or revised to the levels set out in the London Plan. Development expectations on individual sites should then be revised.</p> <p>(2) Station Road/North Chingford should be subject to a master planning exercise to create the basis for a local act 15 minute cycle a first step might be to list the potential community uses within S46.</p> <p>(3) Understand that the proposals for the height of S46 has been revised below 6 stories. This should be explicit in LPS to provide the public with fuller information.</p>	No	<p>I have already sent written comments on LPS, and have been invited to take part in the Examination this February.</p>	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectorate examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>

Christine Croxon				S456 - Chingford Library and Assembly Hall	No Response	No	No	Where are the details of height and visual impact on the site? It is inappropriate to put a concrete box here.	Maximum 4 storeys in 3 storeys for housing and not a square box to staggered architecture in a traditional style in keeping with period character		The community is extremely concerned about the environment and impact on wildlife in the area with the building process	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>
Richard Iles				S456 - Chingford Library and Assembly Hall	No Response	No	No	Unnecessary and bulky development close to a Conservation Area. It will also have an adverse effect on residential properties to the north of the current library building. I understand the Current Development document proposes to built far in excess of the required provision and is already out of date as the Government proposals are to lower the requirement for the London area.	I think the Library should be left as is. It is especially since the Local Plan now includes a new adjacent site further from the C.A. i.e. S455 where a low rise development could take place with less disruption.	Yes	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p>
S456 Chingford Library and Assembly Hall				S456 - Chingford Library and Assembly Hall	No Response	No	No	It is not in keeping with this area to build a high rise block in place of a single storey building. Whilst everyone accepts new homes are required across London, it is critical that this isn't done at the expense of current residents. Chingford Green is a lovely area of Chingford. Families congregate on the green during the summer alongside the very old and beautiful church surrounded largely by single and at most double storey buildings. A high rise block of flats would materially change the feel of Chingford and detract it for current residents. Even aside devaluing and degrading the experience of current residents, there should be no further large scale residential projects until the issue of schools, doctors and parking are addressed.	Single or double storey buildings in chingford only please.	No	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Allison				S456 - Chingford Library and Assembly Hall	No Response	No	No	The NPPF states that plans are to be positively prepared in order to comply LBWFF should be seeking to preserve the Local Character of North Chingford through 'conservation and enhancement of the natural, built and historic environment including landscapes and green infrastructure'. Chingford character is that of a suburb with low rise building and green open spaces, the green was to Epping Forest, with a village feel. The proposal for a 5 storey building which sits directly next to one of Chingford's oldest cottages within a conservation area has quite frankly ignored these aspects. There has been a petition of over 6,000 signatures objecting to such a proposal and a vast majority of the general public would feel there are other means to achieve a new civic space through different funding and retrofitting, instead of an excessive volume of small low quality units to supposedly pay for a new library. The council is aiming to build more than the London plan requires, as stated in chapter 4, page 593 Waltham Forest target is stated as 12,640 but LBWFF is aiming to achieve 27,000 new homes by 2035, an excess of just over 40%. If the pandemic has shown us anything it is that less people are wanting to live in London and prefer to be somewhere with more outdoor space but most proposals across the borough are to be flats. There appears to be no diversity in housing types, where are the bungalows, or family homes? The proposals assume that no one will use a car and will always be within a easy walk to essential amenities and medical care, even whoppers is a car ride away and with no easy direct route via public transport for someone who may need more support or who is unable to cycle for instance. The whole engagement process so far is not very accessible to the community especially those who may be older and may not be as tech savvy. Also it is very difficult for people who have not got an understanding or background in planning and infrastructure to articulate how to have their feelings and opinions listened to.			-	<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,840 homes per year, but targets were deaggregated across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality.</p>

If yes, please explain why?	Council's response
Chris Denton				S46 - Chingford Library and Assembly Hall	No	No	No	The plans shown here are not very specific making it difficult to respond but I will give my opinion as far as I can evaluate. This development proposed a huge change to the area which I consider to be not in the best interests of the area itself or it's residents. The proposal to demolish the Assembly Hall and Library for the main purpose of building 30 new homes on top would not be in keeping with the local landscape. These buildings proposed to be demolished stand opposite the village green. They stand between ancient houses and the church. North Chingford is a village, not a town or city and is the gateway to Epping Forest. I assume that to accommodate those 30 homes, there would be a high-rise (several stories) above the new Assembly Hall and Library. The area is full of interesting houses, most of them quite old. Any high-rise or new build here would be to the detriment and completely out of character for the area and possibly devalue property. Turning into Station Road from the church is also the area visitors use first. They don't want to see an ugly high rise or a densely packed area. They want to see open spaces, sky and the village green, on their way to the forest. People use the village green regularly when the weather permits and it's a pretty area. Overpopulation is also a concern. These plans do not show any proposals for parking facilities, not to mention further congestion on the roads. It's difficult for residents to park as it is, especially in Woodland Road and adjacent streets and for visitors it can be a nightmare. Where are the proposals for additional local services such as healthcare, including social services, and schooling.	This area should not be re-developed or built upon in any way. People admire it as it is and people like living here the way it is. The interior of the Assembly Hall should be updated and with affordable rental change making it more accessible for future events. Inside the library could be given a bit of a facelift too.			The site allocation requirement ensures the provision of the library in the new development. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Marcello Ruffini				S46 - Chingford Library and Assembly Hall	No	No	No	A civic precious & publicly owned asset is being stripped from the legacy of public ownership and is being put into private hands. It is wrong on all levels. The Rooftop is being elevated in a Conservation Area of historical importance. The Rooftop should not be elevated at all in this sensitive area.	Do not elevate the Rooftop. Do not sell property to private ownership. Work & engage with residents who, have made viable alternative proposals that are inclusive, make important social & community contribution to the use of the building	No	Transparency will be served	This response is noted. In Local Plan Part 1, Policy 22: Designated Heritage Assets: There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The study also recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Claire Stroud				S46 - Chingford Library and Assembly Hall	No	No	No	The development is too much of a mish mash of ideas, as set out at the last public meeting. The development is not sensitive and takes away the last venue large enough for public meetings or entertainment. North Chingford is crying out for cultural enrichment, we need somewhere suitable to hold plays, displays, art exhibitions, etc. Whilst a converted library would be great, it does not need a cafe. I couldn't believe my ears when I heard a councillor say that people shouldn't use the library without one. There are at least 100 small local businesses providing cafe services within a few hundred yards of the premises. Space is at a premium, it should not be wasted. Also feel that the mooted doctor's surgery is a red herring. A modern fit for purpose surgery would require patient parking and cannot be squeezed into such a small space.	The overall height of the building should not be above 4 storeys in order to fit with the local area and ensure not impairment to light for local properties and the village green. The flats should be of a large enough size to house families with children. Ideally the flats would be available for rent not just sale and some parking available to the residents.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The site allocation requirement ensures the provision of the library in the new development. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Gillian Poulter				S46 - Chingford Library and Assembly Hall	No	No	No	There are places identified for redevelopment that could help with the pressure on local schools and this site in particular would make a perfect spot for a new school, or a clinic big enough to serve the growing community.	Within the overbuilding plans of the whole borough, new schools and clinics should be incorporated.	No		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing(s)?	If yes, please explain why?	Council's response
Stephen Pick				S46 - Chingford Library and Assembly Hall	No	No	No	The terminology of your questions are so confusing so as to stop anyone trying to answer them or to put any points about this proposal. The proposal is unrealistic and not thought out. It is not taking into account the local area or how it is used. Any tall building there will be out of place with the surrounding buildings and architecture. It will alter and ruin the existing character of the area. The area already is over crowded with traffic and parking so to increase the pressure on that is unrealistic and will make an already busy area unmanageable. It will over stretch the existing infrastructure of doctors, schools, refuse collection, public transport and other local facilities. It will increase the air pollution in the area. The need for more housing in that particular area does not exist. With increased congestion it will make it even more difficult to access services that are needed.		No		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that at sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 7) means that through development by infrastructure as identified in the infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorist vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Stephen Pinner				S46 - Chingford Library and Assembly Hall	No	No	No	1. No car parking facilities. 2. Reduction in public services within proposals. 3. Local residents ignored. 4. Development would put too much pressure on local services, such as doctors, dentists schools etc.	None. The development is an unnecessary waste of tax payers cash.	No		<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Christopher Branch				S46 - Chingford Library and Assembly Hall	No	Response	No	1. Is it sound? No. The council should be trying to preserve the area character and ecology etc. From your own documents to LP 7.3 the character of the north is generally suburban. As such the area is lower in density compared to the Central and South areas of the borough 2. It is a mixed area of relatively low-density residential housing, employment land, retail, the Epping Forest and the borough fringe of Green Belt are major green assets which give this part of the borough an exceptional character. 3. Policy 11.1 North Chingford: It protects and enhances the Chingford Green Conservation Area in accordance with the requirements of Policy 74. Conservation Area; Vision: North of the borough. The North forms the gateway to Epping Forest and its richly diverse ecology and contrasting natural landscapes. Therefore, it is NOT sound. We live here because it is low rise and close to the forest and open land. How can building 80 flats on top of the library on that small footprint, provide decent quality housing? If the pandemic has taught us anything, it is we need outside spaces and there are none with these flats. The library as it is, is in the centre of a conservation area overlooking a 17th century grade 2 listed cottage. There is the village green and open church alongside. Any building above the site that is there will make a mockery of that - we may need a new library, what we don't need is an ugly high rise on top ruining the eye line, spoiling the character of the village and setting flat in a totally inappropriate place. There have been many objections to this development. A petition of over 6000 signatures was drawn up - we have had NO response from the council. Before the pandemic Waltham Forest council held a meeting in St Peter and Pauls church, hundreds of locals went to object and question councillors. https://www.waltham-forest.gov.uk/about-us/consultation-and-involvement		No	Without involving the local residents how can the council demonstrate that it takes their opinion seriously?	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). This study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green space and environmental assets. The highest level of protection is accorded to Remark sites, Special Protection Areas (SPAs), Special Areas for Conservation (SACs) and Sites of Special Scientific Interest (SSSIs) in the borough. There is a statutory requirement to consult Natural England's advice in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSIs, Sites of Importance to Nature Conservation (SINCs), Special Protection Areas (SPAs) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to around 1,800 homes per year, but targets were deconcentrated across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
Stuart Kastenbaum				S46 - Chingford Library and Assembly Hall	No	Response	No	Not in keeping with local character. Changes a predominantly low rise area and impacts views and skyline. Parking needs ignored and effectively includes those who need their own transport for work or due to age or social circumstances. Not positively planned. No Effective. No additional infrastructure planned to cope with the totality of developments S465 - 58. Not consistent with regional/national policy. Borough's plans greatly exceed targets. This development adversely affects local views and harm the setting of surrounding listed buildings. Any proposals of more than 3 stories would not meet policy D9 of the London Plan.	Keep developments of the same height and as close to character as possible with surroundings. Make facilities on site suitable for a diverse demographic and their needs rather than a wishful desire of how people should be made to live.	No	Not necessarily me but certainly representatives of the affected local community who were not given any representation in these planning decisions	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 72: Designated Heritage Assets, There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspector needs to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: • Research/ fact finding, the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others, having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: • Sound infrastructure delivery planning. • Being in regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. • The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant</p>

John Pennicard				S456 - Chingford Library and Assembly Hall	No	No	No	There is not enough infrastructure in the local area to support all the extra people in these flats. Not enough parking, school places, doctors surgery places plus it will be a blot on the landscape.				The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S456 - Chingford Library and Assembly Hall	No	No	No			No		This response is noted.
Kevin Greenhill				S456 - Chingford Library and Assembly Hall	No	No	No					This response is noted.
Teresa Antoniou				S456 - Chingford Library and Assembly Hall	No	No	No	There is no thought to the people who already live there. There is no provision for more e.g. appointments, parking, traffic, school places. Chingford is already stretched and you are spoiling South Chingford. I don't agree with it at all.	There is no thought to the people who already live there. There is no provision for more e.g. appointments, parking, traffic, school places. Chingford is already stretched and you are spoiling South Chingford. I don't agree with it at all.			The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S456 - Chingford Library and Assembly Hall	No	No	No	Fails to comply with the duty to cooperate. Fails in it's duty to notify the local population. Fails to meet the changed London Plan with reduced housing numbers. Fails to meet this point: "Encouraging strong, resilient, accessible and inclusive hubs with a diverse range of uses that meet the needs of Londoners, including main town centre uses, nighttime economic, civic, community, social and residential uses" by demolishing something that fits. Fails to keep the character of the area by putting a high rise block next to listed cottages of historic interest in a conservation area.	Leaflet local residents with the plans, give them the opportunity to respond in writing and not just drive which is not inclusive. Hold a public meeting and listen to residents views and comply with their wishes. Reevaluate the current Assembly Hall site as it has been thoroughly used as a food centre during the pandemic and ensure that the large space with its potential for diverse use will not be lost to the local community. Do not build a high rise block in a conservation area with so many homes and no thought to infrastructure of already over-stretched schools, doctors, and insufficient parking. No cafe is needed.	No		The site allocation requirement ensures the reposition of the library in the new development. In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Provisionally Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: • Research/ fact finding: the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: • Sound infrastructure delivery planning; • Being on regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Consensus with the strategies of neighbouring authorities, including neighbouring marine planning authorities. • The Local Plan should be flexible and able to be monitored. The Local Plan should include who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough", in "general conformity" with the London Plan. and must also seek to have Local Councils to several times each year in the examination through the written representations process.
Alan Crown				S456 - Chingford Library and Assembly Hall	No	No	No	Breaking of covenants and the local preservation area guidelines	Leave as it is and make the Assembly Hall a community asset accessible to local community.	No		The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.

The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Garathine Cleveland				S46 - Chingford Library and Assembly Hall	No	No	No	There has been no negotiation with surrounding neighbours who will be impacted most by this enormous building nor by the increase in parking requirements in the area	Limited height of building to what's there now, which already towers above adjoining buildings, retain parking there is there now.		The plans impact the people living next to the proposed site most yet no one has contacted us directly about the impact to our area this building will have. I feel this is rude at the least and totally dismissive of our views and opinions and shows a lack of willingness to compromise. This is a conservation area and we have had to jump through many hoops to maintain our building in accordance with the rules. However, this building will be double glazed? I know that the conservation rules are being torn up by your mates so why should we abide by them anymore? Why do we have to get planning permission for double glazing when 3 doors away your proposing to put it in? Why should we have to get planning permission for a dormer window when your building 6 storeys 3 doors away, and why can't we have solar panels, on the front roof of our houses? etc.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Jack Baldan				S46 - Chingford Library and Assembly Hall	Yes	Yes	Yes			Yes		This response is noted.
Mike Georgio				S46 - Chingford Library and Assembly Hall	No	No	No	The library is in a conservation area, proposed plans do not blend in any ways with the character of the area. No provision for parking makes it not suitable for people with disabilities and will create additional clutter on the parking in the surrounding area eventually leading to additional taxation to the local people in the form of paid residential parking provision. To name the few of the reasons.	leave the library alone, there are findings available plus extra funding can be found via National Lottery, heritage trusts etc. There is no need for additional housing to be built on this site. Let the people enjoy their way of life.	No	People who live in the should have a say on the area future	The site allocation requirement ensures the provision of the library in the new development. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Paraskevas Markos				SAG - Chingford Library and Assembly Hall	No	No	No			No		This response is noted.
Jennifer Johns				SAG - Chingford Library and Assembly Hall	No	No	No	This is in a conservation area where, for example, the other properties cannot even put in double glazing windows, and these plans include a five or six store block of flats which will over look it and absolutely destroy the whole ambience of the area. The local people have overwhelmingly rejected the plans.	Do not build the block of flats. Modify the assembly hall and reduce the fees for hiring it so that local people and clubs etc can afford to use it as they did extensively in the past.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Martin				SAG - Chingford Library and Assembly Hall	No	No	No	Out of keeping with area, lack of parking, disadvantage elderly residents, existing residents overwhelmed, loss of privacy/daylight/sunlight. Shortage of local amenities schools, doctors/dentists.	Build to existing local building height, provide parking, schools, at that needed by new residents	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Terry Miles				SAG - Chingford Library and Assembly Hall	No	No	No	We do not believe that the plan fulfils the legal duty to meet the development needs of their area, align growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6).	don't do it	No	no one is listening to the residents of Chingford - !!	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. In April 2019, The Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it's new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is inline with the GVA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Gabrielle Marshall				SAG - Chingford Library and Assembly Hall	No	No	No			No		This response is noted.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Cathy Houchin				S46 - Chingford Library and Assembly Hall	No	No	No	The plan is totally out of character to the local area	Lower floors.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S46 - Chingford Library and Assembly Hall	No	No	No	We do not believe that the plan fulfils the legal duty to co-operate the development needs of their area, align growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6). This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 164) states 12,640 new homes over 10 years and LDFP is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not "positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through busy tower blocks. 2) It is not socially sustainable We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan are out of character to the local area.	I do not believe that the Local Plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs. This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 164) states 12,640 new homes over 10 years and LDFP is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through busy tower blocks. 2) It is not socially sustainable We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan are out of character to the local area.			The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA), will not normally be granted planning permission without appropriate mitigation measures in place prior to development. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. A character-led approach is supported by evidence from the Characterisation and Identification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
John Cappalange				S46 - Chingford Library and Assembly Hall	No	No	No	I do not believe that the Local Plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs. This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 164) states 12,640 new homes over 10 years and LDFP is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not "positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through busy tower blocks. 2) It is not socially sustainable We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan are out of character to the local area.	Please see the suggestions above.			The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA), will not normally be granted planning permission without appropriate mitigation measures in place prior to development. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. A character-led approach is supported by evidence from the Characterisation and Identification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
				S46 - Chingford Library and Assembly Hall	No	Response	No	Proposal out of character with surrounding residential properties. Will detract from the character of the Chingford Green Conservation area. Detrimental to adjacent neighbours by blocking out light and overlooking their gardens. Parking problems.		No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality of education of operation, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S456 - Chingford Library and Assembly Hall	No	No	No	Ancient Lights, planned development will deprive this property and others of natural sunlight, also possibly the high rise will cut out line of sight to Watton Reservoir from Crystal Palace sewers and drainage system already struggles to deal with rain conditions in this area, schools are over subscribed, health provision, lack of car parking provision.	To be kept at present height and in keeping with the local area.			The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Peter Leggett				S456 - Chingford Library and Assembly Hall	No	No	No	It will change the shape and feel of the area significantly and not in keeping with the locale	Retain as is			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).
David Biscoe				S456 - Chingford Library and Assembly Hall	No	No	No	The site overlooks Chingford Green, is close to the nationally listed, and much photographed, Carbis Cottage, and is totally unsuitable for development that is significantly higher than the present one.	The revised Site requirements for development proposals should not seek to optimise site capacity, should not include a specified target for new homes, should not set a minimum non-residential floorpace, and merely state that any new development must at least equal present provision for library services, and must be in conformity with LP1 Policy 24 (Conservation Areas).	No	The key word in the question is "necessary". I would willingly participate in an examination hearing but do not at present see why this should be necessary for me, the Council or the wider world.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Russell Willard				S456 - Chingford Library and Assembly Hall	No Response	No	No		Development should not be higher than the current building. Design should fit in with the surrounding buildings.	No		Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S456 - Chingford Library and Assembly Hall	No	No	No			No		This response is noted.
Joy Heatherley				S456 - Chingford Library and Assembly Hall	No	No	No	The current plans do not appear to take into account the concerns of major neighbouring landowners (City of London Corporation) or the difficulty that Epping Forest District Council has had in obtaining any planning permission since 2018 for developments due to negative impact on the Epping Forest Special Area of Conservation. The neighbouring borough of Enfield is building vast numbers of new flats/homes close to the boundary of SWP, a very short distance from Chingford and Highams Park. Any development of over 3 stories in North Chingford, and specifically in the Conservation Area, would not meet the criteria of Policy D9 of the London Plan. The local plan is not consistent with regional and national planning policy, which states that: A) Tall buildings should only be developed in locations that are identified as suitable in Development Plans. B) Development proposals should address the following impacts: i) visual impacts as the views of buildings from different distances. EBlong-range views " these require attention to be paid to the design of the top of the building. It should make a positive contribution to the existing and emerging skyline and not adversely affect local or strategic views. EBmid-range views from the surrounding neighbourhood " particular attention should be paid to the form and proportions of the building. It should make a positive contribution to the local townscape in terms of legibility, proportions and materiality. EB immediate views from the surrounding streets " attention should be paid to the base of the building. It should have a direct relationship with the street, maintaining the pedestrian scale, character and vitality of the street. Where the edge of the site are adjacent to buildings of significantly lower	Please see the suggestions outlined above.	No		The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAZ). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPAs), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Stephen Hudson				S46 - Chingford Library and Assembly Hall	No	No	No	The proposed structure is out of keeping with Chingford green. It should be limited to 2 storeys. There are no parking facilities.	Maximum 2 storeys. Underground car parking.	Yes	To make sure the plan meets the wishes of local residents.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Bill Rodney				S46 - Chingford Library and Assembly Hall	No	No	No	It is clear development will increase pressure on car parking spaces causing pressure on surrounding residential areas. Temporary loss of amenities while redevelopment undertaken. You should not be encouraging new development because of embedded carbon contrary to net carbon zero targets.	Do not demolish, retain existing structures. Protect the continuing provision of community facilities. Temporary relocation of library and meeting if necessary because of disturbance or noise at developer's expense. Such temporary provision to be agreed with community groups.	Yes	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. As per the local plan policies, to adequately evaluate the impact of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
Rashid Ghorah				S46 - Chingford Library and Assembly Hall	No	No	No	I do not believe that the local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area's objectively assessed needs. This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 346) states 12,640 new homes over 10 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not 'positively and proactively promote economic growth'. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through boxy tower blocks. 2) It is not socially sustainable We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the local plan would materially change the character of the area, unbanking the gateway to the forest. It does not fulfil a social objective to support strong, vibrant and healthy communities. 3) It is not environmentally sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 346) states 12,640 new homes over 10 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not 'positively and proactively promote economic growth'. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through boxy tower blocks. 4) It is not socially sustainable	Please see above suggestions.	No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. John Auls				S46 - Chingford Library and Assembly Hall	No	No	No	The height of the proposed building is not in keeping with the surrounding	Reduce the height of the buildings	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S46 - Chingford Library and Assembly Hall	No	No	No	We do not believe that the plan fulfils the legal duty to meet the development needs of their area, align growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6).				The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,464 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were rebalanced across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA), will not normally be granted planning permission without appropriate mitigation measures in place prior to development. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to other substantial harm or total loss of a designated heritage asset in the borough. A characterised approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocate a sensitive approach.
Tim Hancock				S46 - Chingford Library and Assembly Hall	No Response	No Response	No Response	Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, denigrations to the surrounding environment, negatively affecting the current residents) This inconsiderate and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions catering on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is populated by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas. Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country. The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence. The current proposed developments are reminiscent of the failures that are well known to the local community, and the council is pushing ahead with it despite their objections.	Project based on continued denigration to local community and strain on local services, as pointed out above.	Yes	This development is another step on the way to creating a dead zone and destruction of a healthy historical community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by impacting anyone at breakneck speed, with a consent for the consideration before the current people in the vicinity, while it also an assault on their existing culture and community values for the profit of a few at a massive and long run cost to the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, I STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response
Raymond Moffat				S46 - Chingford Library and Assembly Hall	No Response	No Response	No Response	The local residents don't want this development but the council is pushing ahead with it despite their objections.	Comply with local residents views on the size and character of the proposed development	Yes	There is no point putting the proposal for public consultation if you don't then listen and act on their views, participation is part of that process	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Brian Dupon				S46 - Chingford Library and Assembly Hall	No Response	No Response	Yes			Yes		This response is noted.

Anthony G Thomp Up				S46 - Chingford Library and Assembly Hall	No	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must: (A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 25, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 38(1). 11. (1) A local planning authority must: (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (A) such of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan,	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these plants will be removed I do have my doubts or will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the LEZ zone and downwards of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LEZ charge. But the rest of the area will also be subject to these increases and the proposed quiet the natural air flow possibly result in pockets with even higher concentrations. Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate when the 1960s tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In this it was realised in the 1930s that people needed space and New Towns were built, built on green fields and green spaces. The in the 1960s it	No	Because there are too many unwise/unwise	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local Plan directs planned growth to previously developed sites that are currently under-used and land to generate high numbers of private car/protected vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connectors must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Marlyn Treadham				S46 - Chingford Library and Assembly Hall	No	No	No	Does not comply with the duty to cooperate. If it did, then residents' view would be considered with. We do not want this development in our Conservation Area.	Modify the Local Plan to ensure that the existing library and Assembly Hall remain a built. Reduce the hire charges for the Assembly Hall and you may find that the income received will offset the running costs. Why do you want to add a Cafe to the Library Space? There are already 15 cafes within a half a mile of this location. Also, the library should be a quiet place and the last thing needed is another gathering point for mothers and their screaming kids!	Yes	Looking forward to the Zoom meetings on the 23/11 and 23/12 to see how the Council continues to skirt around all the questions!	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Helen Chivers				S46 - Chingford Library and Assembly Hall	No Response	No	No		The new development should be no higher than 3 storeys. Retail and commercial space is not required as there are already enough shops/cafes in North Chingford and we already have many which have shut down. There is inadequate parking for new flats on this site. The new building should be in a traditional style in keeping with surrounding houses and to enhance the heritage site.	Yes		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required in some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Yvonne Sanders				S46 - Chingford Library and Assembly Hall	No Response	No	No	Is the Plan "sound"? There are 4 tests at para 35 of the NPPF: Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. No as SWMP should be seeking to preserve the "local character" of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1.7g 364) states 12,640 new homes over 10 years and SWMP is proposing 27,000 new homes by 2031 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build in every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing new and old. We remain of the position that this site allocation compromises the function of the Assembly Hall as an important performance and rehearsal venue for local groups. Whilst floor space as set out within the site requirements is one indicative measure of effective re-provision, it is also vital that sufficient volume is available as well as supporting facilities and infrastructure such as sound and lighting and changing/rehearsal rooms. As such the narrow focus of the brief could negatively impact on provision and cause harm to the social and cultural well-being of the local community. Use of function would contribute loss of provision and would therefore be contrary to Local Plan, London Plan and NPPF policy. As set out at the previous stage of consultation we do not necessarily object to this site being redeveloped or intensified, although noise generating and residential uses are not necessarily compatible unless carefully designed, but do object to the insufficient focus on adequate re-provision. We note the Council officer's response to our previous comment that specific matters can be addressed at application stage, but we consider the response fails to appreciate the importance of usability of space and that the narrow focus on floor space would become an adopted policy position should this plan pass unamended.	Modifications: Ensure that the very strongly expressed wishes of local residents are heard and incorporated into designs. All new developments in North Chingford are no more than 3 storeys in height so that they do not spoil the historic context and beautiful views or make a delightful suburban setting into an inappropriate urban scene as Policy D9 of the London Plan.	No	I wish to have the opportunity to explain why the Council's proposed developments are not suitable.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of houses to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Witham Forest Waste Action Plan for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Tom Clarke Mgrt				S46 - Chingford Library and Assembly Hall	Yes	No	Yes		If this site allocation is to be retained we recommend reconsideration of the brief to ensure the function of the Assembly Hall is maintained, not just floor space, to ensure adequate retention or re-provision and to ensure the hall remains fit for purpose meeting the needs of its users.	Yes	The threat to this facility of openness to us gives other losses across the wider area extending beyond the borough.	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision. This response is noted.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response	
Uma Wobay				S46 - Chingford Library and Assembly Hall	No	No	No	LBW should be seeking to preserve the 'Local Character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses in the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London is estimated to have fallen by 1 million, so why are there pressures on local councils to build even more possible space? It is not justified. Developers should be required to build on land/sites that they have received permission to develop, within a reasonable period and NOT land bank it, rather than redevelop more new sites. It is clear that any tall (more than 3 storey development) at any of the locations in North Chingford identified in the LP2, would NOT meet the criteria of Policy P19 of the London Plan. There are also issues relating to lack of parking and impact on the numbers of residents requiring school places, GP's and the transport links are not great, so traffic congestion in the area will increase.	As at summer 2020, the Council had over 1,500 empty properties. More should be done to ensure that existing empty homes are brought back into beneficial occupation promptly. In addition, occupiers should be required to build on land/sites that they have received permission to develop, within a reasonable period and NOT land bank it, rather than redevelop more new sites.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.	
				S46 - Chingford Library and Assembly Hall	No Response	No	No Response	I am informed that you are planning to build 1,815 new flats in Chingford. This will bring intolerable pressure on all our local essential services including doctors, hospitals and schools. Why are you more interested in bringing in thousands more residents than the welfare of your residents who have been here many years? I would welcome an answer to this question. Michael Learner (resident since 1971).	Stop building any new flats.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 15,640 new homes (1,564 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 3,800 homes per year, but targets were de-rated across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.	
				S46 - Chingford Library and Assembly Hall	No	No	No	It does not fulfil the legal duty to assess the development needs of the area, which growth and infrastructure improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects/National Planning Policy Framework, para 6).	do not believe that the local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs. This programme of intensification prioritises housing above all - to the significant detriment of the environment, local businesses, and the conservation area. It does not fulfil the Council's duty to be sustainable. In the following ways: 1) It is not economically sustainable. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.1 p.164) states 12,640 new homes over 10 years and LBW is proposing 17,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through busy tower blocks. 2) It is not socially sustainable. We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan would materially change the character of the area, undermining the gateway to the Forest. It does not fulfil a social objective to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations, and by fostering well-designed, beautiful and safe places, with accessible services and open spaces that reflect current and future needs and support communities' health, social and cultural well-being. Land administration should take into account the aesthetic, the historic context and the value of existing buildings.		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. In Local Plan Part 1, Policy P2 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any evidence from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Isanna Monzaff				S46 - Chingford Library and Assembly Hall	No	No	No	I believe that the local plan, specifically referring to the development of the North Chingford library and Assembly Hall, does not meet the area objectively assessed needs. This programme of intensification prioritises housing above all - to the significant detriment of the environment, local businesses, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.1 p.164) states 12,640 new homes over 10 years and LBW is proposing 17,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not "positively and proactively promote economic growth. There are enough cafes in Station Road, we don't need any more. This is the opinion of many local shop owners. Whilst we need new housing, we need development that reinforces the unique character of North Chingford. Its unique character is why we live there and we want to encourage more people to visit. To build on the conservation area will seriously damage its unique character and have a detrimental effect on our enjoyment of our local area. 2) It is not socially sustainable I don't believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. The	Please see my suggestions above.	No		The Council is committed to playing its part in tackling the housing crisis. Vanda Collins				S45 - Chingford Library and Assembly Hall	No	No	No	There is no infrastructure in place e.g doctors schools. Parking is already very limited. Whipp's Cross hospital can cope with the amount of patients it has.		No		<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>Whipp's Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2019, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whipp's Cross Hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the grounds for the hospital site due to its location is character-led, which allows a new state of the art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p>

				S456 - Chingford Library and Assembly Hall	No	No	No	Your council already spent near enough a million on redecorating this library when you 'upgraded' it and the hall next door, what happened is that you made it much more expensive to the hall, so the groups like local film makers no longer went there, you also made the library worse by getting rid of all the nice wooden bookcases and not making the children's area big enough, now you propose to change it all again, which to us this won't just be another big waste of money, and also now you want to put flats on top of the library, a lot of children go to the library, it should be a place of peace and calm, not worrying about who's living above the library, and how on earth is it going to make the area nice for residents who live in this area now? it cannot and you are showing disregard for people who live around the library now, it would be nice if you could expand the library and make it a real place of learning and restore old wooden fittings, make the hall cheaper to use and encourage local groups to use it and put on talks and theatre productions there for children, but we won't turn it into a block of flats effectively.	make the library a central place for peace and learning, it doesn't need noisy flats above it, the flats above it take much away from the library, it is the original building works there of more and more flats takes away from the lovely area of Chingford.			This is not. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).
Christine Shephard				S456 - Chingford Library and Assembly Hall	No	No	No	LBWF should be seeking to preserve the local character of the area. This would be significantly changed with the building of tall blocks of flats. The proposed plan for the stores in a conservation area next to a village green, close to existing listed buildings seriously compromises the existing village feel of the area.	The outstanding need is for houses with gardens rather than flats with no We need homes with outside space or car parking spaces. Building flatwings with no parking means trouble for people or those needing personal transport to work will not be able to live in these units. This will exclude many vital to the mix needed for a varied, integrated population.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Pauline Whitbread				S456 - Chingford Library and Assembly Hall	Yes	No	No	1. Has the plan been positively prepared? LBWF's plan for the changes to the Assembly Hall and Library has not been positively prepared. LBWF has not provided a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities. This means that current needs from neighbouring areas is accommodated where it is practicable to do so and is consistent with achieving sustainable development. LBWF should be seeking to PRESERVE the LOCAL CHARACTER of the area. Residents close to music to Chingford and Highams Park as they are both low rise suburbs. If LBWF does not agree with this statement then why did you knock down the Chingford Hall Estate as well as the Camelford Estate and replace the atrocities with housing? They both became ghettos, so why are you considering creating ghettos again? North Chingford and Highams Park are the gateway to Epping Forest. It is totally inappropriate to change the character of the area from low rise suburban housing to tall high rise flats that will be totally unattractive for the windows to the forest. Queen Victoria gifted Epping Forest to the people and the residents of Chingford have a duty of care in all aspects of ensuring the forest is well cared for as well as the windows/gateway to the forest is also appropriate. Waltham Forest has the oldest building in the borough situated next to the Assembly Hall, to demolish it with a 6 to 8 storey building would be totally inappropriate and ruin the amazing feat of a 17th Century building with such history surviving. To construct a high rise building on The Green would destroy the ethos of the Conservation area. To walk from The Bull and Crown through the churchyard of St Peter and St Paul's historic church, the hollowness and the feeling of completeness due to the trees, the green, the low rise buildings would totally destroy the makeup of the area to add a high rise building would be frankly offensive. Why are the local planning officers insisting that the shops comply with changes to the front of the building regarding historic etc when you are proposing a high rise building in the middle of a conservation area?	LBWF have deliberately allowed the Assembly Hall to decay. Lack of use happened due to enormous costs. Local schools used to hold Music Festivals there but due to the ridiculous rise in hiring it, even to local schools, became untenable. We had to move our Music Festival to Swanley Hall in Woodford! LBWF have intended to allow the Assembly Hall to become irreparable, they have also stripped it of its heritage. The brickwork on the outside should be treasured and the Assembly Hall should be restored back to its former glory. The small hall at the Assembly Hall was always used as a boy's club. Why was this stripped? Why does it need a cafe? How many cafes are there already in Station Road? When will the link from Chingford Station to Stratford be reinstated? Why is North Chingford always ignored? The roads are only repaired/recreated as a last resort? The constant traffic queues along Station Road and King Head Hill and King Road? What is being done to reduce them? And you want to add more buildings which will add to all of these problems. Have you considered changing the junction at Station Road and The Green? Since you removed the filter triangle onto Station Road you have just exacerbated the problem. The queues are now ridiculous. Have you looked at the paved roundabout in Effield/Crocker Road? Where are you going to make the junction at Larkhall Road safer? Another paved roundabout would make it safer for pedestrians and drivers. Waltham Forest should treasure North Chingford instead of imposing high rise horror.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Mark Elliott				S46 - Chingford Library and Assembly Hall	Yes	Yes	Yes	think the plan, if it is sensitively done, architecturally, visually, supporting services and parking allocations	Correctly balanced materials, facades and tiered housing allocation in the design (stepped low at front to higher to rear no higher than current max building height)			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Maureen White				S46 - Chingford Library and Assembly Hall	No	No	No	building too high Will be an eyesore Where will people park who live there? Where will the waste and rubbish from these flats be collected from?	Don't build till No flats Do not build up the bulk of library and commercial and assembly hall ok without the flats above.	No	The scheme is not wanted in the area	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. If yes, please explain why?	Council's response
Rebecca Boyen				S46 - Chingford Library and Assembly Hall	No	No	No	There is not enough parking - it means that the green will be used by the inhabitants as a garden instead of as a free space for all residents. It is not only keeping with the rest of Chingford. There are not enough local school spaces for the number of new inhabitants.	It should be only 2 stories high. There needs to be more green space incorporated and more parking spaces.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new worthy alleviation of congestion, parking problems and improve air quality.
Fiona Cousins				S46 - Chingford Library and Assembly Hall	No	No	No	Have you even considered car parking in the area. Just not putting in car parks doesn't stop people bringing them. Top tail.	-	No	I don't really know what you mean? This consultation is too complicated, who is it aimed at? If residents, you should try again.	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new worthy alleviation of congestion, parking problems and improve air quality. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Tom Wise				S46 - Chingford Library and Assembly Hall	No	No	No	There are dozens of submissions that outline the facts of why the development is not sound or in keeping with the area. I do not intend to repeat this all again. However it is obvious that WFC do not respect the desires of local people or understand the unique qualities of the area which make people not only live here but seek to protect it from unsuitable development. The lack of meaningful local consultation is lamentable. Those consultations that did take place indicated two things: firstly the WFC personnel who attended have no knowledge of Chingford's history, traditions and the desires of the residents and perhaps more worryingly no desire to change this, secondly that WFC have no interest in the views of the residents as they are determined to increase density and diversity so as to make Chingford indistinguishable from Walthamstow. Any development above 4 stories in Chingford would not be in keeping with the local village character and not in keeping with the character of the green.	Renovate not destroy.	Yes	Because WFC consistently ignore local resident views in Chingford. They seem to want to generate us for electing the wrong MPs	This response is noted. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Marion Board				S46 - Chingford Library and Assembly Hall	No Response	No	No	I do not know if the plan is legally compliant. I do know that the lack of parking provision will cause a major problem in the local area. I also know that there is no capacity in local doctors surgeries or any other basic infrastructure to support more homes in this area. There is no requirement for further retail provision or front facing shopping units either. Look at the number of charity shops. Such a development will ruin the urban grain of the area by blocking light and changing the nature of this area.		Yes		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new worthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Ian Ferguson				S46 - Chingford Library and Assembly Hall	No	No	No	This system is not right for elderly. This scheme does not respect conservation area character.	Deliver letter that elderly local people can write on and send back their opinion. Demonstrate how the proposal respects the conservation area.	No		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. During the consultation, residents have also had the option to send their consultation responses to us either by post, or email and copies of the Local Plan and supporting documents have been available in the Town Hall Reception, and at all branch Libraries. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Rosalee Zalks				S46 - Chingford Library and Assembly Hall	No	No	No	The central government guidance to amend plans to focus more on the north of the UK and not to build on floodplains does not seem to have been taken into account since the original documents were drawn up. Further local consultation needs to be undertaken before any money is wasted on an unwanted project.	Amended documents need to be drafted and the whole process needs to be started from the beginning taking account of the changes. For this site, despite a large petition against the project and the reduction in the number of dwellings since the original quote, it still remains an unnecessary expense for the taxpayers of the borough. No consideration has been given to the fact that the foundations of the building would need to be rebuilt and access for building works could not be from the residential area immediately behind as that would deny local residents access to their properties and the road way would be unlikely to support the weight of any construction vehicles. The drainage is also in need of repair as the basement area has flooded in the past. A better solution has been suggested to replace this plan by using the Richmond Road car park instead. This would provide larger one homes, easy access and the additional infrastructure of a doctor's surgery without reducing the size of the Assembly hall and library which only need refurbishment, for which I understand funding has already been allocated.	Yes	So that the "local" councilors realise the opposition to this plan is not going to change.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
D E Foxy				S46 - Chingford Library and Assembly Hall	No	No	No	The proposals will have a huge detrimental impact on the conservation area and the Green if implemented. There are also questions regarding the foundations needed for the building and the effect on surrounding structures to build them.	Rebuild the existing structure and omit the extra housing accommodation.			This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Pam And Cliff Moor				S46 - Chingford Library and Assembly Hall	No	No	No	Station road is already too busy and this would spoil what is a very special building and green space				As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Karen Jones				S46 - Chingford Library and Assembly Hall	No	No	No	You are building these without the necessary infrastructure. Where will they park, plumbers, electricians and/or working nights any rooms with kids all need cars. The impact on the surrounding area will be horrendous	Build housing with parking	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Marilyn Gould				S46 - Chingford Library and Assembly Hall	No	No	No	Isn't this a conservation area? Why are you so hell bent on building extra housing on this site ruining the character of North Chingford.		No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Marilyn Treadham				S46 - Chingford Library and Assembly Hall	No	No	No	The Plan is NOT sound as too many new units proposed without the requisite infrastructure. Possible NON compliance with legal requirements due to Siny Bricks asking for planning permission from their owner - surely this is not legal? Has the Council met it's duty to cooperate - NO, not with its residents as you do not appear to listen to our objections.	The only modification needed is to not try to turn North Chingford into Waltham Forest with building of these proposed new units. Is it legally compliant that the threshold of the Library/Assembly hall site will be transferred to the Council's wholly owned company, Siny Bricks, for the building works to be completed? Is the SB applying for planning permission to built this monstrosity directly to their parent company - surely this is illegal? North Chingford does not need this vast amount of new units, we are already full.		Looking forward to the Zoom meetings on the 23/11 and 21/12 to see how Joe Garrod continues to skirt around all the questions!	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
				S46 - Chingford Library and Assembly Hall	No	Response	No	Although the current building is not particularly attractive, any development needs to be sympathetic to the environs. If 30 dwellings are to be built, what consideration has been given to school places, GP facilities and parking? Also the cost of hiring the assembly hall needs to be reduced so that it can be more fully utilised		Yes		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Council is committed to playing its part in tackling the housing crisis. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Luigi Roccam				S456 - Chingford Library and Assembly Hall	No Response	No	No	don't know enough details about the legality of the building being made. Will it have fire compliant cladding? Will there be multiple staircases?	The building should not be more than 3 floors to fit in with the surrounding buildings. Any residential flats should be offered at a decent rental or sale price. More 2 bed flats for half a million pounds or 2k + monthly rentals are not what London needs. If that's the plan for this development it sounds like a waste of time.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. There have been changes made to regulations concerning fire safety, and the government has indicated that this requirement will apply for building of over 18m in height following consultation. Depending on proposals, they will therefore have to reflect the appropriate threshold.
Gary James				S456 - Chingford Library and Assembly Hall	No	No	No	North Chingford does not have enough schools, doctors, play areas for the amount of flats proposed. It will totally take away the village feel and destroy the close community. I totally object to this plan!	North Chingford does not have enough schools, doctors, play areas for the amount of flats proposed. It will totally take away the village feel and destroy the close community. I totally object to this plan!	No	We are entitled to hear the case by the procedure and put forward our objections	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
-				S456 - Chingford Library and Assembly Hall	No	No	No	Much too high and a large development next to the Chingford Green Conservation area which will look so out of place. Not against the redevelopment of the building if its done sympathetically in line with the surrounding cottages.	Reduce the height of the proposed building and improve exterior in line with surrounding environment.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Sarah Newton				S456 - Chingford Library and Assembly Hall	No Response	No	No	As this development falls within the conservation area it cannot comply when it seeks to increase the height by comparison to the existing building. I couldn't change my house in the same conservation area 10 years ago. Why should you?		No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S46 - Chingford Library and Assembly Hall	No	No	No	The building is a good solid building currently being as a base for AgriX. We should be preserving old buildings with character NOT demolishing them and replacing them with small new tiered apartments	NO COMMENT			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.
Lynn Ferguson				S46 - Chingford Library and Assembly Hall	No	No	No	Consideration of the site as part of the conservation area is insufficient.	Proper design consultation to reflect the historic buildings of the conservation area.			In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
				S46 - Chingford Library and Assembly Hall	No	No	No	This development is totally out of keeping with this area of North Chingford. Both my wife and I and many of our friends DO NOT want this development to go ahead.	don't have any modifications to suggest, as I do not want the development to go ahead.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Elizabeth Curran				S46 - Chingford Library and Assembly Hall	No	No	No	The proposed plans are hugely unpopular in the local area, the local community do not want to have their library demolished, lose their function in the high traffic conservation area have to suffer with the disruption, dirt and noise pollution during the construction. There are many parts of brown space in North Chingford where a development would be welcomed. Myself and Waltham Forest Council force these major changes to areas much loved by residents, that remove the character, charm and pleasure in living in this area.	The proposed closure of access from Mornington Road to Station Road will be a huge hindrance to anyone living in the area. Adjust the plans to keep this access, reduce the amount of residents, or move the entire building to another part of the area, NOT IN A CONSERVATION AREA NEXT TO THE OLDEST BUILDING IN THE BOROUGH. WFC you act like you hate North Chingford. I lived in London for many years, even saw how you harm this different part of your borough and have no respect or care of the residents.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Council is committed to playing its part in tackling the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Kathryn Connor				S46 - Chingford Library and Assembly Hall	No	No	No	I do not fulfil the legal duty to assess the development needs of this area, deliver growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (Local Planning Framework, page 45).	The plan does not meet the definition of "Sound from the National Policy Planning Framework, paragraph 35.	No		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. In April 2019, the Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.
Sally Topping				S46 - Chingford Library and Assembly Hall	No Response	No	No	Not in keeping with the surrounding area and lack of infrastructure in place to support an increased population		No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Rowford Johns				S46 - Chingford Library and Assembly Hall	No	No	No	It cannot be correct to build a new residential block above the library in a conservation area. The proposed buildings are not in keeping with the buildings surrounding the area.	A building which blends into the area not one which is in stark contrast to it	No		Through the evidence published in the Characterisation and Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified with strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 7) means that through development any infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
MS Clark				S456 - Chingford Library and Assembly Hall	No	No	No	The plan does not fulfil the duties outlined in the National Planning Policy Framework, page 6 - development needs. The plan does not meet the definition of "local". National Planning Policy Framework (para. 35). The proposed developments at S456, S455, S457 and S458 do not meet the area's objectively assessed needs. I would dispute that there has been any objective assessment of the area's needs, the programme of consultation prioritises housing above any other consideration. All three proposals constitute a threat to the local environment particularly the nationally important Epping Forest which is the predominant feature of the area and which gives the area a unique place in Waltham Forest. The current urban landscape, with a few unfortunate exceptions, leads comfortably and pleasantly to various points of Forest access and fits harmoniously into the many different viewpoints. The Conservation area around Chingford Green is under threat from the Authority which should be protecting and enhancing its character. The Local Authority has acted in bad faith throughout the Local Plan process by first refusing to confirm that it wished to develop the library and Assembly Hall site, then, in the middle of a pandemic announcing its intentions to dispose of the site to its subsidiary. The Authority has failed to engage with residents who are not able to participate in online events. On line events were poorly managed and totally inadequate. The latest issue of Waltham Forest News the Authority's own publication does not mention this consultation and the extended date for responses. I responded to the two previous stages of the Local Plan and found the process very confusing and muddled, the responses from Waltham Forest to the previous points raised were formulaic and uninformative. The process of reviewing documents and policies on line is very time consuming and difficult if one is constrained by limited technical equipment. In addition to lack of respect granted to local residents the Authority does not appear to have adequately consulted with the other major stakeholder in the area i.e. the City of London Corporation as Conservator of Epping Forest.	I am not legally or professionally qualified in this field. I would ask that the views of those respondents whose knowledge and expertise far exceeds mine be given consideration.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
David Dooks				S456 - Chingford Library and Assembly Hall	No	No	No	Not in keeping with adjoining buildings, excessive development will add to already limited parking space on surrounding roads, changing the Assembly Hall as proposed will render it unusued over time. Development will cause excessive disruption.				As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Helen Chivers				S456 - Chingford Library and Assembly Hall	No Response	No	No	I do not believe that this will be a sensitive development. North Chingford has a village atmosphere and the Assembly Hall is in a heritage area. Any building should be low rise in a traditional architectural style in keeping with the area and should be a place of beauty for local residents. Modern flats tend to be ugly boxes with no character. I am not convinced that new flats will be built in an appropriate style. Building lots of new flats with no parking will be a nightmare for local residents who already struggle to park their cars. Parking permits is not the answer as people will have to pay but still be unable to find a parking space. The new assembly hall will not be large enough for large functions and we definitely do not need any more cafes in North Chingford. Please do not destroy the character of North Chingford.		No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Linda Bravery				S456 - Chingford Library and Assembly Hall	No	No	No	Not compliant because it builds on the village green area contrary to it being within a conservation area. Invooned because it flouts conservation rules. Non co-operative because it alters the use of the village green which affects the local people. This plan is ridiculous, unsightly and harmful to the location and local people.	This plan should not go ahead. It is the worst case of urbanising a village setting we ever known. No amount of modification can compensate losing the village green, library, assembly hall and village setting. It should not go ahead.	No		This response is noted. The borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Sue Cooper				S456 - Chingford Library and Assembly Hall	No	No	No	I object to high rise		No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response	
Paul Macdonald				S46 - Chingford Library and Assembly Hall	No	No	No	This will ruin the low rise village feel of north Chingford. With regard to traffic, the high road is already gridlocked on Saturdays and at times through the week. The additional cars (which people will own even if there are nonparking spaces) will clog up surrounding roads and the traffic will be diverted down a small handful of streets.				Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
Kay Taylor				S46 - Chingford Library and Assembly Hall	No	No	No	A block of flats with no parking in the middle of Chingford Green conservation area, next to historic cottages – totally not in keeping with the local area. Fewer floors, so more in keeping with other local properties, it should be no higher than the shops opposite, not as high as the church steeple. Parking for each property, Chingford is the gateway to Essex, public transport isn't great in that direction, not having parking will just push cars into the local streets which in turn will stop shoppers being able to park and fill the local shops. The plans show a smaller multi use room instead of the Assembly Hall, a cheaper larger space which local people can afford to hire not a smaller room which will be not much use to the local community in what we need locally. Before the Council raised the cost of hiring the Assembly Hall it was used for more local events.				Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
				S46 - Chingford Library and Assembly Hall	No	No	No	No consideration of conservation area, listed cottage, distance to forest.		No		In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.	
Garathie Cleveland				S46 - Chingford Library and Assembly Hall	No	No	No	The proposed work on the assembly hall and library is completely inappropriate for the site overlooking, as it does Chingford Green bounded by its historic buildings one of which goes back to the fifteenth century. The building will be far to tall to fit in with surrounding buildings, will be an ugly dark avoidee glowering over the Green. It isn't well over-drearily' the site and, as has been suggested, not match the tapering church spire adjacent, this being an excuse to build this lump. The houses next to this structure will lose what little privacy they have. In short the structure with its 40 plus flats and no parking will simply add population to an area already over-revered for schools and GP care to name but two. The 'improved' library is simply an add this monstrosity to the area. DO NOT build this, simply improve the library and modernise the Assembly Hall to provide a really useful facility for the whole borough. The excuse that the borough needs more housing is an excuse to over-urbanise the North Chingford area and the borough seems to be taking a leaf out of the Boris book and riding rough shod over the population with no regard for the opinions and feeling of the general population. As a socialist and Labour voter all my life I thought never to see this behaviour from a Labour council, shameful.				The plans impact the people living next to the proposed site most yet no one has contacted us directly about the impact to our lives, this Building will have 1. I feel this is a risk at the least and totally dismissive of our views and opinions and shows a lack of willingness to compromise. This is a conservation area and we have had to jump through many hoops to maintain our buildings in accordance with the rules. However, this building will be double glazed? I now feel that the conservation rules are being torn up by politicians so why should we abide by them anymore? Why do we have to get planning permission for double glazing when 3 doors were your proposal to put it in? why should we have to get planning permission for a dormer window when you're Building 6 storey 3 storey away, and why can't we have solar panels on the front of our buildings?	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Caroline Rubidge				S46 - Chingford Library and Assembly Hall	No	No	No	Anything more than 2 storeys is not in keeping with the areas conservation status.	Reducing plans to no more than two stories and including increased budget/allocations for local services - parking.	Yes		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

If yes, please explain why?	Council's response
				S456 - Chingford Library and Assembly Hall	Yes	No	No	It will significantly erode the areas green space and impact on the surrounding area				The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Jacqueline Logan				S456 - Chingford Library and Assembly Hall	No Response	No	No		The building will be too high			The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Kathryn Unwin				S456 - Chingford Library and Assembly Hall	No	No	No	This is a negative development which would destroy the conservation area and take away an important public amenity and replace it with a substandard building. We are having a safe stored on as although there are over 25 safes in the vicinity of the hall. The current library is a quiet space and a safe would destroy this amenity. The new hall is far too small and should be no smaller than the existing one. Nearly everyone in Chingford is against this plan	Renovate the current building. We were told that it would be too expensive but this has turned out to be untrue as millions are being on other buildings in the South of the borough but as usual Chingford doesn't count.		No one takes any notice of emails	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The site allocation requirement ensures the reposition of the library in the new development.
				S456 - Chingford Library and Assembly Hall	No	No	No	Chingford Green assembly hall/library must remain as it is with just the refurbishments needed. Surely all of these proposals are not made by local residents but presumably by people that live out side Chingford/Highams Park area?	NO COMMENT	No		The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The site allocation requirement ensures the reposition of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) reposition of the leisure facility is a policy requirement: to preserve the existing level of provision of playing pitches.
Susan Doyle				S456 - Chingford Library and Assembly Hall	No Response	No	No	No response so no comments required	This site looks good as it is, original. 30 flats should not be built here especially next to a National Listed Heritage Asset, it will ruin Chingford Green. Also there is not enough parking in this area NOW, where will the people living in these proposed 30 flats park?			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Stephen Doyle				S456 - Chingford Library and Assembly Hall	No Response	No	No	N/A	This site looks good as it is, original. 30 flats should not be built here especially next to a National Listed Heritage Asset, it will ruin Chingford Green, with the church & the building that used to be the Bull & Crown. It is an ideal setting as it is. Also there is not enough parking in this area NOW, where will the people living in these proposed 30 flats park?			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Key Voter				S46 - Chingford Library and Assembly Hall	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling ie doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Sam Keating				S46 - Chingford Library and Assembly Hall	No	No	No	The council is giving priority to housing with this development plan with little consideration to the local conservation area. This applies to other proposed development sites in North Chingford too. There will be little if any benefit to the local economy, north Chingford does not need another cafe. The proposed dwellings which will be tower block style will be detrimental in appearance to the character of North Chingford, there has been little proper consultation with local residents. Additional housing may be required but development should be sensitive to the area, the proposal for the library development would result in an ugly building totally not in keeping with the area. The development will have a negative environmental impact. Residents of the new flats would need to seek parking in nearby streets adding to congestion in the area. The new residents would also lack any outdoor space something that over the last two years has become seen as an increasing necessity for quality of life.	The council should be exploring other possible developments or modifying the existing plans in order to avoid harm to the aesthetics and the heritage to this area of London, see further points above	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). All new development will need to provide an appropriate amount of well-designed, suitably located and usable private and community amenity space. Proposals coming forward on allocated sites will still be subject to the full planning application process.
Martin Collett				S46 - Chingford Library and Assembly Hall	No Response	No	No Response	This development is out of keeping with the Chingford Green Conservation Area. A tower block development is entirely wrong at this location.	Renovate the existing library and assembly hall, they are lovely buildings	No	-	The site allocation requirement ensures the reposition of the library in the new development. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Diane Rowbury				S46 - Chingford Library and Assembly Hall	No	No	No	It takes away the the very heart of North Chingford. The assembly hall is a place where shows, weddings and other community events happen. The library is a meeting place and a place for the community to read, borrow books, use the internet and has space for childrens events etc. You will be trying to squeeze all this into smaller areas with no historical feeling		No	-	The site allocation requirement ensures the reposition of the library in the new development. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
				S46 - Chingford Library and Assembly Hall	No	No	No	The proposed development will put great demands on local services which are greatly over stretched at this present time particularly when associated with the other developments that you are considering in the local area.	Any developments in this area should give far greater consideration to the points I have made above. You should substantially reduce the size of any developments and make sure they do not detract from the architecture in these areas. More schools More doctor's surgeries More public transport	No	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
				S46 - Chingford Library and Assembly Hall	No	No	No	Lack of schools Lack of doctor surgeries Not enough public transport for the area		No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Kay Anderson				S46 - Chingford Library and Assembly Hall	No Response	No	No	30 new homes cannot possibly make a positive contribution. Council is building houses above requirements: why? All plans under Claire Coghlin watch... see why she 'voiced'...	Council needs to be thoroughly investigated re any planning as corrupt to the core... follow the money... does not benefit Chingford citizens at all...			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
				S46 - Chingford Library and Assembly Hall	No	No	No	is not in keeping with the area. We do not need more homes, affordable homes will attract the wrong type of people to the area.	Reversing of the current hall and library support but they need to remain the same aesthetics, floor space and should not be any higher	Yes		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Oliver Gover				S46 - Chingford Library and Assembly Hall	Yes	No	No	The plan for the Chingford Green, Library and Assembly Hall site is in direct contravention of the site's place as part of a Conservation Area. The new library plan is really a clumsy attempt to foist a Fascian Bargain on the community by suggesting a relatively minor improvement in return for a travesty of a development including 30 residential apartments which, presumably, will be accompanied by families needing to access already heavily stretched local services. The environmental impact on North Chingford as the gateway to Epping Forest and as a refuge from London's urban sprawl will be significant although this has already begun.	Scrap it.			The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC). This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Lis Poley				S46 - Chingford Library and Assembly Hall	No Response	No Response	No	I don't think the council care or have consider local residents thoughts on this development. It will be totally out of character. The poor people who live on chingford green directly next door, it will completely ruin the area.	N/a	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Karen Prentice				S46 - Chingford Library and Assembly Hall	No	No	No	Not taking notice of local environment e.g. Neighbouring buildings. Not taking notice of local people. This site at the centre of our community, and a large housing block is completely out of keeping and unsympathetic to the area, both aesthetically and practically. There is no room for extra parking, and the emphasis on other modes of transport will be ignored. The homes will be like rabbit hutches.	Don't build on this site as it completely out of keeping with the local area.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Nicola Doney				S46 - Chingford Library and Assembly Hall	No	No	No	The plan is not in line with the local area. Washam Forest seem adamant to blight the area of north Chingford with high rise buildings despite push back from the people of north Chingford. My property is directly beside this site and light into my home as well as my privacy will be blighted.	Upgrade and replace what is already there if not energy efficient. Do not build on top and destroy the area around the green which is steeped in history. Listen to the local community.	No	My property is set to be blighted by this development	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Gillian F				S46 - Chingford Library and Assembly Hall	No	No	No	The local plan does not listen or take into consideration the views and wishes of the residents. They refused their plans through with no regard to others. The consultations are biased and worded in such a way as those around can interpret whichever way they want which is always contrary to the locals.	The plan needs to be set out in plain English, without wording in such a way as allowing the council to do what they want regardless. There should be a more open method of allowing residents and local businesses to express their views, and not being constrained by misleading biased questions as always happens with these proposals.	Yes		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
				S46 - Chingford Library and Assembly Hall	No	No	No	No consultation other than on line. No way of responding other than this. I have tried numerous times and my comments dont appear.	Proper consultation- not online dependent.	No		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Raymond Moffat				S46 - Chingford Library and Assembly Hall	No	No	No	The council is pressing ahead without proper consultation blaming Covid for this and totally ignoring the objections of local residents about the unsustainability of their plans for North Chingford and the surrounding area.	Reduce the size of any redevelopment so it is in keeping with the local area in both height and style. This is a truly vibrant and these plans are not what the area requires, it is too intensive and out of character			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Andra Boyle				S46 - Chingford Library and Assembly Hall	No					Yes	We need to have a voice. Most of the planning team do not live here and it's important that due diligence in the process includes the impact on existing residents and workers	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
				S46 - Chingford Library and Assembly Hall	No Response	No Response	No	It appears there has been no cooperation in consulting and listening to needs of residents. If they had been brought on a journey, communication to properly and listened to perhaps this would be a such a sensitive development. In this question you're asking about the local plan in general, not specific to this development - how are residents meant to understand what you're asking them if you're not clear in any communication about this?	How are people meant to understand the legal compliance of each development? Language like this alienates residents and is a barrier to participation in surveys like this. Make this a proper consultation rather than a simple box ticking exercise on this inaccessible website. To make this particular development sound, redesign the proposals based on feedback from residents, go out to consultation and this time do it properly with a thorough understanding of the issues raised and how you're going to address them.			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Saige Saly				S46 - Chingford Library and Assembly Hall	Yes	No	No		I believe that the site will be too tall considering its location in a conservation area.			The site allocation requirement ensures the reposition of the library in the new development. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities, within walking distance to the residential catchments areas.
				S46 - Chingford Library and Assembly Hall	No	No	No	Not in keeping with the area		No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Parakevou Markou				S46 - Chingford Library and Assembly Hall	No	No	No	No as LBWF should be seeking to preserve the 'Local Character' of the area - residents desire to move to Chingford 9 Highgate Flats as they are the 'old' suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 1,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3 Pg 164) states 12,640 new homes over 10 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 14% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build an every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Witham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is future proofed for them. Delivery of housing targets should not be delivered in such away so as to have no room for error.		No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Mike Collins				S46 - Chingford Library and Assembly Hall	No	No	No	I do not believe parking for residents has been taken into account		No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Marianne				S456 - Chingford Library and Assembly Hall	No	No	No	Not enough parking - flats/high rise buildings do not fit in with the surrounding areas of north chingford.	Redo library/hall if needed; create more parking spaces if available.	No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Philippa Leggett De Leonora				S456 - Chingford Library and Assembly Hall	No Response	No	No Response	Can it include an underground car park to alleviate current parking issues? Without car parking provision new dwellings will cause stress to all residents.	Can it include an underground car park to alleviate current parking issues? Without car parking provision new dwellings will cause stress to all residents.	No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Douglas Chamberlain				S456 - Chingford Library and Assembly Hall	No	No	Yes	The site is an established community site with library and performance and gathering space and must be maintained. The site is inappropriate for dwelling. The site should remain no higher than the building opposite (max 3 floors). Sunlight to the green must not be hindered. Should any dwellings be permitted, they must have the option to register vehicles at this address.	The site is an established community site with library and performance and gathering space and must be maintained. The site is inappropriate for dwelling. The site should remain no higher than the building opposite (max 3 floors). Sunlight to the green must not be hindered. Should any dwellings be permitted, they must have the option to register vehicles at this address.	No		The site allocation requirement ensures the reposition of the library in the new development. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Nargis Bevan				S456 - Chingford Library and Assembly Hall	No	No	No	Getting rid of the library in the area will impact our suburban community negatively.		No		The site allocation requirement ensures the reposition of the library in the new development. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Dalrose Khan				S456 - Chingford Library and Assembly Hall	No	No	No	This is the council wanting to expand housing with any sites that are available without thinking about the wider community. The library is a hub for the north Chingford community and one of the two located in the Chingford area.	To use half of the building but keep one half for library and community use.	No	As it directly affects my property	The site allocation requirement ensures the reposition of the library in the new development. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Miklos Sagi				S456 - Chingford Library and Assembly Hall	No	No	No	The Chingford Library and Assembly Hall is an iconic building, part of the heritage of North Chingford. The proposal is excessive, high rise and over-development which will change the very nature of our local areas in North Chingford. I believe, this proposed development will also put more demands and pressure on local infrastructure and services, such as schools, doctors, utilities which will have a negative impact on the local area.	Keep Chingford Library and Assembly Hall as is, and do not proceed with the redevelopment.	No	-	The site allocation requirement ensures the reposition of the library in the new development. The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Gloria Jones				S456 - Chingford Library and Assembly Hall	No	No	No	This is a gross overdevelopment of the Green, there is not enough parking as it is without more flats. This is a village area not a high rise area.	cancel plans	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Sally Payling				S456 - Chingford Library and Assembly Hall	No	No	No	Legally compliant? (like I guess, the majority of people I am not legally trained so have no idea (as you are without a doubt well aware). Unsound? Absolutely. A high rise development would be totally out of character with the surrounding conservation area, historic buildings and the role Station Road plays as the gateway to Epping Forest. Also it doesn't take much intelligence to understand the extreme pressure 30 households would put on local schools and doctors' surgeries as well as the continuing problem of parking. Duty to co-operate? I think not. As the pandemic abates (we hope) more pressure to face consultation on these matters need to be arranged as there are many people who are unable or unwilling to fill in this type of frankly off-putting form.	Duty to co-operate - a meaningful consultation accessible to all. Unsound - little thought has been put into the impact this development would have on all the aesthetics of the surrounding historic space (i) parking (ii) the pressure on schools and gp surgeries. There is no doubt that the supply of safe, affordable housing nationwide is at a critically low level. I can see that we, the residents of Chingford, need to free up space to help solve this problem. However, 30 units on this site is a massive. Any development should be curtailed to 3 storeys. The community hub on the ground floor should contain a well stocked library, large assembly space and smaller meeting rooms. I agree with previous comments that a cafe is hardly a priority in Station Road	No	-	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:
Cheryl Taglio				S456 - Chingford Library and Assembly Hall	No	No	No	Place of study for several kids won't be appropriate to move. I attend the library a lot and the next closest library would be in Redbridge in woodford. It is very long distance by public transport. Stop trying to ruin several kids' futures.	Unacceptable	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S456 - Chingford Library and Assembly Hall	No	No	No	All new homes obviously house many new residents but no provision is ever made for new clinics or doctors surgeries. It is hard enough to get a preferred school or doctors appointment already. This view applies to all new development in Chingford.	Provide new schools or extended school places and doctor's practices.	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.

Jason				S456 - Chingford Library and Assembly Hall	No	No	No	I would love to put the detailed and eloquent responses that perfectly articulate how these plans are out of keeping with the area (especially this conservation area, even if the type of housing required and just plain aren't necessary. However after witnessing the utter incompetence and illegal behaviour of LBPF during the non-included 'consultation' and the subsequent farcical implementation that ruined the Walthamow Village area. All whilst introducing traffic, noise and subsequently increasing pollution! Along with the high rise developments on every single car park and available space. So I'll opt for the comment earlier ... You're corrupt, incompetent and operate illegally. You should be ashamed of yourselves.		No		Response noted.

				S456 - Chingford Library and Assembly Hall	Yes	Yes	Yes					Notified
Rebecca Boylin				S456 - Chingford Library and Assembly Hall	No	No	No	Lack of additional infrastructure for additional inhabitants: surgery, schools, shops, parking - everyone of these flats has the right to a car and there is no parking associated with these flats and not enough disabled parking either. The flats are not of character with the rest of suburban Chingford. The green will be used by many more people and will lose its character.	Use flats, more parking more sympathetic drain and not as high rise			
Stuart Mickenbaum				S457 - North City Atria's Chingford	No Response	No	No Response	Not in keeping with local character. Changes a predominantly low rise area and impacts views and skyline. Parking needs ignored and effectively excludes those who need their own transport for work or due to age or other circumstances. Not positively prepared.	Keep developments of the same height and as close to character as possible with surroundings. Make facilities on site suitable for a diverse demographic and their needs rather than a wealthy slice of how people should be made to live.	No	Not necessarily me but certainly representatives of the affected local community who seen under represented in these planning decisions	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 12 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeably alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base involving: <ul style="list-style-type: none"> Research/Fact finding: the choices made in the plan are backed up by facts. Balance of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. </p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: <ul style="list-style-type: none"> Sound infrastructure delivery planning. Being on regulatory or national planning barriers to delivery; Delivery partners who are signed up to; and Consistency with the strategies of neighbouring authorities, including neighbouring marine planning authorities. </p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as a lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an annual monitoring report.</p>
John Hugg				S457 - North City Atria's Chingford	No Response	No	No	Legally compliant how do I know - the plan sound no duty to cooperate what is that please explain	"No an LBWFF should be seeking to preserve the 'Local Character' of the area - residents close to me to Chingford 4 Highways Park are they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 164) states 12,000 new homes over 10 years and LBWFF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London is estimated to have fallen by 1 million, why is there pressure on local councils to build so many more houses than they are allowed to? Also, the housing targets in the London Plan that they are aimed at the Government has stated that they are proposing to reduce house development in London and the South-East and more in the North as part of the levelling up programme. The majority of new properties are flats. The demographics has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desire of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support networks of family and friends to live in a property they feel is future proofed for them. Delivery of housing targets should not be delivered in such a way as to only provide minimum standards and should not be requested in such that development overcrowds existing residential areas to the detriment of existing residents or adversely affects the character of areas which are valued by existing residents. Land optimisation should also be considered in the context of the local context and the needs of the area."	Yes	To see what your intentions are and to be able to argue against over development.	<p>The robust measures proposed to both avoid and mitigate any recreational harm and to the Epping Forest SAC, primarily through the provision of Suitable Alternative Natural Greenspaces and financial contributions to fund the Strategic Access Management and Monitoring (SAMM) strategy, have been developed in consultation and collaboration with Natural England, the City of London Corporation (conservators of Epping Forest) and Lee Valley Regional Park, all of whom have expressed support for the work Waltham Forest have undertaken (see joint letters at LP46, LP48 and LP42). Natural England are clear that they agree with the conclusions of the HRA and consider the Local Plan sound on the basis of the well considered and detailed evidence and strategic proposals and the monitoring indicators proposed. For further detail, please see the Statement of Common Ground with Natural England at LP64 and Natural England's response to the Inspector's further MfD. (dated 23rd January 2023).</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required to be sited in some identified strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>In Local Plan Part 1, Policy 12 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan states that the loss of existing local or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeably alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine active cycling, walking and public transport use.</p>
Mike Chrimes				S457 - North City Atria's Chingford	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with rules that are not transparent to consultees. Consultation on the site allocation (LP2) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LP1) for 2023-2035. This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine whether or how been difficult to get into online. It would seem however that a system of consultation partly driven by the impact of covid, but essentially reliant on web based technologies can never be inclusive of the population as a whole. Certainly some meetings have had significant low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been agreed both from LP1 and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1,000 homes pa. While LBWFF has a large waiting list (50,000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>It is suggested that until master plans are developed, through consultation for the main centres identified in LP1, consultation on individual sites is paused. With reference to site S457 the chief driver in build out order is to provide 30 homes. It is unclear whether this is justified alongside the loss of local employment occasioned by the development, despite the commitment to non-residential floorspace. This site is one of a number of "garage/motor vehicle sites considered for development". The borough's strategic objectives refer to the provision of a variety of employment opportunities. Individually this might not represent a great loss of flexibility of vehicle related employment, but there needs to be holistic view of the demand for such sites across the area, which is far more motor vehicle dependent than southern Waltham Forest. The development guidelines refer to enhanced pedestrian and cycle connectivity, but no notes are included on the planning map. This omission should be addressed. The guidelines refer to minimising access to Epping Forest SAC, in reality this site is close to Epping Forest, and pedestrian and cyclist access is difficult across busy roads. Appropriate development here could help address this.</p> <p>Consistent with National Policy 1 and in general conformity with the London Plan, Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Sound Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Ian Connor				S437 - North City Auto's Chingford	No	No	No	<p>do not believe that the plan fulfils the legal duty to meet the development needs of their area, align growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Framework, page 6).</p> <p>This is because we do not believe that the plan meets the definition of "Sound from the National Planning Framework, paragraph 35. This paragraph of the National Planning Framework states: "to the significant detriment of the environment, local business, and the conservation area."</p> <p>It does not fulfil the Council's duty to be sustainable, in the following ways:</p> <p>1) It is not economically sustainable</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.19) S464 states 12,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.</p> <p>The plan does not "positively and proactively promote economic growth. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through boxy tower blocks, North Chingford is a suburban not urban. This location in particular is adjacent to forest land, North Chingford is the Gateway to Esping Forest. The Conservators of Esping Forest are far from impressed with the current plans for urbanisation of the area and its detrimental effect on the forest environment."</p>	<p>See above. Low rise housing only (certainly no more than 3 storeys). The effect of this and other developments on the local residents, and the local environment impacts need to be addressed in more detail. At no point has this process felt like a genuine consultation just a "going through the motions" exercise. The detrimental effect on local residents (Lengthy High Rise, parking issues and environmental) on the edge of the forest would seem outweigh the benefits.</p>	No	<p>Because there are too many unanswered questions</p>	<p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Site of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA), will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Anthony G Thomas	Tip			S437 - North City Auto's Chingford	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must:</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 16, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1).</p> <p>"18(1) A local planning authority must:"</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(A) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments: I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonstone Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have will be removed I do have my doubts as well there are others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning there will be the first area to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. But the rest of the area will also be subject to these increases and the proposed layout of the natural air flow possibly result in pockets with even a higher r concentrations.</p> <p>Waltham Forests current population density is far to high, and as such we have seen significant increases in social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hill Estate where the 1960's tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. It was realised in the 1920's that people needed space and New Towns were created to provide a better quality of life.</p>	No	<p>Because there are too many unanswered questions</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing a part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually only be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
Lloyd Parkinson				S437 - North City Auto's Chingford	No	No	No	<p>Proposed developments would be out of keeping with the area, they cannot be delivered with policy.</p> <p>Proposed developments would be affordable housing, no parking provision, this will disadvantage other people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/bright, additional demand for parking. Consultation Rowed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life, etc. Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.</p>	<p>Storage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life</p>	No	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Council officers. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>	
Yvonne Sanders				S437 - North City Auto's Chingford	No	No	No	<p>Is the Plan "sound? There are 4 tests at para 35 of the NPPF:</p> <p>Has the Plan been "positively prepared? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.</p> <p>"No an LBWF should be seeking to preserve the "Local Character" of the area residents chose to move to Chingford & Highams Park is they are low rise suburbs of modest houses at the very edge of London - the gateway to Esping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats, and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village park, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 1,000 signatures objecting to this particular development proposal and residents who are being ignored.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.19) S464 states 12,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build even every possible space?</p> <p>Also, the housing target in the London Plan may be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The reports of the new properties are flat - the pandemic has shown that families want houses with gardens. There should be a good mix of housing</p>	<p>Ensure that any development is no more than 3 storeys in height due to the location of the site is close to the "Gateway" to the Forest so that it does not cut into the view of the Forest, as per Policy 10 of the London Plan.</p>	No	<p>I wish to have the opportunity to explain why the Councils proposed developments are not suitable.</p> <p>The Council is committed to playing a part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires that any new development must respect the amenities of existing residents and avoid harmful impacts from overlooking, encroachment, loss of privacy and loss of daylight/bright.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>

If yes, please explain why?	Council's response
				S437 - North City Auto's Chingford	No	No	No	do not believe that the plan fulfils the legal duty to meet the development needs of their area, align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects. National Planning Framework, page 6). This is because I don't believe that the plan meets the definition of "Sound" from the National Policy Planning Framework, paragraph 35. Any development of over 3 stories in North Chingford, and specifically to close to the Chingford Plan, would not meet the criteria of Policy D9 of the London Plan. The local plan is not consistent with regional and national planning policy, which states that: A) Tall buildings should only be developed in locations that are identified as suitable in Development Plans.	The current plans do not appear to take into account the concerns of major neighbouring landowners (City of London Corporation) or the difficulty that Epping Forest District Council has had in obtaining any planning permission since 2008 for developments due to negative impact on the Epping Forest Special Area of Conservation. The neighbouring borough of Epping is building east numbers of new flats/homes close to the boundary of LWPF, a very short distance from Chingford and Highams Park.			The Local Plan requires that all new developments should deliver high quality design that is responsive to the local character of an area. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. This Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. Through the evidence published in the Character intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Andrew Fearon				S437 - North City Auto's Chingford	No			Too many houses too little parking height not compatible with area				The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Paul Wellard				S437 - North City Auto's Chingford	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of building and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for other people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	No		Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online. Through the evidence published in the Character intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. If yes, please explain why?	Council's response
Algal Woodman				S437 - North City Auto's Chingford	Yes	No	Yes	Waltham Forest Council quite rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. And to the south of the borough, access to the marshes is being used to support intensive development. In contrast, in the north of the borough, developments must be designed to "minimise access to Epping Forest land" "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.	Yes	It is essential that green spaces have a voice at the table during the examination hearing sessions.	The SAUND strategy will be delivered as part of the Local Plan to ensure the spaces identified within it see improvements as development comes forward. The Borough's Local Plan has a policy on protecting and enhancing the environment that has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. These robust measures proposed to both avoid and mitigate any recreational harm to the Epping Forest SAC, primarily through the provision of Suitable Alternative Natural Greenspaces and financial contributions to fund the Strategic Access Management and Monitoring (SAMM) strategy. Have been developed in consultation and collaboration with Natural England, the City of London Corporation (Conservators of Epping Forest) and Lee Valley Regional Park, all of whom have expressed support for the work. Waltham Forest have undertaken (see joint letters at UP45, UP46, and UP47). Natural England are clear that they agree with the conclusions of the HRA and consider the Plan sound on the basis of the well considered and detailed evidence and strategies produced and the monitoring indicators proposed. For further detail, please see the Statement of Common Ground with Natural England at UP46 and Natural England's response to the Inspector's further AFD, dated 23rd January 2025.
Alicia Goulter				S437 - North City Auto's Chingford	No Response	No	No Response	The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Epping Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. This site is adjacent to the entrance to Epping Forest. The only way to fit 300 dwellings into such a small space would inevitably lead to a building of several storeys high. LBWF is seeking to build more new homes (27,000 by 2035) than required by the London Plan (Pg 3, Pg. 164). Housing targets should not be met by only providing minimum standards such that the development overloads existing residential areas to the detriment of existing residents or adversely affect the aesthetic and historic character of areas. The plan is not consistent with Regional and National planning policy since LBWF is intending to build many more homes, than the London Plan requires - see paragraph above. The London Plan states that tall buildings should only be developed in locations that are identified as suitable, a site within a few meters of the edge of the forest is clearly not suitable for even a moderate tall building as it would totally dominate the landscape. The plan states that proposals should take account of and avoid harm to, the significance of London's heritage assets, this proposal does the opposite.	The maximum height of any development on the site should be no more than 3 storeys this should be stated on the local plan rather than around 30 new homes. The number of new homes should be reduced.	Yes		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by the Characterisation and Identification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.
Mrs Geraldine Jendel				S437 - North City Auto's Chingford	No	No	No	This process is far too officious - it risks excluding residents from being heard. I am not a legally qualified person. I am relying as a long term resident of Chingford Green Ward. I consider all Local Plan sites in North Chingford to be unsound. In the case of the North City Auto, Chingford, I consider this to be a wholly inappropriate oversized and over tall development given its position in close proximity to Epping Forest and the Chingford Masonic Hall, a listed building. Such a development will contribute significantly to the urbanisation of Station Road, North Chingford and the gateway to Epping Forest, and rob it of its semi-rural and character for both residents and visitors alike. This proposal can not be considered "sensitive, as it would be a significant overdevelopment, unlike the current building on the site, which is low and set well back from the road. Chingford is suburban with the North Chingford area, in particular, having a semi-rural feel, which is much loved by residents and visitors. The area is mainly 2/3 story residential buildings, and as such, the proposed development for the North City Auto, Chingford, would visually overwhelm and overwhelm the site, currently occupied by a modest sized business with however - I would enhance the site and contribute to further enhancing of the semi-rural neighbourhood. It is an entirely unsuitable proposal for a suburban area, adjacent to Epping Forest, with a Conservation Area at the other end of Station Road. My family and I choose to live in North Chingford because of its low rise, open, village feel / semi-rural character. The IP will destroy everything that makes our local community special and unique - and the Council refuses to listen. As with all the other sites in the North Chingford area, the LBWF is ignoring the views of local residents and that wish to keep the precious character of North Chingford intact. Whatever happened to the mantra "Residents First".	I am a local resident - I am not equipped to say why my suggestions would make the IP legally compliant and sound. LBWF needs to listen and engage more with its residents/local community and acknowledge there are other ways of doing things instead of ignoring them and ploughing on with their proposals regardless, as they have done in the case of the IP North Chingford sites. It makes residents feel totally powerless. Reduce the number of proposed homes contained in the IP to the required number only and remove highly sensitive sites such as the North City Auto, Chingford site. Bring back empty domestic properties around the borough into use through a programme of refurbishment. Protect the Chingford Green Conservation Area and restrict any development in suburban neighbourhoods, to less dense, low rise - no more than 3 storeys. Only use site specific high quality, aesthetically pleasing design, respecting local character, architecture, and history for sensitive proposals such as North City Auto, Chingford and Chingford Green and any nearby developments adjacent to listed boundaries - unlike the ugly concrete and glass box buildings with balconies which are springing up around the borough. Include a better mix of housing in the IP - houses, maisonettes and bungalows, with gardens - not just endless, soul-less flats. Provide parking for each and every home and all necessary requirements / amenities such as school places, public transport, and healthcare.	No		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. John Huggill				S437 - North City Auto's Chingford	No	No	No	would want to see exactly what is being proposed there it is the gateway to the forest and should be in keeping with that max height 3 storey, car parking, disabled parking? Charging points etc.? What about the jobs lost at the garage?	As above a controlled height space with adequate parking	Yes	To see what your intentions are and to argue against over development	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p>
Brian O'Leary				S437 - North City Auto's Chingford	No	No	No	I believe the proposal to be unsound for the following reasons: 1. In LP1 Policy 27 scale of growth, has an overly ambitious target for homes in the borough i.e. 27,000. This is 144% higher than the London Plans recommendation. I have argued elsewhere that this figure has not been justified and is probably flawed. However, this is what drives the IDP site proposals regarding scale and intensity. 2. While not quite adjacent to Epping Forest this site is within 500m or so. The scale will not in my view be a very welcoming sight upon entering Station Road Shopping Centre of North Chingford, nor would it be a satisfactory addition to visitors of Chingford Park and Forest. 3. The site is adjacent to a row of popular restaurants and bars which, particularly on weekends, holiday periods, and major sporting events are very busy and noisy. Residents of the flats are therefore likely to suffer a loss of amenity. 4. Epping Forest & Commons Committee rightly have concerns "... 4.4a allocations within 500m of Epping Forest and the EFASC. Of particular concern to the Conservators are the proposed residential developments within 500m of the Forest boundaries in general, as well as the SAC in particular. We consider that the site allocations, densities and design must be modified at the Regulation 19 stage, and in the submission Local Plan itself to protect the character of Epping Forest and ensure a more clearly outstanding edge between dense urbanity and the Forests natural aspect. This is particularly important in North Chingford and Leytonstone, as discussed below, but needs to apply to all place-making within 500m of Forest edges, including to historic green lanes." Also "... in the Submission Local Plan (LP2) Policy 6C, in demanding Project-level HMA for developments in this zone, there is acknowledgement that urbanisation effects may lead to adverse impacts on the SAC, however, we would also add that for such sites within a short walking time of the Forest, it is very difficult to mitigate the impacts of recreational pressure also. Frequency of visits to the Forest from such close allocations are likely to be high and the character of the Forest will be affected.	A more appropriate development for this location would be leisure and hospitality sector businesses, including short stay hotel accommodation, or further civic or community facilities. Whatever the the replacement proposal, mass and height need to be scaled down. The current site is occupied by North City Autos. The building has a 2 storey equivalent height and is set back from the road with ample space around. This type of density and shoulder height complements the context and should be maintained.	Yes	To ensure my representations obtain a full consideration	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base including:</p> <ul style="list-style-type: none"> • Research/ fact finding, the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> • Sound infrastructure delivery planning. • Having no regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Consistency with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
Jane Kestevenham				S437 - North City Auto's Chingford	No	No	No	This is not in keeping with the local character. It changes a largely low rise area and impacts views and skyline. Parking needs have been ignored and includes those needing their own transport for work or due to age or social circumstances. Not positively prepared. Not Effective: No additional infrastructure planned to cope with the totality of developments S435-58 Not consistent with regional/national policy. Borough's plans greatly exceed targets. This development adversely affects local views and harms the setting of surrounding buildings. Any proposal of more than 3 stories would not meet policy OP of the London Plan	Developments should be of the same height and as close to character as possible of their surroundings. Facilities on site should be suitable for a diverse demographic and their needs and not change the character of the neighbourhood	Yes	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MPs.	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or higher than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 12 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base including:</p> <ul style="list-style-type: none"> • Research/ fact finding, the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> • Sound infrastructure delivery planning. • Having no regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Consistency with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p>
Tom Wise				S437 - North City Auto's Chingford	No	No	No	WFC need to protect jobs. This end of Station Road needs to remain low rise low density to protect the forest aspect.	Leave well alone	Yes	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MPs.	<p>This response is noted.</p>
Helen Chilvers				S437 - North City Auto's Chingford	No	No	No	I do not believe this will be a sensitive development - the only flats this close to Epping Forest should be low rise in a traditional style in keeping with the local architectural style.		Yes		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>The HMA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFASC)</p>

Kathryn Connor				5437 - North City Auto's Chingford	No	No	No			No		This response is noted.
Miguel Loureiro				5437 - North City Auto's Chingford	No	No	No	Why are you looking to build in an area that is often congested with traffic, where there are not enough schools, not enough GPs and not enough dentists? I am a resident and I don't believe residents were consulted about any of the proposed developments in North Chingford.		No	I'm a resident so I feel I should have a say in what happens to my neighbourhood	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Louise				5437 - North City Auto's Chingford	No	No	No	My understanding: The garage is rebranding to a new car brand but is not set up for sale. Why do we feel it ok to suggest as a location when its not actually an available proposition and the garage is a local asset bring people into the area? The golf course is on the very edge of a natural area / Epping Forest / Chingford Plains it is by no means a site to build on. This will be a complete site and ruin a bit of natural beauty. Not to mention the traffic and issues with parking, doctors, schools and other services. I didnt complain about the library site. However, these developments are one step too far.	Don't build on a historic site of natural beauty Don't remove a garage which services an area and brings new people to Chingford who therefore spend and bring revenue to the area	Yes		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Marcia Byrne				S437 - North City Auto's Chingford	No Response	No	No		If this site is developed as houses this is going to add more traffic and issues at this area of station road. This area is a highflow at certain times of day with the junction of Barendford Road. Traffic build up, cars can't turn out of Barendford and it is quite unsafe to cross as a pedestrian. Adding housing here will just add to the chaos and safety issues.			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.	
Laura				S437 - North City Auto's Chingford	No	No	No	This area is right near access to Epping forest and fear that it will ruin the views across Epping forest by building more houses along there. There is barely any room for parking around here so I do not know where any new residence will be parking and there is already pressure on the schools and doctors surgeries with the number of residents in the area already.	Not to build on the area as will affect the views and structure near the forest	No		The HBA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.	
Karen Palmer				S437 - North City Auto's Chingford	No	No	No		Such a development does not fit with the surroundings. High Rise intensive housing so close to Epping Forest is damaging to the outlook and environment and will destroy a beautiful area. To think that this will be car free is utter madness and the extra population and traffic, will have an environmental impact. There is no provision for extra schools, health care facilities, infrastructure to cope with the increased number of residents that are proposed and in actual fact the only hospital in the borough is being made smaller.		No		The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 2,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The HBA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC).
Steven Montgomery				S437 - North City Auto's Chingford	No Response	No Response	No Response	Thank you for setting out how you propose to redevelop this site. The location is a perfect opportunity to redevelop into homes. Residents in these new homes will be able to live on a driving high street, be within 30 minutes of Liverpool Street Station, and enjoy being right next to such a beautiful forest. Incredible! It should be clear already but perhaps it's worth saying, residents at these new homes don't need a car. I am happy to say that not everyone in Chingford is obsessed with cars. :) In fact, the current site as a car garage, at the end of a high street, next to a forest, is completely unsuitable for the modern world. We need to stop putting cars before people, especially in relatively high density areas. The redevelopment of this site into homes is a good start.	Please don't build a block of really horrible flats - I'm sure you can think of something that's actually good. There are some good new builds in other parts of Waltham Forest like Wood Street and Walthamrow.			This response is noted. The Council sets out its strategy for managing change in the Borough's Town Centres, High Streets, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.	
Raymond Bluffat				S437 - North City Auto's Chingford	No	No	No	The council is pressing ahead without proper consultation blaming Covid for this and totally ignoring the objections of local residents about the unsustainability of their plans for North Chingford and the surrounding areas.	This development takes no account of the style and characteristics of the area, especially as it is so close to Epping Forest. The plans should be in keeping with the style of the area and the location and need to be drastically scaled back.	No		The Local Plan requires a character-led approach to renaissance, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2016). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. This response is noted.

				S437 - North City Auto's Chingford	No	No	No	More new accommodation, many more occupants no new facilities ie schools doctors practices.	new schools more doctor's practices			The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Gloria Jones				S437 - North City Auto's Chingford	No	No	No	High rise flats are not sympathetic to the surrounding area. This is a suburban area not a town centre.	Cancel plans			This response is noted.
David John Anderson				S437 - North City Auto's Chingford	No	No	No	Ruin the face of Chingford.	something else		simply to judge	This response is noted.
Jason				S437 - North City Auto's Chingford	No	No	No	I would love to put the detailed and eloquent responses that perfectly articulate how these plans are out of keeping with the area, aren't the type of housing required and just plain aren't necessary. However after witnessing the utter incompetence and illegal behaviour of EDOF during the misinstated 'consultation' and the subsequent farcical implementation that ruined the Walthamstow Village area. All whilst introducing traffic chaos and subsequently increasing pollution! Along with the high rise developments on every single car park and available space. So I'll opt for the comment earlier... You're corrupt, incompetent and operate illegally. You should be ashamed of yourselves.		Yes		This response is noted.
David Harkhurst				S437 - North City Auto's Chingford	No	No	No			No		This response is noted.
Cat				S437 - North City Auto's Chingford	No	No	No			No		This response is noted.
				S437 - North City Auto's Chingford	No	No	No			No		This response is noted.
Tom Hancock				S437 - North City Auto's Chingford	No	No	No	Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, denigrations to the surrounding environment, negatively affecting the current residents!) This inconsiderate and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions/careless on failure to control immigration, and defend the sanctity of the family by previous and current politicians orchestrated by commercial interests, and pushed on the public by propaganda from the media that is populated by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas. Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country. The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence. The current proposed developments are reminiscent of the failures that are	Reject based on continued denigration to local community and strain on local services, as pointed out above.		This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also leads to compound the destruction of local communities by impacting anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, I STRONGLY OBJECT, and I have to understand how the people who profit, first and most in short term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
John Huggitt	S458 - Royal Epping Forest Golf Club	No	None	No	No	No	<p>Is the plan highly sound? How would I know it is sound? No duty to cooperate what does that mean please explain.</p> <p>No LBWF should be seeking to preserve the 'local character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 546 states 22,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 4,360 over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, why is there pressure on local councils to build on every possible space?</p> <p>Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a goal mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is future proofed for them.</p> <p>Delivery of housing targets should not be delivered in such away as to only provide minimum standards and should not be achieved in such that development overcrows existing residential areas to the detriment of the area.</p>	Yes	To see what your intentions are and to argue against over-development	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>Through the evidence published in the Characterisation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The London Plan states that the loss of existing social or community infrastructure will not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the London Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The car free approach and parking policy in the Plan is sound and in conformity with the London Plan (noting additional modifications proposed by TL at MMC73.2). The results of Air Quality Study 2 (AQ2) show the positive impacts the Plan will have on air quality across the borough.</p> <p>Car parking can be provided as part of new homes in less well connected areas, subject to a justification in a robust Transport Assessment. As set out in London Plan Policy 76 criterion C. An absence of local on-street parking controls should not be a barrier to new development, and boroughs should look to implement these controls wherever necessary to allow existing residents to maintain safe and efficient use of their streets. Measures such as restricting off-street occupiers except the badge occupiers entitlement to a permit have been introduced in recent appraisals, and secured by high agreement.</p> <p>The provisions of Policy 69 M are designed to ensure fairness to returning residents.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>	
James Newbery	S458 - Royal Epping Forest Golf Club	No	None	No	No	No	<p>Is the Plan "sound"? There are 4 tests at para 35 of the NPPF:</p> <p>Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs; and informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.</p> <p>No as LBWF should be seeking to preserve the 'local character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were are being ignored.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 546 states 22,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 4,360 over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, why is there pressure on local councils to build on every possible space?</p> <p>Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a goal mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is future proofed for them.</p> <p>Delivery of housing targets should not be delivered in such way as to only provide minimum standards and should not be achieved in such that development overcrows existing residential areas to the detriment of the area.</p>	Yes		<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were deobligated across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target raises the Council's identified housing need of 1,805 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London.</p> <p>The London Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>As set out in the London Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base including: - Research/Findings/ the choices made in the plan are based up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or material planning barriers to delivery; - Delivery partners who are signed up to it; and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. - The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes that require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs, it is "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	
Janie Kellenbaum	S458 - Royal Epping Forest Golf Club	No	None	No	No	No	<p>This is not in keeping with the local character. It changes a largely tree area and impacts views and skyline. Parking needs have been ignored and it includes those needing their own transport for work or to age or social circumstances. Not positively prepared.</p> <p>Not Effective: No additional infrastructure planned to cope with the totality of developments S458 - 58</p> <p>Not consistent with regional/national policy. Borough's plans greatly exceed targets. This development adversely affects local views and the settings of its surroundings. Any proposal of more than 3 stories would not meet policy D1 of the London Plan.</p>	Yes		<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. In place in Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the London Plan, all new residential development within the borough is required to be car-free. Catherine Branch	S458 - Royal Epping Forest Golf Club	No	None	No	No	No	<p>Is it sound? No. The council should be trying to preserve the area character not totally changing it. This development is ON TOP and at the gateway to the forest.</p> <p>From your own documents: as LP3 7.3 the character of the north is generally suburban. As such the area is lower in density compared to the Central and South areas of the borough.</p> <p>LP3 7.3 It is a mixed area of relatively low density residential housing, employment land, retail. The Epping Forest and the borough's fringe of Green Belt are major green assets which give this part of the borough an exceptional character.</p> <p>Vision - North of the Borough: The North forms the gateway to Epping Forest and its rich natural scenery and contrasting natural landscapes.</p> <p>Therefore, it is NOT sound. We have because it is in the rise and close to the forest and open land. It will change the character and special status of the area being the gateway to the forest.</p> <p>How can building 45 units, on that tiny footprint mean anything but high rise. If so, then the units would be so small and crammed together that they would totally change the character of the area. I would also like to add that there are no specifics that we can comment on - its a speculation as to size and design.</p> <p>May I draw your attention to impacts: C development proposals should address the following impacts (visual impacts) in the view of the building from different distances: 138 the London plan 2021 chapter 3 design 7 to table of contents.</p> <p>Along range views: these require attention to be paid to the design of the top of the building. It should make a positive contribution to the existing and emerging skyline and not adversely affect local or strategic views.</p> <p>At that location any high rise or cramming in of units would be totally out of</p>	Yes	We need to be heard by the council, not ignored.	<p>There MUST be better consultation - the responses asked for here demanded a high degree of comprehension of negative language. Access to documents online are so difficult to find it makes it irresponsible for any resident to understand and respond in meaningful way. We need face to face meeting and small areas that everyone has access to.</p> <p>The only meeting held in North Chingford were cramped with residents needing to have more information. There are many elderly, less well off and young families and residents who don't have online access. How do they read or access at the online consultation needed to make an informed response? How can that be considered highly compliant or sound?</p> <p>I feel I had many hours that feeling that this is all 'sub urban' and being put in place without meaningful and proper consultation.</p>	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. Alicia Coulter	S458 - Royal Egging Forest Golf Club	No	No	No	No	No	No	<p>The plan has not been properly prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a substantial part of the local plan area. It is not appropriate to allow tall buildings to be built in the area. In order to fit around 45 new homes into the area the buildings will inevitably have to be several storeys high. This is totally inappropriate for an area immediately adjacent to the forest.</p> <p>EWPF is seeking to build more new homes (27,000 by 2035) than required by the London Plan (Pg 1.76 154). Housing targets should not be met by only providing minimum standards such that the development overruns existing residential areas to the detriment of existing residents or adversely affects the aesthetic and historic character of areas.</p> <p>The plan is not consistent with Regional and National planning policy since EWPF is intending to build more new homes than the London Plan requires - see paragraph above.</p> <p>The London Plan states that tall buildings should only be developed in locations that are identified as suitable, a site immediately adjacent to the forest is clearly not suitable for a moderately tall building as it would totally dominate the landscape. The plan states that proposals should take account of and avoid harm to, the significance of London's heritage assets, the proposed does the opposite.</p>	<p>The maximum height of any development on the site should be no more than 3 storeys this is set out in the local plan rather than around 45 new homes. The number of new homes should be reduced.</p>	No		<p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of new build to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach that is aligned to that set out in the London Plan. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 23,640 new homes (1,364 per year) based on a London-wide assessment of capacity/available sites in 2021/78. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the provision of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>
Mike Chrimes	S458 - Royal Egging Forest Golf Club	No	No	No	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendments to the plan, may be rejected for failing to comply with "rules that are not transparent to consultees.</p> <p>Consultation on the site allocation (LPI) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPI) for 2026-2038. This has caused the views of many attending the online consultation meetings, and made it difficult to separate views on the main plan from the specific suggestions. At times it has been difficult to determine the intent of meetings which have been coloured by political point-scoring, while others have been subject to those making ordinary meetings difficult. It is difficult to determine the extent where consultation with the public has been legally compliant, never mind business and other stakeholders.</p> <p>One would lay however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificial low numbers, represented by the number of attendees allowed, or have been difficult to attend.</p> <p>In general however it has been apparent both from LPI and what has been stated at consultation meetings a major driver for the reclassification of development across the borough has been a housing target of c. 1,800 homes per year. While EWPF has a large waiting list (60,000), and central government guidance is driving all local authorities to ensure they develop affordable sites, it is not clear that all sites selected for housing development in the Borough will meet required housing need. More</p>	<p>It is suggested that until master plans are developed, through consultation for the main centres identified in LPI, consultation on individual sites should be avoided.</p> <p>In that regard one could ask why the Kings Road/Proctor Road estate cars not been considered for development, rather than this site so close to Egging Forest.</p> <p>With reference to site S458 the chief driver in bullet point order is to provide 45 homes. It is however unclear if density of development this can be done in practice without impacting Egging Forest in a negative manner.</p> <p>Mention is made of enhanced pedestrian and cycling connectivity but the main focus for many years to access Egging Forest is a walk crossing of Bury Road which is not sufficiently highlighted in the Neighbouring plan.</p> <p>Further through the recent survey of the Borough recent centres makes no mention of this site, with the Golf Club, while Chingford Golf Club is mentioned as a leisure centre. It is not suggested that the facilities should be reproduced which seems to be out of sync with the borough's strategic objectives for diverse leisure activities.</p> <p>The site summary mentions the site is part of the Metropolitan Green belt, and the implication for the site is not mentioned, it is not clear that the site should not be regarded as isolated from developments in Station road more generally, and would benefit from a site characterisation study carried out with stakeholders.</p>	No	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p>	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> •Market-led findings, the choices made in the plan are based on by facts. •The justification of the Local Plan's policies in the area, and •The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> •Sound infrastructure delivery planning; •Mitigation to regulatory or additional planning barriers to delivery; •Delivery partners who are signed up to it and •Delivery with the strategic objectives of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs', in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
Ian Connor	S458 - Royal Egging Forest Golf Club	No	No	No	No	No	No	<p>The plan does not believe that the plan fulfils the legal duty to consent the development needs of their area, align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 47). This is because we do not believe that the plan meets the definition of "Sound from the National Policy Planning Framework, paragraph 18. This programme of infrastructure provision housing about 48% to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable. The Council is seeking to build more than the London Plan requires. The London Plan (Pg 1.76 154) states 12,640 new homes over 20 years and EWPF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. This does not "positively and proactively promote economic growth. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through lower tower blocks. North Chingford is a suburban not urban. The location in particular is adjacent to forest land. North Chingford is the Green Belt. The Conservators of Egging Forest are far from impressed with the current plans for urbanisation of the area and its detrimental affect on the forest and local environment. 2) It is not socially sustainable. We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan would materially change the character of the area, undermining the gateway to the forest. It does not fulfil a social objective to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations, and by fostering well-designed, beautiful and safe places, with opportunities for active and social participation.</p>	<p>Site above - low rise housing only (certainly no more than 3 storeys)</p> <p>The affect of this and other developments on the local residents, and the local environmental impacts need to be addressed in more detail.</p> <p>At no point has this process felt like a genuine consultation plan "going through the motions" exercise. The detrimental affect on local residents (unsightly high rise, parking issues and environmental on the edge of the forest) would seem outweigh the benefits.</p>	No	<p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 23,640 new homes (1,364 per year) based on a London-wide assessment of capacity/available sites in 2021/78. Anthony G Thome Lip	S458 - Royal Egging Forest Golf Club	No	No	No	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>19. Before submitting a local plan to the Secretary of State under section 38A of the Act, the local planning authority must:</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 26, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they may be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1).</p> <p>18(7) a local planning authority must:</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare; and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments (i.e. not believe the plan to be sound).</p> <p>Currently Chingford suffers from a major problem with emissions from the Emirates Waste Fleet which results in higher than normal infant mortality rates and even though they state the new larger plan will be more efficient there will still be emissions. Although they suggest these toxic need to be removed (do they have doubts or will there be others which could be removed).</p> <p>A number of the proposed sites are right on the boundary of the LA2Z zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LA2Z charge. The rest of the area will also be subject to these increases and the proposed the natural air flows possibly result in pockets with even higher concentrations.</p> <p>Waltham Forests current population density is, due to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent COVID pandemic showed that areas of high density being allowed the areas to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1967 tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In an area that had in the 1930s that people needed space and New Towns were developed to reduce the population density.</p>	No	<p>Because there are too many unanswered qu</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of new build to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach that is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's green and blue infrastructure. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the Borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under- utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, development will be expected to make such that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>

The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires a character led approach to regeneration, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan requires that utilities infrastructure and connectors must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p>
Pauline Whitbread	Royal Epping Forest Golf Club			S438 - Royal Epping Forest Golf Club	Yes	No	No	<p>Has the plan been positively prepared? LBWF plan for the changes to the area next to the Chingford Plains and Epping Forest has not been positively prepared. LBWF has not provided a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities. This means that unmet needs from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. LBWF should be seeking to preserve the LOCAL CHARACTER of the area. Residents chose to move to Chingford and Highams Park as they are both low rise suburbs. If LBWF does not agree with this statement then why did you knock down the Chingford Hall Estate as well as the Cahall Estate and replace the streets with housing? This both became ghettos, so why are you considering creating ghettos again? North Chingford and Highams Park are the gateway to Epping Forest. It is totally inappropriate to change the character of the area from low rise suburban housing to tall high rise flats that will be totally unsuitable for the road. Queen Victoria either Epping Forest to the people and the residents of Chingford have a duty of care in all aspects of ensuring the forest is well cared for as well as the amenity gateway to the forest is also appropriate. Waltham forest intend to totally over develop the area of the Royal Epping Forest Golf Club. The local people felt so strongly about it that a meeting was held in St Peter's and St Paul's Church where there was standing room only to object to the proposal. You have now made this document to be completed by response to that it has become a huge challenge to try to complete it. There is a petition of over 6,000 signatures against this high rise development, which we will probably ignore. The council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 164) states 12,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to the COVID pandemic, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build in every possible space? Also, the housing target in the London Plan may be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing</p>	<p>leave it as it is. We do not need more over development. Infrastructure would need to be improved. Parking would become an issue.</p>	Yes	This is noted. However, it's through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would be forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. <p>The Local Plan requires a character led approach to regeneration, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The London Plan (2021) sets a 2 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 1,600 homes per year across London.</p> <p>Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p>	
Yvonne Sanders	Royal Epping Forest Golf Club			S438 - Royal Epping Forest Golf Club	No	No	No	<p>Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, and that unmet needs from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. No as LBWF should be seeking to preserve the LOCAL CHARACTER of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It's NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.9 164) states 12,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to the COVID pandemic, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build in every possible space? Also, the housing target in the London Plan may be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing</p>	<p>A tall building at this site would completely ruin the view of the forest for anyone who approaches it from the direction of Chingford Station. Henry VIII and Queen Elizabeth 1 visited this site to watch the hunt and from this historic view with a 5 storey building would be a noteworthy above 3 storeys should be permitted in this location as per Policy D3 of the London Plan.</p>	Yes	I wish to have the opportunity to explain why the Council's proposed developments are not suitable.	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that an undermine cycling, walking and public transport use.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Brian O'Leary				S458 - Royal Epping Forest Golf Club	No	No	<p>below the proposal to be unsound. There is no evidence that the Council has weighed up public forms versus benefits of any proposal to its members against contrary to its own LPS Strategic Objectives 16 & 17, Policies 72, 74, 83, as well as the guidance & spirit of Historic England Advice Note 4.5. While recognising the nature of the area as an arterial point to the borough and gateway to Epping Forest(6) 1.7, it then claims that "this increase in height would enhance the North Chingford skyline, joining the surrounding buildings together and giving the streetscape greater definition that "visual harm to the skyline writing " would be avoided" (8.1.6. (Draft Skyline Study 21/21)</p> <p>On the contrary, I submit:</p> <ol style="list-style-type: none"> 1. It is a Regent Heritage Area & SAC. It is out of character and a potential blot on the landscape (height & scale against spirit of guidance Advice Note 4.5 1.1.3), spoiling the aesthetic appreciation of a unique part of the borough as one enters and leaves Epping Forest. 2. As a Regent elsewhere, in Chingford had proposed, no attempt has been made to take views about how residents view the character of the area. Architectural views about the desirability of the aesthetic symmetry of tall blocks at either end of Station Rd., is merely another subjective view that has not been open to democratic scrutiny by the community. Consultation data has just been presented to each the looked at in isolation. 3. The building would overshadow the Plains, given the orientation of the sun, with effects on habitat and biodiversity. It seems no studies have been undertaken to predict impact. Not even a Shadowfall Analysis is presented, as shadowing is likely to be particularly significant in winter months. 4. Residents will inevitably occupy car parking space currently used by visitors to Epping Forest, reducing their access. 5. Epping Forest & Commons Committee are facing significant mitigation problems with increased use of Forest due to Covid social distancing and lockdowns (see minutes 16/12/20). This is likely to continue post Covid, as a small site and at the same time provide for "urban greening, tree planting and provision of open space" will mean the development, by necessity, will need to be tall tower block. This would be completely out of character for Station Road, and will impact views of the forest. <p>To justify such a construction, LBWF need to demonstrate an essential need, which is clearly not there. When the proposal to redevelop the Chingford were first made, the LBWF's argument was that these new homes were required to fill LBWF's spots for some larger London plan, presumably originating from County Hall. Furthermore LBWF argued that unless it is operated to fulfil this plan, County Hall would impose a solution.</p> <p>It would be interesting to know the basis of this Greater London Plan, what research was undertaken and who drew it up. Any research must have been based on 2020 data at the very least, and in all probability on data earlier than that. Furthermore, it almost certainly assumed that any trends observable at the time would continue unabated, and no doubt at a "worst case scenario" rate.</p> <p>However, London is now a very different place to what it was pre-Covid and pre-Brexit, two major events which have had a corresponding major impact on the need for additional housing. Many former London residents have returned to the EU, and a great many others have moved out of London altogether. In addition, post-Covid many people's work patterns have irremediably changed; these three factors taken together mean that commuting from London suburbs into Central London is highly unlikely to return to pre-2020 levels (at least in the foreseeable future).</p> <p>LBWF's proposal to build housing without parking spaces is quite unreasonable.</p>	Soundness is not possible given the sensitivity of the context. The only remedy is to abandon the proposal.	Yes	To ensure my representation obtains a full consideration	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets, There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Local Plan was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the Borough. During this in-person consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold engagement events online.</p>
Steve Macklin				S458 - Royal Epping Forest Golf Club	No	No	<p>This proposed development to build 48 apartments on this comparatively small site and at the same time provide for "urban greening, tree planting and provision of open space" will mean the development, by necessity, will need to be tall tower block. This would be completely out of character for Station Road, and will impact views of the forest.</p> <p>To justify such a construction, LBWF need to demonstrate an essential need, which is clearly not there. When the proposal to redevelop the Chingford were first made, the LBWF's argument was that these new homes were required to fill LBWF's spots for some larger London plan, presumably originating from County Hall. Paul Wellford				S458 - Royal Epping Forest Golf Club	No	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/arm rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They are no parking provision, which will pose a problem for other people. The area does not have enough infrastructure to cope, such as doctors surgeries. It is already a problem with the existing development and will be substantially worsened and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	if additional homes must be built in the area, they should be low to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provides should also be undertaken.	No	Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.	
Mr S P Kullier				S458 - Royal Epping Forest Golf Club	Yes	No	<p>The site is immediately in front of the gateway to Epping Forest with outstanding views which would be ruined by a building large enough to accommodate 40 new homes. The view to the forest is one of North Chingford's unique characteristics and should be protected at all costs.</p>	Proposed development of the site should not exceed the height of the current building or obstruct view towards Epping Forest from Station Road.	No	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Helen Chivers				SAS8 - Royal Epping Forest Golf Club	No	No	No	do not agree with building on this site as it is so close to the Green Belt and Epping Forest. 45 homes and other buildings will spoil the view and make that part of North Chingford particularly ugly. Building should be no higher than the existing buildings on the site.				Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the Biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Lambert Postals				SAS8 - Royal Epping Forest Golf Club	No	No	No	Too many properties in a short space. Traffic already there and there is no provision for this extra 49 as on traffic, as well as parking, electric, delivery, motorist and local schools	Too many properties in a short space. Traffic already there and there is no provision for this extra 49 as on traffic, as well as parking, electric, delivery, motorist, motorist and local schools.	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling Guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorist vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
David Matson				SAS8 - Royal Epping Forest Golf Club	No Response	No	No	The proposals are unsound on three grounds: 1)The housing targets in LPI remain unproven beyond assertion and emerge from the targets within the London Plan. As such they do not provide a sound basis for housing allocations on individual sites, such as SAS8. On the same grounds, LPI fails to comply with the Duty to Cooperate with the Mayor's housing targets. 2)The sustainable policy to enable a 15 minute city has been strengthened in LPI. SAS8 is within a multi-function centre with a tourist element. However, SAS8 has not formed part of any master planning of the Station Road area. Instead, each site has remained one of many, in a scatter plot approach that evaluates each site as an individual opportunity site. The community has not been able to shape SAS8 within its context, to suggest uses as part of a wider whole. The Site Allocation is therefore unsound in that it does not reflect this wider consideration within the master planning area. 3)The proposals make no reference to height, although the Council has made use of skyline studies that consider proposals up to 6 stories. LPI is the key document, so that the public should be able to understand the implications of development here. At the moment, there is no justification that the site has a potential for height. The site allocation is therefore unsound because the public is not fully informed of the nature of the possible development.	1.The housing targets in LPI should be revisited, justified or revised to the levels set out in the London Plan. Development expectations on individual sites should then be revised. 2.Borough wide/ North Chingford should be subject to a master planning exercise to tackle the twin issues of the 15 minute city and the areas visitor potential. 3.The Site Allocations potential for height should be part of LPI, to provide the public with fuller information on the prospective development.	Yes	I have already sent written comments on LPI, and have been invited to take part in the Examination this February	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectorate examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or higher than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Christopher Palmer				SAS8 - Royal Epping Forest Golf Club	No	No	No Response	A plan to squeeze 45 houses into such a small site cannot be compliant with density and/or height regulations. It is also unsound to propose that the plan will "provide enhanced pedestrian and cycle connectivity" when that connectivity is already perfectly adequate	Dramatically reduce the number of houses proposed to keep the development in keeping with existing neighbourhood in terms of density and height, as well as mitigating its impact on the rural nature of the surroundings	Yes	Because it's clear that those who developed the proposals have no understanding of the current nature of the area!	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or higher than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).

Christine Shepherd				S458 - Royal Epping Forest Golf Club	No	No	No	If this site is to accommodate 45 homes, it will inevitably mean flats, any development of more than three stories will seriously impinge on the important image of the "gateway to the forest" which is contrary to the spirit of the provision of green space for those living in the south of the borough. The image of Epping Forest around the country and farther afield will be damaged.	Any development on this site should be no more than two or three stories to maintain the long range views of the forest as you leave Chingford Station or approach from Station Road.			<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Lynn Ferguson				S458 - Royal Epping Forest Golf Club	No	No	No	Too reliant on technology to comment. This is my fifth attempt. No one knows or understands how this system works. Huge portions of the local population are therefore excluded. Put a barrier through residents doors, or is that too old school and simple.	As above, equal access to all to comment without the frustration of this redundancy over complicated system.			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local plan consultations have always been welcome either through the online portal or by email and post.
Lynn Ferguson				S458 - Royal Epping Forest Golf Club	No	No	No	Complete lack of local consultation other than on the methods with no detail or information regarding infrastructure to cope. No sensitivity to sites proximity to green belt.	Minimum infrastructure requirements. Proper consultation with local residents	No		<p>This response is noted.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Throughout the consultation period, the council will accept written representations either through the online portal or by email or post.</p>
Stuart Neckenbaum				S458 - Royal Epping Forest Golf Club	No Response	No	No Response	Not in keeping with local character. Changes a predominantly low rise area and impacts views and skyline. Parking needs ignored and effectively includes those who need their own transport for work or due to age or social circumstances. Not positively prepared. Not Effective: No additional infrastructure planned to cope with the totality of developments S458 - 58 Not consistent with regional/national policy Borough's plans greatly exceed targets. This development adversely affects local views and harm the setting of surrounding buildings. Any proposal of more than 5 stories would not meet policy DP of the London Plan.	Keep developments of the same height and as close to character as possible with surroundings. Make facilities on site suitable for a diverse demographic and their needs rather than a wishful desire of how people should be made to live.	No	Not necessarily me but certainly representatives of the affected local community who have been under represented in these planning decisions	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2018). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 72 'Designated Heritage Assets', there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from housing authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/ fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or other planning barriers to delivery; - Delivery partners who are signed up to it; and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</p> <p>The Local Plan should be flexible and able to be monitored. The Local Plan should include who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes.</p>
Bianca Westwood				S458 - Royal Epping Forest Golf Club	No	No	No	Because the local people do not want residential buildings in that location		No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S458 - Royal Epping Forest Golf Club	No	No	No		Just don't do it. The entrance to Epping forest should be left clear of high buildings. I have read through all other plans and whilst the others are particularly appealing I understand that housing is needed. This spot, however is where I believe the line ought to be drawn. I'm sorry that I can't be any more precise than that. I'm not sure why you expect the general public to be able to contribute in such a way.			The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFAC). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Taron				S458 - Royal Epping Forest Golf Club	No	No	No	I would love to put the detailed and eloquent responses that perfectly articulate how these plans are out of keeping with the area, aren't the type of housing required and just plain aren't necessary. However after witnessing the utter incompetence and illegal behaviour of LBWF during the mini Holland 'consultation' and the subsequent farcical implementation that ruined the Walthamcross Village area. All whilst introducing traffic chaos and subsequently increasing pollution! Along with the high rise developments on every single car park and available space. So I'll egg for the comment earlier... You're corrupt, incompetent and operate illegally! You should be ashamed of yourselves.				This response is noted.
Tom Wise				S458 - Royal Epping Forest Golf Club	No	No	No	Do you really have to ask why this is inappropriate?	This is adjacent to protected forest land.	No	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MP.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFAC).
Helen Chivers				S458 - Royal Epping Forest Golf Club	No	No	No	You should not be building flats so close to the forest which is a beauty spot enjoyed by thousands.	Low rise, attractive traditional style or preferably TO NOT BUILD ANY FLATS AT ALL. Most modern buildings look like ugly boxes and are not in keeping with the local architectural style.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).
				S458 - Royal Epping Forest Golf Club	No	No	No	It doesn't provide the housing needed by local residents. Its location makes it valuable to the council.	Build affordable housing as per the brief	No		There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations, for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Mrs Geraldine Kendall				S458 - Royal Egging Forest Golf Club	No	No	No	<p>This process is too officious - it risks excluding residents from being heard. I am not a legally qualified person. I am relying as a long term resident of Chingford Green Road. I consider all Local Plans in North Chingford to be unsound. In the case of the Royal Egging Forest Golf Club, on Green belt land and facing into a protected green space, I consider this to be a wholly inappropriate overland and over call development given its position on the boundary of Chingford Plains and Egging Forest. Such a development will enhance the gateway to Egging Forest, and rob it of its rural feel and character and forever spoil views from across the Plains, for both residents and visitors. There is no way this proposal, can ever be considered 'sustainable'.</p> <p>I am alarmed by this attack on green belt, in such close proximity to Egging Forest, Chingford, a suburban, with the North Chingford area, in particular, having a semi-rural feel, which is much loved by residents and visitors. The area is mainly 2/3 story residential buildings, and as such, this is an entirely unsuitable and unnecessary proposal for an area which was once part of Essex and is still strongly linked to Egging Forest, through remnants of the forest, that now lie within the London, EA postcode, including Chingford Green at the other end of Station Road.</p> <p>My family and I (choose to live in North Chingford because of its low rise, open, village feel / semi-rural character. The LP will destroy everything that makes our local community special and unique - and the Council refuses to listen. I am staggered that LDFW is ignoring this important historical boundary with Egging Forest (an SS20, deep, local opposition).</p> <p>More importantly, the LP seeks to build far more homes than is actually required by the London Plan, and has failed to take into account Brexit and fall in London population; the Covid pandemic; and move towards working from home away from London, and the leveling up agenda requiring less proposed developments would be met of leaving with the area, these could be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, safety/night, additional demand for parking. Consultation flawed as no sufficient public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life, etc.</p>	<p>I am a local resident - I am not equipped to say why my suggestions would make the LP legally compliant and sound.</p> <p>LDFW needs to listen to its residents/local community and acknowledge there are other ways of doing things instead of ignoring them and ploughing on with their proposals regardless as they have done - it makes you feel totally powerless.</p> <p>Reduce the number of proposed homes in the LP so the required number only and remove sensitive sites such as the Royal Egging Forest Golf Club.</p> <p>Bring back empty domestic properties around the borough into use through a programme of refurbishment.</p> <p>Respect the Green belt and restrict any development in suburban neighbourhoods, to low density, low rise - no more than 3 storeys. Only use site specific high quality, aesthetically pleasing design, respecting local character, architecture, and history for sensitive proposals such as Royal Egging Forest Golf Club and Chingford Green and nearby developments adjacent to forest boundaries - unlike ugly concrete and glass box buildings with balconies which are springing up around the borough.</p> <p>Include a better mix of housing in the LP - houses, maisonettes and bungalows, with garages - not just end-terrace, townhouse flats.</p> <p>Provide parking for each and every home and all necessary requirements / amenities such as school places, public transport, and healthcare.</p>	No		<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value in any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p>
Lloyd Parkinson				S458 - Royal Egging Forest Golf Club	No	No	No	<p>Proposed developments would be met of leaving with the area, these could be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, safety/night, additional demand for parking. Consultation flawed as no sufficient public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life, etc.</p>	<p>Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,642 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Tim Hancock				S458 - Royal Egging Forest Golf Club	No Response	No Response	No Response	<p>Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, degradation to the surrounding environment, negatively affecting the current residence?)</p> <p>This is an incredibly and arbitrary decision to simply drop a development in to this community is a classic case of developers maximizing their profits and externalizing the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions centring on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is puppeted by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an architectural and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are</p>	<p>Reject based on continued degradation to local community and strain on local resources, as pointed out above.</p>	Yes	<p>This development is another step on the way to eroding a local area and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing groups of breakaway speed, with a contempt for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will undermine the future wellbeing of the indigenous community?</p>	<p>Offensive Response</p>
				S458 - Royal Egging Forest Golf Club	No	No	No	<p>North Chingford is supposed to be 'the gateway to the forest'. Any development over 2 storeys would be detrimental to the village</p>		Yes		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. 				S458 - Royal Egging Forest Golf Club	No	No	No	This is one of the most ridiculous proposals Founded 1888 Are these people determined to destroy any building they find in the Chingford/Highams Park areas that does not conform to their "glass & steel" agenda? Are any of these proposals being supported or being put forward by local residents of Chingford/Highams Park areas? Are they in fact being proposed by people that do not live within the Chingford/Highams Park areas?	NO COMMENT			In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings; as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Miguel Loureiro				S458 - Royal Egging Forest Golf Club	No	No	No	Why hasn't the council asked the local community what they want? This is destroying a green space to build houses while at the same time destroying the village feel of Chingford	Consult with the local community on what they would want for that space. Why not build a playground for children? This is sorely missed in the area	Yes	In a resident's life I should have a say in what happens to my neighbourhood	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the borough. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Ray Anderson				S458 - Royal Egging Forest Golf Club	No Response	No	No	Council is building above housing requirements for the Borough, why? See why Claire Coghill resigned... all planning under her watch should scrap....	Council need to be thoroughly investigated as corrupt to core. No benefit to Chingford citizens at all.	Yes		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 12 year minimum housing target for Waltham Forest of 12,640 new homes (1,054 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not down to be justified. The revised target (84% short of the Council's identified housing need of 1,210 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Christopher Thorndyke				S458 - Royal Egging Forest Golf Club	No Response	No	No	The site is occupied by a historically important Golf Club which can be used by the local community (membership & hall hire) it is in a ideal location in the edge of the golf course and next to chingford plains & forest. To have such a high density of flats would be awful and totally change the preserved characteristics of the area.	The existing golf clubhouse should remain but the old 1930s house used by Osborne could be redeveloped with a few 2 storey flats (8-7)	Yes		In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings; as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The definition of tall buildings across the borough is sound and in conformity with the London Plan, as agreed in the Statement of Common Ground AT1/RE27. The Local Plan is careful to identify the differing characters across the borough and sets clear policy expectations relating to them. Particular attention in relation to this is drawn to Policy 8 - Character led intensification and the new 'Building height' policy proposed through Main Modifications. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the borough. The Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of sports playing pitches.
Cat				S458 - Royal Egging Forest Golf Club	No	No	No			No		This response is noted.
Rebecca Boylen				S458 - Royal Egging Forest Golf Club	No	No	No	No parking. Housing too high should only be 2 storey as other properties around. No infrastructure in place/ no local schools - nearest school is catholic and not all inhabitants are catholic. No parking. Edge of green space - needs to be in keeping.	Lack of disabled parking. Lack of parking.	No		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Algalan Woodman				S458 - Royal Epping Forest Golf Club	Yes	No	Yes	Waltham Forest Council quite rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. Access to the south of the borough, access to the marshes is being used to support intensive development. In contrast, in the north of the borough, developments must be designed to "minimise access to Epping Forest SAC" "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.	Yes	It is essential that green spaces have a voice at the table during the examination hearing sessions.	The SA/ND strategy will be delivered as part of the Local Plan to ensure the spaces identified within it are improvements as development comes forward. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Sharon Medhurst				S458 - Royal Epping Forest Golf Club	No	No	No	No an LBWF should be seeking to preserve the 'Local Character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents' views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1.9) 164) states 12,640 new homes over 10 years and LBWF is proposing 27,000 new homes by 2031 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build in every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South East and more in the North as part of the levelling up programme. The reports of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property that has future proofed for them.	Impacts: C Development proposals should address the following impacts: 1) Visual impacts a) the views of buildings from different distances - long range views. These require attention to be paid to the design of the top of the building. It should make a positive contribution to the existing and emerging skyline and not adversely affect local or strategic views. mid-range views from the surrounding neighbourhood - particular attention should be paid to the form and proportions of the building. It should make a positive contribution to the local townscape in terms of height, proportions and materials. b) whether part of a group or stand alone, tall buildings should reinforce the spatial hierarchy of the local and wider context and aid legibility and wayfinding. c) architectural quality and materials should be of an exemplary standard to ensure that the appearance and architectural integrity of the building is maintained through its lifespan. d) proposals should take account of, and avoid harm to, the significance of London's heritage assets and their settings. Proposals resulting in harm will require clear and convincing justification, demonstrating that alternatives have been explored and that there are clear public benefits that outweigh that harm. The buildings should positively contribute to the character of the area as buildings in the setting of a World Heritage Site must preserve, and not harm, the Outstanding Universal Value of that World Heritage Site.	Yes	The HBA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by or to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
Richard Iles				S458 - Royal Epping Forest Golf Club	No	No	No	This proposal to build 45 homes on the edge of Chingford plan, a large open area of Epping Forest will need a tall building highly visible against the Forest background quite out of keeping with the SAC and nearby heritage buildings e.g. Chingford Station and Victorian residences along Forest Avenue. It also has safety hazards due to its immediate proximity to a busy junction.	Reject. Unnecessary development immediately impinging on the SAC. I cannot see how access to the SAC can be improved with such a building adjacent to it.	No	This is noted. However, it's through the adoption of Local Plans, that the required level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.	The HBA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Jennie Heath				S458 - Royal Epping Forest Golf Club	No	No	No	This plan isn't in keeping with the surroundings. This is on the coup of forest land & should remain as such	The land should move used for housing	No		The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Raymond Moffat				S458 - Royal Epping Forest Golf Club	No	No	No	This development will be out of character with the area, it will be encroaching on the natural beauty of Epping Forest by its size and the character the area is of predominantly 2 storey construction	Reduce the size of the development, reduce the height to the 2 storey average thereby protecting the views to and the character of Epping Forest and Chingford plans.	Yes	There is no point putting the proposal out for public consultation if you don't then listen and act on their views, participation is part of that process	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by or to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S458 - Royal Egging Forest Golf Club	No	No	No	This plan would be appropriate in a high rise environment area like that development at the junction of Blackhorse Road and Forest Road in Walthamstow.	I'm not sure how planners could possibly think this plan is in any way sympathetic to area which merges into the open common land and Forest. Developers understand the need to complement surrounding building which do not detract from the natural beauty of the area. This proposal does not come close to that idea.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Jane Edison				S458 - Royal Egging Forest Golf Club	Yes	No	No response	You state 40 new homes. I assume this is flat. How tall will the building be? Will they run the current views that individuals have from their current dwellings? What about the parking of their cars? Will all roads in North Chingford be switched to parallel parking so that local residents can park throughout the day. This is a real issue and one that needs to be addressed with all these plans for development. Will Forest View be made into a public road so that residents could park here at the moment the road is a real nightmare.	1) Max of 3 storey tall 2) Permit parking in the whole of North Chingford to allow shoppers and residents to park without penalty. This will allow for the increase in residents as a consequence of all of these proposals that have been put forward in North and South Chingford. 3) Forest View to be made a public road, be brought up to standard and residents parking applied to the area.	Yes	An increase in North Chingford's future.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Peter Leggett				S458 - Royal Egging Forest Golf Club	No	No	No	Any development should not exceed the height of any existing buildings	Provision for car parking per residence and not exceed the height of existing properties.	Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.
Linda Ball				S458 - Royal Egging Forest Golf Club	No	No	No	One of the better parts of Chingford going to be spoilt by crammed in housing bringing the character of the area down - as in some many other parts of Chingford. Take one or two buildings down and cram in 50-100 more. Makes me mad	Let us keep a social club. Why does everything have to be made into small living accommodation.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Ray Anderson				S458 - Royal Egging Forest Golf Club	No response	No	No	Why is council building excessive housing? Above and beyond the requirements of the Mayor of London	Transparency in all council dealings as they are all corrupt to the core. Look at Clare Capill and why she 'resigned'...	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.

If yes, please explain why?	Council's response
Kathryn Uman				S458 - Royal Epping Forest Golf Club	No	No	No	This plan is disgraceful as it would close down a well used local amenity and destroy the environment next to the Forest. Any tall building over 2 stories would be out of place here.	The building should remain as it is and this plan be rejected	No	No one takes any notice of emails	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Nicky				S458 - Royal Epping Forest Golf Club	No	No	No	Leave the forest alone. We need nature to survive. They clean our air. We don't need more pollution here. Those trees are more valuable than apartments.	Scrap that plan	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC) The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Stewart Newton				S458 - Royal Epping Forest Golf Club	No	No	No	Proposed development would be out of keeping with the area and cannot be delivered with policy compliant levels of affordable housing, no parking provision disadvantaging older people. The plan seeks to build more homes than required by the London Plan. Consultation failed as no feedback/public meeting to advise residents, only an online zoom meeting. Shortage of doctors, dentists, schools etc.	Provide parking, healthcare, education, etc.	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Susan Reynolds				S458 - Royal Epping Forest Golf Club	No	No	No	Recreational ground being taken away	leave site as it is	No	-	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Ferry Dale-Hougenide				S458 - Royal Epping Forest Golf Club	No	No	No	The town does not have public services to sustain the current residents in the borough. Adding more homes in North Chigwell will stretch small amount of services in the area. I.e doctors, schools, etc.		No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Mal Trenham				S458 - Royal Epping Forest Golf Club	No	No	No	I find it hard to believe that being right on top of the SAC that the Conservation would agree to such a building on that site. I realise the site is privately owned and the freeholder may wish to "cash in" on LBWF's suggestion to develop. The site is an integral part of the gateway to the forest and as such the proposals are both unsound and fail to comply with the duty to co-operate by not listening to residents' objections.	leave the golf club alone as that would make this part of the Local Plan compliant and sound.	No	I would like the opportunity to bring what is going on and whether further input from residents will be listened to.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Sandra Beach				S438 - Royal Egging Forest Golf Club	No	No	No Response	After the pandemic and move towards working from home many residents are moving out of the area so do we really need the extra built. A local, cheap leisure centre, golf course and library are all attractive incentives for residents to stay in the area. Residents no longer need to commute to the city and are moving to less congested areas offering the above.	Don't have any idea of the legality, like most people, but the law could be wrong! People don't want to live in areas inundated with blocks of flats, usually ugly ones, and our facilities are an asset. Is residential consentment not part of the Local Plan?			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
				S438 - Royal Egging Forest Golf Club	No Response	No	No Response	Over development in a very sensitive area adjacent to Chingford Plains	Reallocate use to amenity space more appropriate to its location	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
Marilyn Gould				S438 - Royal Egging Forest Golf Club	No	No	No	Does Waltham forest actually need all this extra housing as I've been informed that due to Brexit there are not so many people coming to live in the Borough.				The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
C Madden				S438 - Royal Egging Forest Golf Club	No Response	No	No Response	The ambition for 45 homes is far too high for this area. It should be scaled back or the site considered for other use.		No		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. If yes, please explain why?	Council's response
				S458 - Royal Egging Forest Golf Club	No	No	No	It doesn't provide the housing needed by local residents, its location makes it valuable to the council.	Build affordable housing as per the brief	-	-	There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.
				S461 - Royal Egging Forest Golf Club	No	No	No	This is a gateway to the forest. North thighted a semi rural location, unlike the rest of LBWF. This is clear overdevelopment and excessive and not in keeping with the remainder of the area or the will of the local people	-	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Raymond Moffat				S461 - Royal Egging Forest Golf Club	No	No	No	The council is proving ahead without proper consultation blaming Covid for this and totally ignoring the objections of local residents about the unsustainability of their plans for North Chingford and the surrounding areas!	It is intrusive and out of character for the area and needs to be drastically reduced in size to blend in to the where it is	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
				S458 - Royal Egging Forest Golf Club	No	No	No	No as LBWF should be seeking to preserve the 'Local Character' of the area - which is of low rise suburbs of modest houses at the very edge of London - the GBTFW to Egging Forest it is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 564) states 12,640 new homes over 10 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South East and more in the North as part of the levelling up programme. The majority of the new properties are flats. The Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Witham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is future proofed for them. Delivery of housing targets should not be delivered in such away as to only provide minimum standards, and should not be acquiesced in much that development overcrowds existing residential areas to the detriment of existing residents or adversely affects the character of areas which are valued by existing residents. Land intensification should take into account the aesthetics, the historic context and the value of existing buildings such as may be identified as important by local communities in such areas designated for development. The proposals for no parking are social engineering. With no parking for vehicles,	Impacts C Development proposals should address the following impacts: 1) visual impacts a) the views of buildings from different distances; 2) long range views " these require attention to be paid to the design of the top of the building. It should make a positive contribution to the existing and emerging skyline and not adversely affect local or strategic views; 2. mid-range views from the surrounding neighbourhood" particular attention should be paid to the form and proportions of the building. It should make a positive contribution to the local townscape in terms of legibility, proportions and materiality 3. immediate views from the surrounding streets "attention should be paid to the base of the building. It should have a direct relationship with the street, maximising the pedestrian scale, character and vitality of the street. Where the edges of the site are adjacent to buildings of significantly lower height or parks and other open spaces, there should be an appropriate transition in scale between the built building and its surrounding context to protect amenity or privacy. 4) whether part of a group or stand alone, tall buildings should reinforce the spatial hierarchy of the local and wider context and aid legibility and wayfinding 5) architectural quality and materials should set of an exemplary standard to ensure that the appearance and architectural integrity of the building is maintained through its lifespan 6) proposals should take account of, and avoid harm to, the significance of London's heritage assets and their settings. Proposals resulting in harm will require clear and compelling justification, demonstrating that alternatives have been explored and that there are clear public benefits that outweigh that harm. The building should positively contribute to the character of the area 7) buildings in the setting of a World Heritage Site must preserve, and not harm, the Outstanding Universal Value of the World Heritage Site, and the ability to appreciate it. The Council must also address the problem of infrastructure, where are the schools, doctors surgeries etc to support an increased population.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
David Muckelbauer				S458 - Royal Egging Forest Golf Club	No Response	No	No Response	Why put a bid on the landscape, is there no place that you want to ruin	-	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. 				S458 - Royal Epping Forest Golf Club	Yes					Yes		This response is noted.
Royal Epping Forest Golf Club				S458 - Royal Epping Forest Golf Club	Yes	No	Yes	Re: reshaping the Borough Waltham Forest Local Plan LP2 This letter contains the response of the members of Royal Epping Forest Golf Club (the Club) to the planning application for 25 dwellings plus commercial unit, as well as an accommodation necessary to enable the golf club to survive and prosper... We feel we must first briefly explain a little about the Club. The Club owns all of Strategic Site S458. The site has the Clubhouse, putting green and sheds, in a separate small house called Crossways which has a frontage on Station Road is the club's business of our tenant. The Club is the oldest golf club in the borough and the oldest in Essex. It was founded in 1888 and shortly thereafter secured Royal patronage. The Club is the only Royal club in Essex Golf Union and is one of only 64 or so golf clubs around the world with patronage from our Royal Family. The Club has a close working relationship with the Corporation of London who hold out the Forest as Trustee. The Club is a members Club, a not-for-profit organisation which is run by the members, via a Management Committee, for the members. The Management Committee members are voted into office by the club members at Annual General Meetings. The Club has 4 staff. The tenant trades as Chingford Chiropractor, he has been a tenant for over 20 years and our members use his services. Our tenant has 2 employees. Over the past few years the Clubs Management Committee have been discussing options around golf club in terms of sustainability and longevity. The Club members are committed to the long term life of the Club and have authorized the Management Committee to explore options to develop the Club site.	The density of the development of site S458 (Royal Epping Forest Golf Club) in LP2 should be reduced from 45 dwellings plus commercial unit, to 25 dwellings plus commercial unit as well as an accommodation necessary to enable the golf club to survive and prosper...		This is about the very survival of this historic Club	This Response is noted.

Mike Chivins				S459 - 472-542 Larkhall Road and James Road	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules that are not transparent to consultees." Consultation on the site allocation LP2 element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan LP2 for 2020-2026. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been coloured by political posturing, while others have been subject to those making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had significantly low numbers, represented by the number of attendees shown, or have been difficult to get into online. In general however it has been apparent both from LP2 and what has been stated at consultation meetings a major driver for the identification of development across the borough has been a housing target of c. 1300 homes per year. While EWFC has a long waiting list (60000), and central government guidance is driving all local authorities to ensure they develop	There should be clearer reference to the Highams Park Plan with reference to site 458 the chief driver in local plan order is to provide 45 homes. It is unclear whether this is justified alongside the loss of local office accommodation occasioned by the development, despite the commitment to non-residential floorpace. The footprint of the site is a key one in Highams Park retail centre, and an awkward one to develop with a narrow road opposite the Broadway modern housing at Wilton Place. The suggestion of a tall building seems to be at odds with the recent (2020) Highams Park Plan which allows for development in character with the neighbourhood. There are no tall buildings in the retail centre, and it would change the skyline of Highams Park and the centre's essential suburban character. The site is occupied by a variety of businesses. There would be a potential loss of character and variety which is supported by the NP plan if the site were developed monolithically. It is suggested that provision for a tall building is dropped from this site and the site is withdrawn pending further consideration with etc. Highams Park Planning Group who are recognised consultees. The boundary is close to the railway platforms yet this is not described in a sensitive boundary, surely it would be for anybody on the development and should be shown as such. It is a large target that this site is identified for development yet that of the legal Centre, currently something of an inchoate due to neglect, but a key to the future character of the area is not included		I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The Regional Planning Policy Framework (RPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/Fact finding: the choices made in the plan are based up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Absence of regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it and - Consistency with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs", in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				5459 - 472-510 Leikhall Road and James Road	No	No	The plan will light the area making it very dark and drab and not in keeping with the area and the principles of the neighbourhood plan limiting height and density of development and respecting impact of any additional car parking and car journeys on existing neighbourhoods.	Much lower height and reduced accommodation so as not to overwhelm the local schools and Doctors			<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newtowny alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newtowny alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>
Anthony G Thomas	Tip			5459 - 472-510 Leikhall Road and James Road	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must" (A) make a copy of each of the proposed submission documents and a statement of the representations available in accordance with regulation 35, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they may be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 38(1). 11.(7) A local planning authority must" (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (C) The bodies or persons referred to in paragraph (2) are" (B) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan.	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient they will still be emissions. Although they suggest these have to be removed I do have doubts as will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning there will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. Not the rest of the area will also be subject to these increases and the proposed speed the natural air flow possibly result in pockets with even a higher r concentrations. Waltham Forests current population density is far too high and as such we have seen significant increases in social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960s tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In 1911 it was calculated in the 1920s that people needed space and New Towns were built to reduce the population density. This was a lesson to be learned.	Yes	Because there are too many unanswered	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through a L100 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
Gordon Turpin				5459 - 472-510 Leikhall Road and James Road	Yes	No	This submission to the Highams Park Planning Group. We are the designated Neighbourhood Development Forum for the Highams Park Area. The Highams Park Planning Group considers this site allocation within the Local Plan to be unsound, as the inclusion of a new station entrance is unwanted and unnecessary and will cause development on the site to be of a height and density that will completely change the much loved "stage character" of Highams Park District Centre. Our grounds for this allocation being unsound are, as follows: 1. To meet the housing targets proposed for this site, and the inclusion of a new station entrance station will require building heights of up to 7 stories. This is in excess of planning application ID 202046 submitted to Waltham Forest Council which includes 68 flats, active ground floor space and a new station entrance. This application is for just one part of the site. There are no other 6 or 7 story buildings in close proximity to the Site 5459 and because of this, the level of development proposed will be overly dominant and totally out of character with the surrounding buildings. During our consultation on the Highams Park Neighbourhood Development Plan (HP Plan) most residents were clear that they wanted the plan to include policies that would preserve the much-loved character of the Highams Park District Centre and that "new development should fit in. We included policies in the HP Plan to meet this requirement and the HP Plan was approved by referendum with a majority of 96.4% in March 2020. The fact that the HP Plan was adopted by the Council in July 2020, should have been a major consideration in their Site Allocation Document for the area. However, planning officers have clearly paid little heed to the HP Plan or to the many objections raised by local residents to this site allocation in their site allocations consultation. The following narrative shows how the Councils proposals fail to meet the requirements of the HP Plan.	The new station entrance should be dropped, as it is unnecessary given that there is already single level access to both platforms, so a third entrance is not needed. A new entrance is also most likely to be given that planning application ID2030 was withdrawn on 08 December this year before it was considered by Planning Committee due to questions over how it would be funded, especially given 75% well documented financial problems. Removal of the cost of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five stories. That part of the development abutting the station should be no more than four storey and any five storey elevations further down towards 480 Leikhall Road. Efforts should be made such that the design matches the four storey Highams Park Tenax Development on the other side of Leikhall Road to create a balanced effect and better architectural symmetry.	Yes	I am Chair of the Highams Park Planning Group and it is my opinion that some of the site allocations fail to recognise the wishes of local residents as expressed in the Highams Park Neighbourhood Development Plan and we should take the opportunity to express our views to the planning inspector	<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these criteria that would lead to either substantial harm or total loss of a designated heritage asset.</p>
Ian Ashley				5459 - 472-510 Leikhall Road and James Road	No	No	The Local Plan does not take account of the ending and adopted Neighbourhood Plan. In particular it does not respect limitations on height or change of character of the town centre and station. Furthermore employment at this location would be lost while development was in progress and unlikely to relocate back to Highams Park after development.	Follow the principles of the Neighbourhood Plan limiting height and density of development and respecting impact of any additional car parking and car journeys on existing neighbourhoods			<p>Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. Lloyd Parkinson				S439 - 472-530 Larkhall Road and James Road	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public/online meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were re-allocated across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London.</p> <p>This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Paul Willard				S439 - 472-530 Larkhall Road and James Road	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook housing properties and have a serious detrimental effect on privacy. There is no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that previous should also be undertaken.	Yes		<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Mike Schrn				549 - 472-530 Larkhall Road and James Road	No	No	No	The local Plan is not sensitive to either the local plan nor desirable does not conform to the architectural or low rise neighbourhood buildings and will bring high density unnecessary development into one of the most polluted points in the area. Traffic converging from four directions and rail crossing barriers meaning static traffic for fifteen to twenty minutes every hour. The height of the buildings is also far in excess of the local character of Highams Park. In fact the emphasis should be on the park not the Highams.	You have completely ignored the Highams Park Plan and the majority of residents who clearly expressed their desire that Highams Park should retain its character when any new planning decisions were taken. Waltham Forest Council actually adopted it in July 2020 and appear now have ignored it. Democracy seems to have a low profile now. Yet you continually boast that you're "Green" No, the voting public are green for voting in the same old "we got your vote last time we'll get it again" political campaign.		Democracy cannot be exercised unless people take part.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/23. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan at the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,300 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Danielle Frazee				549 - 472-530 Larkhall Road and James Road	No	No	No	Building on this land will mean loss of a public swimming pool and health centre which are widely used by the community. As a young family just moved into the area we need these facilities and it is not clear if they are being replaced or quality of them. Also, more homes will mean more doctors, schools etc which again as new people to the area we are already finding difficult to find. More homes bring more cars and the area already has too much traffic and no parking. It will make the area more congested and possibly dangerous in terms of traffic.	Replacement swimming pool and health centre. Limited number of houses with parking built to ensure overcrowding does not happen.	Yes		The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a nonwhitey alleviation of congestion, parking problems and improve air quality. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a nonwhitey alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic operation. Moreover, the local Plan directs planned growth to previously developed sites that are currently under-utilised and best to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
				549 - 472-530 Larkhall Road and James Road	No	No	No	The proposal has plainly ignored what was already detailed by the local Highams park planning committee. It has failed to keep its character with Highams park and has ignored all previous concerns raised.	Reduce the height of the building which may or may not mean a reduction of flats but anything above three stories is out of character for the area. Detail how what additional services for doctors and schools will be put in place.	No		Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>
Dillon				S459 - 472-530 Larkhall Road and James Road	No	No	No	This high rise building will be a blight on the area and is not in line with the village setting of Highbury park. It does not take into account local people as they have not all been consulted and a proper legal consultation needs to act upon the results of the consultation	Inclusive consultation by way of consultation letters sent to every person over 18 living in Waltham Forest. Act only on the results of the consultation. Alternatively have the consultation with all the representative residents assoc committees within the borough and then all those that are not represented by any committee to obtain the views as above.		Please explain this question	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
				S459 - 472-530 Larkhall Road and James Road	No	No	No	This proposal is ignoring what was said by the Highbury park planning group and which is largely the opinion of local residents. It is not in character with Highbury park and has ignored peoples reasonable concerns.	Height reduced to be in keeping with surrounding buildings. Off street parking allocations so cars can stop buy stuff locally and pick up people without fear of a ticket. Young families need a large informal cafe where they can wheel a buggy in, feed a baby, parents and kids get out, baby change and family toilet (inc a dog). This would truly add to HP family appeal. Especially if all you want to build is flats.	Yes		<p>Development proposals will need to be in general conformity with the Highbury Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Emily Millard				S459 - 472-530 Larkhall Road and James Road	No	No	No	The proposed flats are too high and not compliant with the Highams Park local planning agreement; there is no parking provision and people do have cars and want to drive. There is already a shortage of adequate parking in the area. It is unsound on this basis. It will also block the sun light for local businesses and as a result make the area less pleasant to walk around and sit outside in the many local cafes. Accommodation is required but there are now many flats or apartments and no houses with gardens for families to enjoy.	Lower height and some parking available. Housing is preferable, but if not, more green recreational space.			Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
				S459 - 472-530 Larkhall Road and James Road	No	No	No	This development will completely change the visual impact for local residents. Local residents do not want this change but their views are not being respected. The Tesco signage already overshadows the centre of Highams Park	Any developments should be in keeping with the area as it exists and not impact the already chronic traffic and parking problems in this area	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Wastham Forest Waste and Recycling guidance for the developer sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
				S459 - 472-530 Larkhall Road and James Road	No	No	No				My right having lived here with my children for 69 years	This response is noted.
C Brett				S459 - 472-530 Larkhall Road and James Road	No	No	No	Does not follow Highams park guidelines as agreed	maximum height 3 floors to not overtop local area	Yes	as a local resident for all my life consider local views to be important	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Stephen Lovell				S459 - 472-530 Larkhall Road and James Road	No Response	No	No	<p>consider this site allocation within the Local Plan to be unsound, as the inclusion of a new station entrance is unwarranted and unnecessary and will cause development to be sited in a way that is not in the public interest. I completely change the much loved "village character of Highams Park District Centre. The grounds for this allocation being unsound are, as follows:</p> <ol style="list-style-type: none"> To meet the housing targets proposed for this site, and the inclusion of a new station entrance station will require building heights of up to 7 storeys. This fact is evidenced by planning application ID 202040 submitted to Waltham Forest Council which includes 6/7 storey, active ground floor space and a new station entrance. This application is for just one part of the site. There are no other 6 or 7 storey buildings in close proximity to the Site S459 and because of this, the level of development proposed will be overly dominant and totally out of character with the surrounding buildings. The Highams Park Planning Group consultation on the Highams Park Neighbourhood Development Plan (HP Plan) found most residents were clear that they wanted the plan to include policies that would preserve the much-loved character of the Highams Park District Centre and that "new development should fit in. Policies were included in the HP Plan to meet the requirement and the HP Plan was approved by referendum with a majority of 56.4% in March 2020. The fact that the HP Plan was adopted by the Council in July 2020, should have been a major consideration in their Site Allocations Document for the area. However, planning officers have clearly paid little heed to the HP Plan or to the many objections raised by local residents to this site allocation in their site allocations consultation. The following narrative issues from the Councils proposals fail to meet aspirations of the local residents or respect the policies in the HP Plan regarding the character of the District Centre. In view of the above it is clear that the level of development proposed for Site S459 will be: Contrary to the Highams Park Plan Policy COP2 with regards to character and design, and, contrary to the extent and emerging Local Plan in which the level of development will not just be within in breach of HP Plan Policy COP2, it will completely deconstruct the existing character of Highams Park 1 in line with the Highams Park Planning Groups view which then bases on extensive consultations with local people over the past eight years, that local residents highly value the light suburban character of the area surrounding Highams Park and do not want to see it dominated by an incongruous block of flats which will give the area a much more urban and inner city feel. 	<p>The new station entrance should be dropped, as it is unnecessary given that there is already single level access to both platforms, so a third entrance is not needed. A new entrance is also most likely infeasible, given that planning application ID2030 was withdrawn on 6th December the day before it was due to be considered by Planning Committee due to questions over how it would be funded, especially given TfL's well documented financial problems. Removal of the cost of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five storeys. That part of the development abutting the station should be no more than four storeys and any five storey elevations further down towards 480 Larkhall Road. Efforts should be made such that the design matches the four storey Highams Green Terrace Development on the other side of Larkhall Road to create a boulevard effect and better architectural symmetry.</p>	No	It's my local area and I want to be kept informed	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas.</p>
A Harber-Rally				S459 - 472-530 Larkhall Road and James Road	No	No	No	<p>This level of development will not just be within in breach of HP Plan Policy COP2, it will completely deconstruct the existing character of Highams Park 1 in line with the Highams Park Planning Groups view which then bases on extensive consultations with local people over the past eight years, that local residents highly value the light suburban character of the area surrounding Highams Park and do not want to see it dominated by an incongruous block of flats which will give the area a much more urban and inner city feel.</p>		No	It's my local area and I want to be kept informed	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
				S459 - 472-530 Larkhall Road and James Road	No	No	No	<p>This is not in keeping with surrounding buildings. There is no infrastructure for this level of building. Does this sit with the Highams Park plan?</p>		Yes		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Jane Ridgman				S459 - 472-530 Larkhall Road and James Road	No Response	No	No	<p>The height of the proposed redevelopment would undermine the character of central Highams Park. It currently has a village feel to it. Building a high rise, which would undoubtedly be ugly judging by the state of new developments in Walthamstow, would destroy the appeal of central Highams Park 1. Even if every site needs redeveloping but it doesn't need a high rise full of unaffordable boxes.</p>	<p>Make it low rise, and make it look good - not like cheap, nasty, gloomy and over priced developments that you see building in Walthamstow. It might win you a quick buck but were stuck looking at it for a lifetime.</p>	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p>
David John Anderson				S459 - 472-530 Larkhall Road and James Road	No	No	No	<p>too much</p>	<p>reduce or redevelop for offices</p>	No	Simply to judge	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. 				S459 - 472-510 Larkhall Road and James Road	No	No	No	The proposed height of the development is not in keeping with the low level existing buildings of central Highams Park.	A max of 4 storeys high would be acceptable in this area.	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Nigel Mear				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	I consider the site allocation within the Local Plan to be unsound and have outlined the main reasons below. Whilst I recognise the need for new homes, I feel very strongly that any development must enhance the area and not be so large and overdeveloped that it dominates and completely changes the character of the surrounding area. I consider the site allocation unsound as it represents a high overdevelopment of this site. The building height is far too high and the development will be completely dominant and totally out of character with the surrounding buildings in the town centre and the existing station building. The proposed development clearly does not complement the existing character and appearance of the area and will essentially destroy the character of the centre of Highams Park. This application also fails to comply with the requirements of Highams Park Neighbourhood Plan (Policy CD2: Character & Design) and is completely out of keeping with the character of Highams Park and the architecture of Highams Park Station and the Edwardian shopping district. It will be totally overbearing with an imposing lower-city feel that clearly has no resonance with the village character of Highams Park. The proposed development is in fact the complete opposite of what the above policy stipulates. It will dominate the adjacent Highams Park Station which is a distinctive and defining feature of the character of Highams Park District Centre, and will therefore be hugely damaging to the character of Highams Park District Centre as a whole. The proposed development includes a new station entrance even though the vast majority of residents, who responded as part of the community consultation, were in favour of retaining the existing entrance.	The new station entrance must be dropped. It is completely unnecessary given that there is already single level access to both platforms. Importantly the removal of the roof of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five storeys. That part of the development adjoining the station should be no more than four storeys and any five storey elevations further down towards 460 Larkhall Road. The design should match the four storey Highams Green Town Development on the other side of Larkhall Road to be congruent and create a local village effect and better architectural balance. It is essential that any redevelopment of the site is at a much lower level of density and massing than included in S459 and which respects the important character of the area around Highams Park Station and provides design principles that mirror the architectural rhythm of the more modern Highams Green development on the other side of Larkhall Road. Removal of the unnecessary new station entrance/exit from the site allocation brief is critical as it will allow for lower rise development with less units and improve the visibility of the site. To protect the character of the area around the station, the development should be four storeys adjoining the station and rising to a maximum of five storeys further down at 472-474 Larkhall Road. The lower level should provide active employment space to minimise loss of employment in the District Centre.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan requires that all new developments should deliver high quality design that is responsive to the local character of an area.
Tom Hancock				S459 - 472-510 Larkhall Road and James Road	No Response	No Response	No	Strongly Object to this application (Development implies contaminating activities and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, degradation to the surrounding environment, negatively affecting the current residents') This uncorrelated and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions centring on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is puppeted by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas. Fundamentally the building of this nature is an artificial and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country. The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is vitally important to maintain a cohesive culture within the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence. The current proposed developments are reminiscent of the failures that are	Reject based on continued degradation to local community and strain on local services, as pointed out above.	Yes	The development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by reporting anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one estate at a time. SO YES, I STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short term financial terms, will underwrite the future wellbeing of the indigenous community?	Offensive Response
Ian Cox				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	I think it is unsound because it is unjustified to destroy the character and movement of Highams Park by building taller than 3 stories. It is also not consistent with the agreed Highams Park plan to preserve the character of Highams Park.	In order to make this sound I think this development needs to be restricted to 3 stories, and needs to ensure the character of the building fits in with Highams Park.	-	-	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Mark Streamer				S459 - 472-510 Larkhall Road and James Road	Yes	Yes	Yes			No	-	This response is noted.

If yes, please explain why?	Council's response
Ashken Farber				S439 - 472-530 Larkhall Road and James Road	No	No	No	Taller buildings were very clearly objected to by the majority of local residents & go against the local plans as previously agreed!	Keep the building to the agreed height of mid rise buildings - not tall buildings. That would be completely out of character with the area.		Reduce I dont think that opinions of local residents are being taken into account	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Monique Lane				S439 - 472-530 Larkhall Road and James Road	No	No	No	The building respect is for a block of flats which go against regulations for the area.	building needs to have less floors to fit into the community.	Yes		Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Samantha Lezhman				S439 - 472-530 Larkhall Road and James Road	No	No	No	These questions dont allow for nuance. Please abide by the Highams Park plan as agreed by our community and put forward by the Highams Park Planning Group.	The language you are using is off putting and unhelpful. I would like buildings no higher than 4 stories. I would like an open green space designed for an amphitheatre for communal public events. I would like tall and greater parking for new restaurants. I would like a shop to be designated as a community hub. I would like environmental sustainability to be built into the building works as well as the final buildings and grounds. I would like to know what extra health care and education services will be put in place to support the families who move into new homes.	Yes		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 62,000 homes per year across London.
Malcolm Shyles				S439 - 472-530 Larkhall Road and James Road	No	No	No	It is unsound to build on what was once railway premises. Because most workplaces in the area are being built on, the only work becoming available is via the railway station. At rush hours the streets local to the station become overcrowded, there is the busy B road to the South, a similar road to the North and the level crossing opening and closing for at least 8 times an hour adding up to a total closure time of some 12 minutes or more. There is also regular home passenger rail traffic. As the local work places have been built on more pressure has been put on the Victoria line and at morning peak hours crowd control is necessary. A halt is required to gain access to the single down escalator. Another underground station will soon be required. The proposed development also requires the demolishing of this recently built Lang and Cruickshank Offices, where many are employed. People are going to be put out of work! This is also a serious Climate Change Issue: repaired redevelopment of concrete structures is insane. Flats in this area is also insane, where can children safely play even if they get safely across the local roads to the site? This was after all the station coal yard. Whoever dreamt this up, needs to think again.	The whole plan is unnecessary. The ex-coal yard is unsuitable for housing	No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
				S439 - 472-530 Larkhall Road and James Road	No	No	No	The wish to build high rise residential property in this location gives no thought to Highams Park centre or the wishes of the local community.	The local plan is misleading indicating 45 new homes when the plan is for 145 homes in mainly unsuitable high rise blocks.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. -				S460 - 472-550 Larkhall Road and James Road	No Response	No	No Response		Nothing higher than the surrounding residential area, and as retail sites are still empty from previous developments don't allow for this type of unit.	No		Through the evidence published in the Character intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Kevin Williamson				S468 - 473-520 Larkhall Road and James Road	No Response	No	No	Medium and high density development leaves no green space or any other space - in GP and other NHS services, schools, transport and other infrastructure. After over 50 years residence in LBWV, in both council and private housing, it is no longer a GP or GP practice place to live.				The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The brief of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Natalie Hollows				S459 - 472-550 Letchhall Road and James Road	No	No	No	It is not in keeping with the character of Highams park.	It is too high. Reduce the height!			The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2025). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Patrick O'Neill				S459 - 472-550 Letchhall Road and James Road	Yes	No	No	New station entrance not required. Tall buildings are excessive and will dominate the area. No parking provision is not practical. We do not want Highams Park to lose its current charm when the station is its central focus.		No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Paul Evans				S459 - 472-550 Letchhall Road and James Road	No	No	No Response	High rise buildings with little / no parking are detrimental to the area and would totally change the area for the worse.	Maximum height 4 floors, parking space under ground.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Siobh Demelelou				S459 - 472-550 Letchhall Road and James Road	No Response	No	No	None of the proposed plans make any mention at all to improvement to public transport. They only mention cycling, which isn't good enough and will leave cyclists, motorists and buses competing to use the already overly busy roads, especially around Highams Park where the roads are horribly congested at all times of the day with the level crossing barriers are down.	We desperately need public transport improvements and better planning for the roads. The roads off attitude cannot continue, it seriously needs work. The barriers at Highams Park should be closed permanently, and the roads reconfigured with one way systems to allow traffic flow, and more trains per hour at Highams Park. Higher capacity trains do nothing. It needs to be more frequent. This needs fixing before any new developments can be taken seriously.	Decision making seems to favour developers and be out of touch with the reality recognised by residents		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Jo Ann Richardson				S459 - 472-550 Letchhall Road and James Road	No	No	No	Height is above the Highams Park plan height guidelines.	Reduce height to align with surrounding buildings.	Yes		Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Key Voter				S40 - 472-510 Larkhall Road and James Road	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling (e.g. doctors, dentists & schools). Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no leaflets or public meetings to advise residents, only an online zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Racler				S40 - 472-510 Larkhall Road and James Road	No	No	No	No tall building should be built in this zone as it will destroy the spirit of HP and the low habitations already existing.	Only 4 floor maximum habitations should be built. And also keep the local companies in the ground floor.	No	Because I am living here and I use the local facilities and shops.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
James Moore				S40 - 472-510 Larkhall Road and James Road	No	No	No	The council does not take representations on board. Local do not want more residential development in Highams Park. This is being ignored.	Remove this allocation.	Yes	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Council emails. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Gillian Prouler				S40 - 472-510 Larkhall Road and James Road	No	No	No	This site has been designated as one with potential to build taller buildings. This site is a prominent position in Highams Park to build taller houses is not compliant with the Highams Park Plan. Despite objections you have failed to co-operate with the wishes of the community living and working there.	This site borders the railway, however, so do residential properties on the other side of the track. This build severely impacts their quality of light and privacy, and has not been taken into account. It ignores the planning codes of the Highams Park Plan. You should listen to and take into account these codes and objections to make this a sound plan.	No	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
David Aldridge				S40 - 472-510 Larkhall Road and James Road	No Response	No	No	High rise developments are not the answer and would not fit in with the character of the area. How can you ensure there is no conflict of interest when the former labour council leader is now working for the development company?	Smaller developments only.	No	-	Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Michael And Pamela Hily				S40 - 472-510 Larkhall Road and James Road	Yes	Yes	No	The inclusion of a new station entrance is unnecessary and will involve extra unneeded expense. The proposed height and density is contrary to the village character of the area. There are no other 6 or 7 story buildings close to the proposed development. Ergo, the new buildings will completely over shadow and dominate the area. The station is a one story building and is a much loved and respected part of Highams Park. This development is wholly in breach of Highams Park Plan Policy CDP2 with regard to character and design and, contrary to the extant and emerging Local Plan in which the overriding principles are stated as seeking to retain the character of the Borough's historic neighbourhoods. This development is in danger of decimating the existing character of Highams Park District Centre and will do nothing to improve the area. We are in complete agreement with the comments and arguments put forward by The Highams Park Planning Group	Would like to see this scaled back to a more reasonable height and density. Would like for the village and community feel of the area to be protected both for existing and new residents. We are in complete agreement with the comments and arguments put forward by The Highams Park Planning Group	No	Are concerned about development of housing when there is no provision made for other infra structures. ie schools, medical centres, transport, etc	Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
										Yes		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Simon Teppatt				S459 - 472-510 Larkhall Road and James Road	No Response	No	No	Does not comply with the Highams Park Plan	Reduce the height. We do not want tower blocks!	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Patricia Overman				S459 - 472-510 Larkhall Road	Yes	No	Yes	the new buildings will be too high and a totally inappropriate development at the heart of the village area of Highams Park. There is nothing approaching the 6/7 storeys that these would need to be and are much higher than the other new apartment blocks. A new entrance to the station would increase footfall around the, already busy, Larkhall Rd traffic lined crossing area.	restrict the height of any new buildings which would make this more sound by not overpowering the local area to the detriment of the village feel, abandon the idea of a further station entrance which will make the scheme less expensive and more viable without the need to build so high.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Clare Baumfield				S459 - 472-510 Larkhall Road and James Road	Yes	No	No Response	development way too high and out of character with Highams Park. Please listen to the local plan and in place by HPGS that was 96% agreed with by local residents. All for local development but must be in keeping. We don't need another entrance to station	I support redevelopment of this site but at a lower level of density and massing than included in S459 and which respects the important character of the area around the station and provides design principles that mirror the architectural rhythm of the more modern Highams Green development on the other side of Larkhall Road. Removal of the unnecessary new station entrance/exit from the site allocation brief will improve the visibility of the site and allow for a lower rise development with less units. To protect the character of the area around the station, the development should be four storeys abutting the station and rising to a maximum of five storeys further down at 472-474 Larkhall Road	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Russell Wellard				S459 - 472-510 Larkhall Road and James Road	No	No	No	This does not comply with the Highams Park plan. Knocking down a 1980s building with years of life left in it is hugely wasteful.	Height should be a maximum of 2 storeys in keeping with the rest of Highams Park. Architectural style needs to complement the existing Highams Park buildings. This is not an appropriate site for high density housing.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S459 - 472-510 Larkhall Road and James Road	No	No	No		Needs to be less high	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Arpad Dharwal				S459 - 472-510 Larkhall Road and James Road	No	No	No		Maximum 3 stories.	No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Sinead Conneely				S459 - 472-510 Larkhall Road and James Road	No	No	No	Building will be too high and not in keeping with the local area	Lower the building height	No	important for local residents to be part of the process	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Robert Tatum				S459 - 472-510 Larkhall Road and James Road	No	No	No	Do you consider that the Local Plan Complies with the Duty to co-operate? Walham Forests Proposed Submission Document LP2 dated 5th November 2021 does not comply with the Duty to Cooperate in at least four ways: i) It is confusing to other agencies, and members of the public, that the SA numbers on the Reg 18 Local Plan are completely different from the SA numbers on the Reg 19 version. For example, the Larkwood Leisure Centre site is S464 in the Reg 18 version, but S463 in the Reg 19 version. Even if it was a requirement of the government regulations that consecutive SA numbers, starting from SA1, are used in both documents, it would have been helpful "in the spirit of co-operation" for Walham Forest to have included in the Reg 19 documents the Reg 18 numbers in brackets, i.e. The MasterPlan document for the Larkwood Leisure site is (S463) given as S464. Furthermore, unintended duplication occurs in Table 2, in the Sustainability Appraisal Framework Objectives document, that uses SA numbering (SA1, SA2, etc.) for each Objective. ii) Hard copy forms have been provided in Borough Libraries for those without internet access, requiring the persons name, address, telephone and email. But these forms are probably not GDPR compliant, as they do not state the use that will be made of the personal data (presumably that the name will be published along with comments, but the other details will be kept secret). iii) The consultants appointed, Clearfield Consulting Limited, have not engaged with the Highams Park Neighbourhood Development Plan that was supported by over 94% in a recent Council "run referendum." iv) The "community facility does not appear to permit responses except for those relating to a specific case(s) which the respondent has submitted on the consultation page. This appears to be a deliberate attempt to limit the number of responses received on the consultation page." This is horrible. It looks very out of place compared to other buildings in Highams Park and needs scaling back. People take years to save up and build areas they like, and it's key that when new buildings are added they fit with a surrounding area. Also, infrastructure must again, be considered, parking, schools, doctors, transport.		Yes		The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
David Smith				S459 - 472-510 Larkhall Road and James Road	No	No	No		More than 3 stories high. Highams Park Plan Policy CD9 should be adhered to after HPPG was voted in.	No		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights. In accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or taller than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Development on all allocated sites will still need to go through a full planning application process in order to be approved.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Fiona Conrath				S459 - 472-520 Larkhall Road and James Road	No	No	No	This does not follow Highams Park plan			I don't really know what you mean? This consultation is too complicated, who is it aimed at, if residents, you should try again.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Development proposals will need to be in general conformity with the Highams Park neighbourhood plan in order to be found sound. This site will be reviewed to ensure this is the case and any amendments made as necessary.
Ian Bunge				S458 - 472-520 Larkhall Road and James Road	No	No	No	It does not comply with the Highams Park Plan, why aren't you listening to local people who pay the Council's Tax & elect the council	comply with HPP & provide local infra structure to support new developments	Yes	-	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Ray Anderson				S458 - 472-520 Larkhall Road and James Road	No	No	No	Council is building houses over and above requirements. Why? See why Claire Coghil resigned... all plans muted under her watch should be scrapped...	Thorough investigation into council development planning as corrupt from top down, does not benefit Chingford citizens at all.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
James				S458 - 472-520 Larkhall Road and James Road	Yes	Yes	Yes	-	-	Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Janet McCarthy				S459 - 472-520 Larkhall Road and James Road	Yes	No	Yes	I agree with the Highams Park Planning Group's response as below: The HPPG considers this site allocation within the Local Plan to be unsound, as the inclusion of a new station entrance is unwanted and unnecessary and will cause development on the site to be of a height and density that will completely change the much loved "village character of Highams Park District Centre. Our grounds for this allocation being unsound are, as follows: 1. To meet the housing targets proposed for this site, and the inclusion of a new station entrance station will require building heights of up to 7 storeys. This facts evidenced by planning application ID 20340 submitted to Waltham Forest Council which includes 68 flats, active ground floor space and a new station entrance. This application is for just one part of the site. 2. There are no other 6 or 7 storey buildings in close proximity to the Site S459 and because of this, the level of development proposed will be overly dominant and totally out of character with the surrounding buildings. During our consultation on the Highams Park Neighbourhood Development Plan (HPP Plan) most residents were clear that they wanted the plan to include policies that would preserve the much-loved character of the Highams Park District Centre and that 'new development should fit in. We included policies in the HPP Plan to meet this requirement and the HPP Plan	I agree with the views of the Highams Park Planning Group, as below: The new station entrance should be dropped, as it is unnecessary given that there is already a new entrance is also most likely viable, given that planning application ID2030 was withdrawn on 6th December the day before it was due to be considered by Planning Committee due to questions over how it would be funded, especially given TfL's well documented financial problems. Removal of the cost of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five storeys. That part of the development abutting the station should be no more than four storeys and any five storey elevations further down towards 480 Larkhall Road. Efforts should be made such that the design matches the four storey Highams Green Tesco Development on the other side of Larkhall Road to create a boulevard effect and better architectural symmetry. The Highams Park Planning Group supports redevelopment of this site but at a lower level of density and mixing than included in S459 and which respects the important character of the area around the station and provides design principles that mirror the architectural rhythm of the more modern Highams Green development on the other side of Larkhall Road. Removal of the unnecessary new station entrance/exit from the site	No	I trust the Highams Park Planning Group to represent my views.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Mr. William Farrow				S459 - 472-520 Larkhall Road and James Road	Yes	No	Yes	-	I object to the redevelopment of 472-520 Larkhall Road and James Road on the basis that it completely dominates and therefore alters the entire character of the centre of Highams Park. Being in such a prominent position (in the centre of Highams Park), this proposed construction is far too high in relation to the surrounding shops and properties, many built in the Edwardian era. I also agree with the objections to this development already submitted by the Highams Park Planning Group.	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.

				S459 - 472-510 Litchell Road and James Road	Yes	No	No		Loss of facilities with no provision to improve infrastructure.			The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Paul Burden				S459 - 472-510 Litchell Road and James Road	No	No	No	I do not believe that the Council has (adequately) taken into account the Highams Park Neighbourhood Plan, which it is legally obliged to consider	The Local Plan site allocation for S459 ignores several aspects of the Neighbourhood Plan, in that it the excessive height of the development (7 storeys) will overshadow the whole of the centre of the neighbourhood, destroying its character, particularly in the way that it will dominate the single storey Victorian station			Any proposed development coming forward on this site will need to be in general conformity with the Highams Park neighbourhood plan in order to be found sound. This site will be reviewed to ensure this is the case and any amendments made as necessary.

Paul Wellard				S400- Shell Garage Highams Park	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low-rise suburban/jerry rat in terms of buildings and streetcape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom or no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	No		<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2016).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Steven Phillips				S400- Shell Garage Highams Park	No response	No	No	do not feel any more homes should be built in Highams Park and South and North Chingford as we do not have the infrastructure such as additional schools, nurseries, GP surgeries or hospitals to be able to cope with additional people living in the area. We as existing residents are already struggling to see a doctor or visit Whippers Cross Hospital without considerable wait times now. Schools are over filled based on the current teacher pupil ratio. I have not even mentioned the additional traffic and parking problems extra homes will cause.	Create more GP surgeries, more hospitals, more schools to start with before building any more new homes in this part of the borough.			<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 1,600 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>Whippers Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital need investment and modernisation to ensure that it is fit for purpose and can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2015, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whippers Cross Hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site due to its location is character-led, which allows a new state-of-the-art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p>

Paul Leahy				S440- Shell Garage Highams Park	No	No	No			No		This response is noted.
Mike Chrimes				S440- Shell Garage Highams Park	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, or opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plan, may be rejected. Failing to comply with "rules that are not transparent to consultees. Consultation on the site allocation (LPS) element of the Washburn Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPS) for 2020-2025. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the topics of meetings which have been coloured by political point scoring, while officers have been subject to those making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, over minor businesses and other establishments.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get into online.</p> <p>In general however it has been apparent both from LPS and what has been stated of consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1800 homes per year. While LBHF has a large waiting list (10000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expected housing need. More</p>	<p>Clarify in how this aligns with the Highams Park Plan is essential. With reference to site S440 the chief driver in bullet point order is to provide 10 homes homes. It is unclear whether this is justified alongside the loss of local employment occasioned by the development, despite the commitment to non-residential floorspace.</p> <p>This site is one of a number of "garage/motor vehicle sites considered for development. The borough's strategic objectives refer to the provision of a variety of employment opportunities. Individually this might not represent a great loss of a facility or vehicle related employment, but there needs to be holistic view of the demand for such sites across the area, which is far more motor vehicle dependent than southern Waltham Forest.</p> <p>Most comments on the site stress the need for a garage in this area. The development guidelines refer to enhanced pedestrian and cycle connectivity, but work on cycle routes locally at this point has already been carried out.</p>	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> • Research/ fact finding: the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> • Sound infrastructure delivery planning. • Absence of regulatory or national planning barriers to delivery. • Delivery partners who are signed up to it and • Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the LPS should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
Simon Binks				S440- Shell Garage Highams Park	Yes	Yes	Yes			Yes		This response is noted.
Jane Mulally				S440- Shell Garage Highams Park	No Response	No	No Response			No		This response is noted.
James Christopher Truesdale Sargeison				S440- Shell Garage Highams Park	No Response	No	No	This plan is unsound in that it removes a vital commercial provision from a wide area. It is the only petrol filling station in Highams Park and its use is considerably greater than similar provision in that wider area. It increases the population in the area which has a shortage of medical care, social care and schooling.	Delete this proposal	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>

Steven Philips				SAGD- Shell Garage Highams Park	No	No	No	do not feel any more homes should be built in Highams Park and South and North Chingford as we do not have the infrastructure such as additional schools, nurseries, GP surgeries or hospitals to be able to cope with additional people living the areas. We as existing residents are already struggling to see a doctor or visit Whippers Cross Hospital without considerable wait times now. Schools are over filled based on the current teacher pupil ratio. I have not even mentioned the additional traffic and parking problems extra homes will cause.	Create more GP surgeries, more hospitals, more schools to start with before building any more new homes in this part of the borough.	No		<p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 6,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>Whippers Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2019, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whippers Cross Hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site due to its location is character led, which allow a new state of the art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p>
Lloyd Parkinson				SAGD- Shell Garage Highams Park	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing - no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no health/audit meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc	Build homes to height of existing buildings, provide parking, healthcare, education, etc.	No	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.</p>
Catherine Casey				SAGD- Shell Garage Highams Park	No	No	No	I dont believe the consultation has been adequate or thorough. The almost entirely online nature of it has excluded many Chingford residents, many of whom dont even know its happening. The site Allocation document suggests one amount of potential development sites whereas the later version shows a greater number. This is misleading. Instead of proposing a large number of homes in a busy urban location overlooking a train track, the council could, for example, redevelop the bridge way housing estate, incorporating the same number of homes in a purpose built development. Finally this projection runs entirely contrary to the recently adopted Highams Park plan, almost unanimously approved by residents and councillors.	The number of units should be reduced, the height of the buildings should be greatly reduced and adequate leisure, GP and parking facilities should be incorporated.	Yes	id like to explain how badly the consultation has been conducted and how obscure the questions are, so that any further submissions not be misinterpreted	<p>This response is noted.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. James				S40- Shell Garage Highams Park	Yes	Yes	Yes			No	-	This response is noted.
Mike Turpin				S40- Shell Garage Highams Park	No Response	No	No	The plan should comply with the HPPD plan and ensure that any development is not as high as the Tesco building. It has not been explained anywhere that I have found why a new station entrance is required.	Any development must comply with maximum height restrictions and fit in stylistically with the local style.		To ensure that LBWF comply with the approved Local Plan.	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Tom Wise				S40- Shell Garage Highams Park	No	No	No	We need this petrol supplier plus the associated retail. Over development has already taken place in this immediate area with increased pollution and congestion. There is already a shortage of parking for the station and retail in the area since the previous development took the station car park for housing. Surely enough is enough.	Leave well alone	Yes	Because WFC consistently ignore local resident issues in Chingford. They seem to want to be generic as for electing the wrong MPs.	The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres. This response is noted. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Sarah Wood				S40- Shell Garage Highams Park	No	No	No	The plan does not adhere to the locally agreed Highams Park plan which protects the character of Highams Park. Building above 3 stories is not justified. Houses with gardens are needed in Highams Park not more flats. Also, this is the only petrol station in the area.	Keep the site as a petrol station. If change of use is approved keep height of proposed development to below the trees.	Yes	-	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Victoria Johnsons				S40- Small Garage Highams Park	No	No	No	Plans designed and not in keeping with area- it will destroy the remaining village low rise feel of the area. Dominating the sky line and ruining an otherwise pleasant place to live.	Less floors smaller scale and please design something either cutting edge and ecologically sound or to fit in with the surrounding area taking cues from the high street which has shaped the feel of the area for many years before Tesco. Give more space to the open areas. DO NOT go above the height tesco has set with its buildings.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Ray Voller				S40- Small Garage Highams Park	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling- ie doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no leaflets or public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Andrew Fearon				S40- Small Garage Highams Park	No	No	No	Absolutely preposterous to fit in this amount of housing without parking and with the local infrastructure already struggling	We need the petrol station and shop not replacing with. More housing			The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,645 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. This response is noted.
John Aulis				S40- Small Garage Highams Park	No	No	No	The height of the proposed buildings is to high. The plan is not compliant with the Highams Park local Plan which the Council agreed to.	Reduce the height of all buildings to four stories			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. Development proposals, will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.

Gary				S40- Shell Garage Highams Park	No	No	No	It will drastically increase the number of people and vehicles in a small area				The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Miss Vignati				S40- Shell Garage Highams Park	No	No	No	EBWF have lied to all residents and not informed us with enough time	See the above. You think that the residents are stupid well we are NOT	No		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. During these consultation events, the Council has accepted representations sent through the normal email and social.
A Harber-Kelly				S40- Shell Garage Highams Park	No	No	No	This level of development is in breach of HP Plan Policy CD22 and will ruin the existing character of Highams Park District Centre. The Highams Park Planning Group view is based on extensive consultations with local people over the past eight years and concluded that local residents value the suburban character of the area surrounding Highams Park Station and do not want to see it dominated by incongruous blocks of flats above 4 and 5 storeys which will give the area a much more urban and inner city feel. The proposal for a new station entrance is included in the site allocation even though there were many objections submitted during the Council's initial LP2 Consultation, that a new station entrance was not wanted if it meant high rise development by the station.	No additional exit to Highams Park station, keep developments to 4 storeys, no higher. Certainly not higher than the Tesco site opposite or you will ruin our town centre.	No	It's my local area and I want to be kept informed	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). This response is noted.
Miss Vignati				S40- Shell Garage Highams Park	No	No	No	Rubbish plans no consideration given to local residents	As above			This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
				S40- Shell Garage Highams Park	No Response	Yes	No Response					The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Cathy Houshis				S40- Shell Garage Highams Park	No	No	No	Just disagree with the changes	No changes needed especially tower blocks			This response is noted.
Antonios Zeakis				S40- Shell Garage Highams Park	No	No	No				I wish to be rejected altogether.	This response is noted.

David Drew				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	<p>What is this legal mumble jumbo ?</p> <p>Trying to put people off from being against the plans ??</p> <p>Shame on you</p> <p>This plan involves shutting down 2 leisure centres in Chingford. This will have a massive negative impact on the community</p>	<p>You must keep the leisure centres.</p> <p>What will be left for the local Chingford community to get fit / stay healthy/improve mental health? The answer is nothing will be left</p>	No		<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> • Research/fact finding, the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> • Sound infrastructure delivery planning. • Being on regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>• The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs", in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p> <p>The Duty to Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p>
Brian O'Leary				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	<p>The proposal is unsound because:</p> <p>1. The assessment of housing need and scale of housing growth is inconsistent with and not in general conformity with the London Plan. In its own Feb 2019 Strategic Housing Market Assessment, 6.4.13 p88-100, the Council argues in favour of its projections to that of the CHC. The Council then decided it needed to amend the London Plan targets by increasing the Borough target by 14%. This has been without explanation never mind consultation. Arguable even the London Plan's own projected need could be out of date, based on their own SHMA. This extrapolated previous trends, however many of the original causal influences have been reversed post Brexit and with Covid. If as a result the current trend growth has weakened, the ambition for more homes in London, and particularly in Waltham Forest, needs to be scaled back. Consequently the scale of the current proposal needs to be reviewed.</p> <p>2. This location has extensive poor transport links. Addressing this issue should be a necessary condition for any development, never mind one of this intensity. This is a supposed condition of LPI policy #11</p> <p>3. Another prior condition would be sufficient social infrastructure, to support this increase in population. The Council has failed to measure residents that adequate school places, GPs and other community facilities can and will be provided. LPI Policy 48 is inadequate and not resourcing in this regard.</p> <p>4. The current leisure facilities, Gyms and Pools, are valued by the local community and are quite modern. There is a caveat to doubt that any future redevelopment would guarantee their replacement in kind. These doubts have been evidenced by the Council's own stated Strategic Policy intentions in LPI, notably Policy 39: Hierarchy of Centres. This Policy states that Waltham Forest "Town Centres" is the Borough's principal and economic hub. It will be the focus for investment in major... leisure, culture and tourist and other main town centres". Chingford Mount and the surrounding area is in need of an upgrading of the social and built realm and not the unbalanced</p>	<p>None feasible without prior improvements to the transport and public provision in this area, as well as the Council revising its unbalanced Town Centre Strategy privileging WFC.</p>	No	To ensure views fully considered	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> • Sound infrastructure delivery planning. • Being on regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>• The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs", in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Mrs Julie Whitehead				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, it will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/hourlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.	Yes	So I am aware of the changes proposed in the local area	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Mitigating regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Mike Chrimes				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules" that are not transparent to consultees. Consultation on the site allocation (LP2) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LP1) for 2020-2035. This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, even if behind businesses and other stakeholders. One would say however that a system of consultation partly driven by the impact of Covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had attendance low numbers, represented by the number of attendees, allowed, or have been difficult to get into online. In general however it has been apparent both from LP1 and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1,000 homes per year. While LBWF has a large waiting list (50,000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing intensification are suitable for housing intensification. This site should be removed from the Local Plan.	Public consultation on this site exposed council officers, attempting to do an online meeting, to inappropriate comments, but revealed strong local ambivalence to the development of this site for housing and highlighted an inherent dichotomy between the council attempts to provide more housing through more intensive development, and its strategic objective of preserving and enhancing the historic and natural environment. The current site allocation brief represents a considerable backtracking on the scale of housing development presented to the public, the latter being reflected in the many adverse comments on the site allocation, and could be seen as evidence the council planning department have listened, and taken into account the local green space designation. However there are strong arguments against inclusion of this site in the Borough Plan for the next 15 years: - Most of the buildings on the site are relatively modern, and represent considerable investment by their owner/leasee which they are unlikely to want to relinquish in the time frame, without their demolition the site is too small for a housing development. - In its strategic objectives the Council makes much of its commitment enhancing the Borough's natural environment, promote citizens' choices, provide a variety of development, and also acknowledge the concept of a 15 minute city. The facilities on this site provide a range of leisure facilities within 15 minute reach of much of the north of the Borough - swimming, gym facilities. These facilities were hard won, the former site being earmarked in a planning vision for years. There can be no guarantee that this would not happen again if the existing facilities were demolished, setting back achievement of a 15 minute city.	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Mitigating regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Catherine Casey				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	do not like the leisure provisions will be replaced like for like. The fact that no new car parking spaces will be provided will place stress on the surrounding streets and there are no new GP places forecast. Chingford is exceptionally badly served in terms of public transport and the amount of housing projected would place further stress on what little there is.	This site should be removed from the Local Plan.	Yes	Id like to explain how badly the consultation has been conducted and how obscure the questions are, so that any further submissions not be misinterpreted	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the Borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new strategy to alleviate congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections; and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the Borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Nina Leaultelle				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No Response	No Response	I dont know the rules that make it legally compliant.		Yes		The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Local transport is not always convenient and safe on dark evenings.</p> <p>I feel it would be a waste of money and bad for the environment demolishing newly built facilities.</p>			<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The Local Plan Active Travel and Transport chapter sets measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>
Terry Milnes				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	<p>There are so many but this space isn't big enough to list them all, here is a couple -</p> <p>ESOP should be seeking to preserve the 'Local Character' of the area - residents close to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to forest.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3 Pg S46) states 12,640 new homes over 20 years and ESOP is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space?</p> <p>Also, the housing targets in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats, the Rendlesham has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not just allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is future proofed for them.</p> <p>Delivery of housing targets should not be delivered in such a way as to only create minimum standards, and should not be equated to a race to the bottom.</p>	<p>Chingford needs good quality houses with gardens in keeping with the area. An Infrastructure to accommodate the additional residents and appropriate buildings.</p>			<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan Active Travel and Transport chapter sets measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Anthony G Thomas Lip				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012</p> <p>19. Before submitting a local plan to the Secretary of State under section 5 of the Act, the local planning authority must</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 38(1)</p> <p>14.7(a) A local planning authority must</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority proposes to prepare, and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(3) The bodies or persons referred to in paragraph (2) are</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the proposed local plan,</p>	<p>based on the personal knowledge of the location and the problems associated with recent developments: do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmondson Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient these will still be emissions. Although they suggest these could be removed do have the doubts or will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LEZ charge. Not the rest of the area will also be subject to these increases and the proposed quiet the natural air flow possibly result in pockets with even a higher concentration.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases in anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. It is the way that it was in the 1920's that people needed space and fresh air.</p>			<p>This is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under- utilised and tend to generate high numbers of private car/motorised vehicle trips. Redeployment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>

Local transport is not always convenient and safe on dark evenings.</p> <p>I feel it would be a waste of money and bad for the environment demolishing newly built facilities.</p>	No	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Characterisation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Council is committed to playing its part in tackling the housing crisis. Simon Weston				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	<p>I am writing this email as the date for objections is January 31 2023. Site S461 Larkwood Development should be removed from LP2 and any future plans to develop any residential buildings. I do not, in my opinion, believe the whole of Larkwood Park within the boundaries of New Road, Larkwood Road, Larkwood Centre, Bourse Avenue, Underwood Road, Bourse Gardens and Normanshire Drive, is under a covenant. That Covenant states quite clearly that it cannot be used for residential buildings. That should have immediately stopped Waltham Forest planning department and others from being included in the Local Plan. Throughout this whole process Waltham Forest Council planning department their associates, have completely ignored and bypassed their duties and obligations under the Statement of Community involvement and the local plan guidelines. Not one property in all the roads mentioned already have been notified or notified by post of the proposed plan. Despite there being several noteborders owned by the council at the entrance to the park, not one poster or notice or notification has been placed in them. Not one notice or notice has been shown in any of the existing businesses within the enclosed area of the proposed development. These businesses are part an operating within the 200 year lease agreement with the Council and B&A pension fund drawn up less than 10 years ago. The council using their position as the owners of the land by passing this plan will be acting with a Conflict of Interest purely for financial gain, at the detriment to existing users, residents and future users and residents.</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these points will be removed do have my doubts or will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LLEZ zone and demolition of the road meaning those will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LLEZ change. But the rest of the area will also be subject to these increases and the proposed speed the natural air flow possibly result in pockets with even a higher concentration.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases in social behaviour, crime and in particular violent crime and mental health issues. Also recent covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960s tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In this it was realised in the 1920s that people needed space and New Towns were built with wide roads and green spaces. This has been proven to do better for the situation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do I believe it to be "effective", as it is unlikely to be delivered in the Plan period, because the commercial sites on the site have many years of useful life ahead of them and it is unlikely that they can be replaced on site without a form of development which is harmful to the character of the local area.</p> <p>High rise development would not fit in with local surroundings.</p> <p>There is no other extra infrastructure; doctors, hospitals, schools, dental practices planned.</p> <p>Chingford is already overcrowded and we need more leisure, not flats without gardens or parking spaces.</p> <p>If the current car park is lost local people will not be able to use the swimming pool in the same way. Local transport is not always convenient and safe on dark evenings.</p> <p>I feel it would be a waste of money and bad for the environment demolishing newly built facilities.</p>	No	<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this consultation process, there was a spike in the number of Council officers. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As per the local plan policies, to adequately evaluate the impacts of the development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p>	
Ian Magill				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	<p>I do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p>

The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a net-zero carbon footprint, parking problems and improve air quality.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that undermines cycling, walking and public transport use.</p>
Rebecca Boylen				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	<p>The two gyms and swimming pools are not being included in the two plans to accommodate this.</p> <p>Lower buildings otherwise the local area is compromised and it is out of character.</p>	<p>Two large pools and gyms plus additional parking. Less housing to accommodate this.</p> <p>Lower buildings otherwise the local area is compromised and it is out of character.</p>	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Karen McGill				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do I believe it to be "effective", as it is unlikely to be delivered in the Plan period, because the commercial uses on the site have many years of useful life ahead of them and it is unlikely that they can be replaced on site without a form of development which is harmful to the character of the local area. High rise development would not fit in with local surroundings. There is no other extra infrastructure; doctors, hospitals, schools, dental practice planned. Chingford is already overcrowded and we need more leisure, not flats without gardens or parking spaces. If the current car park is lost local people will not be able to use the swimming pool in the same way. Local transport is not always convenient and safe on dark evenings. I feel it would be a waste of money and bad for the environment demolishing newly built facilities.	do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. V Ada				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	No proper consultation with local residents. Proposal not in keeping with visual amenity. Local residents will be overlooked. Pressure on local amenities. Too many homes without adequate infrastructure.	Leave site as is. Proposal will run green areas and much needed recreational space.	No		<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 1,264 per year based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.</p>
Cheryl Tague				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Living in this area parking is already tight already. When my Mother was heavily pregnant and another person had parked in front of the house and my Mum had asked them to move they refused to. So we had to walk a very long distance instead. How imagine how it would be with 200 new homes near us. This is completely unacceptable. There are several elderly people living near by the area and this would cause a lot of distress to them. There will be a lot more traffic around the roads. More traffic leads to more pollution. Which is shameful on the borough's part because as a borough you have such a big impact and push for sites low emission zones but you yourselves are practicing the opposite. How do you expect people to take you seriously. This is not the way forward and your failing to see the big impact you would have on many people's lives	There are no modifications just to not continue this project	No		<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of revenue to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>In April 2019, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Council has set a target to ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p>

To preserve the existing level of provision of playing pitches.</p>
Paul Willard				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low-rise suburban (semi rural) in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. There is no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope with doctors' surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	Yes	-	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Jackie Meale				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	There is a covenant on this land that states it is for recreational use for the people of the area and is not to be used for residential. There has been no sufficient delivered to local residents or any notices in the Waltham Forest News etc regarding this development. The main source of information has been online. This excludes a lot of elderly residents and those that are tech poor. There is no indication given of how the existing infrastructure will be enhanced to deal with the extra strain on its services.	Full public meetings should be held as all covid restrictions have now been lifted. These should be widely advertised through all mediums to reach the most people. Adequate notice of these meetings should be given and several should be held at different times to make them accessible to all who wish to attend. It goes without saying the venues must be completely accessible. A full regulation, including all legal aspects should be explained regarding how the covenant on the land plans to be legally overruled in order to continue with the development proposals. A detailed proposal on the planned improvements to be made to the local infrastructure including school places, doctors surgery etc. At a time when our local hospital is going to have less beds more residential homes are being planned. Traffic management must be addressed. New Road is covered now. I appreciate as a council you hold the view that residents should not own cars, and as commendable as this maybe the council cannot stop residents owning, using, and parking cars. Enforcing CO2 parking zones is not the answer. This penalises existing residents so that the council's idea of providing no parking spaces for new developments and reducing the number of cars can be trialled. New residents will have cars, will need to park them and this could cause problems in the area.			This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to reach the adequate levels of infrastructure needed to be truly sustainable. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
Karen Nash				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation Based on no sufficient/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.	No		There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 13,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Hazelite Anne Tyler				S443 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Proposed development out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-loaded, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no hearings/public meetings to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Stuart Martin				S443 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. Uti Astibia				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	----- Original message ----- This letter is in strong opposition, specifically but not exclusively, to LBW's 4 proposed development sites around Chingford Mount. This letter is in strong opposition, specifically but not exclusively, to LBW's 4 proposed development sites around Chingford Mount. Namely, 1. Up to 90 new homes on Salisbury and Council car park. 2. Up to 90 new homes on Albert Corner. 3. Up to 25 new homes on former South Chingford Library. 4. Up to 200 new homes on Larkwood Leisure Centre & Nursery site. While we are not totally against development, progress and more homes in the area, these should not compromise other established residents. The proposed developments would be out of keeping with the surroundings. Also this cannot be delivered with policy compliant levels of affordable housing. The site was formally a leisure facility (Lido) and was for the enjoyment of the local community. The current development also has leisure facilities (including swimming pools), which benefits everybody including children. Existing car parking also allows for non-residents to travel to the leisure centre. In addition the houses and existing nursery facilities as well as the Tesco and leisure centres themselves, provide a number of jobs, whose jobs will be at risk. Any intention of replacing some of the facilities currently in place will not be enough, unless there is wider development of the site which then encroaches on green space. I accept this site may offer the option for building some properties. But I believe these should be limited in number and built on the nursery site only.	#NAME?	No	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Through the evidence published in the Character Intermittency Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p> <p>The Local Plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs, and tree planting which will produce biodiversity net gain on sites.</p>
Valen Ejarla				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No		No	<p>NO MORE FLATS PLEASE!! More doctors surgeries, more schools, more parking for existing residents! PLEASE PLEASE PLEASE. Before you even consider squashing more people into this lovely area. I could not be brought to anything... it is that we need less people and more fresh air, more open spaces, more green.....</p>	None if well above please x	No	we all want to be involved... this is our life!	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Wattham Forest of 2,640 new homes (264 per year) based on a London-wide assessment of capacity/available sites in 2027/28. The original draft London Plan figure was equivalent to approx. 2,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate capacity from small sites was not deemed to be justified. The revised target (a) short of the Council's identified housing need of 2,800 homes per year, as well as the London Plan identified need for 6,000 homes per year across London.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
Michael Shielock				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No		No	<p>This council appears to be based on ignoring the existing leaseholders and owners of the recreational and other facilities & business on this site to encourage redevelopment. The local residents do not want this development and have been very vociferous in attacking the recent attempts by the council to the "market" this redevelopment which is itself very vague as to what EXACTLY is proposed for this site.</p>	With this council's repeated attempts to build housing on this site that appear primarily to be blocks of flats the more local residents oppose it. As more and more building of residential properties are built, in what appears to be a flawed 10 - 15 "regeneration plan there are no explanations as to what plans there are for supporting this new infrastructure - additional school places, doctors' surgeries and the like.	No	I do not consider that proper representations have been made to the people of Chingford and Highams Park about the impact of the Councils desired wish they will have on this part of the borough	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p> <p>The Local Plan Infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p>
Sandra Beach				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No		No	<p>Do we always have to comply or can we exercise a little vision and not build for the large part? Ighy Flats all over Chingford. Residents require sports facilities and the ability to walk to their local supermarkets for the health benefits that it brings. Working gardens are changing and people have plants to move out of the area in search of a less crowded environment, GP appointments, school places etc. What happens when tenants of the Flats have families and require houses and the aforementioned services.</p>	Fewer flats, more houses. Encourage people to walk to Supermarkets and sports facilities. Some people i.e. the elderly or those with young families will not be able to cycle but will walk to facilities if they are near enough.	Yes		<p>The Council commits to a long-term objective of reducing levels of private car ownership and vehicle journey in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the Plan is car-free and employment development is car capped. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low-traffic neighbourhoods (LTNs) and the expansion of cycle infrastructure. This forms part of a holistic approach by the borough for reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan Infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Evee Kousa				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	<p>I am writing this to categorically object for the intention of any planning on the above site whatsoever.</p> <p>The way in which this process has been handled from start to finish has been farcical at best.</p> <p>Site S46 Larkwood Development should be removed immediately from PZ and any future plans to develop any residential dwellings on this site is not in my opinion legal.</p> <p>The whole of Larkwood Park within the boundaries of New Road, Larkhall Road, Larkhall Crescent, Rogers Avenue, Underwood Road, Bourne Gardens and Normanshire Drive, is under a covenant.</p> <p>That Covenant states quite clearly that it cannot be used for residential dwellings.</p> <p>That should have immediately failed Waltham Forest planning department and others from it being included in the Local Plan.</p> <p>Throughout this whole process Waltham Forest Council planning department, their associates have completely ignored and bypassed their duties and obligations under the 'Statement of Community involvement and the local plan guidelines).</p> <p>Not a single property in all roads adjacent and within the immediate vicinity have been consulted or notified by post of the proposed plan, so there are many more others who are completely oblivious to the ongoing plans</p>	<p>save the site alone, as it is, in its current state do not build or do anything on it. That would make it legally compliant and sound. It's not been up for long. It works and cater very well for the community and local people. Providing good health, wellbeing, jobs and doesn't suffocate the area at detriment to the local forest. The local infrastructure are not sufficiently supported or appears as though clearly thought out for an exponential rise in the suggested number of people. It heavily contradicts its strategic plan it has set out on a majority of fronts.</p>	Yes	The undertaking of this plan contradicts on multiple fronts. It's strategy which has been set out from the onset. It is not legal in nature as it is under a covenant for use of any residential dwellings	<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing park and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, where sites that have an existing leisure facility can be forward as a site allocation (for example sports centres). Provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2021 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the Borough. During this pre-submission consultation, there was a pile in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Chris Friedlander				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	<p>The plan is unsound as it diminishes much needed amenities within the area and increases residential strain on local resources. South Chingford/Highams Park already has a high residential density that has led to increases traffic and pressure on local amenities due to the mass development within Highams Park over the last 20 years. This will further supply pressure and make the location undesirable to live in.</p>	<p>The consultation duly acknowledges the importance of the green location behind the development, but does not take into consideration the need for parking, gym and swimming amenities for the local residents as there is no other alternative nearby.</p>	Yes		<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Terry Mitrov				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	<p>The development is not in keeping with surrounding residential properties. There is no guarantee of the for the leisure facilities and there is NO parking provision at all. There are serious ecological implications with some ancient woodland being 'strangled' by many residences and no where near enough amenities. It certainly doesn't 'enhance anything.</p>	<p>Build houses NOT flats. Give residents adequate parking and gardens in proximity with the surrounding houses</p>	No	no one is listening to the residents of Chingford.!!	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Council is committed to playing its part in tackling the housing crisis. If yes, please explain why?	Council's response
Dr Shashi Khambhar				S461 - Larwood Leisure Centre and Nursery and the Land to the Rear of Larwood Leisure Centre	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking. Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit. There is no mention of residential parking in the plan either.	consider building homes to height of existing buildings to be necessary consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	Yes	As a local resident, I would consider it necessary to participate in examination hearing sessions as this would directly affect by way of loss of privacy, loss of light and development out of character for the area.	The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Ray Voller				S461 - Larwood Leisure Centre and Nursery and the Land to the Rear of Larwood Leisure Centre	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and possibly loss of natural light. There will be additional demand for local amenities where existing are already struggling: in doctors, dentists & schools. Local infrastructure is never considered, and new road consistently has issues with traffic flow due to the size of the road and the existing traffic that uses it - including buses. The buses are vital for access for elderly residents. It has been suggested that the site will be car free. Who will police this and ensure that residents do not own a car. Or does Car Free simply mean residents can park in any of the neighbouring roads causing further issues? There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no leaflets or public meetings to advise residents, only online Zoom meetings with faulty connections: this is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents not flawed meetings via Zoom. Allow residents to have their say at a public meeting. Stop removing our amenities!	Yes	-	The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Jack Cooper				S461 - Larwood Leisure Centre and Nursery and the Land to the Rear of Larwood Leisure Centre	No	No	No	High Rise will damage area	-	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Mudassar				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No					This response is noted.
Sarah Magsajan				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The idea that the council could legally remove the ONLY community swimming facility used daily by schools and young people that provides an affordable leisure activity can not be legally compliant.	The leisure centre cannot and should not be removed, the closest facility would be Walthamstow this would remove this type of activity would be just so many families on this side of the borough.			The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
Antonios Zewils				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No				each to be rejected altogether.	This response is noted.
Ralph Dimitriou				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It's just a feeble minded proposal to destroy woodland in favour of uprightly tower blocks, that aren't in keeping with the area, and that locals do not want. There is no mention of transport and infrastructure improvements in an area already desperately under-served by public transport. Ridiculous.	Don't destroy woodland, don't build such tall blocks and improve public transport. Ideally we need another station at the hatch, and permanently closing Highams Park level crossing to allow more trains would hugely help the area.	No	Decision making seems to favour developers and be out of touch with the reality recognised by residents.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The site allocation requirement ensures the re-provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) re-provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Clifford Gray				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The proposal takes away what little leisure space we have in this area. It is not acceptable to build this number of houses in an area which is already short of leisure facilities health care and school spaces.		Yes	I do not agree with the proposed plans as they are not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No					This response is noted.
Benjamin Faulkner				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It needs to guarantee that current green and woodland spaces and leisure facilities will not be impacted and reduced by these plans	As per my previous answer, the plan must guarantee that current green and woodland spaces and leisure facilities are not impacted by these plans.	No		The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Christine Croxon				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The Larkwood site was gifted to the area for recreation - High Rise is inappropriate and will block light to surrounding properties. It will also bring more antisocial behaviour and crime to this area which we are already struggling with	Do not bring the site so close to the main road and build houses with gardens which is what the area needs	Yes	The community is extremely concerned about the environment and impact on wildlife in the area with the building process	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to examine hearing session(s)?	If yes, please explain why?	Council's response
Tom Wise				S461 - Leatwood Leisure Centre and Nursery and the Land to the Rear of Leatwood Leisure Centre	No	No	No	As a long term Chingford resident I have witnessed repeated mismanagement and poor development of this site by WFC. Fantasies are obvious non starter as local residents were quick to resist. It eventually lost the council over £5 million. Chingford residents largely moved here because of the fact that it was different to the rest of the borough - more like Epping Forest than Witham Forest. We do not like high rises and high density developments. Why do WFC not use and employ local people rather than using people from Witham towns who do not know or understand the area, it's wants and needs. Consultations have been poor or non-existent. This cannot be legal. Obviously any development would have to replace the leisure, education and recreation. These all require transport in an area where public transport is slim to non-existent. In addition although WFC seem to believe they can provide housing without providing parking. This is not sustainable and the number of housing units would require high rises which would destroy the area	Don't do it	No	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MPs	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility are considered as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement. To preserve the existing level of provision of playing pitches. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local Plan consultations have always been welcome either through the online portal or by email and post. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality.
Patricia Monamara				S461 - Leatwood Leisure Centre and Nursery and the Land to the Rear of Leatwood Leisure Centre	No	No	No	Not in keeping with the area and why I moved to Chingford.		Yes		The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Ms. A. Fizan				S461 - Leatwood Leisure Centre and Nursery and the Land to the Rear of Leatwood Leisure Centre	No Response	No	No	In summary, the influx of hundreds of people in the area will do this area or much harm, the health and wellbeing of existing residents, goods and services will be significantly overwhelmed and impact on quality of life for both old and new.	Of course, it is quite difficult to properly understand what it is going on because we are unaware of the proposals, breach standards/compliance due to paperwork, documents and everything available to look at being incredibly complicated to properly comprehend.	Yes	Many members of the community do not receive effective communication and are unaware of how to access and participate. Plus people receive information differently so seeing and hearing in face to face meetings, it is more productive for communicating for many.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local Plan consultations have always been welcome either through the online portal or by email and post. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Witham Forest. These policies focus to improve active and sustainable transport choices across the Borough, ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchment areas. Moreover, the plan aims to offer healthy living choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Witham Forest.
				S461 - Leatwood Leisure Centre and Nursery and the Land to the Rear of Leatwood Leisure Centre	No	No	No	Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will discourage other people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/twilight, additional demand for parking. Consultation flawed as no written public meeting to advise residents, only online Zoom meeting. Shortage of doctors, hospitals, dentists schools etc.		Yes		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required in some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/twilight As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Responses to local Plan consultations have always been welcome either through the online portal or by email and post.
Harjot Alexander				S461 - Leatwood Leisure Centre and Nursery and the Land to the Rear of Leatwood Leisure Centre	No	No	No	1. It is well known that this site is under a legal covenant which states that it cannot be used for residential dwellings, but must only be used for recreational use. It is currently being used for precisely this purpose - private gym, court gym (used by a local school), children's nursery and a pub/restaurant. This point in itself is reason not to continue with the development. 2. No homeowners nearby have received a leaflet advising them about the consultation. The council did not even include this information in the WFC News which is delivered to all homes in Witham Forest. 3. There have been no public meetings, despite notifications being sent. They only had online meetings which were brief with technical problems and mismanagement by the planning department, where we were not able to get our points across in the allocated hour, and also the hour was taking a fact that we couldn't take it all in. Consequently we asked for Minutes of the meeting which were promised but did not receive. 4. This site has been allocated for development even though some of the buildings are relatively young in building terms. They are perfectly fine buildings, and are well used and loved by the local community.	THE FOLLOWING POINTS CORRESPOND TO THE SAME NUMBERS ABOVE: 1. Remove this site from the site allocations list as it is unlawful. 2. Extend the deadline and then halfted drop homeowners and also add the information into the WFC News, as well as in newsletters. 3. Due to the community not being given the opportunity to attend a public meeting, and the problems with the zoom meetings (as detailed), think the deadline should be extended in order to make everyone aware of what the plans are for this site. Many elderly people were obviously excluded from zoom meetings due to the meetings being inaccessible to them, and them having no means for equipment to access them. 4. A public meeting would enable nearby homeowners who would be affected to be seen further going information about the forthcoming plans, and information to attend. These nearby homeowners are likely to be affected by occupation of the planned 200 dwellings (see, lets face it, won't all be non-car owners "a lot of them will have cars and if there are no parking spaces, they will just park in nearby roads). 4. You can address this point, except not develop the site, and leave it exactly as is.	Yes	I would like to be kept in the loop about all aspects of this.	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. 				S445 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The land was given to the people of Chingford for recreation	The facilities of the site are well used and desperately needed for the number of residents, just look at the field and the car park to see the numbers using the pool and gym etc. The height of the building is completely out of character with the surrounding area. I have grown doubts for this sight, I am old enough to remember Larkwood pool being demolished, in the plans there was to be landscaping of the surrounding area, with seats to admire the view, that never happened!			The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
				S445 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This site is supposed to be used for leisure purposes with a range of services provided and is a real hub for the surrounding area and residents, giving it over to suit amount of residential use with ridiculously small amount of outdoor leisure facilities does serve the community.	There is no modification possible which won't have a significant negative impact on the community, surely the health of its residents should be considered in this situation.			The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
				S445 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This area has a covenant against it and it is meant for recreational purposes only. There has been no public meeting where clarity can be sought on what is planned, there has been little publication about the consultation, meaning that those individuals who might have provided key info about it, there has been an emphasis on electronic communication discriminating against those individuals who do not use IT nor understand it.	By doing the opposite of what has been done, namely publishing it more widely in a variety of communication styles, by having face to face meetings, by making the way people file their comments more easy to understand and complete.	No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
				S445 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	Far too many flats without infrastructure to support. I doubt there will be enough social or affordable housing in the plan.	Leak flats and keep the swimming pool	No		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 3,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.

Emre Kucuk				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No			Yes	The understanding of this plan contradicts on multiple fronts it's strategy which has been set out from the onset. It is not legal in nature as it is under a covenant for use of any residential dwellings	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No							This response is noted.
Ruth Goodwin				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	To get a total of 280 homes on that piece of land will require tall buildings which is not in keeping with any other buildings in the vicinity and will spoil the aesthetic of being in the woods and using the playing field. What will happen to the leisure facilities too? These need to be left alone as a lot of people use them.	Don't build any massive buildings that are taller than the already existing houses on the land and don't get rid of the leisure facilities.	Yes		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Russell Willard				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	There is a covenant on the land preventing development for housing.	The site should only be used for the recreation, gym, swimming pools etc. Degradation of these facilities is not acceptable. This site is not suitable for blocks of flats, Larkwood needs to be protected from over development.	No		The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Sibhan Harney				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	The leisure centre is the only one in Chingford. Where do children go for swimming lessons, where do adults go to swim? This is taking away much needed facilities for low income families.	Leave the area as it is. Every business on this site is utilised.	No		The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.

Alicia Murphy				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The government want us to get fit and healthy and council want to knock down the Leisure centre's for more housing. There must be other areas in Chingford that houses could be built.				The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
L Tyson				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Active frontage? What is that? There is already a Nursery and leisure centre. What is the garage entrance? The idea that people living in the proposed development will not have cars is ludicrous.	There should be no change to the area. Woodland Forest doesn't need building on. There are no modifications to be made. Except leave the trees and green space alone.	No		Active frontages mobilise the elevation of the building that faces the street at street level. The active frontage normally comprises of commercial, retail or leisure spaces as opposed to residential. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Raymond Moffat				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This development is too large, it goes against local views, it removes the only leisure centre in North Chingford and is out of character for the area. The idea that people living in the proposed development will not have cars is ludicrous.	Listen to local residents, down size the development plans to fit the character of the area, keep the leisure centre at its present size or even expand it but don't turn it into a leisure pool at the expense of swimmers, retain the parking facilities that are essential to many residents, who cannot use public transport	No	There is no point putting the proposal out for public consultation if you don't then listen and act on their views, participation is part of that process	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan requires a character-led approach to intensification, including 1st buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	By removing the only leisure facilities in the area, nursery, and family pub/restaurant can only be a disadvantage for the residents and families alike as there would be nowhere for people to socialise and keep fit. Local children/schools will also miss out on learning how to swim and existing parents won't be able to have their children looked after by the nursery. Also by increasing the population of the area by putting in 200 plus homes will only affect the already overcrowded area with its poor transport and road infrastructure which would lead to a more busier road with extra cars, noise pollution and would also increase pressure on local schools, GP practices and dentists.	Improve the local green area and playing fields with play park, better parking facilities, skate park, sports pitch, outdoor gym so that families and people alike and use and everyone will be mentally better off instead of being demoralised by looking at tower blocks of flats and no facilities to use.	Yes		The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Walkways Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.

Sarah Rose				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	<p>I have already commented on this on my previous submission namely that it's uncooperative because it's building against the needs of existing residents who need more infrastructure not homes. As stated in the legal covenant this area was left to the people by the Queen as a leisure area. The wonderful outdoor swimming pool which my parents tell me about to gene. Why waste to really swim indoors on a hot day? Some lucky people have the beach. It is unsound because this is actually a flood area plus newbuilds were torn down as inadequate in the 70s as inadequate housing and gheto areas. Anyway, I am just adding that while someone has argued to transform Larkwood green area with a skatepark, outdoor gym, pitches etc, this would absolutely ruin the character of the area. I have heard here and my siblings and can safely say there are enough play parks around. This is a F&C and should be left as such for everyone to enjoy. People currently like eating picnics, sunbathing, hanging out with friends and family, casual exercise, enjoying the F&C and quiet and walking their dogs. It seems very male orientated like so much in society to put in a skatepark pitches and gym and it would be grossly unfair. Look at Ridgeway park with the reputation of children's area. You now have to walk directly through it to access Chingford Ave. Not everyone wants to encounter children everywhere! We need safeguarding so this field isn't turned into a children's area like everywhere else in the borough with the corresponding increase in noise, general antisocials, mess and chaos. Not everything needs to be organised all of the time. What's wrong with the pitches by extensions of which there are many? I noticed they often empty and have also encroached further on public land recently. How about the skate park at Chert Lane or are people too lazy to walk down the road these days? Incidentally with this neo-building that is currently popular, there are less and less areas open to dogs and dog walkers. We all know children are grounded over and enjoy more rights than dogs in London. Let them have one area! The current dog areas are small and not up to scratch. Clear lanes in particular is lacking even grass and a working</p>		No		<p>The Council is committed to playing its part in tackling the housing crisis. If yes, please explain why?	Council's response
Ella Goldsworthy				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre				am a local resident not a lawyer but I consider it fails to comply with the duty to co-operate in that it will NOT listen and follow local residents' wishes on the matter.	Any development of the area should fit in with the residential nature of the area - ie houses NOT blocks of flats of any size.			This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Helen Howard				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No					No		This response is noted.
Valen Bjarte				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do I believe it to be "effective", as it is unlikely to be delivered in the Plan period, because the commercial uses on this site have many years of useful life ahead of them and it is unlikely that they can be replaced on site without a form of development which is harmful to the character of the local area	I do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do I believe it to be "effective", as it is unlikely to be delivered in the Plan period, because the commercial uses on the site have many years of useful life ahead of them and it is unlikely that they can be replaced on site without a form of development which is harmful to the character of the local area		we all want to be reviewed...this is our life!	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be sustainable. The site allocation document ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	nothing	nothing	No		This response is noted.
Yvonne Sanders				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	Is the Plan "sound"? There are 4 tests at para 35 of the NPPF: Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. No as LBWF should be seeking to preserve the "Local Character" of the area - residents chose to move to Cliford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 1,000 signatures objecting to this particular development proposal and residents whom are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.2) S461 states 32,680 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 4,680 over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing. https://www.levellingup.gov.uk/levelling-up-programme/levelling-up-programme	This is the only Public Open and Swimming Pool in Cliford, built relatively recently with a long life ahead of it. It is not appropriate for this facility to be demolished, at what huge cost in Carbon emissions, to result in a smaller facility with more flats. NO to more intensive development of this site that would result in insufficient parking spaces for visitors to the Leisure Centre.		I wish to have the opportunity to explain why the Councils proposed developments are not suitable.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a net-zero carbon footprint, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a net-zero carbon footprint, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
David Tyler				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	No - as building too close to the forest, so will have a detrimental affect to it.	The only modification would be not to build on there	Yes		The Borough's Local Plan has a policy on protecting and enhancing the environment that has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
										No

Cheryl Tago				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I enjoy going for swimming and during the lockdown have suffered with some mental health issues and still being under the age of 18 and being able to go the leisure centre that I have been going to since the age of 11 has been incredibly helpful. Many of my friends and family under the age of 18 attend this leisure centre and for you to take away this place is incredibly sad that you would even think to take this away from many young people in the area. It's quite sad how young people are never considered when it comes to these development plans. We are the future leaders and it's as if you don't want us to be fit for the future as taking away such valuable resources will take a big toll on many young kids lives and also adults. Boris Johnson has had a big push on let's mental health by keeping on in school to develop our social skills and swimming classes that are played on offer is one way of developing our social skills. Do you think that it's right and just to take this away from us? Having open spaces to walk around by the leisure centre has been incredibly helpful.	I don't believe the removal of the leisure centre is anywhere near legally compliant.	Yes		<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. Malcolm Shykles				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	On 2nd Sept I received the following letter from OUM Property: "I refer to your correspondence to Dr Charles Woodburn at BAE Systems dated 7 August 2021 which has been passed to OUM Property who are the Investment Managers acting on behalf of the BAE Property Fund. Please note that the Larkwood Retail Park has been owned by BAE Systems since 2013 and the Nuffield gym, Busy Bees nursery and the new Tesco convenience store are all sit on long leases and there is currently no intention for residential development." The leaseholders for the next some 200 years, BAE Systems, have no plans for residential development on their property. So why has the LBWF come up with these plans? The LBWF closed the well-loved Larkwood Pool purchased from public donations and the adjacent flower gardens and play area, the cricket/ football pitch run down. This summer a local man was stabbed and killed by a youth with nothing better to do. By closing down youth facilities the youth of the area have nowhere to go. In past times there were plenty of activities for youth and this summer the pool would have attracted some 10,000 per day. The whole of Larkwood was the Larkwood Park & major facility for Walthamstow and Chingford. Closing down the remaining Leisure Facilities is not favorable to the physical and mental health of the neighborhood.	I should have thought that the owners should have been consulted.	No		The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Kathryn Unwin				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Site is covered by covenant which states site is only for leisure. Existing facilities would not be replaced as only a leisure centre and nursery are planned. What about the Nuffield centre and restaurant. Also a large carpark is needed to enable people to get to the site as public transport is poor.	Keep the site as it is	No	No one takes any notice of events	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Mike Goodyear				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	WB just add more pressure and traffic to the area	What about leisure facilities?	No	I feel that the local authority just bulldozes its own agenda	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Kathryn Uman				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Covenant on land which forbids the building of housing. There are 2 leisure centres on the land but only 1 is mentioned in the rebuttal. Environmentally unsound to knock down new buildings.	Leave the site alone there is no room for housing on this site and little public transport along new road so a car park is necessary.	No	No one takes any notice of emails.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.
Neil Hooper				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Much like the Chingford Mount proposal developments. The proposal for 280 new homes on this site is ludicrous & completely in line with Waltham Forest's ongoing mission to reduce Chingford to a giant Council Estate. LBWFL "interesting" 2020's experiment on Chingford Hill Estate cost millions to rectify in the 1990's.	Reduce the number of homes a level consistent with local infrastructure and ensure that you are building quality homes for the residents. Not another Chingford Hill Estate slum that needs pulling down & redeveloping in 20 years time.	No	To ensure residents aren't ignored as usual.	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Andrew Fearn				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Absolutely preposterous to fit in this amount of housing without parking and with the local infrastructure already struggling	Scrap the plan and retain the leisure centre and restaurants	No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 5, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.
Terry Milnes				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Hidiculously poor consultation- this area has a covenant and should not be developed at all. Totally out of character to surrounding residential dwellings.	Leave it as it is - great local facilities with ample parking.	No	no one is listening to the residents of Chingford -!!	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Local Plan requires a character-led approach to reidentification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Sarah Rose				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No Response	No	understand that the planning for building of homes includes no community provision, therefore no parking, school, doctors surgery etc. This would result in more people using current infrastructure at the expense of the current residents, therefore leading to diminished standards of living for all current residents and local workers. Local infrastructure needs government support, it is not acceptable to not be able to access a doctor for weeks at a time.	Plans for corresponding infrastructure to be made alongside and incorporated into housing plans. Evidence of research-informed heights, the tower blocks of the 70s and 80s were torn down on the basis that they had been proved unsatisfactory...this leads many to question why they are now being rebuilt. I am pleased that the green space known as Lark Wood is being conserved, as is actually also a legal matter.		No but I imagine some people would.	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and safer buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and safer buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	Yes	No	No Response	It doesn't acknowledge feedback from community members with respect to the leisure facilities provisions.	Ensure the leisure facility inside a pool.	No	-	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The site allocation requirement ensures the provision of leisure uses. Daf				S411 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I think with the Covid19 risks going on, we have come to realize that woodlands should be left well alone, and the fungi there should be left undisturbed. I don't have a problem with the other sites, but I think trees are what we need, not buildings. If you intend to put any buildings up, will they be 'green'. Heat pumps, harvesting rain water for the flushing toilets, no gas boilers, etc etc? If you were to consider anything, it would be great to have the leisure center turned back to a lido or outdoor swimming area.	I have no idea, except this plan doesn't seem in line with the covid agreement and what the indigenous communities are protesting about, the destruction of wildlife and nature.	Yes	I HAVE NO LEGAL KNOWLEDGE, BUT JUST LISTEN TO THE NEWS AND EXTENSION REBELLION AND INSULATE UK	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Ian McGill				S411 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I am totally against the redevelopment of the Leisure Centre site. To achieve the number of homes planned to be built on these sites, the only way of fitting them in each area would be to go up in the air with high rise! This form of housing is totally out of keeping with the existing character of the area and will cause harm to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. Without parking for the residents of these proposed developments this will cause massive parking wars in already very limited street parking around residential Chingford Mount and would disadvantage older people. If the 280 homes are built then residents of New Road and surrounding streets will be extremely adversely affected. By building 280 flats on this site, overlooking opponents of free plus houses, would completely destroy residents' way of life. These proposed developments cannot be delivered with policy compliant levels of affordable housing. Once these homes are built will there be extra doctors, hospitals, dentists and schools or just hollow promises to do so? Chingford Hall Estate was demolished in 1993, this was a High Rise development and low rise houses built instead. It is widely known that these small homes are not good for mental health. Covid has only shown how bad a problem this is. Why would the Council want to repeat their mistakes?	Please only build homes to the height of existing buildings, and no higher and also provide parking for any new residents. Infrastructure should be provided for any new flats as trying to get a doctor's/dental appointment is extremely difficult. With so many new homes our local hospitals, schools and nurseries will be massively impacted, making things even worse for existing residents. We do not want to lose our leisure centre. We have already lost our lovely art deco cinema and the beautiful Old Albert pub on Albert Corner to developers and what have we got now? Please leave it alone! It appears that every time the Council want to develop it just ends up being an eyesore and makes the area look worse. Please look at other existing buildings that are derelict before this site. There is a half built block of flats near Morrisons Supermarket on Chingford Mount Road and the other derelict flattened site in Old Church Road that should be looked at first with a view to redevelopment.	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. Through the evidence published in the Characterisation Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and is close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Thomas Townsend				S411 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	There should be no residential development this should be for leisure only for the people of Chingford as per the original covenant anything else is a betrayal by law?		No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.

Elizabeth Agius				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This area has a covenant against it meaning it should be for recreational purposes only so should not be used for residential use. This has not had a public meeting. This has not been publicised enough, people are only aware of it via word of mouth. There has been no leafleting neighbouring households. It has been mainly left to social media which many people have no access to.	All the above point need to be addressed properly and thoroughly. To allow local residents the chance to comment with all the facts clear defined. The covenant issue need to be reviewed.			The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Tracy Sharpe				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	There has not been clear consultation, with leafleting and there is a covenant on the land that states it is for recreational purposes only. There is no need to change the existing facilities and build on beautiful woodland	Leave it as it is, it works well for the community, and it is a much loved local area	No	Its protected land	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. 				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	1. It has a covenant against its development, stating that it should be used for recreational purposes only (meaning NOT residential). This is law. 2. There has been no public meeting. 3. The consultation has not been sufficiently publicised. It was only published online, which excludes all the people who don't appear to come across the site and everybody who is not online. Via, for example, leafleting neighbouring households and advertising other than online. It wasn't even given a mention in the local WP News	As stated in the covenant, it should be used for recreational purposes. The borough is going out for an outdoor swimming venue with a huge rise in the popularity of outdoor swimming. There could be a skate park, sports facilities aimed at young people, who are a group of people who have disproportionately suffered under the pandemic response. It could be parkland or meadow, or an adventure playground for children.			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. Michael Shellock				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Until the Council of LBMF properly communicates with and makes open and honest representations to and receives substantial support from local residents then any "Local Plan" cannot be considered to be valid.	Tough and tricky, considering the timescale and space heaven/hereon. We need better representation from local people in Chingford and Highams Park, since it is perceived by the majority in these areas that Chingford and Highams Park are under attack from the Labour-controlled council. The council have yet to justify why they are trying to build so many houses/flats in numbers that far exceed the requirements of Central Government and City Hall in London.	No	I do not consider that proper representations have been made to the people of Chingford and Highams Park about the impact of the Councils desired wishes will have on this part of the borough.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Against the proposal. 200 extra homes added to already over burdened public services as well as a loss of leisure facilities to the local area.		Yes		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Andrew Stoddart				S41 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Against proposal. 200 extra homes in an area where public services are already strained. Also a loss of leisure facilities to the area.		No		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. Mrs Malena Benfield				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Once again, no proper consultation for local residents. Minimum should be a letter through the door with a form to fill in. Once again, there are not the school or health facilities in the area to cope with this amount of people moving to the homes you propose to build. These facilities are stretched to the limit as it is. Every child should be able to attend their local school. My children went to Larkwood school. They would not have stood a chance of getting into this school if these homes had been built a few years ago. Is there going to be parking allocated to these new homes or once again are local streets going to take the burden? Chingford Leisure Centre is a fine leisure centre which is very important to a lot of residents. What is going to happen to that? There is nothing wrong with it and should be left alone.	Leave Chingford Leisure Centre alone, more doctors, dentists, hospitals and schools needed. Sort the parking situation out.	Yes		<p>The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Janica Westwood				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The local residents are happy with the site as it is. We require public & private leisure facilities plus car parking.				The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Caroline Rubidge				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The existing site provides much needed local amenities designed to help working families and encourage healthy lifestyles. The new plan would reduce access/size of these areas in a part of the borough already lacking key facilities.	Protect the two gym spaces and nursery area and car access to local transport links. From north Chingford residents are poor and would cut off ability to access leisure facilities if parking was reduced.	No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Glynis Devlin				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I took part in an "engagement event" in 2022 when members of the local community commented on these plans and made it clear they were opposed to the proposals. Consultation was flawed because a lot of people in the area were unaware of any plans for re-development here. Over-development of any area brings it's problems and where are the plans for parking facilities? According to the council representative at the 2021 engagement event, people who would live in the new development would not have cars. A lot of people use the leisure facilities here and don't wish to have them taken away. Then there comes the same old problem of lack of plans for extra services. It's difficult enough trying to get hold of your own GP and finding a dentist. Social care has long been over-stretched and what are the plans for extra schools. Chingford is a sub-urban area, not a town or city. High rise development and over-development will not benefit any of the residents here.	I suggest you have the current site as it is. Retaining all the facilities as they are. Chingford is not overrun with swimming pools and leisure centres and so we would like to keep the local amenities we already have. All the facilities on this site are well established services.	No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Aime-Marie Luff				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The area does not need redeveloping. The leisure centre was renovated a few years ago. It is heavily used by the local residents who will be very deprived if the centre were closed for over a year while redeveloped. The other leisure centres cannot help take on these residents swimming lessons, gym sessions and classes which the residents rely upon for mental and physical health. The green area has been re-wilded and home to deer and other species and construction work would be catastrophic to their survival		No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. Andrew Stoddart				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Against the proposal. There is a severe lack of leisure facilities in South Chingford. Young people have no distractions, knocking down the local library which has served the local community as far back as I can remember will only make the situation worse. The library is also a valuable resource to the elderly community. This beautiful historic building will be lost and a block of flats will be put in its place. A big shame and a loss to the community. We are constantly being told how important good mental health is. South Chingford will have NOTHING to offer its inhabitants as both the library and leisure centre at the Larkwood site will be lost. It isn't healthy putting that many people close to each other with no leisure amenities.		No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Environmental issues, use of forest area with destruction of wildlife	Don't do it! The air quality is better in this part of WF and the forest is why	No		In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.
A Ken				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The masterplan is out of character of the area and being over-development likely to cause harm to the "sense" of existing residents, not least because the 300+ vehicles that will come new residents will impose significant additional demand on the on-street parking in the area.	Don't do it	No		The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Identification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It was the glorious Larkwood swimming pool. Long since shamefully demolished. Now we have Fitness centres, Tesco and a pub. Surely all of these proposals are not made by local residents but presumably by people that live out side Chingford/Highams Park areas?	NO COMMENT	No		The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Gillian Poulter				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The directions to developers re leisure are extremely vague. There will be a loss of a private gym and pool and a public gym and pool. All of which are used by the wider community. Health, exercise and leisure centres are scarce this end of the borough. You are removing facilities with no clear indication that they will be replaced.	You need to make it clear that if the developer removes the current facilities it has to replace them, with adequate parking.	No		The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Antoni Zaskis				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This facility is used by thousands of people every week. With plenty of parking facilities. Four offer to destroy completely the face of Chingford, something we do not want or wish, as residence of this area.		No	wish to be rejected altogether.	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. Rebecca Boyton				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No		Not enough parking. Not big enough leisure facilities - there are 2 on this site	No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No Response	No					The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.
David John Anderson				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Too much too little space	leave it		simply to judge	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,880 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Kathryn Connor				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 164) states 12,640 new homes over 10 years and 12697 is proposing 27,000 new homes by 2035 - a very significant excess of 12% over the required target.	is this proposal evidence led?	Yes		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,880 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Jaquie Stafford				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	We do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do we believe it to be "reflective" as it is unlikely to be delivered in the Plan period, because the commercial uses on the site have many years of useful life ahead of them and it is unlikely that they can be replaced on the site with a form of development which is harmful to the character of the local area.	As to the above I feel very strongly and agree with what I have said in and could not have worded it better myself!	No		The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Russell Wellard				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This area should remain as it is. Leisure centres need car parks for their customers. High density housing is completely inappropriate for this site.	Leave this site as somewhere for leisure and fitness.	Yes		The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.

Timothy Boyce				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The site is under covenant and should be withdrawn from planning proposal. The site provides employment and leisure for the community and has been developed fairly recently so do just that. Utilization is unworkable not needed and illegal considering the covenant. The need for extensive housing is not as severe as it was in 2006 or 2020 the site as it is served the community the best.	Minor development on the nursery site should be looked at instead			The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Henri				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It has a covenant against it meaning it should be for recreational purposes only (ie not residential), no public meetings - no mention in the local VP laws. Lack of sports facilities.	Keeps all sports facilities, non residential development			The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Paul Leahy				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Leave it alone. Chingford does not need new flats. There isn't enough room for new builds.		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	Yes	Yes	Yes			No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Clat				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No		It is totally unacceptable to eat away at more green space.			The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Mrs M Demetriou				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Absolutely disgusting, especially using part of the woodland. This should be completely a hearing of.	LEAVE IT ALONE!	No	I do not agree with the plans	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Cheryl Tagoe				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Not appropriate	Not to complete this project	No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Cheryl Tagoe				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No		Ridiculous	No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Cheryl Tagoe				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Chingford is quiet and peaceful area. Stop ruining chingford	Don't build here	No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Sharon Legg				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	As a life long resident of Chingford and a regular user of the public leisure centre, we are dismayed that the council is planning to get rid of this facility. Both the public and private leisure centres are well used, all year round. The council demolished the old Oasis site to build "Antares" then demolished that to become the current centre. We used to have a cinema at Chingford Mount. Please stop taking away our facilities to cram more houses in for the council tax income. This just shows the stupidity that the council has for its residents. This leisure centre doesn't just provide fitness facilities, it is a lifeline to some people who come to socialise and give structure to their day. It is used by all ages, from babies to elderly people and for schoolchildren learning to swim. It is exactly what the council should be promoting, not taking away.	Scrap the plans for this site altogether to demonstrate that that the authority cares about its residents.	No		The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	How does this benefit people in chingford taking away our leisure centre and building more homes why dont you knock down Walthamstow swimming pool and build your new homes on that site.		No		The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.

If yes, please explain why?	Council's response
Timothy Boyce				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The leisure centre and the land behind is subject to a covenant it is not for the land owner and the developer to re-write the covenant in order to achieve a goal. The centre including all surrounding buildings provide employment and leisure facilities for the community that the covenant is in place to protect.	The Nursery is in private ownership and has sought planning for some time but this has been refused as being too dense, too many properties for instance. It seems double standards are in place perhaps some reasonable development of the nursery could be allowed			The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
Cheryl Tague				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Not enough schools in the area in proportion to number of homes. Kid's will be the future prone missives, doctors, lawyers of tomorrow. Many teacher shortages already due to the pandemic and will cause a significant reduction in school's GCSE, A-Level and SAT's attainment which will lower the countries average and not the way forward for the country as a whole.	Not to complete the project			The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
John Arthur Charles Walls				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No Response		The existing leisure facilities (including Huffield Health site) are fully used and form a vital element of our environment. Their loss would be unforfeitable.	No	Far too often people who fail to express an opinion are counted as being in favour of proposals.	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No Response	Yes	It should be legally compliant	More trees			The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No					Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Mudassar				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No					This response is noted.

Miss Vignati				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	Use your brains you idiots at the planning dept at LBWF		No		Offensive Response.
Tim Hencock				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, degradation to the surrounding environment, negatively affecting the current residents). This is a case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and fully-entitled approach to development activity is to provide a resolution to an upstream problem created from weak decisions concerning on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests, who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas. Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding the attack to the wider country. The reason this is an obvious attack is: the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is vitally responsible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence. The current proposed developments are reminiscent of the future that are in the Plan (S45) There are 4 tabs at para 75 of the NPPF	NEECT This site was always intended for public facilities (look at the Larkwood pool).		This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of satam using tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at breakneck speed, with a concern for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, STRONGLY OBJECT, and I am keen to understand how the people who profit fit and roots in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response
Haima Newbury				S45 - Near Tree House	No	No	Has the Plan been "actively prepared"? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. No as LBWF should be seeking to preserve the 'Local Character' of the area - residents chose to move to Chingford & Higham Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents' views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1: 94,944 States 12,680 new homes over 22 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 3 million, so why is there pressure on local councils to build in any possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - The Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time you saw a family of 4 in a flat? Not consistent with regional/national policy. Borough's plans greatly exceed targets. This development adversely affects local views and turns the settings of surrounding buildings. Any proposal of more than 3 stories would not meet policy D9 of the London Plan.	Yes		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The London Plan (2021) set a 20-year minimum housing target for Waltham Forest of 52,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 6,000 homes per year across London. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/fact finding: the choices made in the plan are backed up by facts; -Evidence of participation of the local community and others having a stake in the area; and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: -Research/fact finding: the choices made in the plan are backed up by facts; -Evidence of participation of the local community and others having a stake in the area; and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. Stuart Kitchinshaw				S45 - Near Tree House	No	No	Not in keeping with local character. Changes a predominantly low rise area and impacts views and skyline. Parking needs ignored and effectively isolated these into more car dependent for work or due to tight or local circumstances. Not positively prepared. No. Effectiveness. No additional infrastructure planned to cope with the totality of developments S45 - S8 Not consistent with regional/national policy. Borough's plans greatly exceed targets. This development adversely affects local views and turns the settings of surrounding buildings. Any proposal of more than 3 stories would not meet policy D9 of the London Plan.	Keep developments of the same height and as close to character as possible with surroundings. Make facilities on site suitable for a diverse demographic and that needs rather than a whitewash desire of how people should be made to live.	No	Not necessarily but certainly representatives of the affected local community who seen under represented in these planning decisions.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. In the Local Plan Part 1, Policy D2 - Designated Heritage Assets, There is a strong presumption in favour of retaining and enhancing Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided the planning process for any development from these classes that would lead to other substantial harm or total loss of a designated heritage asset. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> • Research that finding the choices made in the plan are based up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource objectives of sustainability will be achieved. <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> • Sound infrastructure delivery planning; • Making no regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems with infrastructure proposals.</p> <p>The Local Plan should be clearly linked to an Annual Monitoring Report.</p>
Mike Chrimes				5462 - Nur Tree House	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, but that reason it is difficult to see how the submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. This suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules" that are not transparent to consultees.</p> <p>Consultation on the site allocation (LPI) element of the Waltham Forest Plan has been taken forward towards the consultation stage. The main plan (LPI) for 2026-2035. This has coloured the views of many attending the other online consultation meetings, and made a difficult to separate views on the main plan from the specific suggestions. At times it has been difficult to determine the status of meetings which have been very followed by political point-scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, even behind businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had attendance low numbers, represented by the number of attendees allowed, or have been difficult to get into online.</p> <p>In general however it has been apparent both from LPI and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1,500 homes pa. While WLFW has a large waiting list (50,000), and central government guidance is driving all local authorities to ensure they develop affordable homes, it is not clear that all sites selected for housing intensification are suitable for housing intensification.</p>	<p>While this site offers potential for development the change of use would result in the loss of care home facilities already in short supply across the borough.</p> <p>The proposed site location suggests 33 new homes could be offered on the site but this is difficult to envisage given the planning inspectors decision to block a previous planning application here, also for 33 residences on the site (APV/03080/W/18/220426). It is partly because it would not address the local priority need for larger affordable homes.</p> <p>The site allocation should be either abandoned or reworded to take account of the above planning appeal decision.</p> <p>LAPV/03080/W/18/220426</p>	No	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p>	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. Anthony G Thome Lip				5462 - Nur Tree House	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>19. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must"</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 55, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 58(1).</p> <p>14(7E) A local planning authority must"</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(A) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments it does not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Emirates Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed I do have my doubts or will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LAE2 zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LAE2 charge. The rest of the area will also be subject to these increases and the proposed quiet the natural air flows possibly result in pockets with even a higher concentration.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1967 tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the 1940s and 1950s that people needed space and New Towns were built to provide a better quality of life.</p>	Yes	<p>Because there are too many unanswered</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to improve affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improved air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developer sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
Anthony G Thome Lip				5462 - Nur Tree House	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>19. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must"</p> <p>(A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 55, and</p> <p>(B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 58(1).</p> <p>14(7E) A local planning authority must"</p> <p>(A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(A) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments it does not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Emirates Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed I do have my doubts or will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LAE2 zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LAE2 charge. The rest of the area will also be subject to these increases and the proposed quiet the natural air flows possibly result in pockets with even a higher concentration.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1967 tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the 1940s and 1950s that people needed space and New Towns were built to provide a better quality of life.</p>	Yes	<p>Because there are too many unanswered</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to improve affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Yvonne Sanders				S462 - Pear Tree House	No Response	No	No	Is the Plan "sound"? There are 4 bids at para 35 of the NPPF. Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. The NPPF should be seeking to preserve the "Local Character" of the area residents chose to move to Chingford & Highams Park as there are low suburbs of mostly Houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats, and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3 Pg 364) states 12,640 new homes over 10 years and LDFW is proposing 27,000 new homes by 2035 - a very significant excess of 12% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing targets in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Rainecliffe has shown that families want houses with gardens. There should be a good mix of housing types and a good mix of housing types and a good mix of housing types.	This property has been refurbished during 2020/2021 and is supposed to be a Care Home but appears to be a house in Multiple Occupation for homeless people? Is it likely that it will become available for Development in the next 10-15 years? If it does, it is essential that the development is no more than 3 storeys high, so that it is in keeping with adjacent properties, does not spoil the view or skyline and does not take the ancient "right to light" of the properties behind it.	Yes	I wish to have the opportunity to explain why the Councils proposed developments are not suitable.	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>
Bill Robney				S462 - Pear Tree House	No	No	No	How do you intend to encourage new development because of embedded carbon contrary to net carbon zero targets	Refurbish rather than redevelop. Subject to a structural survey, it should be possible to add further floors using lightweight sustainable materials.	Yes		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>In April 2020, the Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, the Council sets out a strategic objective to build the borough's climate change resilience by targeting net zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.</p>
Mrs Geraldine Kendall				S462 - Pear Tree House	No	No	No	With regard to the Pear Tree House site, the proposed development is entirely out of character within its setting, which is a largely low rise 2/3 storey suburban area adjoining Epping Forest and on the perimeter of the boundary with Essex. Its height and density would have a detrimental impact on adjacent residential and the residential neighbourhood, and views and skyline. It would also contribute to the urbanisation of North Chingford when all the other proposed sites in the area are taken into account. Parking requirements in an area of poor public transport and few cross boundary public transport options have also been ignored which would have a negative impact on older people, and those requiring car to get to work (as many work outside of London). Car free developments are not suitable for a suburban area, adjacent to Epping Forest, with poor public transport because if residents need a car to get to work, they will simply have one anyway and just add to the local parking problems. LDFW housing targets at the LP far exceeds those required of it, which will adversely affect the character of North Chingford. Development proposals exceeding 3 storeys would not meet policy D9 of the London Plan. The site should only be re-developed to offer low rise family homes with gardens, which fit in with the surrounding domestic architecture, rather than 3/4 flats, in an 'office style' ugly apartment block with large windows and balconies, without garden or parking spaces. This is far too dense for its location and should be rejected.	LDFW has shown that it does not listen to the residents/local community of North Chingford. It now needs to reduce the number of proposed homes in the LP to the required number only and include only suitable site specific development proposals which will not impact adversely on the character of the area - and which would forever transform the village-like feel of the edge of Epping Forest suburbs, into a wholly urban site. Bring back empty domestic properties around the borough into use through a programme of refurbishment. Respect the Chingford Green Conservation Area and restrict any development in suburban neighbourhoods, to less dense, low rise - no more than 3 storeys. Only use site specific high quality, aesthetically pleasing design, respecting local character, architecture, and history for sensitive proposals adjacent to Epping Forest boundaries - the ugly concrete and glass box building with balconies which are springing up (or proposed for) elsewhere around the borough are just not appropriate. Include a better mix of housing in the LP - houses, maisonettes and bungalows, with gardens - not just endless, soulless flats. Provide parking for each and every home and all necessary requirements / amenities such as school places, public transport, and healthcare.	No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>

Miss Vignau				S462 - Near Tree House	No	No	No	All the LBWF are flats stop wasting tax payers money and do your jobs properly. You are all useless. These plans are rubbish				This response is noted.
Lloyd Parkinson				S462 - Near Tree House	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/night, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.		Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
Paul Wellard				S462 - Near Tree House	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low to suburban (semi rural in terms of buildings and streetage). In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. There is no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	Yes		Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Kathryn Unwin				S462 - Near Tree House	No	No	No	There is a shortage of care homes in the borough. This site could be proposed as one, and this would free up local houses for rent and sale. A much more environmentally friendly solution.	Renovate and open care home.		No one takes any notice of anything	Where proposals affect existing care facilities, the policy set out in Local Plan Part 1 ensures that there can be no loss without demonstrating that there is a surplus of that form of accommodation in the area and that it is no longer required. There is a considerable need for additional capacity to meet the needs of an ageing population. New supported and specialised accommodation will meet stringent criteria to ensure that facilities are high quality and fit for purpose.
Terry Milnes				S462 - Near Tree House	No	No	No	1. Has the Plan been "robustly prepared"? This means providing a strategy which, as a minimum, seeks to meet the area objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. No. LBWF should be seeking to preserve the "local character" of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It's NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 1,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3.79 344) states 12,440 new homes over 10 years and LBWF's proposals 27,000 new homes by 2031 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build in every possible space? Also, the housing target in the London Plan may be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The reports of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this is of course considered and met.		No	no one is listening to the residents of Chingford -!	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan sets out requirements in Policies 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of sizes. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability. In Local Plan Part 1, Policy 22 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's identity, history and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.

Peter Lofow				S42 - Near Tree House	No	No	No	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to let a few pass because they are full (pre-pandemic which is what you need to compare with) and at the very times we need to travel into work. At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider squeezing more people into an already vastly over populated area?	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to let a few pass because they are full (pre-pandemic which is what you need to compare with) and at the very times we need to travel into work. At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider squeezing more people into an already vastly over populated area?	Yes	Do not trust the council of planning teams	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>
Richard Iles				S42 - Near Tree House	No	No	No	A proposal for an Elderly residential accommodation development on this site by McCarthy and Stone was rejected by the Council and (on Appeal) by a Planning Inspector. I would have thought that there is a shortage of such provision in the Borough. There is a growing need as the population is ageing. One reason the Council gave for rejection was the size of the development and I hope they are not following the same path. The site is currently undergoing extensive refurbishment/redevelopment and may potentially be accommodated a significant number of occupants although there appears to be no information about the purpose of this activity.	I think the existing building which is modern and sound should be retained for elderly residents. I should also perhaps declare a future interest!	Yes		<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of sizes. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.</p> <p>The Local Plan contains requirements for access in Policy 16 - Accessible and Adaptable Housing. This sets out that all newly built self-contained homes are to be accessible and adaptable in line with Building Regulation M4(2) and a minimum of 10% of new-build, self-contained homes are to be suitable for occupation by a wheelchair user or easily adapted for occupation by a wheelchair user in accordance with Building Regulation M4(3). This will be applied to the site allocations and ensure that they contribute to meeting housing needs.</p>
				S42 - Near Tree House	No	No	No	Should not encourage new building when not necessary.	Retain and refurbish existing building.	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p>
				S42 - Near Tree House	No	No	No	Surely all of these proposals are not made by local residents but presumably by people that live out side Chingford/Highams Park areas?	NO COMMENT			<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Christine Shepherd				S42 - Near Tree House	No	No	No	The need in this area is for affordable houses rather than flats with no parking or outside space, since the London Plan was drafted, COVID has increased the need for outside space has been demonstrated in terms of the mental and physical health of WF residents. The number of Existing vacant housing and flats has not been investigated fully, making the judgement of the units currently needed not legitimate.	The current number of units available needs to be calculated, the wishes of those on the housing waiting list needs to be acknowledged in terms of area they want to live in and what level of accommodation they need.			<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,840 new homes (1,284 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 42,000 homes per year across London.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? 				5463 - Nur Tree House	No	No	No			Yes		This response is noted.		
Tim Hancock				5463 - Nur Tree House	No	No	No	Strongly Object to this exploitation (Development implies cancelling positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, demoralisation to the surrounding environment, negatively affecting the current residents? This is an inordinate and arbitrary decision to simply drop a development in this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions carried on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests, who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas. Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country. The reason this is an obvious attack is: the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence. The current proposed developments are a reinvention of the future that are	Reject		This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of taking existing tenures to displace current communities. This approach also seeks to compound the destruction of local communities by reporting anyone who breaches speed, with a concern for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is treating a social and cultural desert one enclave at a time. SO YES, STRONGLY OBJECT, and I am keen to understand how the people who profit from it and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Yes	Because there are too many unwise and/or	This response is noted.
Anthony G Thome Lip				5463 - North Circular S12	No	No	No	The question first to provide a definition of the law to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must: (A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 31(1). 11. (1) "A local planning authority must" (A) notify each of the bodies or persons specified in paragraph (2) of the prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are" (A) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be correct. Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these issues will be removed do have my doubts as will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the L1E2 zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the L1E2 change. But the rest of the area will also subject to these increase and the proposed quiet the natural air flow possibly result in pockets with even higher concentrations. Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In this it was realised in the 1930's that people needed space and New Towns were built with more space, green spaces, good services, schools, and a better quality of life.	Yes	Because there are too many unwise and/or	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to any new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collection and to alleviate traffic congestion. Moreover, the local Plan directs planned growth to previously developed sites that are currently under-utilised and used to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connections must be designed into the proposal from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the development and secured through an L126 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.		
Lloyd Parkinson				5463 - North Circular S12	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, day/night, additional demand for parking. Consultation flawed as no residents/online meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life etc.	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life	Yes		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. John Duffell				5463 - North Circular S12	Yes	Yes	Yes			No		This response is noted.		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Mike Chrmas				S464 - Justin Road and Trinity Way	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendments to the plan may be rejected for failing to comply with "rules that are not transparent to consultees. Consultation on the site allocation (LPS) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPS) for 2022-2026. This has coloured the views of many entering the often online consultation meeting, and made it difficult to separate views on the main plan from the specific suggestions. At times it has been difficult to determine the topics of meetings which have been very coloured by political point scoring, while officers have been subject to abuse making online meetings difficult. It is difficult to determine the extent whether consultation with the public has been legally compliant, over mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from LPS and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1800 homes per year. While LBWF has a large waiting list (100000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More	It is suggested that until master plans are developed, through consultation, for the main centres identified in LPS, consultation on individual sites is pursued. This site should be considered as part of a group comprising SA 46, 47, 48, 53, 64 and 74, possibly extended further to take into account the fourth circle, with full consideration of the implications for these developments on active transport infrastructure, improvements to east west public transport beyond and within the borough, and opportunities and needs for soft infrastructure eg health and education facilities, the creative sector, as well as the impact of the (temporary) loss of retail and employment for the local population	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed. Positively Prepared. This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified. This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding, the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective. This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Being to regulatory or national planning barriers to delivery. - Delivery partners who are signed up to it, and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be legally compliant to avoid being legally challenged in the examination or through the planning application process.	
Lloyd Parkinson				S464 - Justin Road and Trinity Way	No	No	No	Proposed developments would be out of keeping with the area. Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning. -Being regulatory or national planning barriers to delivery. -Delivery partners who are signed up to it, and -Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough, in "general conformity" with the London Plan. Local Plans also need to be legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Anthony G Thomas Tip				S468 - Highams Park Industrial Estate	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must" (A) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (B) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 38(1). 14.(7) A local planning authority must" (A) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (B) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (C) The bodies or persons referred to in paragraph (2) are" (B) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have will be removed I do have my doubts as will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. The rest of the area will also be subject to these increases and the proposed speed the natural air flow possibly result in pockets with even a higher r concentrations. Waltham Forests current population density is far to high and as such we have seen significant increases in social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hill Estate where the 1960s tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the UK was realised in the 1920s that people needed space and New Towns were built to provide a better quality of life.	Yes	Because there are too many unanswered questions.	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing a part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new urban environment, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L106 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
Lloyd Parkinson				S468 - Highams Park Industrial Estate	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, bright/light, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life. Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Yes	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 32,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were de-prioritised across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Victoria Johnsons				S468 - Highams Park Industrial Estate	No	No	It doesn't listen or negotiate with the Highams Park Planning group - it ignores their opinions when it has the duty to represent Highams Parks residents views.	Where is the provision for driv and school places? The area to be built on is too close to the field and will be encroached upon. Again that word "explore" implies which means absolutely NOTHING to developers, who may explore and then say any given initiative is too expensive. pointless	Yes	Development proposals will need to be in general conformity with the Highams Park Neighbourhood Plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasizes the provision of GP practices and other health care facilities, within walking distance to the residential catchments areas.	
				S468 - Highams Park Industrial Estate	No	No	The whole of the borough is becoming claustrophobic with every bit of space being filled with blocks of expensive unwellcoming matchbox flats, this development should be a warning we need space not confinement	Leave the business that employ and save local people alone	Yes	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.	
John Duffell				S468 - Highams Park Industrial Estate	Yes	Yes			No	This response is noted.	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? 				S468 - Highams Park Industrial Estate	Yes	No	No	Loss of facilities with no provision to improve infrastructure.				The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Ray Anderson				S468 - Highams Park Industrial Estate	No Response	No	No	All developments need to be scrutinised as Council is building/ developing above requirements. See why Claire Coghil 'vignette' and how all these plans were developed under her watch.	Stop all developments until current Council fully investigated as they do not have Chingford residents interests.			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,850 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Mike Turpin				S468 - Highams Park Industrial Estate	No	No	No	It does not comply with the LBWF commitment to abide by the accepted local Plan. All new building should not be too high and should be designed to match the local style.	It should comply with the limitations contained in the local plan.	Yes	To ensure that LBWF comply with the approved Local Plan.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Ian Ashley				S468 - Highams Park Industrial Estate	No Response	No	No Response	There is insufficient parking to support additional industrial, retail or residential capacity at this location. It is likely that existing industrial activity would be lost during redevelopment and be unlikely to return. The site is not well connected - contrary to the assertion in the plan.	Remove this location designation and suitable for development from the plan	Yes		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Waltham Forest has an identified need to provide additional industrial floorspace over the Local Plan period. As such, development within existing designated industrial sites is required to re-provide the same quantum of industrial floorspace, and the intensification of industrial provision is encouraged.
Benjamin Faulkner				S468 - Highams Park Industrial Estate	Yes	Yes			The plan should include guarantees to retain the same amount of green space and recreation space as we have today.			The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
										No

				S468 - Highams Park Industrial Estate	No	No	No					This response is noted.
Simon Binks				S468 - Highams Park Industrial Estate	Yes	Yes	Yes					This response is noted.
Beryl Lough				S468 - Highams Park Industrial Estate	Yes	Yes	Yes			No		This response is noted.
Tim Hancock				S468 - Highams Park Industrial Estate	No Response	No Response	No Response	<p>Strongly Object, to this exploitation (Development implies something hostile and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, denigrations to the surrounding environment, negatively affecting the current residents?)</p> <p>This is an expedient and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions centering on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is: the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are</p>	Reject based on continued denigration to local community and strain on local services, as pointed out above.	Yes	The development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone of brokenness speed, with a contempt for the consideration toward the current people in the vicinity, while it also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, I STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will undertake the future wellbeing of the indigenous community?	Offensive Response
Michael Phillips				S469 - Washburn Lane SLS3	No Response	No	No	<p>The plans make no mention of the hundreds of un-occupied dormitories in the south. This area does not need more shoddily built high-rise blocks, which will increase traffic, increasing risks for pedestrians and cyclists, and disrupt local residents for many years. What is needed is (i) green space and better access to the waterfront, (ii) commercial space for local businesses, and (iii) sensitive development of existing industrial areas to enhance its character and utility. Adding thousands of residential units will stretch infrastructure and diminish the character of the local area.</p> <p>If residential units are required, build quality family houses, not flats!!</p>		No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required to be sited on some sites identified within strategic locations such as town and district centres and a close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council sets out it's strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. If yes, please explain why?	Council's response
Ben Tompson				S469 - Bacthorne Lane SLS	Yes	No	Yes	recognise the need for new homes but this proposal talks about optimising the volume of homes, which will put too much pressure on the surrounding green space and building height, which will harm the value of the marshes as open green space uninterrupted by unmarred structures. There is no mention of a proper sustainability strategy with regard to protecting the surrounding green space and the development itself being carbon neutral and sustainable. Many people attribute their mental health problems to being able to access the open space of the Marshes. The open green space of the Marshes has been a saviour for so many local residents. The benefits of open, unobstructed green space is backed up by over 3000 clinical studies in the last 5 years alone.	A development at this scale should have the environmental impact and sustainable building practices at its heart. This means low-rise buildings that complement their surroundings and don't obstruct views of green space for local residents. Buildings that use sustainable resources. A building strategy that means the development is self-sufficient through sustainable energy technologies like solar and wind. This approach needs to be outlined from the start, before any high level permissions are granted.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. In April 2020, the Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it's new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.
Ashley Fletcher				S469 - Bacthorne Lane SLS	No	No	No	The plan appears to have ignored the 100s of residential units to the south of the SLS, indeed they are not even represented on the map (while residential blocks are missing on Hookers Road/Champneys Close/Hoffmans Road etc.). Further, the plan says "New development is required to mitigate for potential impacts (noise, odour and air quality, visual amenity, hours of operation and lighting) to protect the operations of the existing businesses" when totally ignoring existing residents to the south of the area. Why should the new development only have to mitigate potential impacts to existing business but not existing residents? Tall towers are being suggested to be very near the south of the area, again this totally ignores the 100s of residents that live to the south who would have a huge tower block built on top of them. Why is Waltham Forest suggesting tall towers, the Taylor Wimpey development just south of this area was only allowed to be six stores this would seem a sensible height for these new developments. The area is already struggling with a lack of social infrastructure for local residents, a new GP was promised years ago as part of another recent development but that is still not open. Have Waltham Forest considered local GP's etc., do we have the capacity for these additional residents? Will you be requiring new schools/ dental practices/ GP's etc. Have Waltham Forest considered the air quality/ noise issues from "industrial intensification"? It seems odd that Waltham Forest are seeking to do this when they have acknowledged that there are air quality/ noise issues already coming from the industrial estate which they are struggling to reduce/ deal with (I understand there are a number of active noise pollution complaints that Waltham Forest are investigating from this area). I think this area should be developed, but more consideration for local residents is required (in particular those to the south of the area, that were not included in the consultation).	The plan needs to be modified to take into account the 100s of residents living to the south of the area, which appear to have been totally ignored/ forgotten (to the extent that residential blocks do not even appear on the map included with this plan.). The tall blocks should be further north in the area, and all new development should have to consider existing residents and not just businesses.	No	To ensure local residents are duly consulted	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The site allocation requires that replacement commercial floorspace is reproduced, ensuring that the site still provides economic opportunities The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. Owing to the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local plan consultations have always been welcome either through the online portal or by email and post.
Cheryl Gayer				S469 - Bacthorne Lane SLS	No Response	No	No	The Local Plan completely ignores the substantial residential development (Hookers Road/ Hookers Road/ Champneys Close) immediately below the site boundary at the bottom of the plan. Not only is that area blank on the plan, but your development guidelines ignore it. The guidelines discuss mitigating potential impacts (noise, odour and air quality, visual amenity, hours of operation and lighting) to protect the operations of the existing businesses but they make no mention of mitigating potential impacts on local residents. This is unacceptable. Moreover, the Local Plan suggests potential for height at the south of the site. That would be in close proximity to the residential development, which is only six floors high, and adjacent to the Wetlands. A tall building in that location is completely inappropriate.	The substantial residential development located immediately below the site boundary should be included in the Local Plan both in terms of the placement plan and in terms of the development guidelines. It is essential to consider potential impacts to these residents and how to mitigate them. Moreover, neither high-rise buildings nor heavy industry should be allowed in the south part of the site in view of the large number of residents living immediately south of there. Any tall buildings and heavy industry should be reserved for the central or north part of the site (and query whether either is appropriate given the proximity of the Wetlands).	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimize these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
Dominic				S469 - Bacthorne Lane SLS	No	No	No	Because it's not for local people who won't be able to afford anything there	Don't build anything there leave it natural for the local wildlife to inhabit	No	No it's not necessary	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. This is noted. However, it is through the adoption of Local Plans, that the required level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.
										No

If yes, please explain why?	Council's response
Julian Cheyne				S49 - Blackthorn Lane SLS	No	No	No	<p>Development of this site will adversely affect the neighbouring Walthamstow Wetland which is a Site of Special Scientific Interest (SSSI), a RAMSAR (Wetland of International Importance) site and part of the Lea Valley Special Protection Area (SPA).</p> <p>The Site Allocation fails to mention these important features of this site and fails to consider the harmful impacts this site will have on the Walthamstow Wetlands.</p> <p>Waltham Forests Policy BS 6 states:</p> <p>Police BS 6 Development proposals will not normally be granted planning permission where they pose adverse direct or indirect effects on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA). Development on or near to Walthamstow Reservoirs Special Protection Area, Walthamstow Wetlands and Walthamstow Marshes Sites of Special Scientific Interest must not have a detrimental impact on the biodiversity or nature conservation value of the site.</p> <p>Waltham Forest lists the following policies in its Draft Local Plan:</p> <p>•Protect and enhance existing green and blue infrastructure, including open space and leisure facilities, biodiversity and nature conservation (17 'Protecting and Enhancing the Environment')</p> <p>Policy SA 14.5 C. minimising any negative impacts it may have on visual amenity, access, health and security</p> <p>14.6 amenity will be carefully assessed in regards to its associated environmental, health and social impacts, in relation to both the immediate</p>	<p>Development should be restricted in terms of population and the number of units. Tall buildings should not be allowed. This site has a number of important environmental designations. As Waltham Forest states in its policies it should respect and protect green open spaces in all parts of the Borough, whether they be Epping Forest, the Lea Valley Park or local open spaces. Green open spaces provide important health, social and economic benefits which are all the more important in dense urban settings. Increased population pressure is unsustainable and tall buildings reduce the same of openness of open spaces harming visual amenity.</p>	Yes	I am a member of Save Lea Marshes, which campaigns to protect and enhance green open spaces in this part of London	<p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>
Tara				S49 - Blackthorn Lane SLS	No	No	No	<p>We are facing an environmental emergency, potentially one of the biggest emergencies and thus crisis of our lives. We need to create more green spaces, not build on the ones we have. We need less emissions, pollution and waste, not more. We need to protect the biodiversity of special green spaces such as marsh land, ecological habitats that pollinate flowers, clean the air and soak up flood water. This is anti progressive and not for the benefit of the people.</p>	Keep the site as is	Yes	To make sure its fair	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p>
Caroline Day				S49 - Blackthorn Lane SLS	No	Response	Yes	<p>The 'potential for height' i.e. blocks of 16-27 directly adjacent to Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and thus, unsound.</p>	<p>To be in line with the protections afforded to SSSI, RAMSAR sites of international importance for nature conservation and the SPA, there should be no 'potential for height' afforded to this site allocation. Development, if any, should be strictly limited in terms of height, purpose and scale in order not to have a significant adverse impact on the neighbouring wetlands.</p> <p>The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of cars and an increase in lighting and so on, if the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.</p>	Yes	If further detail is required, for submission to be taken fully into consideration.	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Tushar Kulkar				S469 - Backhorse Lane SLS3	No	No	No	<p>The plan fails the duty to cooperate because it arbitrarily increases the assigned houses gross from 1800 to 2900. This is completely unnecessary and was not consulted on in any other document. There is no evidence provided for why this is the correct amount for this area. 2900 is a very substantial amount which would substantially reduce the ability of the landowners to help provide industrial use cases. Therefore this should be reduced to 1800 otherwise the plan is not sound or cooperative.</p> <p>Furthermore the plan fails the agent of change principle because it does not state that it will mitigate pollution impact on local residents, such as those living in the development south. By increasing connectivity through these developments the council is merely increasing A&R and noise pollution affecting 2000s of people will be making clean residential streets that are not intended for such use.</p> <p>Lastly, there needs to be clear statement that local areas accessible to the public are being created rather than private use cases for specific residents only.</p>	<p>Reduce the houses target to 1800.</p> <p>Put language in to the principles stating "the new area will ensure that there will be safeguarding of local residents to prevent spillover effects such as increased noise pollution and use of residential roads". This is achieved by ensuring pedestrians and cyclists use new infrastructure along backhorse lane, and along the west path along the wetlands.</p> <p>Another statement stating that development must prioritise creating public spaces accessible for all, rather than private uses</p>	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Duty-to Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p>
Colin Miller				S469 - Backhorse Lane SLS3	Yes	Yes	Yes	The area needs more hospitality, retail and housing, plans look great!		No		<p>The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p>

-				S469 - Blackhorse Lane SCL	Yes	No	Yes	Access to greenery in the marshes has been one of the few consistent pleasant escapes available to me in the last 7 years. This kind of access to nature is very rare in London and one of the reasons that made me want to live on this side of the borough. I believe that further grand scale constructions will further demature the space. Londoners need more green space and less speculative high-rises.	Respect the importance of the marshes as a key nature site in the life of East London residents. Keeping the marshes wild is the best option. Alternatively minimize as much as possible the impact of new constructions on the identity of the marshes, one of the rare easily accessible open spaces in a busy city, leaving it as a low rise and inviting nature to flourish.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. Victor Smith				S469 - Backthorpe Lane SLS	Yes	No	Yes	Walthamstow Wetlands, which is next to this proposed site, is part of the Lee Valley Special Protection Area, a Site of Special Scientific Interest, and Ramsar site wetland of international importance. This Local Plan is unsound because it does not take this into account, therefore potentially enveloping the impact of this Plan on the valuable wetlands it is next to.	The Local Plan should be modified to take into account the protected status of the Walthamstow Wetlands, and it must be ensured that any development does not negatively impact the Wetlands. Like Egging Forest, Walthamstow Wetlands and the Hackney and London Marshes area should be protected from development. This is particularly important as this area is a floodplain that will act as a buffer to protect local residential and commercial areas from increased risk of flooding caused by climate change.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. C Martin				S469 - Blackhorse Lane SLS	Yes	No	Yes	I think the size of the proposed development would be incredibly detrimental to a huge population who use the space for mental health and wellbeing. I work as a counsellor and regularly have clients who describe the positive and life changing effects of visiting open green spaces - often with particular reference to 'openness', 'visibility' and 'horizons'. Town blocks like this would not only totally ruin this sense of space, a real rarity for Londoners, but also bring a huge influx of population who the demographic (due to the proposed high prices) are not necessarily those who would use the space, or most vulnerable. Additionally it seems impossible that the wildlife and biodiversity will be unaffected by these changes. I believe these plans are unsound and unethical, motivated only by money - complete object.	I believe the only justifiable plan would be to leave the site as it is, it does not have any buildings at all, even barnyards, would leave the future life for housing in its entirety, and the huge mental benefits of the space in fact. The only reasonable reason to build here would be for pure social council housing - no purchasable properties at all. As I do not intend to do this, there is no moral grounds for the development.	No		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2), means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of benefit for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.
Jade Croftland				S469 - Blackhorse Lane SLS	Yes	No	Yes	The Blackhorse Lane SLS about the Withamshaw Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on, if the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. Nina Pearlman				S469 - Blackhorse Lane SLS	Yes	No	Yes	Withamshaw Wetlands is a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). The Blackhorse Lane SLS proposal directly impacts the Wetlands adjacent to it. Surprisingly this information is absent from the development guidelines. The borough should apply the same approach to our blue and green spaces worth of protection as it does to Egging Forest, a Special Area of Conservation (SAC). To apply a different approach to sites equally worth of protection is inconsistent and, therefore, unsound.	The borough should apply a consistent approach to the relationship between people and green spaces across the borough, and seek to protect natural habitats from damage caused by an increase in population density and all the ills that come with it (increase number of pets and lighting, congestion etc) if the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	My quality of life and the value of my property will be directly affected by this proposal, which will have negative impact on wellbeing and the existing community. I seek to assure my voice is heard.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
				S469 - Blackhorse Lane SLS3	No Response	No	No Response	The Blackhorse Lane SLS3 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Paul Baskin				S469 - Blackhorse Lane SLS3	No Response	No	Yes	It's inconsistent to seek to minimise access to Egging Forest in one part of the borough, as the council rightly does, and yet put forward proposals like this, given that the Blackhorse Lane SLS3 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance, a RAMSAR site and part of the Lee Valley Special Protection Area (SPA).	Stop the development completely because the scale and massing of these blocks is such that they would diminish an important open space and greatly reduce their amenity by imposing a fixing of encroachment and being surrounded. An important part of the enjoyment of these green spaces is to get away from the pressures of daily life and to seek to the ordinary people of London. These blocks would hugely reduce that enjoyment for all Londoners.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Marion O'Brien				S469 - Blackhorse Lane SLS	Yes	No	No	As the Blackhorse Lane SLS abouts the Wetlands the plan would dramatically affect the delicate ecosystem of the SSSI as well as bring additional pressure to the local transport links which are already overstretched by all the new developments in the immediate area. The Wetlands are part of the Lee Valley Special Protection Area (SPA) yet there is absolutely no mention of this in the development guidelines. The borough's green and blue space is vital to the physical and mental health of residents	Development should be restricted in terms of number of units and height (no more than 5 stories) with and a focus on people-centred urban development and social housing. As Waltham Forest states in its policies it should respect and protect green open spaces in all parts of the Borough, whether they be Epping Forest, the Lee Valley Park or local open spaces.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. 				S469 - Blackhorse Lane SCS	Yes	No	Yes	The Blackhorse Lane SCS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. The proposal is unsound in many ways. Damage to precious wildlife, ecosystems and local biodiversity. This will happen as the area is built on and then further impact will come from the population increase in the area. Increase of people, cars, noise, light, vehicles and pollution will have a hugely negative affect. Increased mental wellbeing of local residents. Locals have relied on the sanctuary of the marshes for decades and especially so over lockdown. Such open green spaces boost mental wellbeing, help reduce crime and help people recover from illness. Creating a multi-story eye wall will completely change the place and take something very precious away from locals. A less effective flood plain. The area is a flood plain for the local area. This needs to be kept in tact for greatest effectiveness. The site weather is only getting more extreme. The flood plain needs to be preserved.	would like to see the site left as it is for the benefit of the existing local community and wildlife. It would support a diverse ecosystem and benefit peoples mental and physical health as well as protecting them from flooding, pollution and overcrowding, with detrimental affect would also be reduced.			The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. 				S469 - Backhorse Lane SLS3	No	No	No	The council of Waltham Forest rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. Protecting this green space and its biodiversity should be one of the top priorities of Waltham Forest Council and it's residents. Spaces such as this have saved the mental health of many citizens specifically during the pandemic and the holdovers and their proposed tower blocks and houses will completely destroy that	If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes certainly can't, then the development should be refused. Furthermore, these plans are harmful as they will undoubtedly lead to a line of towers all along the west side of the Marshes			The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. I propose that S469 Backthorpe Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
				S469 - Backthorpe Lane SLS	Yes	No	Yes	The Backthorpe Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound. Indie Cahill				S469 - Backthorpe Lane SLS	No	Response	No	Witham Forest Council rightly acknowledges that access to green spaces, particularly open green space, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Egging Forest and mitigate for urban effects to ensure no adverse effect on the Egging Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Egging Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Egging Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and Pocket Park. Pocket park hosts over 300 trees and its destruction will increase the likelihood of flooding in the area should the River Lee level rise, therefore its loss of protection with the marshes, compared to Egging Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, when the Marshes and Pocket Park are, then the development should be re-located. These sites are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained, the number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-pandemic statistics, which while understood are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	No	As this has a massive impact on the community	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The allocation of this site requires the creation of high quality green space. Through the evidence published in the Character Intensification Study, sites that are appropriate for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by or to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Barak Can Akici				S469 - Backthorpe Lane SLS	Yes	No	Yes	The Backthorpe Lane SLS abouts the Withamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). 				S469 - Backshore Lane SCL	No	No	No	This proposal is on a risky flood plain, the marshes are a great public amenity & more high rise development rising to 50 stories strikes as mad on a safety aspect - ground was laid recess if ever needed from this height would be impossible. Try converting existing redundant factory buildings to achieve more friendly neighbourhoods. Instead of joining a well loved natural area for Hackney residents to escape to.		-	-	Housing sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
				S469 - Backshore Lane SCL	Yes	No	No	The Local Plan does not consider how traffic, noise and pollution will affect existing neighbours. HDV moving in and out of the industrial estate at different hours of the day and night cause annoyance to local residents. The Local Plan needs to provide solutions to ensure the development does not cause residents in the surrounding areas suffer.	Limit the hours where HDVs are able to access the site. Introduce no idling areas so the HDVs do not leave their engines running while waiting to unload	-	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, if new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/instored vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimize these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.

Navey Mahals				S469 - Backshore Lane SLS3	Yes	No	Yes	The Backshore Lane SL about the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in the site allocation document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Backshore Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	Yes	Hard to achieve good community engagement only through online channels.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
David Berteil				S469 - Backshore Lane SLS3	Yes	No	Yes	The proposed development at S469 - Backshore Rd will put huge population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits beside. The Hackney area of the Old River has been a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Egging Forest area. This use of this site to house thousands of people is putting huge population pressure on a vulnerable SINC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will lose yet another green space they can spend time and walk dogs in. Due to unsustainable population pressure, these plans are unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting and the impact of tall buildings. If the green spaces near a proposed development cannot sustainably absorb the impacts of the development, as Hackney Marshes cant and Pocket park wont if it is destroyed, then the development should be refused. I suggest that Oriant Way Pocket Park be retained. A second modification suggested is the number of units and the area of the town should be significantly decreased, to reduce population pressure on the surrounding marshland area that cant absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-lock statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	Yes	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.	
Ute Krayman				S469 - Backshore Lane SLS3	No	No	No	The Backshore Lane SL about the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in the site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound. The open green space of the wetland has been a haven for so many of local residents. Many people attribute their mental health and wellbeing to being able to access the open spaces of the wetland, not just during covid but for the last 20 years and longer. Continued good mental health and wellbeing is a direct impact on the NHS as it puts less pressure on our resources. Yet these proposed intensified development including tower blocks and houses will completely destroy that.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Backshore Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	No	I live and work close by and the development will have an impact on my life and the life of my community.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Frances Dismore				S469 - Backshore Lane SLS3	No	No	No	The Backshore Lane SL is immediately adjacent and contiguous with the Walthamstow Wetlands. There is no mention in the development guidelines of the fact the wetlands is a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). In the same site allocation document Egging Forest is stated to be worthy of protection of development, rightly so, on the grounds it is a Special Area of Conservation (SAC). It is internationally and unsound, therefore to not protect our equally important blue and green spaces, with designated protection status, to the west of the borough.	MODIFICATION: Designated protections of our blue and green spaces should be recognised and safeguarded consistently wherever these areas are located, the more so for the fact that we are facing the existential threat of catastrophic biodiversity loss as documented in The State of Nature 2020 (DOI: 10.13169/2.2.36200-8766). The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in average pollution/nearby St Andrews Road sewer storm overflow Tg30508004 spilled 8 times for a total of 4 hours in 2020. The Lee Val Walthamstow Storm Tank spilled 21 times for a total of 73 hours in 2020), road run off pollution, air pollution, lighting and noise so on. For example, light pollution changes animal habits and insect abundance. The building of tall buildings in London has increased the Peregrine falcon population. A good thing one might assume. A couple of pairs now use Walthamstow Wetlands as their hunting grounds and breed nearby. However, the increasing light pollution allows the falcons to hunt later into the night, exposing vulnerable, declining bird species that once could migrate to the Ramsar site under the safety of darkness, such as the Woodcock to experience more intensive predation. If the green spaces near a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.	Yes	Transparency is important residents must be able to observe who is making decisions that damage our air quality, water quality, natural heritage, public health and overall resilience, resilience.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
				S469 - Backshore Lane SLS3	No	No	No	It fails to take into account the 200 of residents living on Hobbles Road/ Hoffmanns Road/ Colindale Road/ Champsess Close. The blocks of flats on those roads (which are directly next to this area) are not even included on the map for the local plan. There 200 of flats that currently exist (and people live in) that are totally missing from the plan. We fail to see how Waltham Forest can consider industrial uses/ tall buildings are appropriate in the south of the land parcel when those residents are accounted for (what we right next to that area).	Industrial intensification should be prevented at the South of the land area, and also the south tall building location agers must be close to the existing residential blocks (again I wonder if this is because these residential blocks are not on the map being used)	Yes	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.	
				S469 - Backshore Lane SLS3	No	No	No		Yes	The site allocation requires that replacement commercial floorspace is re-provided, ensuring that the site still provides economic opportunities.	The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
xxx				S469 - Blackhorse Lane SCL3	No	No	No	Spec all heights should be 20 metres from the river waterfront		Yes	I think all heights should be 20m away from the waterfront	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Stacey Glover				S469 - Blackhorse Lane SCL3	No	No	No	This creates extra traffic extra population on a grand scale but no extra schools of gp surgeries etc in place to accommodate the extra people causing more back log and no school places for the community already here.		No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Abigail Woodman				S469 - Blackhorse Lane SCL3	Yes	No	Yes	The Blackhorse Lane SCL3 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a RAMSAR site and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest SAC is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Hanna Ellis				S469 - Blackhorse Lane SCL3	Yes	No	Yes	This site is adjacent to the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. Rebecca Flint				S469 - Blackthorne Lane SLS	Yes	No	No Response	The Blackthorne Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound. I also think that further building on a flood plain is very logical. We are aware from friends that live on the edge of the marshes near Coppinmill that they have been informed they now live in an area at risk of flooding due to the fact that there has been so much building work near Ferry Lane/Blackthorne. For them, long term residents of over 20 years, who's homes have never flooded this was really quite shocking. Have you taken into account the rise in insurance for houses affected by the building in a flood plain?	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. I propose that S469 Blackthorne Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats. I cannot see that building on the area that is an area of SSSI and a flood plain is logical in a time of increased global warming, higher sea level, and as we saw last year flash flooding across the borough of Walthamstow - it will only increase.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. George Morgan				S469 - Blackhorse Lane SLS	Yes	No	Yes	The Blackhorse Lane SLS sits next to the Walthamstow Wetland, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines which both they legally sit upon. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so too - clearly - should our blue and green spaces that flank the west of the borough. To do otherwise is inconsistent and therefore, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect natural habitats from damage caused by an increase in the number of people, which brings with it an increase in the number of pets, potentially damaging recreational activities, lighting, emissions and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refrained. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.			The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Melanie Salfbery				S469 - Blackhorse Lane SLS	Yes	No	Yes	The Blackhorse Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent so therefore unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refrained. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Anika				S469 - Blackhorse Lane SLS	Yes	No	Yes	I have been a WF resident my whole life, have lived next to and gone to school next to the Marshes. Lea Marshes is a special site for plants and wildlife. It is a haven for the local community who use it for education, recreation and for their mental and physical health. The proposed plans removed as they would significantly adversely affect the Marshes and its wildlife and landscape and in turn impacting the local communities who use it daily. This initiative would go against the wishes of Waltham Forest Council who recognise the importance of green spaces. In other areas of the borough plans next to Epping Forest are showing consideration for green spaces, I believe this should be the case for the Marshes too.	Due to the nature of the plans above, I believe the only modification in this case would be to leave the site as is, with light industrial use. This is the only way to ensure no disturbance is made to the natural environment.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Alex Birtles				S469 - Blackhorse Lane SCL3	Yes			In my view the local plan is not sound. First and foremost it is acknowledged that the Blackhorse Lane SCL is adjacent to Walthamstow Wetlands. This area has been designated as a Site of Scientific Interest and is such a wetland of international importance. There is no reference to the fact that it is an SSSI in the plan. This is an appalling omission and perhaps a deliberate indication to not inform residents of the impact of these plans on such a special area. Other conservation areas of special interest in the north of the borough have been protected from development. The policy across the borough should be consistent. Furthermore this area	I believe that S469 Blackhorse Road should be protected because of its SSSI status and that there be no further development plans accepted for discussion in the future. This would be in line with actions taken in respect of the north of the borough.			The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Adam Burch				S469 - Blackhorse Lane SCL3	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to 'minimise access to Epping Forest and 'mitigate' for urban effects to ensure no adverse effect on the Epping Forest SAC. However, the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have had different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes. The Blackhorse Lane SCL abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound. The following threats are all further reasons why the site is unsound: Blocks of 18-27 storeys Abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI) A RAMSAR (Wetland of International Importance) site Part of the Lee Valley Special Protection Area (SPA)	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
				S469 - Blackhorse Lane SCL3	No	No	No	The Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	Yes		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Ben Hatherton				S469 - Blackhorse Lane SCL3	Yes	No	Yes	The Blackhorse Lane SCL abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.			The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. I propose that S469 Backhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
-				S469 - Backhorse Lane SLS	Yes	No	Yes	The Backhorse Lane SI about the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. Miranda Cochran				S49 - Backhorse Lane SLS	Yes	No	Yes	The Backhorse Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. I propose that S49 Backhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

Hannah				S49 - Backhorse Lane SLS	No	No	No	The Walthamstow Wetlands should be protected for multiple reasons, as a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). It is ridiculous that area in the North of the borough get this protection.	The site should be MFL as it. The Wetlands can not take on this level of change. The area can not take on the additional pressure, and these proposals will irrevocably destroy this SSSI, RAMSAR site and SPA.	Yes		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. -				S469 - Blackthorne Lane SLS	No	No	No	The marshes are an essential place for people in the surrounding built up areas to connect with nature, and filling the space with apartment blocks would devastate this resource.		-		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Olivia Healy				S469 - Blackthorne Lane SLS	No Response	No	No	This is building is infringing on a green space filled with wildlife. It is destructive to the ecology and biodiversity of the area. This green space should be protected.	Do not build near to the wetlands, reservoirs, and marshes.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Alice Mead				S469 - Blackthorne Lane SLS	Yes	No	Yes	I welcome proposals to improve the pedestrian and cycling experience along the roads that border Hadley and Walthamstow Marshes, but a development on this scale will inevitably be detrimental to the character of this important area of open green space as a result of the impact of the construction itself, followed by increased motor traffic and footfall. At all this is likely to cause physical damage to the Marshes and wetlands and their associated biodiversity, increasing the number of high rise towers is not appropriate when so many local residents use the Wetlands as a refuge from the urban environment. The Blackthorne Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackthorne Lane be protected as the SSSI and RAMSAR site that it is and be immune from further development threats. Alternatively, any development should be reduced in scale and kept low-rise to minimise its negative physical, environmental and visual impacts.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Eamonn Keane				S469 - Blackhorse Lane SLS	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to 'minimise access to Epping Forest and mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes certainly can't, then the development should be reframed. Furthermore, these plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes. I suggest the modification that this site be kept as it is, as a light industrial site. Waltham Forest needs employment sites. This is already a low use employment site (Locally Significant Industrial Site) with good road (A12) connections with the potential to create good valley side to the site, with no residential neighbours. This is compatible with open green space, affording the same level of protection to the Marshes as Epping Forest, and would be a suitable modification.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Louise Marshall				S469 - Blackhorse Lane SLS	Yes	No	Yes	FIRST BOX: The Blackhorse Lane SLS abouts the Walthamslow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed. I propose that S469 Backhorrie Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.			The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Anthony Wragg				S469 - Backhorrie Lane SLS	Yes	No	Yes	The Backhorrie Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed. I propose that S469 Backhorrie Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. S Pender-Hughes				S469 - Backthorpe Lane SLS	No Response	No	No Response	The proposal at S469 are unsound because: The Backthorpe Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	Ramsar Sites are wetlands of international importance that have been designated under the criteria of the Ramsar Convention on Wetlands for containing representative, rare or unique wetland types or for their importance in conserving biological diversity. As such Waltham Forest must protect them from development and the resultant impact of population pressure, increased light/noise/air pollution, increased run off and significant change to the character of the space. Considering this, the current proposals must be modified and the only way to make these sound would be to protect the area at S469 as the SSSI and RAMSAR site that it is and to ensure it is made immune from further development threats.			The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Sara Hussaini				S469 - Backthorpe Lane SLS	Yes	No	Yes	The Backthorpe Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-located. I propose that S469 Backthorpe Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. To do otherwise is inconsistent and, thus, unsound.	Respond to the proposed plans around the Marshes // Threats to Lea Marshes. How to respond // **Final date to do this by is 31st January 2022** Waltham Forest has plans for a number of new developments around Hackney and Walthamstow Marshes that, if approved, will create a line of tower blocks along the River Lea to 50 storeys high. If these plans go ahead, they will irreversibly change the face, feel, openness and biodiversity of the Marshes. While recognising more affordable housing is essential, the placement (and predicted lake) of these new developments are more likely to degrade and erode our human and wildlife communities that support them. The plans for high rise developments around the Marshes are in the second stage and Save Lea Marshes have done amazing work to bring together how we can object to these plans to try and save our beloved open green spaces around Hackney and Walthamstow Marshes. Here is a summary of the information they have put together and how to object through the official channels: There are 3 main sites that Save Lea Marshes have chosen to object to: 1. The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pits, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-allocated. I propose that S469 Backhorse Road be protected as the SCS and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. I propose that S469 Backhorse Road be protected as the SCS and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.	
Silo Mason				S469 - Backhorse Lane SCS	Yes	No	Yes	The Backhorse Lane SCS is next to the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). However there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pits, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-allocated. I propose that S469 Backhorse Road be protected as the SCS and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. Heonor May Alford				S469 - Blackhorse Lane SLS	Yes	No	Yes	The Blackhorse Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should these as equally important green spaces for the surrounding communities. This development is therefore inconsistent and, thus, unsound.	Green and blue spaces across urban areas should not only be protected but developed themselves. Developments that propose increase in population, traffic, waste, domestic pets, pollution and light directly impact surrounding wildlife, biodiversity and clean air. This means the green and blue areas around the new development cannot sufficiently absorb its impacts, therefore the development should be re-worked or removed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.		Born in the area I am highly connected to these green spaces and its surrounding communities so believe I have a voice when it comes to its potential threat.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Isalde Godfrey				S469 - Blackhorse Lane SLS	Yes	No	Yes	The Blackhorse Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refrained. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	Yes		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed. I propose that S469 Blackhorse Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	No	It's necessary to be able to ask questions and get answers	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Clare Gleeson-Lindley				S469 - Blackhorse Lane SLS	Yes	No	Yes	The Blackhorse Lane SLS abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets, and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed. I propose that S469 Blackhorse Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats. Further, as a resident of Blackhorse Lane for 9 years, the opening of the Wetlands was heralded by many as a reason to visit the area, by undertaking this project, not only will the beautiful and tranquil Wetlands be compromised for visitors but also the very wildlife it seeks to protect. In addition to this, works traffic on a road that has benefited from traffic calming measures as well as being just on the inside of IJZZ will increase both air and noise pollution.	Yes	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Prab Ragan				S469 - Blackhorse Lane SLS	No	No	No	The Blackhorse Lane SLS is directly adjacent to Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). This is not mentioned in the development guidelines. There is a track record of recognition in such sites. For example Egging Forest, a Special Area of Conservation (SAC), is protected from development.	As above there need to be consistency in green spaces across the borough. The developments should seek to protect natural habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. This should be considered to ensure the green spaces sustainably absorb the impacts of the development. I propose that S469 Blackhorse Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Diego Fernandez Fernandez				S469 - Blackhorse Lane SLS	No Response	No	No Response	It is unsound because it does not protect the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Despite this, there is absolutely no mention of any of this in the development.	To be sound the development should be reframed. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then this cannot carry on as initially planned. I propose that S469 Blackhorse Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	No		The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Tim Wethers				S469 - Blackhorse Lane SLS	No	No	No	The council does not seem to take into account the vibrant businesses that have recently founded themselves within the industrial area. This seems like a timely valued goal to turn Blackhorse Lane into a residential neighbourhood without providing adequate other uses to support the current residents. Personally I do not think the council has an idea on how to grow the area sustainably.	The businesses that exist along with potential new startups, needs to be adequately considered.	Yes	This should not take place behind closed doors. People have lived in this area longer than the council has sat in their post.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The brief of growth proposed in the site allocation responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The site allocation requires that replacement commercial floor space is re-provided, ensuring that the site still provides economic opportunities.

				S469 - Blackhorse Lane SLS3	Yes	No		The Walthamstow Wetlands is a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA) but there is no mention of this in the Development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces in the west part of the borough. Hence, the plan is unsound.	The development should be re framed by taking into consideration the vital importance of preserving green space consistently across the borough. The development would irreversibly damage the fish fauna habitat: the S469 Blackhorse Road should be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.			The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
				S469 - Blackhorse Lane SLS3	Yes	No	Yes	The Blackhorse Lane St about the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of cars and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.			The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
				S469 - Blackhorse Lane SLS3	No	Response	Response		The area is now a huge condensed new-build residential site. There aren't enough services and amenities for people who live there as it is [1 small supermarket within 1 mile]. I really don't think more housing is the answer. We need to re-purpose any industrial buildings to service the existing residents in the area.			The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Hannah Wadsworth				S469 - Backhorse Lane S14	Yes	No	Yes	The Backhorse Lane S14 abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Backhorse Road be protected as the SSSI and RAMSAR site that it is and be removed from further development threats.	No		
Abigail Woodman				S470 - Argill Avenue S14	Yes	No	Yes	welcome Waltham Forest Councils commitment to protecting Metropolitan Open Land (MOL) in the borough. Open green spaces are essential for physical and mental health and wellbeing, and it's very heartening to see that there are no proposals for developments on MOL. However, that numerous tall developments in Leyton and Lea Bridge, including this development, will affect the openness of MOL, a characteristic of MOL that must be protected. Furthermore, the habitats of the marshes: "Walthamstow Marsh (as SSSI), Leyton Marsh and Hackney Marshes" must be protected from the damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If Epping Forest SAC is deemed worthy of protection from development in this site allocations document, so should our equally important green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by intensification. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.	No	The local plan is focused on people and development and it is essential that the needs of the environment and wildlife are fully represented. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
Wivienne Perry				S470 - Argill Avenue S14	Yes	No	No	I don't think its a good idea. We need this land as flood plain and its really short sites to build on this given the flood risk year		Yes		Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1; Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. This response is noted.
Guy Gibbs				S470 - Argill Avenue S14	No Response	No Response	No	Current waste management facility regularly creates strong, unpleasant smell which affects surrounding streets. Unless any further development of site addresses, and prevents, this it should not be implemented as will detrimentally affect local residents.	Supportive of initiative to "reconnect ancient routes, such as the Black Path, and create better links to nearby landmarks such as Coppermill Pump House and other industrial/archaeological features of the Lea Valley as well as the Pump House Museum". Current access to nearby wetlands from low fill area is inadequate and dangerous.	No		The site is identified as a priority area for new waste management facilities within the adopted North London Waste Plan. This is consistent with the London Plan approach to the siting of waste facilities within designated industrial estates, where their impact can be best mitigated. The Council supports measures to mitigate the impact of such facilities through appropriate design measures.

Charles Craig				S471 - Rigg Approach SLS	Yes	No	No	Enhanced Industrial Floorpace Capacity is not what is required, what is required is more homes on under utilised Industrial Areas.	See above			This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal way which would not be able to secure the adequate levels of infrastructure needed. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Waltham Forest has an identified need to provide additional industrial floorpace over the Local Plan period. As such, development within existing designated industrial sites is required to re-provide the same quantum of industrial floorpace, and the intensification of industrial provision is encouraged.
Abigail Woodman				S471 - Rigg Approach SLS	Yes	No	Yes	I welcome Waltham Forest Council's commitment to protecting Metropolitan Open Land (MOL) in the borough. Open green spaces are essential for physical and mental health and wellbeing, and it's very heartening to see that there are no proposals for developments on MOL. It must be said, however, that numerous tall developments in Leyton and Lea Bridge, including this development, will affect the openness of MOL, a characteristic of MOL that must be protected. Furthermore, the habitats of the marshes "Walthamstow Marsh (ss 556), Leyton Marsh and Hackney Marshes" must be protected from the damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If Egging Forest SAC is deemed worth of protection from development in this site allocations document, so should our equally important green spaces flanking the west of the borough. To do otherwise is inconsiderate and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, any developments should seek to protect habitats from damage caused by intensification. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.	Yes	The local plan is focused on people and development and it is essential that the needs of the environment and wildlife are fully represented.	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements. The Local Plan requires the protection of MOL in the Borough, unless very special circumstances can be justified. The impact of development on sites near to MOL will be assessed as part of this process.
				S471 - Rigg Approach SLS	No	No	No	The council is favouring their own sites over others and deciding to limit other development with prejudice	The council is favouring their own sites over others and deciding to limit other development with prejudice			The sites included in LP2 have been through a comprehensive selection process which has factored in national and regional policy and assessments as well as "Call for Sites" exercises which were undertaken during the plan preparation period, which invited landowners/developers to put forward sites. These have strongly informed the council's decisions when deciding scope and location of development in the borough. We feel the sites chosen ultimately will help us to meet our strategic objectives and build more housing in the borough.

Hanne Gil				SA72 - Lammam Road SUG	Yes	No	Yes	Encroachment on supposedly protected green space will damage wildlife habitat and wildlife itself. Loss of green space will be detrimental to mental health of residents in surrounding areas.	No further development	Yes	-	<p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.</p>
Islan Cheyia				SA72 - Lammam Road SUG	No Response	No	No Response	<p>The site allocation suggests there is need for a new walking route to Hackney Marshes.</p> <p>Explore the opportunity of a new walking route linking to the Hackney Marshes to the South</p> <p>It is unclear what this means. There is already a good connection with Hackney Marshes via Friends Bridge so there is no reason to believe this is needed.</p> <p>This suggestion may mean another bridge across the River Lea which would be harmful to the SINC on the Hackney side of the Old River Lea. This would not be desirable and would be harmful to the Old River Lea environment.</p> <p>Another possibility is it would mean a link south to New Spitafields. This would destroy an at present inaccessible area which acts as a wildlife haven. It also presupposes the desirability of the New Spitafields development, which is strongly resisted. So again this would be harmful and undesirable.</p> <p>The site allocation refers to the Waterworks Nature Reserve</p> <p>"Respond to the sensitive context of the green amenity of the WaterWorks Centre and Nature Reserve"</p> <p>However, it also needs to refer to the important Waterworks Meadow or Field. This Meadow is suitable for rewilding and for ecological improvement. It is an important open space for local people to enjoy. Consideration needs to be given to upgrading some or all of this site as a Site of Special Scientific Interest (SSSI) and to protect it from inappropriate use. This site is often harmed by music or other events designed to earn money rather than operate as a real destination for recreational activities.</p>	The context of the site allocation needs to include important local features, notably the Waterworks Meadow and the Old River Lea and the need to protect these sites from inappropriate development or usage. It should highlight the ecological significance of these sites. The Waterworks Centre should not be an accommodation centre but should be used as originally intended as an educational and recreational centre. It has been accepted as an Asset of Community Value. Green open spaces is vital for people's health and wellbeing and deserves protection. The industrial site must not harm the neighbouring open spaces. This plan should address and reduce inequalities in the Borough and ensure that those experiencing deprivation and overcrowding development should be spread around the Borough and not concentrated in one sector. Much needed open spaces in deprived areas should be strongly protected and extended to help improve the health and well-being of residents in these areas. The future development of the industrial areas should aim to enhance and extend the neighbouring open spaces.	No	I am a member of Fore Lea Marshes and am concerned by the future of open spaces in this part of London	<p>The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.</p> <p>Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p>

Mike Chimes				S474 - Deacon Way Trading Estate (Cabinet Way)	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules that are not transparent to consultees.</p> <p>Consultation on the site allocation (LPI) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPI) for 2020-2026. This has coloured the views of many respondents in the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point scoring, while officers have been subject to abuse making ordinary meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get into online.</p> <p>In general however it has been apparent both from LPI and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1800 homes per year. While WFP has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More brownfield sites should have been chosen for housing to be built.</p>	It is suggested that until master plans are developed, through consultation, for the main centres identified in LPI consultation on individual sites is pursued. This site should be considered as part of a group comprising SA 46, 47, 48, 49, 50 and 51, possibly extended further to the east along the north circular, with full consideration of the implications for these developments on active transport infrastructure, improvements to east west public transport beyond, and within the Borough, and opportunities and needs for soft infrastructure e.g. health and education facilities, the creative sector, as well as the impact of the (temporary) loss of retail and employment for the local population	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a robust and credible evidence base involving: <ul style="list-style-type: none"> • Reasonable (not best) findings, the choices made in the plan are based on facts. • Evidence of participation of the local community and other housing stakeholders in the area, and the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals will ensure that the social, environmental, economic and other objectives of sustainability will be achieved. </p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: <ul style="list-style-type: none"> • Sound infrastructure delivery planning. • Absence of regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Consistency with the strategies of neighbouring authorities, including neighbouring marine planning authorities. </p> <p>• The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. However it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs, in "general conformity" with the London Plan. The Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p> <p>The Local Plan should be found to be sound through the examination process and the Local Plan Document has been adopted.</p>
Lloyd Parkinson				S474 - Deacon Way Trading Estate (Cabinet Way)	No	No	No	<p>Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will displace other people. The Plan intends to build more homes than required by the London Plan. Existing residents will be over-taxed, loss of privacy, change/upgrade, additional demand for parking. Consultation flawed as no feedback/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life etc.</p>	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Yes	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,064 new homes (1,206 per year) based on a London-wide assessment of capacity/available sites by 2027/28. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Jayne				S474 - Deacon Way Trading Estate (Cabinet Way)	No Response	No Response	No Response	Improving pedestrian access to this site is sensible		Yes		Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. Subject: Albert Crescent Pedestrianisation

Dear Sirs

I am unable to write my comments on the draft framework link online as it will not open, hence my email to you.

I feel Cherrydown Avenue should not be blocked off as it will adversely affect access for emergency vehicles, residents who live in those roads (plus Marmion Ave, Hurst Ave, Middleton Ave, etc, etc), making the existing traffic congestion, pollution and fuel consumption even worse, going against the Borough's aim to make the Borough more green.

It is also very worrying that the website is not working and people cannot comment and those residents not online, have no chance of knowing what is planned as they have not be notified.

Kind regards

Karen McGill

Subject: Re: LBWF Regeneration

Dear Cllr Miller,

Thank you for your email.

I am writing to advise that as at 5.25pm this evening and as previously mentioned there are NO PLANNING BOARDS on display in 228 Chingford Mount Road and there are NO HARD COPY LEAFLETS in there regarding the Chingford development. When will these be available and when will the Planning Boards be on display? The only leaflets available in the back room are the dusty old Chingford Treasure Trail Leaflets. These are of no use to residents concerning the development!

You have not answered my question in my earlier email 'Can you please advise the cost of these leaflets compared to the cost of the whole Consultation?' I believe it is a small price to pay to advise residents, many of whom are not online and have no idea whatsoever about the proposed developments. Why are residents not being advised on the developments, many of whom have gardens directly adjacent to the proposed sites? How can they comment?

In addition, please delay the deadline for the Site Allocation Consultation as at the moment we cannot have a public meeting which myself and approximately 600 members of our Facebook Group want to take place. Why was there no public meeting in the summer when there were no restrictions?

For your information, this email will be going on our Facebook Group and may be shared by members to other groups.

Kind regards

Karen McGill

Dear Sir / Madam,

Representations to the Council's Proposed Submission Local Plan (LP2) - Site Allocations Document Former Webbs Industrial Estate (Site SA34)

Thank you for providing us with the opportunity to engage with the consultation on the Council's Proposed Submission Plan (LP2) - Site Allocations Document. I write on behalf of our clients, Catalyst Housing and Swan Housing Association, who have an interest in the above site and who have secured planning permission from the Council for its comprehensive redevelopment.

Below I set out a brief summary of the context of the site and the approved scheme before turning to specific comments on the consultation document.

Context

In July 2016 the site was purchased by the Greater London Authority with the intention of finding a development partner to redevelop the site to provide a significant quantum of new homes. Catalyst and Swan were selected as the preferred bidder in August 2017. In October 2018 Catalyst and Swan submitted a detailed planning application to the Council for the following development at the site:

"Demolition of existing buildings and structures, and comprehensive redevelopment to provide a series of buildings ranging in height from 1 to 15 storeys to provide 359 new affordable homes in a mix of one, two and three bedroom units (Use Class C3) 2,569sqm of non-residential floor space comprising of 720sqm of flexible floor space (Use Class A1 and/or A2 and/or A3 and/or A4 and /or B1 and /or D1 and/or D2), 532sqm of flexible floor space (Use Class B1 and/or D1) and 1,313sqm of floor space (Use Class B1), car parking, cycle parking, landscaping, highways and utilities works." (LPA Ref. 183424).

Planning permission was granted by the Council in March 2021. A number of pre-commencement planning conditions attached to the current planning permission have already been discharged by the Council with the remainder of the pre-commencement conditions subject to live planning applications. Development is anticipated to start on site in 2022.

Comments on the Proposed Submission document

Our clients strongly support the allocation of the site in principle, however, they have some comments on specific parts of the allocation. These are discussed in more detail below.

Proposed Site Allocation

We note that the 'Proposed Site Allocation' now states:

Offices and associates throughout the Americas, Europe, Asia Pacific, Africa and the Middle East.

Savills (UK) Limited. Chartered Surveyors. Regulated by RICS.

A subsidiary of Savills plc. Registered in England No. 2605138. Registered office: 33 Margaret Street, London, W1G 0JD

"Comprehensive redevelopment to provide industrial led employment space and new homes". (author emphasis).

The inclusion of 'industrial led' is completely at odds with the current planning permission at the site that was granted by the Council. The B1 floorspace was envisaged to comprise of a mix of office (B1a) and light industrial (B1c) uses depending on the location of the floorspace within the site and at what storey the floorspace is within the approved buildings. It would be incorrect to describe this as purely 'industrial'. This should be described as 'employment-led'. The 'Proposed Site Allocation' text should therefore be reworded to read:

"Comprehensive redevelopment to provide ~~industrial-led~~ employment-led non-residential floorspace and new homes."

Indicative Development Capacity

Given the above comments, the 'Industrial floorspace (sqm)' under the 'Indicative Development Capacity' should be amended to the following: 'Non-residential floorspace (sqm)'.

Site Requirements

The second bullet point of the Site Requirements on page 116 of the consultation document states that:

"Make provision for 2,560sqm of non-residential floorspace comprising 720sqm of flexible floor space; 532sqm of flexible floor space and 1313sqm of employment floor space, car parking, cycle parking, landscaping, highways and utilities works."

This appears to have just been copy and pasted from the current planning permission at the site (minus the stated use classes). Notwithstanding the fact that the current wording is unclear, this is considered too specific for a site allocation. The second bullet point should be amended to the following:

"Deliver around 2,560sqm of non-residential floorspace including a large proportion of employment floorspace."

The suggested wording still reflects the quantum of non-residential floorspace approved as part of the existing planning permission at the site and would still ensure that the floorspace is employment-led (a key policy requirement), but it would also allow a degree of flexibility within the wider 'non-residential' banner for the site to respond to future changes in the market. This is considered a far more effective and appropriate approach for the site allocation.

Placemaking Plan

The Placemaking Plan on page 117 of the consultation document does not fully accord with the approved scheme at the site. The approved scheme includes servicing from both Sutherland Road and Blackhorse Lane, however, the Placemaking Plan only shows this from Sutherland Road. Furthermore, the approved scheme includes a new publically accessible east-west green link through the site between Blackhorse

Lane and Sutherland road. Whilst the Placemaking Plan shows 'enhanced pedestrian & cycle connectivity' east-west through the site only part of this is 'greened'. The whole route should be 'greened' but using a narrower shading to reflect the extent of the actual green link approved on site. These elements should be updated on the Placemaking Plan on the next iteration.

Future Participation

I trust that the above is of assistance in the preparation of the new Local Plan. I would be grateful for confirmation of receipt of these representations and would welcome the opportunity to engage with further versions of the new Local Plan in the future. If you have any queries or would like to discuss, please don't hesitate to get in contact with me.

Yours faithfully

Oliver Milne

Queries regarding Chingford Mount sites, received via regeneration inbox

From: Mary Cutajar [REDACTED]
Sent: 09 January 2022 11:25
To: regeneration <regeneration@walthamforest.gov.uk>
Subject:

Just wondering where the extra schools, medical centres, and parking provision will be situated to support this proposed program? Also there are other areas in Chingford, such as the old Poundland store, which has been an eyesore since a fire over 4 years ago which could be utilized, plus other sites on which building works appear to have come to a halt, both in Old Church Road and Chingford Mount Road. Has the additional increase in traffic been considered? Hall Lane is already subject to traffic overload. Are we to suffer more as a result of this proposal? It seems obvious that officials supporting this do not live in the area. From Mary Cutajar [REDACTED]

Subject: Chingford Mount development

Good Evening

I am sending this email as I am opposed to the online consultation it is too complicated for me, as a 74 year old doing anything online is not my first choice. I do use the internet, but this online consultation is not user friendly, is this the reason you have used this form of communication to exclude anyone who does not use technology?

I am totally opposed to this scheme in its current form.

The consultation ask is it legally compliant? **No**

Is it sound? **No**

Does it comply with the duty to co-operate? **No**

Proposed developments within the area, they cannot be delivered with policy compliant levels of affordable housing, there is no parking provisions, this will disadvantage older and the disabled residents of the borough. The plan seeks to build more homes than required by the London plan.

Existing residents would be overlooked, loss of privacy and lose normal daylight sunlight.

Additional demand for parking.

The consultation was flawed as there was no public meeting to advise residents, only Zoom meetings which were not publicised.

Vast amounts of residents do not have zoom facilities.

These developments do not purpose improved infrastructure to cope with increased numbers of residents/ population. No additional hospital spaces, dentists, doctors, schools (students already don't get their first choice and many have to travel to get to the school they have been given), public transport links. Trying to get a doctors appointment before covid was unacceptable if this proposal happens it will be impossible to see anyone.

I need a blood test, I have to wait 14 days for that appointment, there is no walk-in facilities anymore, totally unacceptable.

Homes should only be built to complement the existing buildings (Waltham Forest should have learnt from previous high-rise buildings now demolished Chingford Hall Estate Priory Court etc).

It has been proved that high rise buildings have an adverse effect on the surrounding area. The development in Ferry Lane is high rise and an eyesore, it has totally changed the look of the place. I see some of these flats are on the market for in excess of £400,000 hardly affordable for the local residents.

Up to 90 homes on each of the Sainsbury's and Iceland sites.

Is there any facilities planned for these stores to remain in the mount? I can't see them, if so where are residents meant to shop. By taking away these stores you will destroy the retail area there. Where do we park, I use the Sainsbury's car park, it is well used which shows there is a need for it. I use both these stores on a regular basis, again very well used.

I also understand Morrisons is part of plan, where do I and all the other residents of Chingford shop if these stores/shops are not replaced.

Your vision of more walking and cycling is something I strongly support but unfortunately to put these measures in at the expense of the needs of the elderly, disabled, parents with small children and the convenience of all the public, cannot be justified, should they not run alongside not instead off.

If Albert Crescent is pedestrianised, how do the emergency vehicles enter the road to help the residents who live of the Crescent? as far as I can see they would have to go via Hall Lane to the Stewardson Road. It is too ridiculous for words and another negative effect on the environment, moving traffic from one road to another.

Plans for the Leisure Centre in New Road, what is happening to the Leisure Centre that is currently there, where is that going?

Coupled with the Station Road plans you are turning a lovely suburban borough our into a Concrete Jungle that's worse than any London inner borough.

If this goes through you will ruin thousands of peoples lives for a few hundred new homes, totally inappropriate.

Regards

Brian Gallacher

To: regeneration <regeneration@walthamforest.gov.uk>

CC: localplanconsultations <localplanconsultations@walthamforest.gov.uk>

Subject: Chingford Mount development

I moved to Chingford to be able to raise my children in a safe and clean environment. There was plenty of green and open spaces that didn't require getting in the car. We could also walk to the high street which had a few independent shops plus supermarket. The residents were also welcoming and friendly.

Imagine my horror to now find that you want to build high rises which is not in keeping with the area and also increase the population by such a vast amount. I am not opposed to development but now when it destroys the aesthetics of the area rather than enhance it.

Currently, the traffic on New Road alone during the school run is gridlock when you are trying to accommodate parked cars, buses and parents trying to get their kids to school. There is insufficient infrastructure e.g doctors, dentist, and schools in the surrounding area to support this yet you think it makes sense due to your tunnel vision in stating that Chingford should take its fair share. You also wish to destroy green spaces and then appease us by planting a couple of trees to keep us happy, you clearly think we are stupid.

Blocking off roads then moves the traffic to what was a quiet residential street causing further pollution which is what I moved away from. Also damaging the wellbeing of residents especially the older generation. I have already noticed an increase of cars parked along Larkshall road in the evenings and also the number of people with mental health issues walking the streets and crime is also becoming a further problem. Increasing the population to such and extent is going to exacerbate this 10 fold.

Improving the area for walkers and cycling is great, updating the shops, preferably with more boutiques rather than pound and food shops we have too many of those already so a variety would enhance it.

All I can say is that you are looking for Utopia Town, in short turning our village into a town without amenities, you don't want people to drive, who are you to dictate how people travel, they may not have a choice, you do however have a choice on how this moves forward. What you want does not exist in the real world.

I don't know whether you have breached standards/compliance as the ordinary person cannot understand the documents which is what you are hoping for. All I know is it does not make sense.

Thank you.

Chingford Mount over-development

From: [REDACTED]

Sent on: Monday, January 10, 2022 12:35:58 PM

To: localplanconsultations <localplanconsultations@walthamforest.gov.uk>

Subject: Chingford Mount over-development

Dear Sirs

I have just received a letter describing the planned housing developments at Chingford Mount where I live at a walking distance from the shops. I am horrified by the plan of getting rid of the only supermarkets like Sainsbury and Iceland which provide easy shopping especially for us elderly. Also all the new planned homes without parking facilities will be horrendous for us locals. I live in Brook Crescent E4 and my street is already parked solidly, especially vans and lorries are a nuisance. Whatever will happen with 280 new homes. Also, Chingford Mount will be looking like a council estate. Please re-consider saving this neighbourhood.
Aila Bloom (82).

Chingford Mount redevelopment

From: [REDACTED]

Sent on: Sunday, December 19, 2021 9:37:55 AM

To: localplanconsultations <localplanconsultations@walthamforest.gov.uk>

Subject: Chingford Mount redevelopment

We want shops like Sainsbury and Iceland to stay in Chingford. The Hub is doing a great job for the aged in Waltham Forest, where are you going to put them and the other shops etc that you are getting rid of. You will make The Mount not a viable place to go as there will be nothing left to go there for only high rise housing which spoils the ethos of the area. There are already empty shops because people are not coming to the area. These developments won't help, just destroy the area more.
The medical practices in the area are overwhelmed with patients at the present time so putting more pressure on them with all this proposed housing will not be good.
You should put back the toilets, that would make more sense.
WE DO NOT WANT HIGH RISE OR MORE HOUSING IN CHINGFORD, leave us alone and do your damage in other parts of the borough.

Chingford Mount regeneration

From: [REDACTED]
Sent: 20 December 2021 13:43
To: regeneration <regeneration@walthamforest.gov.uk>
Subject: Chingford Mount regeneration

Hello

After reading your proposals for regenerating the Chingford Mount area around Albert Crescent, I agree with a lot of the comments in the paper, but what I do not agree with, although it is not stated in the paper, is high rise flats that will mask the views over our area.

It was pleasing to see that our Sainsbury's Supermarket will continue because this is a lifeline for many local elderly and disabled people who cannot get to the larger stores, Sainsburys is a friendly and necessary facility where shoppers often meet and chat with people they know while doing their shopping.

I also agree strongly with greening up the area with trees and plants. The extension of bus routes is also favourable especially as we have no tube or rail in our vicinity (by the way on page 31 it says bus 58, there is no bus 58 at Chingford Mount). Bus drivers will need a stopping place though to rest.

It is also pleasing to see the new streetlamps in our area, but some of the darker places need a street lamp especially the garage area at the back of Chase Gardens (although this may not be within your remit here).

We need our community facilities as South Chingford Community Library and Hub has been closed since covid lockdown, this is urgently required and hopefully will stop anti social behaviour especially in darker places as mentioned above. I have lived in Chingford Mount 25 years and have seen how the area has declined.

Please keep me informed of any progress on the regeneration of Chingford Mount.

Thank you.

Mrs. Carole Rogers

Sainsbury's Hall Lane

From: [REDACTED]
Sent: 18 December 2021 14:25
To: regeneration <regeneration@walthamforest.gov.uk>
Subject: Sainsbury's Hall Lane

Dear Sir Madam I have lived my life in this property for 86 years I don't get much pleasure now except sitting in the back garden weather permitting, I don't relish sitting there for the next few years overlooking a building site or high rise buildings which are out of caricature with the rest of borough. You demolished tower blocs on chingford hall estate several years ago saying they were not fit for people to live in people want houses with gardens not blocks of flats.

Yours faithfully

R Stoddart.

Comments for the Consultation.

The plan is seeking to build more homes than required by the London Plan.

To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause "harm" (in planning terms) to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight, and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.

Subject: LBWF Regeneration

Dear Cllr Miller,

I understand from correspondence that there are LBWF leaflets about the redevelopment in Chingford, but you are unable to provide them to residents due to the cost. Can you please advise the cost of these leaflets compared to the cost of the whole Consultation?

You stated in the last couple of days that there are leaflets in 228 Chingford Mount Road but there are none there. The old plans/boards that were in the window for about 5 days are now the back room of the shop!

Obviously time is of the essence as comments to the Consultation need to be received by 14th January.

Regarding the 4th December council officer event at 228 Chingford Mount Road/Albert Crescent, there were only two officers present and no leaflets were handed out, contrary to your email. The shop (228) was a pop up shop selling clothes and the officers just stood outside. The only leaflets handed out were about the Chingford treasure trail, nothing about the redevelopment.

What steps have been taken to advise residents where English is not their first language? The boards in 228 Chingford Mount Road were only in English with nothing to help non-English speakers.

Zoom meetings are not sufficient as most people are not au fait with Zoom.

We are extremely concerned that most residents have no access to the information and therefore cannot respond in time.

You also say we cannot have a public meeting due to covid concerns but you've had all year to do so when it was safer, especially in the summer.

By residents not responding I presume you will believe that they are happy with the plans but I can assure you that many people want the chance to have their say but have no idea how to.

The websites are not user friendly with questions in 'planner-speak' asking questions like "are these plans legally compliant and sound". Most people have no idea what means. It appears that it has been made as difficult as possible for residents to respond.

Can you either provide leaflets as soon as possible or delay the deadline? We just want ALL residents to have their say, whether good or bad.

Many thanks.

Kind regards,

Karen McGill

Hall Lane car park

From: [REDACTED]

Sent on: Saturday, January 8, 2022 1:05:58 PM

To: localplanconsultations <localplanconsultations@walthamforest.gov.uk>

Subject: Hall Lane car park

Re-Development of 90 homes in a 5 storey development of flats without parking facilities in hall lane.

This parking facility is the only one in the Chingford Mount area. Has the council considered the need of the elderly, disabled and people with mobility issues. Not every resident in the area is capable of cycling! Or walking a distance! The hall lane car park, especially the disabled bays is always in constant use. Lots of residents prefer shopping in a smaller compact supermarket rather than the superstores which are often too big to navigate.

Closing this car park would be detrimental to many residents and traders in the Chingford area people need to shop in the post office, pharmacy, dry cleaners etc. Without the use of the car park people will be forced to park in the neighbouring streets which are already full to capacity.

I strongly urge you to reconsider the folly of going ahead with this project.

LP1 Strategic Policies and LP2 Site Allocations

From: [REDACTED]

Sent on: Friday, January 7, 2022 6:32:25 PM

To: localplanconsultations <localplanconsultations@walthamforest.gov.uk>

Subject: LP1 Strategic Policies and LP2 Site Allocations

To whom it may concern, I am writing to raise further questions and to voice my concerns regarding the Council's planning proposals.

I do not feel that the consultation process is being handled correctly (or even legally) with very little access to information for residents not online and I also feel that documents LP1 and LP2 should have been issued together as the issues raised in both documents need to be considered together.

I note that LP1 stated that all new developments would be car free. No parking does not mean no cars and many of the residents would need to find alternative places to park. No parking is discriminating against the old and infirm who need cars to get around (being unable to cycle or walk long distances) and they need parking for their carers to park on often twice daily visits so that they can live at home. Plus you have workmen who may live in these new homes – where do they park their vans? In addition, surely the Council should insist that all new developments include allocated parking for each household with an electric car charging point in order to encourage residents to switch to electric cars and improve air quality in the area. I also note that while the Council seems to be anti-cars, it asked volunteers with cars to come forward in the pandemic to help residents keep hospital appointments, get prescriptions, shopping, etc

Transport provision is overlooked by LP2. Where will the transport hub at Albert Crescent be relocated to? Has TFL been consulted on providing public transport for an increased population? In fact there are no details on

how or if any infrastructure improvements will be delivered. An increasing population will require improvements to the infrastructure – more detail needs to be provided on this.

Why would the Council think it acceptable to remove the Sainsbury's supermarket and car park at Hall Lane and the Morrisons supermarket and car park and reduce the capacity of the Sainsbury's at Low Hall? Where are current residents to shop even without the proposed new residents? It just doesn't seem to be well thought through!

Why does the Council wish to house another 27,000 people in this Borough? It is not acceptable that future development should change the suburban feel of the Chingford and Highams Park areas. There is no justification for any building to exceed the height of those immediately surrounding them. It is important to retain the character of the area.

Subject: RE: Waltham Forest: New event available

Good Morning Team,

Thank you for consulting us on the Site Allocations proposed submissions document for the Waltham Forest Local Plan.

Would it be possible to provide the GIS layer of the site allocation outlines/boundaries? This will help us and our consultees in assessing the constraints associated with each individual site.

Best Regards,

Tom Craig

Site Allocation Consultation - Chingford Mount E4

From: [REDACTED]
Sent on: Friday, December 31, 2021 6:57:43 PM
To: regeneration <regeneration@walthamforest.gov.uk>;
localplanconsultations <localplanconsultations@walthamforest.gov.uk>
Subject: Site Allocation Consultation - Chingford Mount E4

I feel that the Site Allocation Consultation is not legally compliant, not sound and does not comply with the duty to co-operate.

My comments are as follows:

Sainsbury's Hall Lane, Albert Corner, Former South Chingford Library Sites

The plan is seeking to build more homes than required by the London Plan.

To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause 'harm' to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.

Without parking these proposed developments will disadvantage older people.

My father's home, which I also part-own, is in Albert Avenue which backs on to Sainsbury's in Hall Lane. Building five plus storeys of flats would completely destroy my father's way of life. He spends a lot of his time in the garden enjoying the peace and quiet and can actually see the sky. With a high rise block of flats in the way, his mental health would suffer greatly. He is so worried about the loss of privacy and light and his way of life would be changed forever. Throughout the various Covid lockdowns, my father's only safe place has been his garden and who knows how Covid will change people's behaviour in the future.

The Sainsbury's in Hall Lane has been a lifeline especially over the last couple of years for local residents, many of whom are elderly. Should this close down whilst redevelopment takes place, there will be no-where for them to shop.

These proposed developments cannot be delivered with policy compliant levels of affordable housing.

Blocking off Cherrydown Avenue from Albert Crescent making it pedestrianised will cause gridlock to an already extremely busy crossroad junction. Residents in Cherrydown Avenue, Marmion Avenue and Hurst Avenue will have to drive the long way round causing more congestion, pollution and using more petrol.

The Consultation is flawed as non online residents have not had a chance to comment as they received no leaflets through the door advising of the plans. There has also been no public meeting. Zoom meetings were too short and not everyone could comment as there was not enough time to ask questions and there was not enough capacity for those who wanted to register.

In this area there is a shortage of doctors, hospitals, dentists, schools, and with over 200 extra homes, this would only make matters worse for existing residents.

In the past we realised the massive mistakes of putting people in little boxes in Chingford Hall Estate and many other soul-destroying, high rise flats and in the case of Chingford Hall Estate, this was knocked down and low rise houses built instead. It is widely known that these homes are not good for mental health. Why would the Council want to repeat their mistakes?

If new homes are required, why not look at the empty half-built eyesore of a building at the Morrisons junction. Another site which is empty and awaiting redevelopment, is in Old Church Road where the old shoe shop was, which was called Dollybirds.

Any homes should not be built any higher than existing buildings to keep the character of the area. If high-rise developments go ahead in Chingford Mount, it will totally destroy the village feel of the existing area.

Please consider the above points when making your decision.

Kind regards,

Karen McGill

Dear Sir/Madam,

On behalf of the owner, Sewardstone Holdings Limited, we support proposed allocation SA55 (60-74 Sewardstone Road). However, it would be prudent to state in the supporting text there is an opportunity to create a focal point on the junction of Sewardstone Road and Kings Head Hill. This

could take the form of a building with height subject to the normal development control criteria (up to 8 - 9 storeys). Such a building would compliment the proposed allocation on the other side of Sewardstone Road (Motorpoint SA53).

Regards

Mark Pender

Subject: Site SA46 Sainsbury's Car Park and Adjacent Sites

To whom it may concern, I am writing to raise my concerns regarding Site Allocations LP2.

As a frequent user of the Sainsbury's supermarket on this site I am concerned regarding the reduced parking capacity that will no doubt result if 430 new homes are built on this site. It is already difficult to park on this site at peak times. Are you proposing that we drive further afield to larger outlets for our shopping needs as this would not be environmentally friendly. Traffic coming on and off this site is already congested.

I understand that the 430 new homes would have little or no parking. No parking does not mean no cars and many of the residents would need to find alternative places to park. No parking is discriminating against the old and infirm who need cars to get around (being unable to cycle or walk long distances) and they need parking for their carers to park on often twice daily visits so that they can live at home. Plus, you have workmen who may live in these new homes – where do they park their vans?

On a more general note:

- The circa 19,000 homes (as mentioned on page (i) of your document) is in line with Government guidance, so why is the council proposing 27,000 additional new homes (page 1 of your document)?
- More detail is needed on how the Council intends to improve infrastructure to meet the demands of the new residents, including schools, GP surgeries, dentists, new roads, more buses, etc
- We need our new hospital up and running before we build more new homes. The area has already seen extensive building of residential properties and Whipps Cross Hospital is unable to provide existing residents with a service fit for purpose.
- Our police force is already over stretched, how will the new residents impact on this.
- Has Thames Water been consulted on ensuring water pressure and supply can be maintained even during periods of lower than average rainfall without drawing on our rivers?

I have to say that I write this with a heavy heart as I do not believe that the Council cares about the opinions of its existing residents, which is painfully apparent based on the Consultation process which excludes a large proportion of the community who don't have access to the internet and who are completely unaware of the proposal.

Subject: Site SA48 Morrisons Supermarket and Car Park

To whom it may concern, I am writing to raise my concerns regarding Site Allocations LP2.

As a frequent user of the Morrison's supermarket on this site I am concerned regarding the reduced size of the supermarket and the reduced parking capacity that will no doubt result if 270 new homes are built on this site. Are you proposing that we drive further afield to larger outlets for our shopping needs as this would not be environmentally friendly. Traffic coming on and off of this site is already congested.

I understand that the 270 new homes would have little or no parking. No parking does not mean no cars and many of the residents would need to find alternative places to park. To whom it may concern, I am writing to raise my concerns regarding Site Allocations LP2.

I note that your objectives include “ensuring unique character of the borough is protected and enhanced” and “responds to the local character”. In my mind this would preclude the building of flats higher than 3 floors on this site. However, I see that you have “included the potential for taller buildings” on this site, which clearly does not meet your previous objectives. Traffic in the area is already congested due to the level crossing or are you proposing to shut that?

I understand that the 145 new homes would have little or no parking. No parking does not mean no cars and many of the residents would need to find alternative places to park. No parking is discriminating against the old and infirm who need cars to get around (being unable to cycle or walk long distances) and they need parking for their carers to park on often twice daily visits so that they can live at home. Plus you have workmen who may live in these new homes – where do they park their vans?

Subject: Site SA61 - Larkwood Leisure Centre

To whom it may concern, I am writing to raise my concerns regarding Site Allocations LP2.

I am a frequent user of the Nuffield Health Centre. How would this be impacted? It is a Government priority to improve the Nation's fitness in an attempt to relieve some of the pressure on the NHS. How would reducing local access the health centres meet this objective? I had understood that as a result of the pandemic increasing housing in already over populated areas was to be reconsidered and that we all need more access to open green spaces and health facilities.

I understand that the 280 new homes would have little or no parking. No parking does not mean no cars and many of the residents would need to find alternative places to park. No parking is discriminating against the old and infirm who need cars to get around (being unable to cycle or walk long distances) and they need parking for their carers to park on often twice daily visits so that they can live at home. SOUTH CHINGFORD

From: [REDACTED]
Sent on: Saturday, December 18, 2021 4:39:09 PM
To: localplanconsultations <localplanconsultations@walthamforest.gov.uk>;
regeneration <regeneration@walthamforest.gov.uk>
Subject: SOUTH CHINGFORD

Hi

I am writing to oppose ALL proposals for development in South Chingford that include high rise buildings.

(But in particular, Sainsburys in Hall Lane E4 8HH.)

The plans are seeking to build more homes than required by the London Plan.

To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause harm to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.

Schools, Gp surgeries etc are already full to bursting, we can't support any more people in this area until more facilities are added.

If possible, please take this email as THREE objections, as my parents don't have internet so can't email you.

Thank you,
Lisa Valen

Chingford mount development

From: [REDACTED]

To: localplanconsultations <localplanconsultations@walthamforest.gov.uk>
Subject:

Plans for redevelopment at the Mount look dreadful. How are buses going to turn around – do a 3-point turn? Or is TFL going to extend all the routes to Chingford Station? What about now the old library building the CREST building, this is a local asset well used by the elderly before COVID and there are no other buildings locally that could accommodate this service. Why should a cemetery be more a part of the area. It is not a park it is a place to be with the dead. Dogs are already a problem and should be banned again as I have seen owners let them off the lead so they can wander through the graves and go to the toilet.

Why does the local plan site not send me an email as it says it will? Tried 10 times now.

Planning
Policy Team
LBWF

26th December 2021

Dear Sirs,

I am completely against all the large developments planned in Chingford. The council is seeking to build more than the London plan requires, and the government is proposing less development in the south east and more in the north.

Tall buildings should only be built if they are not having a bad impact on the surrounding area. Any tall buildings in Chingford would be detrimental to all areas in the town.

I am also really worried about

how all the new residents will affect our services, schools GPs & hospitals.

It would be interesting to know how many homeless people there were in LBWf 5 years ago and how many there are now. LBWf has built hundreds of flats in Walthamstow, but are any of them allocated to people desperate for accommodation?

Yours sincerely

Geraldine McFarlane
